,, ,, ,, ,, Legitimate	78
,, ,, ,, ,, Illegitimate	66
Premature Births	10
Violent Deaths and Suicides	10
Total.....	20
Rate of above, per 1,000 of population.....	.46
Number of persons per house (Census, 1911)	4.31
Number of persons per acre (Census, 1911)	11.4
Excess of Births over Deaths.....	283

NELSON, APRIL, 1921.

To the Chairman and Members of the Health Committee.

GENTLEMEN,

I have pleasure in submitting my Report on the Health and Sanitary Conditions of the Borough for the year 1920, and may say that in its compilation attention has been paid to the Memorandum of the Ministry of Health regarding the arrangement and sequence of the various particulars submitted.

NATURAL AND SOCIAL CONDITIONS OF THE DISTRICT.

Population, Census 1911	39,479
„ Estimated 1920	43,095

PHYSICAL FEATURES AND GENERAL CHARACTER OF THE DISTRICT.

Area of Borough	3,466 acres.
Contour	Hilly.
Ordinance level, lowest point	350 feet.
„ „ highest point	1,100 feet.
„ „ Centre of Town	458 feet.
Drainage of Surface Water...	Natural, chiefly to Walverden Stream and Pendle Water.
Subsoil...Clay, with under stratum of sandstone and out croppings of coal.	
Rainfall	Rather Heavy.

RAINFALL DURING THE YEAR 1920.

Month.	Ogden No. 1	Coldwell			Victoria Park
		No. 1	No. 2	No. 3	
January	4.64	3.83	5.095	2.80	5.81
February	5.40	2.97	3.72	2.80	4.63
March	3.88	3.945	4.645	2.75	4.08
April	4.12	5.17	5.83	5.00	4.76
May	4.53	5.155	6.34	4.65	6.43
June.....	2.90	2.85	3.05	2.55	1.85
July	8.12	6.155	6.78	5.45	6.56
August	3.06	1.62	1.875	1.59	2.16
September	2.68	2.36	2.7	1.92	2.31
October	1.91	3.14	3.57	2.55	1.74
November	2.94	2.1	2.7	1.87	3.08
December	3.25	2.835	3.635	2.29	3.42
	47.43	42.13	49.94	36.22	46.83

RAINFALL FOR FIVE PREVIOUS YEARS.

	Ogden Inches.	Coldwell Inches.
1915	37.45	41.41
1916	42.18	49.34
1917	37.24	45.88
1918	62.14	80.04
1919	40.21	40.26
Average	43.84	51.38

SOCIAL CONDITIONS.

In normal times the population may be classified as well-to-do artizan, with a less than average of the very poor. The chief occupation is in the Textile trade, mostly Cotton Weaving, with the necessary associated trades.

VITAL STATISTICS.

BIRTHS.

Total Number of Registered Births	693
" " " " Males	361
" " " " Females	332
Legitimate Births, Males	343
" " Females	320

Birth and Death Rates of Nelson for the last Ten years. (per 1000 of population).

Year	Birth Rate	Total Death Rate	Zymotic Death Rate	Infantile Death Rate per 1000 Births
1911	18.3	10.1	1.22	77
1912	16.9	11.8	1.05	93
1913	17.3	11.5	0.73	91
1914	16.9	11.4	1.10	122
1915	15.2	10.9	0.67	92
1916	14.1	11.7	0.80	112
1917	10.8	12.2	0.57	106
1918	9.5	14.2	0.60	113
1919	9.0	11.6	0.28	69
1920	16.0	9.5	0.30	77
Average for 10 years.	14.4	11.5	0.73	95

INFANTILE MORTALITY.

Total Number of Deaths under 1 year of age	56
Number of Deaths of infants non-resident	2
Nett Deaths	54
Infantile Mortality Rate per 1,000 births	78
Increase on last year per 1,000 births	9
Average for the last ten years per 1,000 births	95

A chart is appended showing the Infantile Death Rate in the various Wards during the past five years.

The causes of death of Infants during the last ten years are shown in the following table.

Year	In- fectious Diseases	Diarr- hoeal Diseases	Premature Births, Congenital Defects and Injury at Birth	Wasting Diseases	Chest Diseases	Other Causes	Total
1911	1	19	11	7	10	8	56
1912	10	4	19	4	14	12	63
1913	2	11	22	10	12	8	65
1914	13	6	33	3	13	18	86
1915	1	2	31	1	11	11	57
1916	5	4	25	5	15	13	67
1917	1	2	19	3	9	13	47
1918	1	3	13	5	13	8	43
1919	1	4	8	2	9	3	27
1920	2	4	21	8	11	8	54

The following table gives a comparison between Nelson and other East Lancashire towns, as regards Birth Rate and the various Death Rates for 1920.

Name of District	Estimated Population	Birth Rate	Death Rate	Epidemic Death Rate	Phthisis Death Rate	Infantile Mortality per 1000 Births
Nelson	43,095	16.0	9.5	0.3	0.62	77
Ramsbottom ..	15,283	17.9	12.1	0.52	0.85	94
Bacup	21,053	22.6	14.1	0.14	0.57	79
Colne	26,876	19.4	11.2	0.5	0.7	91
Heywood	27,226	22.6	15.2	0.55	0.95	115
Rawtenstall ..	28,470	20.8	13.3	0.56	0.49	89
Chorley	32,853	24.1	12.2	1.12	0.66	124
Darwen	39,182	21.5	13.0	0.22	0.58	93
Accrington ...	45,398	19.1	13.3	0.48	0.61	96
Burnley	105,030	23.9	14.1	0.65	0.72	129

A table is included at the end of the Report giving details of the deaths of infants under 1 year, and of the ages at which death occurred, from which you will notice that 21 deaths, or approximately

INFANTILE DEATH RATE IN WARDS—1916 to 1920.

40 per cent., occurred in the first week of life, and 30, or 55 per cent., in the first month. I would also draw your attention to the fact that out of the 21 deaths in the first week, 8 were under 1 day old and 7 over 1 day but under 2 days, this giving 15 deaths which had probably occurred before even the notification of the birth had been received.

POOR LAW RELIEF.

In normal trade conditions the amount of Poor Law Relief distributed bears favourable comparison to any of the surrounding districts.

HOSPITAL ACCOMMODATION.

The needs of the district are supplied by the combined Cottage Hospital and Orthopædic Hospital at Reedyford and by the accommodation still available at the Victoria Hospital, Burnley. The Poor Law Infirmary at Burnley is also available for necessitous cases.

SANITARY CIRCUMSTANCES OF THE DISTRICT.

WATER SUPPLY.

This is derived from two gathering grounds, one four miles distant on the east side of the town, known as Coldwell Reservoir, and one four miles distant on the west side of the town, known as Ogden Reservoirs.

Coldwell Reservoir.—Capacity, 80,000,000 gallons; filtration, 4 Bell's patent vertical pressure filters; nature of water, good, moderately hard.

Ogden Reservoirs.—Capacity, No. 1, 54,500,000 gallons; No. 3, 160,000,000 gallons; filtration, 12 Vertical Pressure filters; nature of water, good, soft.

Total storage capacity of reservoirs, including yield of streams, 170 days' supply.

Approximate daily consumption, 1,850,000 gallons.

Consumption per head of population in area supplied, 28½ gallons.

Curtailment of supply during 1920—Nil.

RIVERS AND STREAMS.

The provisions of the Rivers Pollution Acts are administered by the Ribble Joint Committee.

DRAINAGE AND SEWERAGE.

The whole of the drainage of the district is carried out on the water carriage system, and all the sewage, with the exception of that from the small low-lying district of Lomeshaye, is delivered at the Sewage Works situated at Linedred by means of a high level gravitating sewer. The sewage from the Lomeshaye district is carried by a low level sewer, and is lifted into the high level sewer by means of automatic ejectors, situated at the works. The treatment is biological, consisting in the use of detritus tanks in duplicate fitted with mechanical screening and dredging apparatus, septic tanks, percolating filters, sedimentation tanks and strainers. The sludge from the septic tanks is pressed with lime, and that from the sedimentation tanks is air dried, and both are disposed of to farmers.

Dry weather flow	1,250,000 gallons per day.
Detritus tanks, capacity of each	29,000 gallons.
Septic tanks, total capacity.....	1,288,215 gallons.
Storm tanks, total capacity	375,000 gallons.
Percolating beds, total capacity	22,080 gallons.
Sedimentation tanks, total capacity ...	1,095,166 gallons.
Strainers, total capacity	175,000 gallons.

CLOSET ACCOMMODATION.

No. of Privy Middens (in town)	Nil.
No. of Pail Closets	4
No. of Waste Water Closets	8386
No. of Fresh Water Closets	2291
No. of Waste Water Closets converted to Fresh Water Closets	5

SCAVENGING.

The whole of the scavenging and cleansing of the town is carried out by the Corporation staff, the ashpit and trade refuse being dealt with at the Destructor Works, and the street and gully refuse being taken direct to the tip, situate at Reedyford.

No. of Dry Ashpits (in the town), excluding middens	7,310
No. of Portable Receptacles for refuse	2,553

Mr. Nutter, the Cleansing Superintendent, has kindly supplied me with the following particulars of the work carried out under this heading during the year.

Weight of refuse destroyed	8,271 tons.
No. of loads of ashpit refuse destroyed	6,726
No. of loads of light refuse destroyed	1,629
No. of loads of market refuse destroyed	174
No. of tubs of garbage destroyed	5,745
No. of miles of streets swept	1,722
No. of gullies cleansed	33,841
No. of loads of gully refuse collected	1,455
No. of loads of water distributed on streets	242
No. of loads of grit distributed on streets	125
No. of loads of street sweepings collected	1,948
No. of loads of snow collected	55

SANITARY INSPECTION OF DISTRICT.

A summary of the work carried out under this heading is as follows :—

No. of complaints of nuisances received and investigated	73
„ premises in general, inspected	1461
„ „ „ re-inspected	109

No. of inspections during year	520
General Condition of premises	Poor

STATEMENT OF SLAUGHTER-HOUSES.

	In 1914.	In January 1920.	In December 1920.
Registered	2	2	1
Licensed	12	12	12

Although the question of Public Abbatoirs has received consideration during the year, we are still no nearer the provision of one of the most important needs of the Borough.

SMOKE OBSERVATIONS.

Number of Smoke Observations taken during the year	22
Number of chimneys concerned	18
Time limit per hour	10 minutes.
No. of times limit has been exceeded	4
„ chimneys concerned	3
Legal proceedings	Nil.

SCHOOLS.

The sanitary condition of the Schools in the Borough is on the whole good, and all are supplied with Town's water. It has only been necessary to close one school during the year, an outbreak of German Measles and Scarlet Fever necessitating the closure of the St. John's Infant School just prior to the Christmas Holidays.

FOOD.

MILK SUPPLY.

The milk supply of the town is derived from farms in the immediate locality. The farms situated within the Borough are visited by the Veterinary Inspector, and all the cattle are inspected. I append his report for 1920, which reads as follows:—

41, Carr Road,

16th March, 1921.

Report of Veterinary Inspector on the Farm Buildings and Cattle kept in the Borough of Nelson in the year 1921.

I have been round and inspected all the cowsheds within the Borough and find the cattle therein in good health, but not as fleshy as usual, no doubt due to the bad hay harvest.

A few of the farms are changing tenancy, and some have few cattle.

All told the number of cattle is 650, of which 532 are in milk, and 21 of the latter have got one deficient teat each. However, not one deficient teat is giving milk, or inflamed, or suspicious of tubercle.

The premises are mostly well drained and ventilated, and cattle in the majority of cases clean.

Some of the shippens, owing to bad construction, make it impossible to keep cows clean.

There has been no epidemic among either horses, cattle, sheep or pigs, for which we may thank the heavy rainfall.

The number of cattle that might be suspected of having tuberculosis, in my opinion, still continues to decrease.

(Signed) JOHN BARKER, M.R.C.V.S.

It is intended during the present year to make a series of examinations of the milk supply of the Borough, with a view to determining the presence or otherwise of the tubercle bacilli in the milk, the necessary tests to be carried out at the new Public Health Laboratory.

MILK (MOTHERS AND CHILDREN) ORDER, 1919.

The following is a summary of the action that has been taken during the past 12 months.

Number in receipt of Free Milk at 1st January, 1920	47

MEAT AND OTHER FOODS.

As there are 13 private slaughter houses in the Borough, it is obvious that no complete examination of meat at the time of slaughter can take place. The slaughter houses are visited frequently, and so far as possible, supervision is carried out. No seizure of

unsound meat has taken place during the year, but the following articles of food have been submitted for inspection and condemned as being unfit for human consumption.

3 carcasses of cows (tubercular)
 1 carcase of bullock (tubercular)
 1 carcase of boar
 1 carcase of sheep
 86 lbs. chilled liver
 1 boiled ham
 6 chickens
 474 rabbits
 116½ lbs. salmon
 107 lbs. cod
 495 lbs. hake
 42 lbs. gurnard
 56 lbs. Scotch finnon
 28 lbs. Finnon haddock
 600 eggs

TINNED GOODS.

2 tins tongue
 1 tin corned beef
 3 tins mutton
 2 tins beef
 6 tins rabbit
 3 tins lobster
 1 tin salmon
 1 tin pilchards
 7 tins milk
 73 tins Nestle's milk
 3 tins peaches
 2 tins apricots
 2 tins apples
 1 tin pears
 1 tin pineapple

FOOD AND DRUGS ACT.

No. of samples submitted for analysis (milk)	23
Other articles	None
„ samples found genuine	22
„ samples found deficient	1

In the sample found deficient, the analysis revealed a deficiency in milk fat of 13 per cent. of the limit of 3 per cent. fixed by the sale of milk regulations. A sample of milk had, however, been taken the same morning from this vendor at Barrowford by the Police

Authorities, and this was also found deficient. As the farm premises were not situate in Nelson, it was decided to leave it to the Police Authorities to follow up the case, as a result of which the vendors were fined £5 including costs.

INFECTIOUS DISEASES.

Total number of Infectious Diseases notified during year ...	275
Total number of Infectious Diseases notified in 1919	446
(Measles and German Measles were taken off the list of notifiable diseases on the 1st January, 1920).	
Average number of notifications for the last 10 years	457

Dr. MacPhee, the County Council Tuberculosis Officer for No. 9 Area, in which Nelson is situated, has kindly supplied me with the following particulars of the work done by him at the Tuberculosis Dispensary:—

The County Council's Tuberculosis Dispensary is situated at 64, Carr Road, Nelson. It is therefore conveniently placed for the Borough and is open for Insured and Non-Insured persons alike.

The County Dispensary Tuberculosis Officer is in attendance twice a week, on Tuesday and Friday afternoons at 2 p.m.

Notifications of persons suffering from Tuberculosis in the Borough of Nelson:—

	Pulmonary.	Non-Pulmonary.
Form A.	22	20
Form B.	—	4
Form C.	12	—
Form D.	13	—
Number of New Patients examined at the Dispensary	72	
Number examined at their own homes	13	
Number of examinations of old cases	462	
Number recommended for Home treatment (Domiciliary) ...	89	
Number recommended for treatment in Sanatoria	14	
Number recommended for treatment in General Hospitals .	13	

As mentioned in my report for 1919, the Nursing Staff was augmented and therefore during 1920 much more attention was devoted by the Tuberculosis Nurse to individual cases receiving Home treatment.

In Surgical cases, wounds were dressed and the hygiene of the patient and the home was personally supervised. Greater efforts were made to isolate, as far as possible, all infectious cases under Domiciliary treatment, and Bedsteads and Mattresses were lent in several cases, in order the better to effect this.

Bed rests, Air cushions and other Nursing Utensils, were also lent from the Dispensary in special cases.

There is no doubt effectiveness in the control of Tuberculosis, in so far as the home is concerned, is very largely dependent on the efforts and devotion of the Nurse and Health Visitor. With that in view, the work of the Nursing Staff has been considerably developed during 1920.

I herewith append a few details of the work of Nurse Ward:—

Number of primary visits to patients	55
Number of " following up " visits	723
Total	778
Number of visits where special nursing was undertaken	172

Isolation of the 55 primary cases visited. 33 were Pulmonary, that is the lungs were affected, and the following conditions were found at the initial visit.

Number isolated (separate bedrooms)	16
Number not isolated (occupying same bed with others)	12
Number occupying separate bed, but not separate room	5

Of the 17 cases not completely isolated, isolation was effected in 9 cases. Of the remainder 5 were not considered infectious; 2 could not be isolated on account of there being no accommodation, and in 1 case partial isolation was effected.

All patients with sputum are continually being urged and encouraged to make use of the paper handkerchiefs and sputum utensils which are supplied from the Dispensary.

Contacts.

Every endeavour is made to examine contacts of infectious cases where it is considered desirable.

(Signed) B. MACPHEE,

DISINFECTION.

After convalescence disinfection of the rooms and bedding is carried out, on request in cases of Measles, Erysipelas, Non-Pulmonary Tuberculosis, Pneumonia, Malaria and Dysentery, and compulsorily in the other cases. Clothing and Bedding are treated through a Steam Disinfector, Books, Boots, &c. are exposed to Formaldehyde Gas in a closed chamber, and the rooms are sprayed with Formalin and then fumigated with Formaldehyde Gas.

Allinson's Food	...	...	...	...	2

In certain cases enquiries have been made as to the reasons for not feeding the babies on breast milk or not continuing with same after having commenced, and the following explanations were offered :—

Mother's milk gradually decreased until there was none or not sufficient	77
Owing to mother returning to work	14
Retracted nipples	8
Mastitis	3
Discontinued on Doctor's advice	26
Discontinued on miscellaneous advice	14
Mother did not persevere	10

BABY WEEK.

No Baby Week was held during the year, but on October 27th a meeting of mothers and babies was arranged in the Council Chamber, at which the prizes awarded by Mr. Councillor J. H. S. Aitken to babies born in Baby Week, 1919, who attained the age of 12 months were presented. There had been thirteen births in the 1919 Baby Week, 12 alive, 1 stillborn, and of these 11 babies were entitled to receive prizes.

MATERNITY HOME, FERN LEA.

The Maternity Home was open from the beginning of the year to April 8th, on which day it was closed in order to commence the alterations and additions decided upon by your Committee.

The number of applications, admissions and discharges for the months whilst open are as follows:—

Month	No. of Applications	No. Admitted	No. discharged	No. of Births.
January	5	7	6	6
Febr'ary	12	8	5	9
March	14	6	10	6
April	11	Closed	2	...
May	4	„	...	...
June	4	„	...	...
July	5	„	...	...
August	2	„	...	...

Of the 21 births occurring in the institution, 2 were still-born, 1 died 30 hours old and 1 died at 2 days old.

HOUSING.

The majority of the houses in the Borough are substantially built, and are of the through type with separate yard accommodation to each house. There is no slum area (as understood by the

term) in the district and there are only 29 back to back houses, and there are no houses "let in lodgings."

A summary of the number of rooms in the houses, excluding bathrooms, sculleries, &c., is as follows:—

No. of houses of one room	.01%
" " with two rooms	1.1%
" " " three rooms	2.0%
" " " four rooms	57.0%
" " " five rooms	30.0%
" " " over five rooms	10.0%
" " containing baths	20.0%

The defects most commonly found are of the minor type and an informal intimation is generally sufficient to have any necessary work carried out. The shortage of houses which naturally follows the complete suspension of building operations that occurred during the war is now being met by your Council under the Housing Scheme, of which the following is a summary.

No. of Schemes submitted	No. of Lay outs.		No. of Houses included in House Plans.		No. of Houses.	
	Sub- mitted	Approv- ed	Sub- mitted.	Approv- ed	On which work has c'mmenced	Completed
4	4	4	611	171	145	13

HOUSING CONDITIONS.—STATISTICS.

YEAR ENDED 31ST DECEMBER 1920.

1. GENERAL.

1. Estimated population	43,095
2. General Death Rate	9.5
3. Death Rate (Phthisis)	.62
4. Infantile Mortality	77
5. Number of Dwelling-houses of all classes (approx.) ...	10,000
6. Percentage of working-class dwelling-houses	90%
7. Number of new working-class houses erected	13

2. UNFIT DWELLING-HOUSES.

(i) Inspection.

1. Total number of dwelling houses inspected for housing defects (under Public Health or Housing Acts	Nil.
2. Number of dwelling-houses which were inspected and recorded under the Housing (Inspection of District) Regulations, 1910	Nil.

3. Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	Nil.
4. Number of dwelling-houses (exclusive of those referred to under the preceding sub-heading) found not to be in all respects reasonably fit for human habitation	138
(ii) Remedy of Defects without service of formal notices.	
Number of defective dwelling-houses rendered fit in consequence of informal action by the local Authority or their officers	114
(iii) Action under Statutory Powers.	
A. Proceedings under section 28 of the Housing Town Planning &c. Act, 1919.	
1. Number of dwelling-houses in respect of which notices were served requiring repairs	Nil.
2. Number of dwelling-houses which were rendered fit	
(a) by owners	Nil.
(b) by Local Authority in default of owners	Nil.
3. Number of dwelling-houses in respect of which closing orders became operative in pursuance of declarations by owners of intention to close	Nil.
B. Proceeding under Public Health Acts.	
1. Number of dwelling-houses in respect of which notices were served requiring defects to be remedied	24
2. Number of houses in which defects were remedied	
(a) by owners	24
(b) by Local Authority in default of owners.....	17
C. Proceedings under sections 17 and 18 of the Housing, Town Planning, &c. Act, 1909.	
1. Number of representations made with a view to the making of Closing Orders	Nil.
2. Number of dwelling-houses in respect of which Closing Orders were made	Nil.
3. Number of dwelling houses in respect of which Closing Orders were determined	Nil.
4. Number of dwelling-houses in respect of which Demolition Orders were made	Nil.
5. Number of dwelling-houses demolished	Nil.

3. UNHEALTHY AREAS.—NIL.

4. No. of houses not complying with the building bye-laws erected with consent of Local Authority under Section 25 of the Housing and Town Planning Act, 1919 Nil.
5. No separate staff is employed, the inspections being carried out in the ordinary routine work of the Sanitary Inspectors.

THE HOUSING ACTS, 1890 TO 1919.

- Has your Authority determined the procedure to be adopted for the inspection of your district as required by Article i. of the Regulations of 2nd September, 1910? Yes.
- Has your Authority prepared, as required by Article I. (3) a list of dwelling-houses, the "early inspection of which is, in the opinion of the M. O. H., desirable"? —
- Has your Authority designated an officer to undertake the special inspection of houses to keep the records stipulated by articles (II.) and (III.)? Yes.
- What officer has been so designated? I. of N.
- Have the necessary books, forms, &c., for keeping the required records been obtained? Yes.
- Are these up to date? No.
- Action taken in 1920 under the Housing Acts:—

- (a) No. of Dwelling-houses specially inspected during 1920 under Sec. 17 of the Act of 1909, i.e., with a view to ascertaining whether any dwelling-houses are unfit for human habitation? Nil.
- Have the particulars of these inspections, as specified in Article II. (1) to (8), and Article III. (1) to (8), of the Housing (Inspection of District) Regulations, 1910, been fully recorded? Nil.
- (b) No. of Dwelling-houses inspected under (a) which are considered unfit for human habitation? Nil.
- (c) No. of Representations to Authority with a view to making Closing Orders? Nil.
- (d) No. of Closing Orders made? Nil.
- (e) No. of Dwelling-houses in which defects were remedied without making Closing Orders? Nil.
- (f) No. of Dwelling-houses put into a fit state of habitation after making Closing Orders? Nil.

(g) No. of Dwelling-houses demolished? Nil.

General character of defects found to exist? Minor
defects remediable under P. H. Acts.

Total number of dwelling houses inspected for the purposes
of the Housing Acts other than those inspected under
(a) above. (Not including inspections re Nuisances, &c. 5

CONCLUSION.

In conclusion I have to thank the individual members of my Staff for their willing assistance and co-operation during the year, as this being my first year of office under your Council I have had to rely to some extent on their knowledge of local conditions.

I remain,

Your obedient servant,

R. G. MARKHAM, M.B., D.P.H.,

Medical Officer of Health.

BOROUGH OF NELSON.

ANNUAL REPORT

OF THE

SCHOOL

MEDICAL OFFICER

FOR 1920.

R. G. MARKHAM, M.B., D.P.H.,

School Medical Officer

JUNE, 1921.

To the Chairman and Members of the Education Committee.

GENTLEMEN,

I have pleasure in submitting the Annual Report of the work of the School Medical Staff for the year 1920.

STAFF.

The Staff consists of the Medical Officer and two trained Nurses.

CO-ORDINATION.

The control of the work for Infant and Child Welfare and of Children under school age is entirely under the Public Health Committee whose Officer is also the School Medical Officer. There are no Nursery Schools in the Borough.

**SCHOOL MEDICAL SERVICE IN RELATION TO PUBLIC
ELEMENTARY SCHOOLS.**

SCHOOL HYGIENE.

There are 12 schools in the Borough excluding the Secondary School, of which 4 are Council Schools of fairly recent construction, the others being of an older type of building. In all, however, attention is paid to the ventilation, warming, sanitation, and cleanliness, and all have an adequate water supply for washing and drinking purposes.

MEDICAL INSPECTION.

The children are inspected under one of three headings, viz., Entrants, Intermediate (age 8), and Leavers, and Table 1 at the end of the Report gives the detailed number of the children examined in each group for the year. Notes were made on the individual schedules of any defect found and observation taken as to any previous notes that had been made.

In all 1821 children were examined in the routine inspection, and 125 were examined at special examinations. The defects noted at these examinations amounted to 883 of which 121 were for uncleanness either of the head or body.

Table 2 gives in detail the defects under the various headings, the following being a summary.

Defects.	Number. found.
Malnutrition	41
Uncleanliness	121
Defect or Disease of Skin	28
" Eye	103
" Ear	45
" Nose and Throat	403
" Heart and Circulation	28
" Lungs	47
" Nervous System	23
Rickets	9
Deformities	25
Other Defects or Diseases	10

INFECTIOUS DISEASE.

There has only been one occasion during the year on which it was thought advisable to close a School on account of Infectious Disease. This was in the second week of December when an outbreak of German Measles accompanied by an increased number of cases of Scarlet Fever warranted the closing of the Infants Department of Great Marsden School until after the Christmas holidays.

A table has been prepared, No. 12, and is submitted shewing the number of notifications of cases of Diphtheria and Scarlatina amongst children attending school and the various schools affected.

FOLLOWING UP.

341 defects were found in the course of the Medical Inspection which were followed up by the School Nurses, and Table 7 gives in detail the defects, and also the result of the action that has been taken. In addition, every defect found during the routine inspection is noted, and these children are re-inspected on the occasion of the next medical examination at the school.

SCHOOL CLINIC.

This comprises a treatment clinic for (a) minor ailments, (b) refractions, (c) the X Ray treatment of ringworm, (this latter was only installed towards the end of the year and is at present housed in a temporary room of an unsuitable character), and (d) Dental clinic.

During the year 1125 children have attended the School Clinic and have paid a total of 14,626 visits. The number of defects found requiring treatment was 1128 and with 89 on the books at the beginning of the year gives a total of 1,217 cases. Of these 1,032

have been discharged, 845 cured, 131 improved, and 56 unchanged, leaving 185 still under treatment at the close of the year. Table 5 gives in detail the cases treated at the Clinic, Table 6 deals with the cases of defective vision dealt with during the year, whilst Table 9 gives details of the attendances at the Clinic month by month.

OPEN AIR EDUCATION.

There are no residential open air schools or day open air schools in the Borough nor are there any open air classrooms in any of the Public Elementary Schools.

Playground classes are left to the discretion of the various Head Teachers and have not come under the jurisdiction of the School Medical Service.

PHYSICAL TRAINING.

This is not dealt with by the School Medical Service.

PROVISION OF MEALS.

During the year 1.095 meals have been provided to 12 necessitous school children, the arrangements being carried out as in previous years.

SCHOOL BATHS.

The Corporation Baths in Bradley Road are used by the School Children during the summer months and instruction in swimming is given by qualified instructors. During the year there have been 13.242 attendances at the Baths by children from the Elementary Schools, and 911 attendances by pupils from the Secondary School.

CO-OPERATION OF PARENTS, TEACHERS, AND SCHOOL ATTENDANCE OFFICERS.

Parents are notified prior to each examination taking place at the school and are invited to attend. Many of them do so and it is found to be of great assistance when any defect is observed during the examination of a child to have the parent present to whom more explicit information can be given than is the case when there is only the child present. In these latter cases, however, when no parent or guardian is present, the School Nurse visits the home and when necessary suggests either an interview with the School Medical Officer at the Clinic, or the calling in of their own Medical Advisor in order to secure treatment.

A large number of the children attending the Clinic are sent by the Teachers at the various schools and their co-operation renders the service much more efficient, and assistance is also rendered by the Teachers during the course of the routine inspections. Similarly the School Attendance Officers in the course of

their duties are instrumental in obtaining advice or treatment under the School Medical Service for children in whose interests it may be necessary. Moreover the School Attendance Department and the Head Teachers are supplied with a copy of all certificates issued by the School Medical Officer from the School Clinic relating to the exclusion from school of any child suffering from any disease or defect warranting such exclusion, and also with a copy of the Certificate issued authorising their re-admission to school.

CO-OPERATION OF VOLUNTARY BODIES.

No scheme of definite co-operation or assistance from any voluntary organisation is in operation. Certain individual help is however rendered and Mr. R. Landless, acting on behalf of the late Sir John Thursby and his Executors, is worthy of the thanks of your Committee, as through his generosity 40 children have been sent to the Thursby Convalescent Home at St. Annes.

BLIND, DEAF, DEFECTIVE, AND EPILEPTIC CHILDREN.

There are no special schools in the Borough for the educating of these children. The Head Teachers of the various schools however bring to the notice of the School Medical Officer any defective child and they are examined. Arrangements are made when necessary for the children to attend the Certified Schools at Burnley dealing with these classes of children.

NURSERY SCHOOLS.

There are no Nursery Schools in the Borough.

SECONDARY SCHOOLS.

The Medical Inspection of the children attending the Secondary School is carried out by the County Authorities under their School Medical Services. I have, however, on occasion made a special examination of certain scholars who have been sent to the School Clinic when illness of a suspicious character has developed in a class, and have recommended the exclusion of 3 scholars, 2 of whom were suffering from Tonsillitis, and 1 from Ringworm.

CONTINUATION SCHOOLS.

No medical inspection is made of pupils attending Continuation Schools.

EMPLOYMENT OF CHILDREN AND YOUNG PERSONS.

No examination of children with a view to their employment was made during the year. A few school children are engaged in the delivery of milk or newspapers.

SPECIAL INQUIRIES.

Three special inquiries have been made during the year dealing with outbreaks of disease at schools, in each case the Infants Department being affected. Chicken-pox and Measles were responsible for the enquiries, but the closing of one School as previously mentioned, and the disinfection of a second school was the only action found necessary to be taken.

In conclusion I have to thank the Members of my Staff for their willing co-operation during the year, and also the Head-masters and Head-mistresses of the various Schools.

I am,

Your obedient servant,

R. G. MARKHAM, M.B., D.P.H.

School Medical Officer.

BOROUGH OF NELSON.

Seventh Annual Report

OF THE

School Dental Clinic

For the Year 1920.

THOMAS JACKSON, L.D.S.

Dental Surgeon.

School Clinic,

11, Carr Road,

Nelson, Dec., 1920.

DENTAL DEPARTMENT.

To the Members of the Nelson Education Committee.

MR. CHAIRMAN, LADY AND GENTLEMEN,

I have the honour and pleasure to submit to you my Seventh Annual Report as School Dentist for the year 1920.

During the year all the children in the various schools, of the ages from 6 years to 12 years have been inspected and opportunity given for treatment, as per your instructions, so that the children who were 6 years of age in 1914 have been inspected and opportunity afforded them of receiving dental treatment practically during the whole of their school-life.

Facilities have been afforded to all parents to be present at the inspections of the children, but very few indeed have accepted the invitation to be present. Many more parents bring their children to the Clinic for treatment, and see for themselves the treatment given and many express themselves in gratitude for it.

I do not wish to weary you with a great deal of figures as showing the results of each years treatment and inspection as in former years, as these figures have increased year by year, but have contented myself with giving a Summary of those figures.

The work of the year was somewhat interfered with by the break-down in my health, but I was ultimately enabled to complete the whole of my work before the close of the year. I take this opportunity of thanking you very sincerely for your kindly consideration and leniency during my enforced absence, I greatly appreciated it, and it was no doubt helpful towards my recovery.

In my previous reports I have drawn your attention to certain facts and dental conditions of the children which I considered worthy of mention. The same prevails this year, only a little more so, but one very outstanding prominent fact for the year deserves mentioning, that the percentage of children requiring no dental treat-

ment has gone up in the aggregate from 17.93 in 1919 to 26.07 in 1920; also that the percentage of children requiring urgent treatment has decreased 2.55 per cent. and those requiring treatment have decreased 6 per cent. This speaks volumes for the success of your Clinic in the continued treatment of the children and for the principle that each child should have the opportunity of being inspected and treated once during each year of school life.

The School Nurse has paid 292 Visits to the parents of children of six years of age to explain to them why Dental treatment is so necessary at this age.

In all I have spent 63 half-days in inspecting the children, and 120 half days in treating at the Clinic, and 6 half-days in clerical work at the end of the year, making a total of 189 half days.

I have continued to receive every assistance from the Organising Secretary and his Staff, also every courtesy and help from the Head Masters and Mistresses and Teachers, to all of whom my thanks are tendered for the manner in which they receive me and render every possible assistance whilst inspecting the children at their respective Schools, which facilitate my work considerably.

The School Nurse also continues to render me real valuable assistance in the management of the children at the Clinic. Without her help the work of the Clinic would not be so successful.

I have the honour to be,

Your obedient servant,

THOS. JACKSON, L.D.S.,

School Dentist.

In addition to above there were also the following cases:—

- 6 years of age, 29 special cases, and 11 paid 2nd visits.
- 7 years of age, 8 special cases, and 16 paid 2nd visits and 1 a 3rd visit
- 8 years of age, 8 special cases, and 7 paid 2nd visits.
- 9 years of age, 1 special case, and 2 paid 2nd visits.
- 10 years of age, 2 special cases, and 3 paid 2nd visits.
- 11 years of age, 1 special case, and 1 paid 2nd visit.

During the year the School Medical Officer, whilst inspecting the children, came across 53 girls and 35 boys, 41 of whom were under 6 years of age, 4 at 7 years of age and 29 of 8 years and over, who, in his opinion, required some minor dental treatment, and for these the following work was done.
