URBAN DISTRICT COUNCIL OF PADIHAM.

—○○○○—

ANNUAL REPORT
of the
MEDICAL OFFICER OF HEALTH
for the
YEAR ENDING DECEMBER 31st, 1955.

J. W. J. FORSYTHE, MB., CHB., BAO.
Medical Officer of Health.

PADIHAM URBAN DISTRICT COUNCIL.

Town Hall,
PADIHAM.

4th June, 1956.

To the Chairman and Members of the Urban District Council of Padiham.

Mr. Chairman, Gentlemen,

I have the honour to present my thirtieth Annual Report dealing with the health of the inhabitants of Padiham during 1955.

Acting on the instructions of the Ministry of Health this will be an interim report, confined to essential or urgent matters which have affected the Public Health during the year, such as, overcrowding, sanitation, distribution of clean food, and outbreaks of infectious diseases etc.

SOCIAL CONDITIONS OF THE AREA.

The unemployment which occurred during 1952 and which was more or less confined to Cotton Operatives was still fairly prevalent during 1955.

Most of the mills in Padiham run their own canteens and these should be encouraged and used more than they are, by the workers.

The County Council has control of two nurseries in the area where children under school age, of women engaged in industry, are looked after, and regarding these nurseries the only complaint is the supervision is not strict enough in times of epidemics.

All the schools in the district provide dinners for the scholars and this is to be highly commended.

In connection with the welfare of the old people, a voluntary association has been set up and is doing valuable work, such as, letter writing, doing shopping when necessary, giving advice, and arranging for domestic help in cases of sickness.

So far as the health of the aged is concerned there is no doubt that the sons and daughters will have to bear their fair share of looking after them and not leave it to others.

The health of the inhabitants has been fairly good during the year and so far as recreations are concerned full advantage was taken of all the facilities controlled by the Local Authority and the various Sunday Schools.

A new association has been started in Padiham to help handicapped and disabled people and very valuable work is being done in this respect.

SANITARY CIRCUMSTANCES OF THE AREA.WATER SUPPLY:-

The water supply has been good both in quantity and quality. Chemically and bacteriologically the water has been excellent.

The following are the results of bacteriological and chemical examinations carried out in 1955.

Bacteriological examinations - No. 16.

Results - B.coli per 100 c.c.

0 in 15 samples.

1 in 1 sample.

All results expressed in parts per million.

OBSERVATIONS.

All the samples are from a chemical point of view of very good quality, free from any deleterious matter and suitable for all purposes of domestic supply.

WATER SUPPLY (continued):

Sample two had a slight odour of diesel oil or paraffin (Kerosene) which is probably derived from some very local contamination of short duration.

Sample number four shows a trace of lead probably derived from lead piping. The amount is not significant but larger and more significant amounts of lead might be taken up by the water standing in lead pipes for any length of time.

Sample two showed a slight deposit of hydrated oxide of iron which accounts for the relatively high iron content.

Interviews.	146

DERATISATION AND DISINFESTATION.

(a) RODENT CONTROL:-

This is effectively controlled by the Rodent Operator. Sausage rusk bait and Zinc Phosphide poison, also damp bread mash and arsenic oxide poison were used.

(b) DISINFESTATION:-

Eight premises were dealt with for vermin, five for cockroaches, two for fleas, and one for crickets.

The refuse tip was periodically dusted with D.D.T. powder to ensure cockroach and cricket control.

INSPECTION AND SUPERVISION OF FOOD.BAKEHOUSES:-

The number of bakehouses on the register is 14. These have been regularly inspected. No contraventions were noted.

DAIRIES AND COWSHEDS:-

All the dairies and cowsheds were periodically inspected.

Number of Dairy farms in the district	6
Number of persons registered as distributors of milk.	44
Number of dealers licensed to use Special Designation "Tuberculin Tested"	8
Number of dealers licensed to use Special Designation "Pasteurised".	12
Number of dealers licensed to use Special Designation "Sterilised".	10
Total number of approvals.	<u>80</u>

MEAT REGULATIONS:-

These have been closely watched by the Sanitary Inspector during the year.

FOOD PREPARATION:-

Regular and frequent visits were made to food preparing premises and it is a pleasure to report that it has not been necessary to make any official representation.

Number of premises registered for sale or manufacture of ice cream.	48
Number of premises registered for preparation or manufacture of sausage, or potted, pressed, pickled or preserved food.	43
Total number of registrations during the year.	3

FOOD POISONING:-

No cases of food poisoning were reported during the year.

OFFENSIVE TRADES.

The following offensive trades are now in existence in the area.

Tripe Boiler.	1
Size Maker.	1
Fish Fryers.	12

These premises were inspected on 31 occasions.

COMMON LODGING HOUSES.

There is one registered common lodging house in the district and 14 visits of inspection were made during the year.

The prospects of this lodging house being closed within the near future seem very bright and this will be very welcome news.

SMOKE OBSERVATION.

An attempt to stimulate interest in smoke abatement was made by the Local Authority during the year when a Cinema Show was organised. The attendance was very poor.

No serious smoke nuisances were observed during the year.

HOUSING.

(a) Number of new houses erected during the year - 38.

(b) Number of houses erected under the various acts:-

1.	Housing Act. 1919.	31
2.	Housing Act. 1923-24.	170
3.	Housing Act. 1930-36.	228
4.	Housing Act. 1936-46.	21
5.	Housing Act. 1946-51.	228
	Total	<u>678</u>

OVERCROWDING.

No overcrowding as set down in the Housing Act, was observed during the year, although seven cases of complaints were submitted to the Committee.

HOUSING CONDITIONS.

Preliminary surveys show that 63 houses have been considered as unfit houses at the present time and that 246 houses will fall into the same category in 10 years time.

To give some indication of the extent of the shortage of houses it is only necessary to state that there are 130 families in lodgings, 59 without children, and the rest with 1, 2, 3, or 4 children.

Over 100 aged persons are seeking one bed-roomed bungalows.

Housing schemes are in progress to try and alleviate these conditions.

PREVALENCE OF AND CONTROL OVER INFECTIOUS DISEASES.

1955 was more or less a normal year apart from an outbreak of measles which however was mild in character - no deaths being recorded.

The following cases of Infectious Diseases (other than Tuberculosis) were notified during the year.

Scarlet Fever	15
Measles.	191
Whooping Cough.	2
Chicken Pox.	3

TUBERCULOSIS.

The following cases of Tuberculosis were notified during the year:-

Respiratory	4
Non-respiratory	1

All new cases are thoroughly investigated and followed up.

Immediate contacts are X-rayed, given the Montouse Test, and examined by the Chest Physician.

It is hoped to have another visit by the Mass-Radiographic Unit in 1957 and an even better response should be obtained.

In conclusion, I would like to thank the Clerk of the Council, the Sanitary Inspector and the Surveyor for their loyal co-operation during the year.

9. DERATISATION AND DISINFESTATION (Continued):-

- (b) The technique advised by the Pest Control Division of the Ministry of Agriculture and Fisheries, was applied in all treatments, and when necessary, a change was made from sausage rusk bait and zinc phosphide poison, to damp bread mash bait, and arsenic oxide poison. Warfarin is now frequently used as a bait.

The North East Lancashire Advisory Committee held one meeting during the year.

(c) DISINFESTATION:-

Eight premises were dealt with for vermin; five for cockroaches, two for fleas and one for crickets. The refuse tip at Lumb Wood was periodically dusted with D.D.T. powder to ensure cockroach and cricket control.

10. INFECTIOUS DISEASES:-

The following table gives the number of notifications of infectious diseases and of cases removed to Isolation Hospital.

<u>Disease.</u>	<u>Notified.</u>	<u>Removed to hospital.</u>

12. SOCIAL WELFARE:-

The Health Department continues to be available for liason work. The principle activity has been to provide contact with the Home Help Organiser. Eleven cases were dealt with.

Three cases of aged persons needing care were investigated, and passed on to the proper authority and were eventually admitted to hospital

13. SMOKE OBSERVATIONS:-

A cinema show was organised to stimulate interest in smoke abatement. Although all persons concerned in this subject were invited, the attendance was very poor.

The "Clean Air Bill" is still being considered by Parliament.

14. RAG FLOCK AND OTHER FILLING MATERIALS ACT, 1951:-

Both firms previously operating from licensed premises have not applied for renewal of their licences.

15. HEATING APPLIANCES (FIREGUARDS) ACT, 1952,-

No contraventions observed.

11. HOUSING (continued):-

The following list does give a complete picture of the housing demands for the district:-

<u>In Lodgings.</u>	<u>Padiham.</u>	<u>Out of District.</u>	<u>Total.</u>

16. ACCIDENTS IN THE HOME:-

Arising out of the report of the Standing Interdepartmental Committee on Accidents in the Home, one representative meeting was convened.

A policy of propaganda by displays of posters and the distribution of handbills was pursued.

17. REPORTS SUBMITTED TO THE COUNCIL:-

- (a) 12 monthly reports.
- (b) 7 reports relating to alleged overcrowding.

18. PUBLIC CLEANSING:-

- (a) A fortnightly collection service has been maintained throughout the year except on the occasions where there have been breaks for holiday periods and bad weather.

The policy of urging householders to report full ashbins has met with a degree of success. The number of reports increased from 66 in 1954 to 313 in 1955.

Routine in the collection service has been maintained. The number of loads of domestic refuse dealt with are indicated in the following table:-

Table 1.	No of loads Collected.	Approximate weight in Tons.
1946	1,742	Not recorded.
1947	1,592	2,796
1948	1,607	2,716
1949	1,657	2,709
1950	1,644	2,905
1951	1,665	2,950
1952	1,680	3,092
1953	1,555	3,016
1954	1,672	3,310
1955	1,657	3,113

(b) TRADE REFUSE:-

The weekly service for the collection of clinkers from bakehouses, trade premises, schools, chapels, and workshops, has been maintained. 845 loads of refuse weighing approximately 1,124 tons was removed.

604 calls were made for the removal of extraneous materials from domestic and trade premises.

(c) REFUSE DISPOSAL:-

The controlled tip activities continued satisfactorily, and none of the fears regarding rat infestation, nuisance from smells, and the inadequate disposal of organic matter, have materialised. The following table shows the number of loads of refuse dealt with:-

Table 11.	1950.	1951.	1952.	1953.	1954.	1955.
Number of loads of household refuse deposited on tip.	1,644	1,665	1,680	1,635	1,672	1,657
Number of loads of other refuse deposited on tip.	2,328	2,274	1,989	1,783	1,961	1,690
	3,972	3,939	3,669	3,418	3,533	3,347

18. PUBLIC CLEANSING (continued),-

Damage on the tip by trespassers, is less of a problem and source of worry than in previous years. A steady diminution of this trouble is evident now the tip faces are becoming less accessible.

(d) STREET SCAVENGING:-

The scavenging of streets is carried out by a mechanical street sweeper and two men with bins and hand trucks.

The mechanical road sweeper has been in use for the full year and its practical value is now beyond doubt a qualified success. 323 tons of "sweepings" were collected.

The more efficient road sweeping service has been maintained at a lower cost than by manual sweeping method.

The gullying machine has maintained a steady routine. The cleansing cycle is as follows:-

- i. Mains - at six weeks intervals.
- ii. District Roads (frontages). - at 12 week intervals.
- iii. District Roads (back streets). - at 16 week intervals.

(e) URINALS AND PUBLIC LAVATORIES:-

The two urinals and three public lavatories were cleansed daily throughout the year. The Cleansing standard has been maintained resulting in fewer complaints. New lighting has been installed in the Station Road Ladies conveniences.

(f) TRANSPORT:-

The departmental transport has functioned without serious breakdown, except in the case of the mechanical sweeper which developed a defect in the transmission.

Minor defects in the refuse collecting trucks are now occurring at more frequent intervals.

19. SALVAGE:-

The price of waste paper rose from £7.10.0d., to £8. 10. 0d., and fell again to £8. 0. 0d., per ton.

2,150 bales of waste paper were packed and dispatched as against 1,690 for the previous year, an increase of 460 bales.

1951/1955. (5 years)	£6268.	£1253.
1955. (1 year)	£1523.	£1523.

It appears that the peak of waste paper sales income has been reached and that a decline in prices will occur in the near future.

20. APPRECIATION:-

Again I would like to express my sincere thanks to the Chairman of the Council, the Chairman of the Health Committee, the Clerk of the Council, the Medical Officer of Health, and members of the staff who have assisted me in so many ways in carrying out the many duties of the office.

I am,

Gentlemen,

Your obedient servant,

J. Newell

A.R.San.l., M.S.I.A.

Sanitary Inspector and
Cleansing Superintendent.
