The Prevalence of, and Control over, Infectious and Other Diseases.

During the year measles and whooping cough have continued in epidemic form, measles on a reduced scale, 213 cases of measles and 135 cases of whooping cough being notified.

There has been no other epidemic.

Diphtheria. Three cases were notified, one an adult, two children, both laryngeal, neither had been immunised. All recovered.

Scarlet Fever. 26 cases, all recovered.

Cerebo-Spinal-Meningitis. 2 cases, both recovered.

Acute Polio-Myelitis. 2 cases, one death.

Pneumonia. 40 cases, 17 deaths.

Artificial Immunisation against Diphtheria.

1,130 children have been treated at School Clinics and Infant Welfare Centres. There is still a poor response, particularly in children under 5 years of age.

**Notifiable Diseases (other than Tuberculosis) during the
Year 1942.**

Disease.	Total Cases Notified.	Cases Admitted to Hospital.	Total Deaths.
