NEWHAVEN PORT HEALTH AUTHORITY

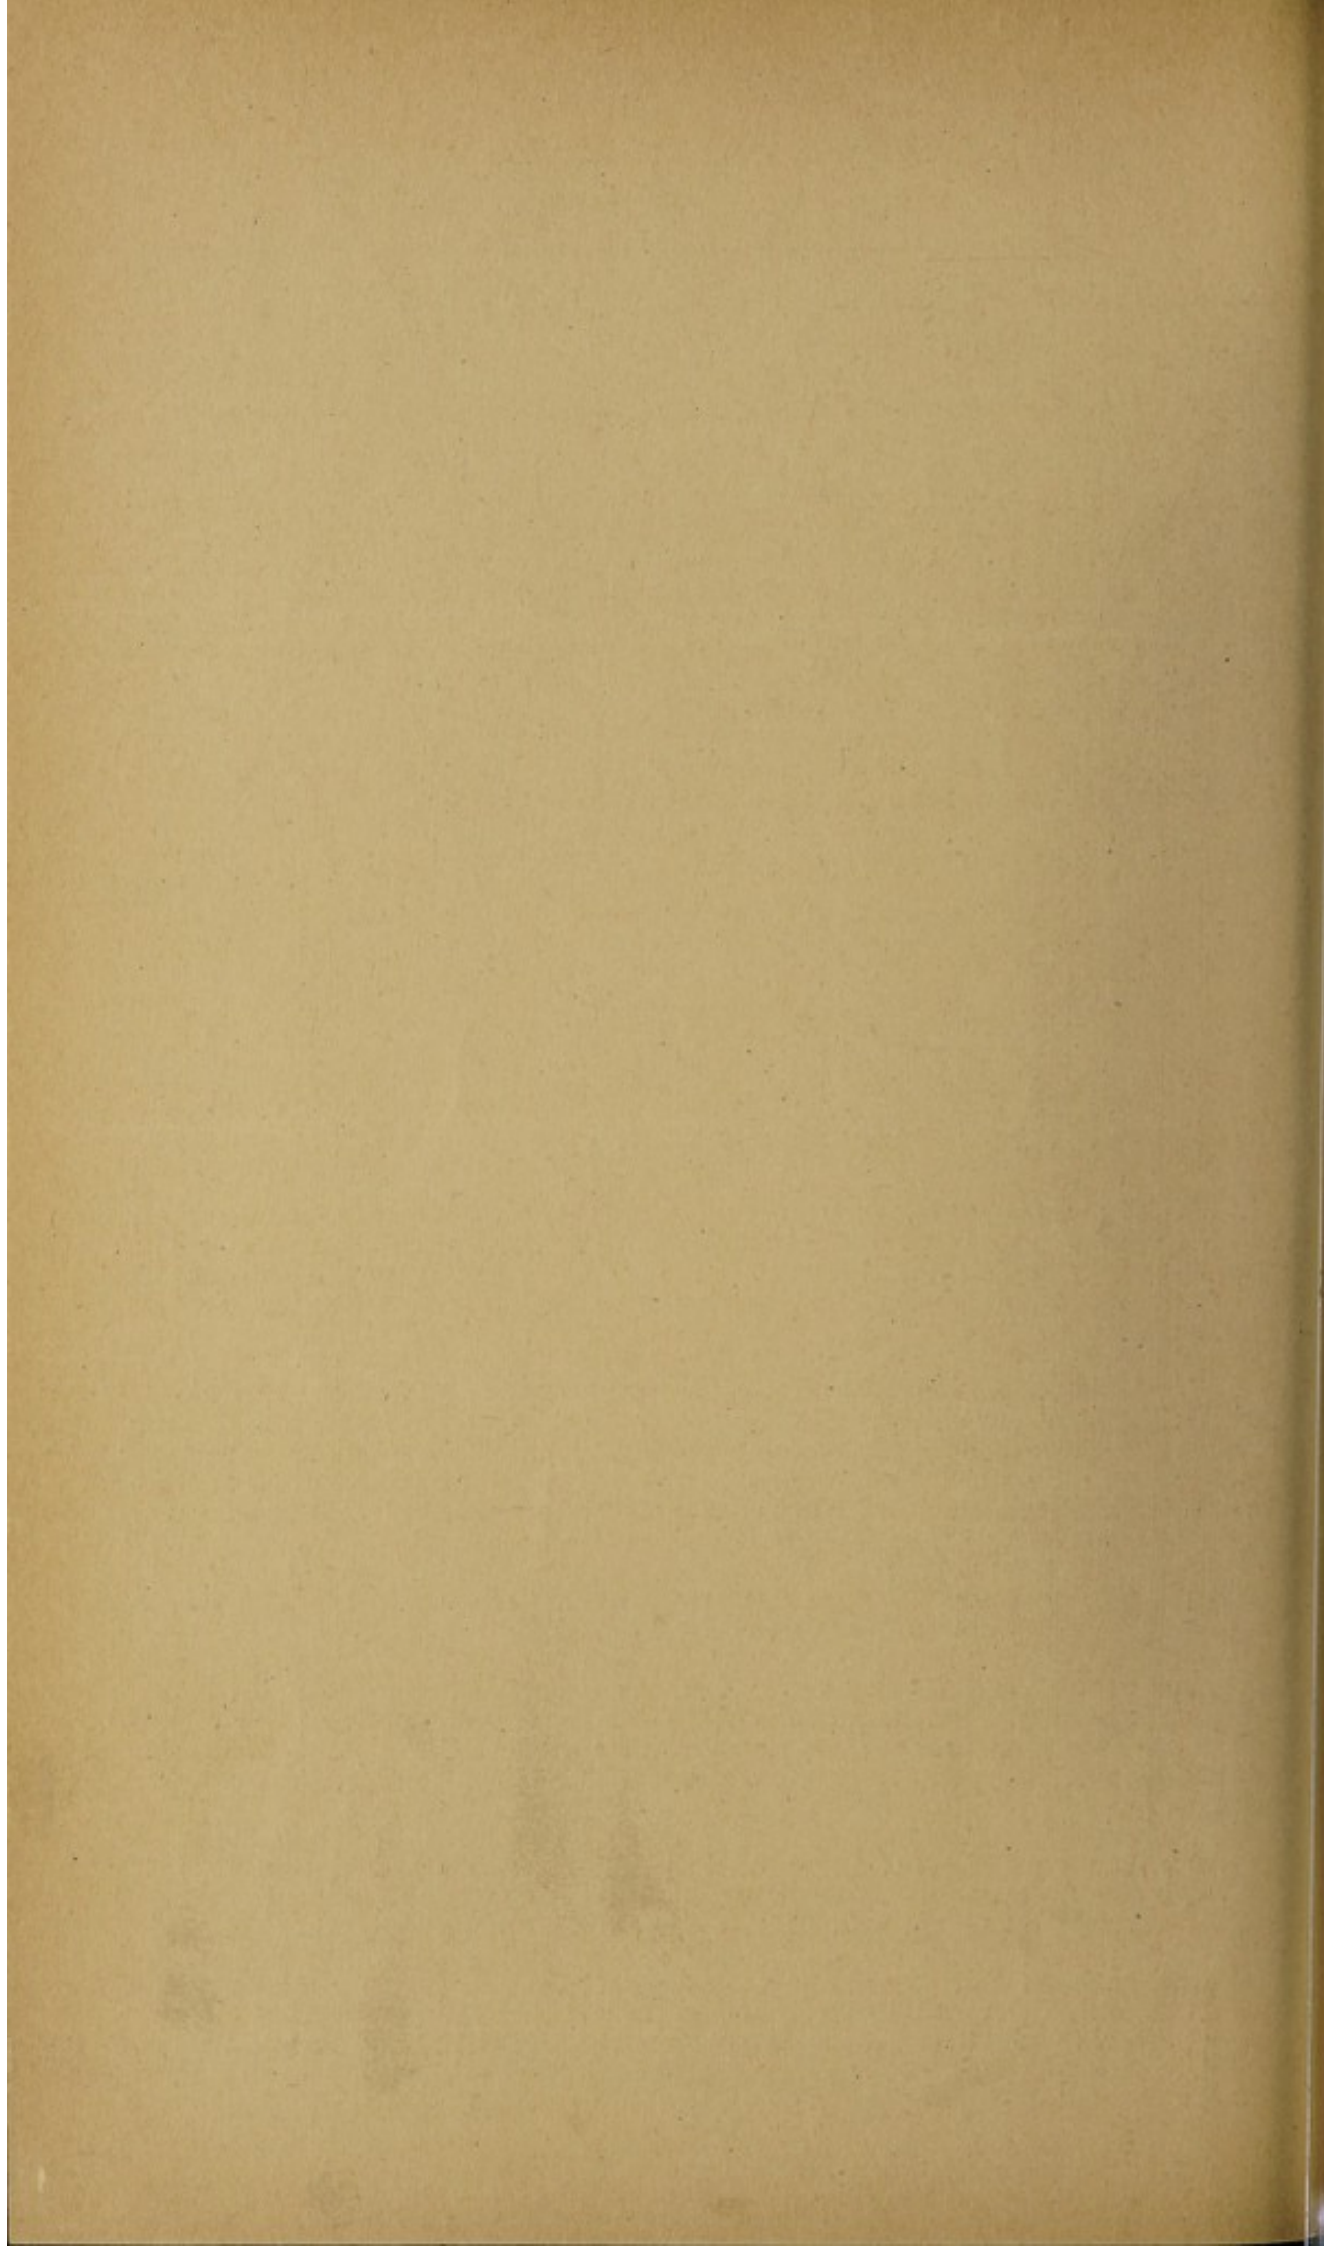

ANNUAL REPORT OF THE PORT MEDICAL OFFICER

FOR THE YEAR ENDED

31st DECEMBER, 1962.

Public Health Department,
The Grange,
Southover,
LEWES, Sussex.

March, 1963.

NEWHAVEN PORT HEALTH AUTHORITY

ANNUAL REPORT FOR THE YEAR ENDING 31st December, 1962.

To the Members of the Newhaven Port Health Authority

Ladies and Gentlemen,

I have the honour to present the Annual Port Health Report for Newhaven for the year 1962.

Passenger traffic between Newhaven and Dieppe extended from 30th March to 31st October, 1962. During 1962 the total number of inward passengers (Alien, Commonwealth Immigrant and British) which arrived at the Port was 153,712 as compared with 172,866 in 1961, whilst outward passengers numbered 156,872 as against 170,156 in 1961. The lower figures for 1962 were largely due to the smallpox outbreaks in the early part of the year in this country which caused a falling off in the amount of cross-channel traffic.

The annual numbers of inward aliens arriving at Newhaven from 1945 to 1962 are given in the following table:-

<u>Year</u>	<u>Inward Aliens</u>	<u>Year</u>	<u>Inward Aliens</u>
1945	17,911	1954	54,652
1946	26,376	1955	58,410
1947	31,551	1956	49,934
1948	41,412	1957	43,330
1949	48,127	1958	41,030
1950	49,521	1959	39,146
1951	51,918	1960	40,440
1952	52,104	1961	44,610
1953	51,084	1962	46,558

Of the 46,607 aliens who arrived at the Port in 1962, forty-nine were refused permission to land by the Immigration Officer, 46,217 were inspected by a Medical Inspector and 390 were subjected to detailed medical examinations. One was found to be undesirable for medical reasons.

Of the 4,004 Commonwealth Immigrants who arrived at the Port from 1st July, when the provisions of the Commonwealth Immigrants Act, 1962, came into force, to 31st December, 1962, one was refused permission to land by the Immigration Officer, and all were inspected by a Medical Inspector. None were subjected to detailed medical examinations. One was refused permission to land by the Immigration Officer.

The scheme whereby four medical inspectors are employed on rota in inspecting aliens was continued in 1962.

The total tonnage entering Newhaven Port in 1962 was 570,614 as compared with 574,246 tons in 1961. In 1962 the numbers of ships entering the Port were 1048 from foreign ports and 396 coastwise. In addition, 5,396 yachts, having a total tonnage of 21,058 entered the port.

Imports in 1962 amounted to 269,635 tons and were comprised chiefly of coal, building and roadmaking material, coke and patent fuel, fruit, vegetables and other foodstuffs, timber, iron and steel.

Exports in 1962 amounted to 64,590 tons and were comprised chiefly of iron, steel, vehicles and vehicle parts, machinery and building and road materials. The increase in exports from 40,929 tons last year was due almost entirely to the restarting of the export trade in scrap metals.

NEWHAVEN PORT HEALTH AUTHORITY

ANNUAL REPORT FOR THE YEAR ENDING

31st December, 1962

There was only one case of notifiable or other infectious disease on ships in 1962. This was a case of chickenpox in a scout returning from a Scout Jamboree in North Africa. Under the circumstances the opinion of the local smallpox consultant was obtained before the ship was cleared.

I have to thank Drs. Alexander, Kirker and Barton for their help in the medical inspection of aliens and Mr. Harrison, the Port Health Inspector, for his very ready assistance.

Lastly I want to tender my thanks to you for your help and encouragement during the year.

Yours obediently,

J. L. COTTON,

M.B., Ch.B., D.P.H.

Short account of measures taken on arrival by ships of (a) any cases of smallpox, cholera, plague, yellow fever, typhus or relapsing fever excluded in Table D (b) any suspected case of such disease.

(a) No cases of smallpox, cholera, plague, yellow fever, typhus or relapsing fever occurred on ships arriving during the year.

(b) There was a possible case of smallpox. This occurred in a scout returning from a Scout Jamboree in North Africa. Landing permission for the passengers and crew was refused until the local smallpox consultant was satisfied that this was a case of chickenpox.

SECTION X

OBSERVATIONS ON THE OCCURANCE OF MALARIA IN SHIPS

No case of malaria arrived at the port, nor did any vessel report a case of malaria during the voyage.

SECTION XI

MEASURES TAKEN AGAINST SHIPS INFECTED WITH OR SUSPECTED OF PLAGUE

No measures were taken as there were no ships infected with or suspected of plague.

SECTION XII

MEASURES AGAINST RODENTS IN SHIPS FROM FOREIGN PORTS

1. Procedure for inspection of ships for rats.

Where possible the Port Health Inspector or the Rodent Operator examines vessels for the presence of rats. A regular inspection is made in the case of the Cross-Channel vessels and an attempt is made to inspect thoroughly all foreign going ships.

2. Arrangements for the Bacteriological or Pathological examination of rodents with special reference to rodent plague, including the number of rodents sent for examination during the year.

Arrangements exist for the examination of rodents from ships when necessary at the Public Health Laboratory, Brighton.

No specimens were sent during 1962.

3. Arrangements in the district for Deratting ships, the methods used and if done by a Commercial Contractor, the name of the Contractor.

The Port is a designated approved port for this purpose.

Trapping, poisoning and gassing are available. The Contractors carrying out this work are Associated Fumigators Limited and Ratsouris Limited.

4. Progress in the rat-proofing of ships.

Ships using the port are mainly Cross-Channel passenger and cargo vessels with a high degree of rat-proofing and little harbourage. Colliers entering the port have been found to be almost devoid of harbourage, while in the modern vessels rat-proofing is good.

If any excessive temporary harbourage is discovered the Master is required to abate same.
