There was no serious epidemic during the year.

We were fortunate in having no confirmed case of Poliomyelitis. During the year a scheme was inaugurated for the vaccination of children in a selected age group and it is hoped that supplies of vaccine will be sufficient to make it possible for a high percentage of the children to receive protection.

Once again it is pleasing to report the absence of Diphtheria and it is now over eleven years since a case was notified.

Diphtheria Immunisation

Details supplied by the Local Health Authority show that during the year 1957, 170 children under five years of age were immunised against diphtheria and 90 children aged four to fifteen years were given a "booster dose".

SANITARY CIRCUMSTANCES OF THE AREA

WATER SUPPLY

Number of Samples taken for Analysis

(a)	from piped supply	8
(b)	from wells	Nil

Four samples of water for bacteriological examination and four samples for chemical analysis from the piped supply after treatment were all satisfactory. The reports obtained show that the water supply was satisfactory as regards quality, and the quantity available was much better than in previous years. It was only necessary to 'turn off' at night for a very limited period on the high pressure system only, and no restrictions were necessary on other supplies.

SEWAGE DISPOSAL

The sewage disposal works and pumping facilities are in need of drastic reconstruction. It is hoped that the proposed new scheme will be commenced at the earliest opportunity.

CLOSET ACCOMMODATION

Total number in District at end of 1957

(a)	Pail Closets	8
(b)	Water Closets	5,020

PUBLIC CLEANSING

The Cleansing Department is under the control of the Engineer and Surveyor.

House refuse and trade refuse is collected by direct labour for disposal at the destructor works and at the controlled tip. Owing to labour difficulties it has not been possible to give a weekly collection of house refuse, the average for the year being approximately 12 days, but this was greatly improved towards the end of the year.

SANITARY INSPECTION OF THE AREA

The particulars given under this heading are for all purposes including particulars given elsewhere in this Report :-

Total Number of Complaints received	180
Total Number of Premises at which Defects or Nuisances were dealt with	279

FIELD OFFICERS

The District Officer is under the control of the Engineer and Surveyor.

There is no sewerage and water supply in the district for disposal of the domestic refuse and the controlled tip. Owing to the fact that the district is not yet provided with a sewerage system, the average for the year being approximately 12 tons, but this was greatly reduced towards the end of the year.
