Public Health Department. Council Offices. MIDHURST.

October, 1960.

TO: The Chairman and Members of the Midhurst Rural District Council.

Mr. Chairman, Ladies and Gentlemen.

I have the honour to present to you the Annual Report on the health of the Midhurst Rural District and the work of the Public Health Department during the Year 1959.

The principal vital statistics for the year, together with comparative figures for 1958 are :-

	<u>Midhur</u> 1959	<u>st R.D.</u> <u>1958</u>	England a 1959	und Wales. 1958
Estimated Home Population	17,010	16,940	45,386,000	45,109,000
Crude Birth Rate per 1,000 Population	14.63	12.80	16.5	16.4
Crude Death Rate per 1,000 Population	14.81	15.40	11.6	11.7

157 Houses (79 Private, 78 Council) were completed during 1959, making a total of 1,259 houses completed since 1945. In In addition, a further 20 houses were in course of erection at Tillington and a contract had been placed for the construction of 8 dwellings at Lurgashall.

I would like to express my thanks to the Chairman and Members of the Council for their support, and to Mr. T.G. Henry and all members of the Staff for their work during the year.

3

I am, Mr. Chairman, Ladies and Gentlemen.

Your obedient Servant,

guglegan. Medical Officer of Health.

Section I.

STATISTICS AND SOCIAL CONDITIONS.

The District is an agricultural and residential one occupying the North-Western corner of West Sussex. The Counties of Hampshire and Surrey lie to the West and North respectively, Chichester Rural District to the South, and Petworth to the East.

Apart from agriculture, there are other minor industries providing employment, and holiday traffic brings a considerable amount of trade to hotels and cafes. A caravan site has been established near Midhurst itself.

Annual Reports become yearly less and less concerned with infectious diseases and more and more with larger questions of social care and physical wellbeing in the community. Like most sweeping statements this is only partly true. Certainly the Medical Officer of Health is not now preoccupied with outbreaks of enteric fever, smallpox, diphtheria and scarlatina; notifications of measles and whooping cough as inconveniences of childhood do still provide him with figures to juggle with and speculate upon if indeed he believes that the notification figures bear any real relation to the true incidence of these diseases, but Infectious Diseases in the old sense no longer occupy the Medical Officer's time as once they did.

There are, however, two diseases against which active campaigning is still necessary - Tuberculosis and Food Poisoning. Great advances have been made against tuberculosis in the last twenty years - deaths in England and Wales have been reduced from 30,231 in 1938 to 4,480 in 1958, and notifications from 50,689 to 29,838 in the same period. These figures show the great increase in effectiveness of treatment and the still high notification figures show that while the disease remains widespread, relatively fewer cases remain undiagnosed, probably thanks to a more co-operative public and readily available Mass Xray facilities. Only when notification figures show a progressive decrease will the end of tuberculosis be really in sight.

Food poisoning is another story. Many improvements have been made in standards of food handling and a number of essentials which for years local authorities have been persuading traders to accept now have legal force under the Food Hygiene Regulations (washing facilities for staff, cold storage for vulnerable foods, impervious and easily cleanable working surfaces and the exclusion of known disease carriers among staff are some important examples). The public no longer accepts as inevitable the very poor conditions under which food used normally to be exposed for sale. Refrigerated display cabinets are now the rule

4

Statistics and Social Conditions (Contd.)

rather than the exception even in small shops.

Nevertheless the drop in the number of cases of food poisoning which might have been expected to result from these advances has been disappointing taking the country as a whole.

Housewives and caterers cannot be reminded too often that meat, particularly meat in "processed and made up" recipes is the vehicle of infection in more than three quarters of outbreaks where the cause can be found. Cooling and refrigeration of cooked meat which is to be used again is the first defence against infection, and the second, and equally important, rule is - wash your hands before handling food and after using the lavatory.

There was no notable incidence of disease during the year; details are given in Section VI of the report.

	tal Deat			Death		And the owner water of the owner water of the owner	RICTS	AND WALES
adjus	tment fo	-			per 1,000 Death Rate per			Death Rate
Vear	Total		ex	the second day of the	The second s	No. of Concession, Name of Street, or other	ulation	and the second states of the s
1041	Tootar	M	F	Crude	Corre	Rural	Urban	population
1958	261	137	124	15.40	9.24	13.09	14.22	11.7
1959	252	151	101	14.81	8.73	13.66	14.55	11.6

When dealing with a small population such as that of this District, a certain random fluctuation from year to year in birth and death rates is to be expected. This is illustrated by the figures for the last ten years shown on Page 10.

Of the total deaths recorded during 1959, 205 or 81% occurred in persons aged 65 years or over; 150 or 59% in persons aged 75 years or over, and 58 or 23% in persons aged 85 years or over.

The chief causes of death in order of frequency were :-

	<u>1959</u>	1958
(i) Diseases of heart & circulatory system	102(40%)	96(37%)
(ii) Vascular lesions of nervous system	54(21%)	57(22%)
(iii) Neoplasms (growths)	38(15%)	35(13%)
(iv) Respiratory Diseases (excluding	-	
Pulmonary Tuberculosis)	32(12%)	29(11%)

These four causes accounted for 226 or 89% of the total deaths.

A table at the end of this Section shows the age, sex distribution and causes of death in 1959.

During the year deaths exceeded births by 3, and the Registrar-General's estimate of population at mid 1959 showed an increase of 70 over the 1958 estimate.

Section II.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

Hospitals.

The hospitals providing accommodation and treatment for residents of the District are administered by the South-West Metropolitan Regional Hospital Board, and are as follows :-

> Chichester Isolation Hospital. St. Richard's Hospital, Chichester Royal West Sussex Hospital, Chichester Midhurst Cottage Hospital Petworth Cottage Hospital Haslemere Hospital Petersfield Hospital Horsham General Hospital Worthing Hospital Southlands Hospital, Shoreham-by-Sea Sussex Maternity & Women's Hospital, Brighton Zachary Merton Maternity Home, Rustington Aldingbourne Chest Hospital.

Laboratory Service.

Examinations carried out for this Authority by the Public Health Laboratory, Portsmouth, during 1959, were as follows :-

Nature of Specimen	Number Examined.			
(a) Ice Cream		24		
(b) Milk (Pathological)		122		
(c) Milk (Biological)		20		
(d) Water		187		
TOTAL		353		

Ambulances.

The Local Health Authorities (the West Sussex County Council and the Surrey County Council) provide an ambulance service with ambulances operating from Midhurst, Petworth and Haslemere.

The same Authorities are also responsible for the Hospital Car Service.

Home Nursing and Midwifery.

General District Nurses, Midwives, Health Visitors and School Nurses, are employed by the West Sussex County Council to serve in the Rural District.

- 11 -

General Provision of Health Services (Contd.)

Treatment Centres and Clinics.

Ante-Natal Clinics	-	held at Petworth.
Infant Welfare Centres	17.0	held at Camelsdale, Midhurst and Petworth.
Infant Weighing Centres		held at Fernhurst, Graffham, Harting, Heyshott, Northchapel, Rogate and Stedham.
School Clinic (Minor		
Ailments)) Orthopaedic Clinic)	-	held at Chichester.
Speech Therapy Clinic	-	held at Chichester and Midhurst.
Eye Clinic	-	held at Chichester.
Chest Clinic	A.L.	held at Aldingbourne Chest Hospital.
Venereal Diseases Clinics		held at St. Mary's Hospital, Portsmouth; The Royal Surrey County Hospital, Guildford; and St. Richard's Hospital,

Chichester.

Nursing Homes.

Six Nursing Homes in the District are registered by the West Sussex County Council under Section 187 of the Public Health Act, 1936, providing a total accommodation for 142 patients, mostly for aged chronic cases.

National Assistance Act, 1948.

Sections 47 and 50.

No action was necessary during the year.

General District Murass, Midwives, Health Visitors and School Murses, are employed by the West Sussex County Council to serve in the Rural District.

Section III.

SANITARY CIRCUMSTANCES OF THE AREA

Water Supply.

The Midhurst Rural District Council and the Wey Valley Water Company provide mains water to all Parishes in the District, 4,631 properties having a supply within the dwellings with very few exceptions.

Private Estate water is also piped to 974 houses.

Details of the supplies in each of the Parishes as at 31st December, 1959, are given in the table at the end of this Section.

MIDHURST RURAL DISTRICT COUNCIL WATER UNDERTAKINGS.

Rotherfield Bore Supply, Easebourne - to the Parishes of Bepton, Cocking, Easebourne, Heyshott, Midhurst, Stedham, West Lavington and Woolbeding.

The number of houses supplied from this source is 1.302.

<u>Slade Lane Bore Supply, Rogate</u> - to the Parishes of Chithurst, Elsted, Harting, Iping, Linch, Rogate, Stedham, Treyford, Trotton and Woolbeding.

During the year it was decided, subject to contributions being received from the different owners, to extend this supply from Iping Lane to Queens Corner and Titty Hill, and at the time of writing this report the work was in hand.

A total of 1,114 houses are supplied by this scheme.

Lodsworth Bore Supply, Lodsworth - to the Parishes of Easebourne, East Lavington, Graffham, Lodsworth, Lurgashall, North Ambersham, South Ambersham and Tillington.

Due to further complaints from inhabitants at Cocking of insufficient water pressure, the Ministry's approval was given to the Council for a main extension to be carried out from Graffham to Bex Mill, Heyshott, so as to afford a sufficient water supply in this Parish.

This source of supply also provides water to properties in the Northchapel area of the Petworth Rural District.

This source supplies 618 houses.

Spring Supply, Henley - to the Parishes of Easebourne and Fernhurst.

Spring Supply, Henley (Contd.)

Thirty-three houses are supplied by this Scheme.

Consequent upon continued adverse bacteriological reports on the raw state of this water, it was decided to do away with this supply and make arrangements for the area at present served to be supplied from the Midhurst Rotherfield source, the water to be electrically pumped from Knightsfield to the present Henley reservoir.

WEY VALLEY WATER COMPANY.

Water is supplied to the Parishes of Fernhurst, Harting, Iping, Linchmere, Lurgashall, North Ambersham, Rogate and Trotton.

The total number of houses supplied is 1,524.

Water Analyses.

A total of 187 samples of water were taken and submitted for examination and the following table gives details of the results obtained :-

madhate staned dagh	No.of	Examination							
Source	Samples	Bacteri	ological	Chemical					
	Taken	S	U	S	U

Supplies	10	6	4	di-ow	bod				
TOTALS	187	135	50	2	il tro				

Note: S = Satisfactory U = Unsatisfactory

Drainage and Sewerage.

Fernhurst Village Drainage Scheme.

This disposal works was enlarged during the year in order to cope with the considerable development of the Fernhurst Village area.

Tillington Sewerage Scheme.

This scheme was completed during the year and work was well in hand with draining the different houses to the new sewers provided. Drainage and Sewerage (Contd.)

Habin and Nyewood Drainage Scheme.

This scheme was put in hand during the year, and at the time of writing this report the scheme was nearing completion.

State of Household Sanitation in the District :

Public Cleansing.

Refuse Collection.

The refuse collection service provided by the Council is as follows :-

<u>ONCE WEEKLY</u> : Midhurst; Easebourne (Lutener Road, Easebourne Street - Post Office to School only, and Dodsley); West Lavington (Chichester Road -South Pond to Station only).

<u>FORTNIGHTLY</u>: Bepton; Chithurst; Cocking; Easebourne (except Lutener Road, Easebourne Street - Post Office to School, and Dodsley); East Lavington; Elsted; Fernhurst; Graffham; Harting; Heyshott; Iping; Linch; Linchmere; Lodsworth; Lurgashall; North Ambersham; Rogate; South Ambersham; Stedham; Tillington; Treyford; Trotton; West Lavington (except Chichester Road - South Pond to Station); Woolbeding,

All refuse is deposited on the tip at Holmbush.

Following complaints of insufficiency of refuse collection the Council acquired a new vehicle during the year, and as a result, all districts formerly having a monthly collection are now receiving a fortnightly collection. In addition, Dodsley, in the Parish of Easebourne, was afforded a weekly collection instead of a fortnightly one.

Woolbeding

North Amboreham

Cesspool Emptying Service.

This work has been carried out under contract by the Cleansing Service (Southern Counties) Limited, but during the year the Council acquired their own cesspool emptier so that this work is now carried out by the Council's vehicle.

Shops Act, 1950.

Forty-six visits were made to shops and offices.

Factories Act, 1937.

There are 67 establishments situated in the district coming within the scope of the Factories Act, 1937, of which 45 are provided with mechanical power.

During the year 49 inspections of factory premises were made.

Factories Act, 1937 (Contd.)

Arising out of these inspections, the following defects were found and remedied :-

Nature of Defect.Number Found
and Remedied.Want of Cleanliness...2Unsuitable or defective
sanitary conveniences...1

Swimming Baths and Pools.

There are no public swimming baths or pools in the area.

16

Camping Sites.

The following licences were granted during 1959 under Section 269 of the Public Health Act, 1936 :-

- (a) Licences to erect, station and use movable dwellings
- (b) Licences authorising the use of land as a site for movable dwellings ... 2

Eradication of Bed Bugs.

No action was necessary in this respect.

Prevention of Damage by Pests Act, 1949.

During the year, 1,701 infestations were dealt with and some 4,635 rats were destroyed.

Rag Flock and Other Filling Materials Act, 1951.

There are no premises in the district at which rag flock is used or sold.

Pet Animals Act, 1951.

One licence was granted under this Act.

Schools.

There are 13 schools in the district of which 12 have waterborne sanitation. At the time of writing this report a start was about to be made to provide waterborne sanitation to the remaining school.

Twenty visits were made to school premises.

Section IV.

HOUSING.

At the close of 1959, the Council's list of housing applicants showed 306 outstanding cases as compared with 290 in 1958.

New houses completed during the year totalled 157 (79 private, 78 Council).

Housing Act, 1957.

Action was taken under Section 16 of this Act which resulted in one Undertaking being accepted, and 2 Closing Orders and 19 Demolition Orders being made.

Five houses were demolished during the year.

Housing Act, 1949 - Improvement Grants.

Applications were received for the improvement of 59 dwellings. Of these, 50 were approved, 5 were under consideration, and 4 were refused.

The number of houses reconditioned during 1959 with the aid of grant was 43. Since the Act came into force the number of houses completed is 269.

House Purchase and Housing Act, 1959.

This Act came into force on the 14th June, 1959, and there are now what are called the "Standard" Grant Scheme and the old "Discretionary" Grant Scheme. Under the "Standard" Grant Scheme it is compulsory for the Council to give grants not exceeding one-half of the cost and up to a maximum of £155 for the provision of bath, water closet, wash-hand basin, hot and cold water system and larder, the maximum to be reduced by £25 if there is a bath in existence, by £40 if there is a water closet, by £5 if there is a wash-hand basin, by £75 if there is a hot and cold water system, and by £10 if there is a larder, subject to the dwelling in question not being unfit after the above amenities have been provided.

Under the "Discretionary" Grant Scheme grant can be obtained up to one-half of the cost of carrying out the improvements subject to a maximum of £400, the dwelling on completion of the works being brought up to a definite standard laid down, As its name implies, the giving of grant under this scheme is entirely at the discretion of the

21

House Purchase and Housing Act, 1959 (contd.)

Council, but in the case of a refusal, under the new Act, the Council must give its reasons.

During the year, applications were received for Standard Grant in respect of 7 dwellings. Improvements have been carried out with the aid of this grant at 2 dwellings.

Rent Act, 1957.

Two applications for Certificates of Disrepair were received during the year. An Undertaking was given by the landlord in one case to carry out the necessary repairs within six months, and one Certificate of Disrepair was served.

Houses Erected by Private Enterprise.

The 79 houses built privately during 1959 are situated in the following Parishes :-

Requisitioned Premises.

The following statement gives details of the action taken during 1959 in connection with requisitioned premises :-

INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.

Number of :	
Inspections of dairies and milk premises Producer Distributors with farms in the	133
District	8
Retail Dairies (not producing milk) in the	
District	3
Milk Distributors with Dairies outside the	
District	9
Dealer's Licences granted authorising the use of the Special Designations :	
(a) Tuberculin Tested Milk 14	
(b) Pasteurised Milk 13	

During the year pasteurisation and bottling of milk by the Midhurst Farm Dairies was given up, the whole of the milk formerly supplied by this Dairy now being obtained already bottled from a firm at Chichester.

4

(c) Sterilised Milk ...

Ninety-three samples of milk taken from distributors during the year were submitted for examination for cleanliness by the Methylene Blue Test, and of these, 80 were reported upon as satisfactory.

Twenty-nine samples of Pasteurised Milk were taken and submitted to the Phosphatase Test, and 28 of these were satisfactory.

Twenty samples of milk taken from farms whose milk is retailed in the district were submitted for biological examination and reported free from Tubercle Bacilli.

Meat and Other Foods.

Most of the meat consumed in the district is slaughtered elsewhere, supplies being delivered mainly from Chichester. Petersfield, Haslemere and London.

There is one licensed slaughterhouse at West Street, M'dhurst, and animals killed thereat are as follows :-

	Calves	Sheep	Pigs
Number killed and inspected	1	3	5
No carcases were condemned in	whole or	in part.	

25 -

Meat and Other Foods (Contd.)

The following is a summary of butchers' shops, etc. in the district, together with details of inspections of these premises carried out during the year :-

Number of :

Butchers' Shops

Premises registered under the Food and Drugs Act. 1955, for the preparation and manufacture of sausages or potted, pressed, pickled or preserved food intended for sale for human consumption

Visits made to the above premises 304 Premises registered for the sale of Ice Cream 60

Visits to Ice Cream premises

There are no manufacturers of Ice Cream in the district.

9

69

Twenty-four samples of Ice Cream were taken from dealers and submitted for examination for cleanliness by the Methylene Blue Test. Of these, 23 were in Grade I, and 1 in Grade II.

Bakehouses.

There are five bakehouses in use in the district and during the year. 16 inspections were made.

Other Food Premises.

Details of other food premises in the district, together with inspections made during the year, are set out herewith :-

Cafes, Restaurants, Private Hotels and		Amon'L
Guest Houses	0.003	21
Visits to such premises	57	
Grocers and General Stores		46
Fishmongers and Poultry Shops		3 3
Greengrocery Shops	10.01	6
Sweet Shops		5
Visits to such premises	132	

26

Food Hygiene Regulations, 1955.

All food premises in the district are inspected from time to time and every opportunity is taken to impress on all concerned the need for cleanliness of persons, premises and utensils.

Sixteen informal notices were served during the year and thirteen of these were complied with.

Seven slaughtermen are licensed under the provisions of this Act.

staff and 56 people responded. As there was no outbreakisf Influenza lecally fluring the winter, however, no considuated could be drawn as to the effectiveness of thismparticulateriques vaceine.

There were no causes of Poliomyelitia during the year, While it is too soon to make any soulident elais that polionyelitis vaccination has been an important factor in this freedom. The figures for England and Wales are at least encouraging. The public seem still a little relustant to bffer themselves and their children for protection perhaps because they are confused by the alternative vaccines available.

Vaccination against polionyelitis is now available to anyone under 40 years of age. Consent forms are available anyone the Health Department.

Deaths attributed to Cancer during the year numbered 38 (25 males, 13 females) - Mideathaida 1958. The Cancer Death Rate is 2.35 per 1.000 of the estimated home population; 2.06 in 1958. Corresponding rates for England and Warns, the erg

Section VI.

PREVALENCE AND CONTROL OF DISEASES.

During 1959, there were notified 122 cases of Measles, 11 of Pneumonia, and 4 of Pulmonary Tuberculosis.

During the year the Council approved the suggestion that all manual workers and officers on "outside" duties should be given the opportunity of protection against Tetanus infection at the Council's expense.

Although the incidence of Tetanus ("lockjaw") is low, it is a very distressing condition with a high mortality. Moreover, the injection of Anti Tetanus Serum into an individual, after he has suffered a wound which might be infected, is followed not infrequently by unpleasant reactions especially if he has been sensitised by a previous similar injection.

There are however available, preparations of Tetanus Toxoid which can be used deliberately to give a greatly enhanced immunity to Tetanus infection in advance. If a wound is sustained after this protection, a further "boosting" injection of Tetanus Toxoid is given instead of Anti Tetanus Serum without the risk of reactions associated with the latter.

Twenty members of the staff have accepted this offer.

Injections of Influenza vaccine were also offered to the staff and 56 people responded. As there was no outbreak of Influenza locally during the winter, however, no conclusion could be drawn as to the effectiveness of this particular vaccine.

There were no cases of Poliomyelitis during the year. While it is too soon to make any confident claim that poliomyelitis vaccination has been an important factor in this freedom, the figures for England and Wales are at least encouraging. The public seem still a little reluctant to offer themselves and their children for protection perhaps because they are confused by the alternative vaccines available.

Vaccination against poliomyelitis is now available to anyone under 40 years of age. Consent forms are available on request at the Health Department.

Cancer.

Deaths attributed to Cancer during the year numbered 38 (25 males, 13 females) - 35 deaths in 1958. The Cancer Death Rate is 2.33 per 1,000 of the estimated home population - 2.06 in 1958. Corresponding rates for England and Wales, the Cancer (Contd.)

Administrative County and the Urban and Rural Districts are 2.14, 2.62, 2.67, and 2.55 respectively.

The following is an analysis of the age and sex distribution of all persons whose deaths were certified to be due to Cancer during 1959 :-

Diphtheria.

(a) <u>Notifications</u>. No cases of Diphtheria were notified during 1959, nor were any deaths registered as due to this cause.

29

Diphtheria (Contd.)

(b) <u>Immunisation</u>. During 1959, 13 children of school age and 189 children under 5 years of age received a complete course of injections. In addition, 61 children received 'follow-up' injections.

Measles.

Notifications of Measles received during 1959 totalled 122 (42 in 1958).

78 Cases occurred during the first quarter of the year.

Pneumonia.

Eleven cases of Pneumonia were notified (2 in 1958).

Notifications of this disease bear little relationship to its incidence however. There were also twelve deaths registered as due to Pneumonia.

Tuberculosis.

Eight cases were added to the register (4 primary notifications and 4 cases moving into the district as transfers from other areas). All were pulmonary cases. In 1958, 12 pulmonary cases were added to the register.

Three cases were removed from the register and three deaths were recorded as due to Pulmonary Tuberculosis.

The death rate from Pulmonary Tuberculosis for the year is 0.17 per 1,000 of the home population (0.17 in 1958). The death rate for the Administrative County is 0.06.
