BOROUGH OF PENZANCE

THE
**ANNUAL
REPORT**

OF THE
MEDICAL OFFICER OF HEALTH
AND
CHIEF SANITARY INSPECTOR

1958

MEMBERS OF THE PUBLIC HEALTH COMMITTEE

Chairman - Councillor H. L. Richardson.

Vice-Chairman - Councillor E. M. Cain.

The Mayor - Councillor S. T. Peak. (ex officio)

Alderman Miss A. U. Chirgwin.

Alderman B. D. Stevenson.

Councillor J. G. Corin.

Councillor T. Cotton.

Councillor W. E. Cowan-Dickie.

Councillor W. C. Harvey.

Councillor L. Tonkin.

Councillor W. F. J. Young.

PUBLIC HEALTH OFFICERS OF THE AUTHORITY

Medical Officer of Health:

D. L. JOHNSON.M.R.C.S.,L.R.C.P.,D.P.H.(Lond.)

Chief Public Health Inspector:

A. T. HARPER.M.R.San.I.,F.S.I.A.

Public Health Inspectors:

R. E. WARBURTON. Cert.R.S.I. & S.I.E.J.B. &
Cert.R.S.I. Meat & Food Inspection.

R. R. PENGELLY. Cert.R.S.I. & S.I.E.J.B. &
Cert.R.S.I. Meat & Food Inspection.

MEMBERS OF THE PUBLIC HEALTH COMMISSION

Chairman - Commissioner H. L. Edwards.
Vice-Chairman - Commissioner S. A. Cain.
The Mayor - Commissioner S. T. Cook. (ex officio)

Commissioner H. L. Edwards.
Commissioner S. A. Cain.
Commissioner S. T. Cook.
Commissioner T. G. Brown.
Commissioner W. E. Brown-Blair.
Commissioner W. E. Brown.
Commissioner J. T. Brown.
Commissioner W. E. Brown.

MEMBERS OF THE BOARD OF HEALTH

Medical Officer of Health:
J. A. Johnson, M.D., F.R.C.S., F.R.S. (Hon.)

Chief Public Health Inspector:
A. C. Smith, M.B., B.S., F.R.S. (Hon.)

Public Health Inspectors:
H. E. VANDERBILT, M.B., B.S., F.R.S. (Hon.)
G. E. S. I. Hunt & Food Inspection.
H. E. FENNELL, M.B., B.S., F.R.S. (Hon.)
G. E. S. I. Hunt & Food Inspection.

Municipal Buildings,
Penzance.

The MAYOR, ALDERMEN and COUNCILLORS,
BOROUGH OF PENZANCE.

Mr. Mayor, Ladies and Gentlemen,

So overwhelming has been the defeat of the major Infectious Diseases, such as that of Diphtheria in recent years, that the appearance of even two cases of Typhoid Fever in the same year comes as a shock to complacency. Though notified on the same day they were unconnected, one being a boy of 15 admitted to hospital from another district, to which he had recently returned with a school party from a holiday in Germany. The other was a nurse, who also made a full recovery from her illness: in her case the sub-type of typhoid organism was the rare Type T, which made its first known appearance in Britain in this County during World War II, and may have originated in South Africa many years ago. The source of this present infection remains untraced, despite extensive investigations, but there is a remote possibility that the patient contracted the disease from drinking sea water near a sea outfall: in her own country sea water is sometimes imbibed for its medicinal effect.

A case of mild poliomyelitis of the paralytic type was notified in February and a boy aged 11 died of a polio-like illness in November. These cases pointed the urgency of a speeding up of the immunisation programme, which had made such slow progress in 1956 and 1957 due to limited supplies of vaccine. In 1958 the scheme was twice extended to include older children and later young adults. By the end of the year 7,211 persons had been immunised in the Area as a whole, and 1,635 had received a third or booster dose: at the beginning of the year the number of children protected had only been 900.

Perusal of Mr. Harper's section of this report shows once again the importance of maintaining regular routine inspections as an essential preventive measure in Public Health - unfortunately, in a way, there are no spectacular results to bear out this fact! The good progress with work of improvement in general food hygiene in the Borough is particularly noteworthy, but the appearance of a Grade IV and 13 Grade III bacteriological results for ice cream samples, out of a total of 67, was disturbing.

D. L. JOHNSON.

Medical Officer of Health.

SECTION A

STATISTICS AND SOCIAL CONDITIONS OF THE BOROUGH

Area - 3,155 acres

Population - 19,570 (Registrar-General's Estimate mid-year 1958)

Rateable Value - £231,435

Product of Penny Rate - £932

No. of Inhabited Houses - 6,590

<u>No. of Livebirths:</u>	Male	Female	Total
	143	110	253

Rate per 1,000 population: 12.9

<u>No. of Stillbirths:</u>	Male	Female	Total
	4	4	8

Rate per 1,000 total births: 31.6

<u>No. of Deaths:</u>	Male	Female	Total
	154	132	286

Rate per 1,000 population: 14.6

<u>No. of Infant Deaths:</u>	Male	Female	Total
	2	1	3

Rate per 1,000 livebirths: 11.9

Maternal Deaths: Nil.

SECTION B

The MAYOR, ALDERMEN and COUNCILLORS,
BOROUGH of PENZANCE

Mr. Mayor, Ladies and Gentlemen,

It gives me great pleasure to submit the section of this
Report dealing with the work of the Public Health Inspectorate.

In presenting it I would like to record my appreciation to
councillors, colleagues and staff alike for the guidance and as-
sistance which I have received throughout the year under review.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

A. T. HARPER.

Chief Public Health Inspector.

SECTION 2

ANALYSIS OF THE AREA

(1) Water Supply

The following is an estimate of the number of houses in the
Borough (a) without a public water supply, (b) supplied by stand-
pipe and (c) with a mains supply.

(a) No Public Supply	(b) From Stand- pipe	(c) Mains
21	1	1

Further sampling from all sources of public supply was main-
tained throughout the year as indicated in the table below. In
the case of the two water supplies, i.e. Mains and Standpipe, this
involved weekly sampling both at source and in distribution.
Weekly samples were also taken at the tap and treated water of the
Mains supply and at the Mains supply in distribution. There

SECTION C

CLIMATE 1958

	TEMPERATURES		RAINFALL Ins.	SUNSHINE Hrs.
	Max.	Min.		
Jan.	49	40	6.06	55.3
Feb.	51	41	5.84	44.4
Mar.	49	40	4.64	85.0
Apr.	54	42	1.61	175.0
May.	58	47	3.22	211.4

July.	66	55	3.29	182.6
Aug.	66	56	5.78	140.3
Sept.	66	56	5.74	161.7
Oct.	59	50	3.50	122.5
Nov.	54	45	2.55	64.4
Dec.	51	45	6.50	67.0
Mean	57	47	Total 52.48 Av. 41.61	Total 1526.6 Av. 1696.5

The year 1958 was one with higher rainfall and considerably lower sunshine than average.

The deficiency in sunshine was most marked in the wet summer months of August and September when twice the normal rainfall was recorded and hours of sunshine were 100 less than average.

(The above information was provided by Mr. J.H.I.Cable, Borough Meteorological Observer, to whom I am indebted.)

SECTION D

SANITARY CIRCUMSTANCES OF THE AREA

(1) Water Supplies

The following is an estimate of the number of houses in the Borough (a) without a public water supply, (b) supplied by stand-pipe and (c) with a mains supply.

(a) No Public Supply	(b) From Stand-pipe	(c) Mains
21	19	6550

Routine sampling from all sources of public supply was maintained throughout the year as indicated in the table below. In the case of the two major supplies, i.e. Drift and Boscathnoe, this involved weekly sampling both at source and in distribution. Weekly samples were also taken of the raw and treated water of the Tolcarne supply and of the Gulval supply in distribution. There

were remarkably few unsatisfactory reports throughout the year.

Supplies					
	<u>Drift</u>		<u>Boscathnoe</u>		<u>Tolcarne</u>
	Works	Domestic	Works	Domestic	<u>Gulval</u>
Raw	5	-	2	-	49
Treated	56	54	52	51	45

The plans for the Drift Dam were completed by the Consulting Engineers (Messrs. Herbert Lapworth Partners) and tenders for its construction were invited. The contract has been placed with Sir Robert McAlpine & Sons Ltd. and the dam is due to be completed by January, 1961.

During the year the filters at Drift Waterworks were overhauled and new filter floors were put in by the Water Department.

Several lengths of main in the Borough were cleaned and re-lined with bitumen by the General Descaling Company thereby improving the supply to several areas in the older parts of the town.

(2) Sewerage

The public sewer was extended to the Chyandour Square area and the drains which discharged into the culvert have been connected to it.

An outline scheme for the improvement of the sewerage system at Mousehole was approved by the Committee.

Outline schemes were also approved for providing sewers at Tredavoe and Trevithal.

(3) Food Administration

(a) Food Hygiene Regulations. A considerable proportion of one Inspector's time was devoted to the supervision of the various types of catering establishments and over 300 visits were made specifically for purposes of the Food Hygiene Regulations. Because of the co-operation received from traders generally which was reported in the report for 1957, it was possible to give more attention to guest houses and private hotels.

Although the "intrusion" into houses for purposes of food hygiene was something new it is fair to say that in the main, proprietors of these establishments were very reasonable in their acceptance of these visits and the purpose for which they were made. Their response to requests to provide additional amenities in the form of sinks, wash hand basins and hot water supplies was generally most gratifying.

(b) The information included in previous reports with regard to the number & type of food premises in the Borough is shown here-

with in amended form for the year 1958:-

(i) No. of food premises in the Borough:-

Butchers	34	Sweets & Confectionery	29
Manufacturing Butchers	18½	Hotels, Restaurants,	
Bakers	19	Cafes & Snack Bars	68
Fish-friers	18½	Dairies	27
Grocers	74	Licensed Premises	40
Fruiterers &		Wet fish shops	8
Greengrocers	23	Wine & Spirit	
		Merchants	6
		Ice Cream Premises	95½

(ii) No. of registered premises in the Borough:-

(a) Under Sec.16 Food & Drugs Act, 1955
(See X in (i) above) 131

(b) Under Milk & Dairies Regulations 27

(iii) The number of inspections of all types of food premises is shown in the summary of visits and inspections - Appendix E.

(iv) All unsound and diseased meat which was condemned during the year was taken to the premises of Cornish Fish Products Ltd. at Stable Hobba, for rendering down and mixing with artificial manures.

Other unsound foodstuffs, in smaller quantities, were taken to the Council's controlled tip for burial under supervision.

(c) Ice Cream (Heat Treatment) Regulations, 1947-52. Routine fortnightly sampling of ice cream was carried out during the summer months, and as in the past greater attention was given to the products of local manufacturers of whom there were five. The results of the tests carried out are shown as follows:-

Samples returned in Grade I.....32 or 50%
Samples returned in Grade II.....18 or 28%
Samples returned in Grade III.....13 or 20.3%
Samples returned in Grade IV..... 1 or 1.7%

After a record year in 1957 when only 2 of 56 samples failed to reach Grade I and none was below Grade II, the results of 1958 were to say the least very disappointing. It is several years since a sample was returned in Grade IV. The poor results could not be attributed to a hot summer and they were not confined to one or two manufacturers, but were shared by all except one. Despite several visits to premises and inspections of plant and methods no satisfactory explanation could be found for the disturbing results.

(d) Milk & Dairies Regulations, 1949-54. There is nothing of note to report under this heading. The milk retailed in the Borough throughout the year came in the main from three pasteurising stations, viz. Primrose Dairy Ltd., St. Erth, West Cornwall Milk Co. Ltd., Hayle, and Penryn Co-operative Society Ltd. A little T.T. milk was also retailed and this came from Trannack Mill Farm, Sancreed.

Samples were taken monthly from each of these sources and

the results were as follows:-

<u>Samples taken</u>	<u>No. which failed Methylene Blue Test</u>	<u>% Failures</u>	<u>No. which failed Phosphatase Test</u>
Designated 59	NIL	NIL	NIL

(e) The facilities of the Pathological Department at the Royal Cornwall Infirmary were utilised for testing all ice cream and milk samples, the examinations being carried out free by arrangement with the Public Health Laboratory Service.

(4) Refuse Collection & Disposal

No changes took place in the refuse collection service during 1958, but during the summer months overtime work was necessary to clear the rounds. Test weighings carried out throughout the year showed that it was the more bulky nature of the refuse rather than additional tonnage which produced the extra loads. This, despite the fact that the three 10 cubic yard lorries had been fitted with metal roof racks to take the vastly increased quantity of non-returnable cartons which in recent years have replaced wooden packing cases.

In addition to the three lorries already mentioned, a 7 cubic yard machine operated in the narrower streets and lanes, and a total labour force of 14 drivers and loaders was employed. A weekly collection of domestic refuse was made with more frequent collections from business premises. For the latter service a sum of £394 was received.

Altogether a total of 6,980 tons of trade and house refuse was collected at a cost of £10,355. The disposal cost was £4,300, but this, of course, included the cost of handling large quantities of highways cleanings and garden debris from the various public parks for which no weights were available.

A little income - £137 - was received from the sale of tins and light ferrous scrap segregated at the tip, but in mid-year the market dried up and salvage work was discontinued.

Tipping over section one at Newlyn Coombe was completed in July, and refuse disposal was resumed at the Eastern Green site where tipping space was available for approximately eighteen months. It is the Council's intention to divert the stream before returning to the Coombe to tip over the second section.

(5) Housing

As indicated in the Report for 1957, national financial restrictions placed a brake on the Council's housing activities, and the effect became most evident in the fields of slum clearance and on the future building programme. At the time of the steep rise in Interest Rates the Council had a fair amount of building work in hand i.e. 111 flats and 3 houses, but it was decided that no new projects should be undertaken whilst the Interest Rate remained above 5%.

At the commencement of the year only 26 flats and 3 houses of those mentioned above remained to be completed so that the prospects of carrying out large scale re-housing from slum clearance areas were very remote, and the preparation of clearance schemes slowed down.

The Housing Committee gave very serious consideration to the position at the January Committee meeting and made several recommendations to the Council. It was resolved to proceed with the re-housing of tenants remaining in the areas dealt with in the First and Second Years' Programmes and to demolish the vacated houses and clear the sites. The Third Year's Programme was modified and action deferred in respect of the properties still outstanding. A decision to discontinue direct labour building was also taken at this meeting, and at the same time, it was resolved to dispose of the plant and materials held by the organisation. This ended a Council undertaking which had made a very considerable contribution to the building programme and the re-housing of many needy families.

The total number of houses and flats completed and handed over for letting was 29. These together with houses which became vacant during the year enabled 33 families included in the Slum Clearance programme and 64 families on the Council's list to be re-housed.

In addition to the houses mentioned above, a further 33 were erected by private enterprise. Considerable progress was made towards the development of the land at Pendrea which the Council had made available for this purpose.

Action taken under the Housing Acts resulted in the demolition of 37 unfit houses and the closing of 12 others. A Closing Order was also made on a part of a house.

Two small areas were declared to be Clearance Areas, viz. Nos. 2 to 5, Coulsons Buildings, (4 houses), and Nos. 1 to 7, Abbey Place, and No. 26, New Street, (8 houses).

Thirty houses were made fit, 13 of these by formal action under the Housing Acts.

In addition, 56 applications were received under the provisions of the Improvement Grants Scheme.

Twenty Certificates of Disrepair were issued under the Rent Act, and eight were cancelled.

(6) Factories Acts Administration

The work of the Department in this field is summarised in Appendix C which is a copy of the Annual Report as submitted to the Minister of Labour and National Service. The inspections carried out were mainly of a routine nature, but a certain amount of trouble continued to be experienced from dust and smoke nuisances arising at four establishments in the Borough. The help of the Alkali Inspector and advice received from the National Industrial Fuel Advisory Service in dealing with two of these was appreciated.

There was also helpful co-operation with both the Divisional Factories Inspector and officers of the County Fire Service in dealing with Means of Escape Certificates.

(7) Rodent Control

One full-time Rodent Operator was employed during the year. Methods of treatment were strictly in accordance with Ministry recommendations and included poisoning and trapping.

No charges were made for the treatment of dwelling houses, but business premises were treated on a contract or cost-plus basis.

In addition to treatments for surface infestations, two treatments of the sewers of the Borough were carried out, and also a 10% "Test Bait" of the whole system.

The following is a summary of the work carried out during the year:-

	Local Authority	Dwelling- houses	Agricul- tural	All other including business & industrial	Total
No. of proper- ties in- spected	197	602	72	864	1735
No. found to be in- fested	70	107	2	107	286
No. treated by Local Authority	70	107	2	107	286

(8) Disinfection & Disinfestation of Premises, etc.

In the absence of any outbreaks of infectious disease very few premises needed fumigation and what little clothing and bedding there was requiring treatment was dealt with at the local hospital by arrangement with the Regional Hospital Board.

A few premises were treated for flea infestation and fly nuisances and either Gammexane in smoke or powder form or an insecticidal spray was used.
