ANNUAL REPORT OF THE PORT MEDICAL OFFICER, PLYMOUTH, FOR THE YEAR 1925.

PLYMOUTH PORT SANITARY AUTHORITY.

Port Sanitary Offices,

Millbay Docks, Plymouth.

31st December 1925.

TO THE CHAIRMAN AND MEMBERS OF THE

PLYMOUTH PORT SANITARY COMMITTEE.

Gentlemen,

In accordance with the duty imposed by the Ministry of Health Sanitary Officers Order 1922, and Circular 651, December 1925, I have the honour to submit to you my second Annual Report on the Health of the floating population, and the work of your officials in connection with the sanitary conditions and inspection of vessels, examination of aliens, and the landing and examination of food-stuffs in the Port, for the year ending the 31st December 1925.

The Plymouth Port Sanitary Authority was constituted in the year 1882 by a provisional order of the Local Government Board dated 16th May 1882, which was subsequently confirmed by Parliament and also by an amending Order for the Permanent Constitution of the Port Sanitary Authority of the 4th November 1902. This Order came into operation on the 1st December 1902. On the 9th November 1923, the Corporation of Plymouth was constituted the Port Sanitary Authority and the Plymouth Corporation Act 1923 contains the following provisions : -

PART XII.

ARTICLE 123.

- (1) The Corporation shall be permanently constituted the Port Sanitary Authority for the Port of Plymouth and shall hold their first meeting as such Port Sanitary Authority during the month of November Nineteen Hundred and Twenty Three.
- (4) The Corporation shall keep separate accounts of their revenue and expenditure as Port Sanitary Authority.

ARTICLE 127.

The jurisdiction of the Port Sanitary Authority shall extend to the whole of the Port of Plymouth together with the waters of the Port and all docks, basins, harbours, creeks, rivers, channels, roads, bays and streams, within the Port, and the place or places which may from time to time be appointed as the Customs Boarding Station or Stations of the Port, and the place or places for the time being appointed for the mooring or anchoring of ships for the port, under any Regulations for the prevention of the spread of diseases issued under the Authority of the Statutes in that behalf, and for the purposes of any such Regulations as aforesaid, shall also extend to any ship which in pursuance thereof, or of any directions given thereunder, is moored or anchored at the place appointed thereunder, as aforesaid or which is on its way thither.

The limits of the Port of Plymouth as defined by His Majesty's Customs : -

"Commence from the west side of the Erme mouth at the entrance into Bigbury Bay, in a supposed direct or right line westward into a Headland commonly called Rame Head, and from thence in a supposed direct or right line into the East of a river called the Seaton, together with "

PLYMOUTH PORT SANITARY AUTHORITY.

Port Sanitary Officer, Plymouth.  
31st December 1925.

TO THE CHAIRMAN AND MEMBERS OF THE

PLYMOUTH PORT SANITARY COMMITTEE.

Gentlemen,

In accordance with the duty imposed by the Ministry of Health Sanitary Officers Order 1922, and Circular 651, December 1925, I have the honour to submit to you my second Annual Report on the Health of the floating population, and the work of your officials in connection with the sanitary conditions and inspection of vessels, examination of aliens, and the landing and examination of food-stuffs in the Port, for the year ending the 31st December 1925.

The Plymouth Port Sanitary Authority was constituted in the year 1882 by a provisional order of the Local Government Board dated 10th May 1882, which was subsequently confirmed by Parliament and also by an amending Order for the Permanent Constitution of the Port Sanitary Authority of the 4th November 1902. This Order came into operation on the 1st December 1902. On the 9th November 1923, the Corporation of Plymouth was constituted the Port Sanitary Authority and the Plymouth Corporation Act 1923 contains the following provisions: -

PART XII.

ARTICLE 124.

- (1) The Corporation shall be permanently constituted the Port Sanitary Authority for the Port of Plymouth and shall hold their first meeting as such Port Sanitary Authority during the month of November Nineteen Hundred and Twenty Three.
- (4) The Corporation shall keep separate accounts of their revenue and expenditure as Port Sanitary Authority.

ARTICLE 127.

The Jurisdiction of the Port Sanitary Authority shall extend to the whole of the Port of Plymouth together with the waters of the Port and all docks, basins, harbours, creeks, rivers, channels, roads, dyes and streams, within the Port, and the place or places which may from time to time be appointed as the Customs Boarding Station or Stations of the Port, and the place or places for the time being appointed for the mooring or anchoring of ships for the Port, under any Regulations for the prevention of the spread of diseases issued under the Authority of the Statutes in that behalf, and for the purposes of any such Regulations as aforesaid, shall also extend to any ship which in pursuance thereof, or of any directions given thereunder, is moored or anchored at the place appointed thereunder, as aforesaid or which is on its way thither.

The limits of the Port of Plymouth as defined by His Majesty's

Customs: -

"Commence from the west side of the Brixton Mouth at the entrance into Brixton Bay, in a supposed direct or right line westward into a Headland commonly called Brixton Head, and from thence in a supposed direct or right line into the East of a river called the Brixton, together with"

"all bays, havens, harbours, sounds, bars, rivers, streams, strands, channels, creeks, roads, shores, and places within the said limits contained, and which said limits are also delineated and shown by the plan or chart thereof thereto annexed marked A. (Extract from Return to Exchequer writ filed and enrolled at Westminster in the 4th year of the reign of Queen Victoria - i.e. in 1841.). The Boarding Stations for all vessels arriving at or departing from the Port of Plymouth and the Creek of Calstock, to bring to for the Boarding or landing of Officers of Customs, are that portion of the Sound set apart as the anchorage ground for merchant vessels, also the Cattewater."

A small map has been printed from which you will readily see the extent of the foreshore which your officials have to patrol from time to time, making the necessary visits to the vessels discharging or loading at the various wharves, docks, etc., in the execution of their duties.

The Port of Plymouth is one of the finest ports of call in Europe. Unlike the ports of Southampton, London, Cherbourg, Le Havre, Bremerhaven and Rotterdam, Captains need feel no anxiety about catching tides as there is enough water in the Sound and Cawsand Bay, even for the largest vessels and the Port Officials are always ready to clear them, no matter what time of day or night they may arrive.

The principal lines of steamers making this a port of call for the purpose of landing of passengers, mails, and specie are as follows:-

Australian Commonwealth....	Australian ports.
Aberdeen Steamship Company.....	Cape Town and Australian ports.
American Line.....	New York.
British India Company.....	Indian ports.
Cunard Line.....	New York, Montreal and Quebec.
Dutch West India Mail.....	West Indies.
Elder Dempster Company.....	West Coast of Africa.
French Line.....	New York and West Indies.
Hamburg American Line.....	Spain, Cuba and Mexico.
Henderson Line.....	Rangoon.
Holland American.....	New York.
Norddeutscher Lloyd.....	New York.
Ozean Line.....	Mexico and Cuba.
Orient Line.....	Australian ports.
Peninsular and Orient.....	India, China, Japan, Australia and Colombo.
Royal Mail.....	New York.
Red Star Line.....	New York.
Union Castle.....	Cape Town and East Coast of Africa.
United States Lines.....	New York.
White Star Line.....	New York.

The Cunard Company announce that next year in addition to their ordinary service, they intend to inaugurate a new service of four vessels CAMERONIA, CARMANIA, CARONIA, and LANCASTRIA, from New York to Plymouth and London.

The Hamburg-American Line have opened a branch office in Plymouth and the ships of their West Indian Service commenced calling at Plymouth during December.

The Chief Ports, Foreign and British, with which the Port has most trade, and the principal imports and exports are as follows:-

#### IMPORTS.

Baltimore.....	Grain.
Brest, Ghent, La Paix, Paimpol )	Potatoes, Green Peas, Strawberries,
Plougastel, Perros, Roscoff, )	Cauliflowers, Carrots, Onions, Parsnips,
St Malo, Treguier.....	and Brandy.
Beunos Ayres and Tampico.....	Grain.
Melbourne and Sydney.....	Grain.
Adessa and Novorossisk.....	Grain.
Antwerp.....	Carrots, Onions, Potatoes, Sugar, Lard and Parsnips etc.
Montreal, Quebec, Vancouver.....	Grain.
Iquique.....	Nitrate.

"all bays, havens, harbours, sounds, bays, rivers, streams, straits, channels, creeks, roads, shores, and places within the said limits contained, and which said limits are also delineated and shown by the plan or chart thereof hereto annexed marked A." (Excerpt from Return to Exchequer writ filed and enrolled at Westminster in the 4th year of the reign of Queen Victoria - i.e. in 1841.)

The Boarding Stations for all vessels arriving at or departing from the Port of Plymouth and the Creek of Calstock, so long as for the Boarding or landing of Officers of Customs, are that portion of the ground set apart as the anchorage ground for merchant vessels, also the "Cattewater."

A small map has been printed from which you will readily see the extent of the foreshore which your officials have to patrol from time to time, making the necessary visits to the vessels discharging or loading at the various wharves, docks, etc., in the execution of their duties.

The Port of Plymouth is one of the finest ports of call in Europe. Unlike the ports of Southampton, London, Cherbourg, Le Havre, Bremen, and Rotterdam, Captains need feel no anxiety about anchoring there as there is enough water in the Sound and Gwenn Bay, even for the largest vessels and the Port Officials are always ready to clear them, no matter what time of day or night they may arrive.

The principal lines of steamers making this a port of call for the purpose of landing of passengers, mails, and specie are as follows:-

Australian Commonwealth.....Australian ports.  
 Aberdeen Steamship Company, Cape Town and Australian ports.  
 American Line.....New York.  
 British India Company.....Indian ports.  
 Cunard Line.....New York, Montreal and Quebec.  
 Dutch West India Mail.....West Indies.  
 Elder Dempsey Company.....West Coast of Africa.  
 French Line.....New York and West Indies.  
 Hamburg American Line.....Spain, Cuba and Mexico.  
 Henderson Line.....Bangkok.  
 Holland American Line.....New York.  
 Norddeutscher Lloyd.....New York.  
 Ocean Line.....Mexico and Cuba.  
 Orient Line.....Australian ports.  
 Peninsular and Oriental India, China, Japan, Australia and Colombo.  
 Royal Mail.....New York.  
 Red Star Line.....New York.  
 Union Castle.....Cape Town and West Coast of Africa.  
 United States Lines.....New York.  
 White Star Line.....New York.

The Cunard Company announce that next year in addition to their ordinary service, they intend to inaugurate a new service of four vessels CAMERONIA, CAMERONIA, and CAMERONIA, from New York to Plymouth and London.

The Hamburg-American Line have opened a branch office in Plymouth and the ships of their West India Service commenced calling at Plymouth during December.

The United States, Foreign and British, with which the port has most trade, and the principal imports and exports are as follows:-

# IMPORTS.

Baltimore.....Grain.  
 Bristol, Great, La Palis, Liverpool, Green Pass, Greenberies, Flour, Great, La Palis, Rosport, Cauliflower, Carrots, Onions, Parsnips, St. Malo, Trevel, and Brandy.  
 Buenos Ayres and Tandio.....Grain.  
 Melbourne and Sydney.....Grain.  
 Madras and Novorossiysk.....Grain.  
 Antwerp.....Carrots, Onions, Parsnips, Sugar, Lard, and Parsnips etc.  
 Montreal, Quebec, Vancouver.....Grain.  
 Leningrad.....Nitrate.

IMPORTS CONTINUED.

Hamburg.....	Sugar, Potatoes, Onions, Machinery, Toys, Kanite, Enamelware, Musical Instruments, Hardware, Granite, Glassware, etc..
Amsterdam and Rotterdam...	Carcasses of Pigs, Sugar, Potatoes, Lard, Onions, Cheese, Carrots, Paper, Fruit Pulp, Cream of Tartar, Glass (Bottles), Hardware, etc..
Göthenburg.....	Timber, matches, and wood goods.
Karachi and Basrah.....	Grain.
St. Johns, Newfoundland...	Codfish.
<hr/>	
Channel Islands.....	Fats of sorts, Fruit and Vegetables.
Aberdeen, Dundee & Kirkcaldy....	Potatoes.
Bristol.....	Fruit, Vegetables, Paint, Oils & Cattle Foods, etc.
Belfast.....	Potatoes, Fruits, Vegetables, Government Stores, Bacon etc.
Cardiff and Swansea.....	Coal and Flour.
Cork.....	Oats, Butter and Salted Pork.
Glasgow, London and Liverpool...	Fruit, Vegetables, Canned Goods, Flour Sugar, Dried, preserved and fresh Fruits, Cattle foods, etc.
Newcastle, Sunderland & Blythe..	Coal.
Waterford.....	Oats and Margarine.

EXPORTS.

Fish is sent to Spain and Italy in barrels, and trawlers take large cargoes to Germany.  
Pitch is sent to France.  
China Clay is sent to Germany and America.

The existing facilities for preventing the importation of infectious disease are as follows : -

Plymouth Pilots and Customs Officers are provided with a list of Ports infected with the major infectious diseases. This list is amended from time to time according to epidemic prevalence; weekly reports of the diseases throughout the world being supplied to the Port Medical Officer by the Ministry of Health. Any ship reporting the occurrence of any of these diseases during the homeward voyage is taken by the Pilot to the quarantine anchorage in Jennycliffe Bay, where it is at once visited by the Port Medical Officer.

All homeward bound mail and passenger vessels are visited by the Port Medical Officer, who interrogates the Ship's Surgeon and receives a medical certificate from him stating the health condition of the ship.

In the case of cargo vessels the Officers of the Customs board every ship, part of their duty being to question the Captain as to the health of those on board. In cases of illness of an infectious nature, immediate notice is given to the Port Medical Officer, who visits the ship forthwith.

Complete co-ordination exists between the Naval Health Authorities and the Port Sanitary Officials. Weekly notifications of infectious diseases occurring in the Port are interchanged between the Naval Health Officer (Surgeon Commander C.H.Dawe.) and the Port Medical Officer.

A letter of instruction has been distributed to all passenger ships calling here requesting wireless information to be sent to the Port Medical Officer, twenty-four hours before the ships arrival, when cases of sickness have occurred during the voyage so that adequate arrangements can be made beforehand. A copy of this letter was printed in my last years report.

The use of wireless apparatus for indicating the approximate time of the ships arrival has not yet been reduced to a fine art. Whereas some ships give the approximate time of arrival very accurately, other ships do not, and much valuable time is wasted afloat waiting for ships whose wireless time of arrival is often hours overdue.

IMPORTS CONTINUED.

Hamburg.....Sugar, Potatoes, Onions, Machinery, Toys, Kanite  
Hammam, Musical Instruments, Hardware,  
Granite, Glassware, etc..  
Amsterdam and Rotterdam...Cakes of Pils, Sugar, Potatoes, Lard, Onions,  
Cheese, Cakes, Paper, Fruit Pulp, Cream of  
Tartar, Glass (Bottles), Hardware, etc..  
Gothenburg.....Timber, matches, and wood goods,  
Kaschi and Bazarah.....Grain,  
St. Johns, Newfoundland...Codfish.

Channel Islands.....Fats of sorts, Fruit and Vegetables.  
Aberdeen, Dundee & Kirkcaldy...Potatoes.  
Bristol.....Fruit, Vegetables, Paint, Oil & Cattle  
Foods, etc..  
Belfast.....Potatoes, Fruit, Vegetables, Government  
Stores, Bacon etc..  
Cardiff and Swansea.....Coal and Flour,  
Gork.....Cats, Butter and Salted Pork.  
Glasgow, London and Liverpool...Fruit, Vegetables, Canned Goods, Flour,  
Sugar, Dried, preserved and fresh fruits,  
Cattle foods, etc..  
Newcastle, Sunderland & Blythe...Coal.  
Waterford.....Cats and Margarine.

health of those on board. In cases of illness of an infectious nature,  
immediate notice is given to the Port Medical Officer, who visits the  
ship forthwith.

Complete co-ordination exists between the Naval Health  
Authorities and the Port Sanitary Officials. Weekly notifications of  
infectious diseases occurring in the Port are interchanged between the  
Naval Health Officer (Surgeon Commander C.H. Dawe), and the Port Medical  
Officer.

A letter of instruction has been distributed to all passenger  
ships calling here requesting wireless information to be sent to the Port  
Medical Officer, twenty-four hours before the ship's arrival, when cases  
of sickness have occurred during the voyage so that adequate arrangements  
can be made beforehand. A copy of this letter was printed in my last  
year's report.

The use of wireless apparatus for indicating the approximate  
time of the ship's arrival has not yet been reduced to a fine art. Whereas  
some ships give the approximate time of arrival very accurately, other  
ships do not, and much valuable time is wasted whilst waiting for ships  
whose wireless time of arrival is often hours overdue.

Folio 4.

The number of hours nightwork for the year has been over 791, and it would be quite impossible for your Port Medical Officer to carry out the necessary work if it were not for the ready and able help afforded by the two Deputy Port Medical Officers, Dr. E. J. Hynes and Dr. G. D. Kettlewell.

During the year 2,657 vessels, with a registered tonnage of 4,884,659 and carrying crews numbering 165,944 and having on board 149,369 passengers, 29,367 of whom landed here. In addition 9,039 passengers arrived here on coastwise vessels.

The floating population dealt with by your officials was therefore 344,592 a number considerably greater than that of the Borough.

There were 59 deaths and 625 cases of sickness reported by the Masters of Ships' Surgeons as having occurred during the homeward voyage, 463 being of an infectious nature notifiable to the Ministry of Health and Naval Health Officer, Mount Wise, and 70 cases were landed and removed to the Borough Hospitals, South Devon and East Cornwall Hospital, Greenbank Infirmary, Royal Albert Hospital, Local Nursing Homes, or sent direct to their homes for treatment.

Cases of an infectious nature are placed in your motor launch "CLYTIE" and removed to the Hospital Ship "FLAMINGO" (22 beds) in the case of Cholera, Plague, Yellow Fever or Smallpox; other cases being transferred ashore where they are met by the Borough Motor Ambulance which takes them to the Borough Infectious Diseases Hospitals, Mount Gold and Swilley.

The Borough Disinfecting Apparatus is used for the disinfection of infected clothing etc., in the absence of the necessary appliances at the Hospital Ship. A special bathroom at the Borough Hospital, Mount Gold has been placed at the disposal of the Port Sanitary Authority for the cleansing of verminous persons under the Aliens Order 1920, and the Port Sanitary Authorities (Infectious Diseases) Regulations 1920; and the steam disinfecter is used for the disinfecting of verminous clothing.

One member of the crew of a cargo vessel required cleansing during the year.

The Chief Diseases causing anxiety during the year were Smallpox, Malaria and Plague.

SMALLPOX.

On the 19th February the s.s. "MALDA" arrived from Calcutta. The ships surgeon reported having landed a case of smallpox at Colombo during the homeward voyage. The usual precautions were taken to prevent the spread of infection. The crew and passengers landing here were medically examined, names and addresses of the latter being taken and forwarded to the Medical Officers of Health of their destinations. The vessel then proceeded to London, full particulars were forwarded to the Chief Medical Officer, Ministry of Health, and the Port Medical Officer, London.

On the 4th March the P. and O. Steamer "KAISAR-I-HIND" arrived from Bombay. After boarding the vessel the ships surgeon informed me that he had landed a case of smallpox at Colombo on the 18th February. All precautions were taken here to prevent the spread of infection.

On the 12th March the P. and O. Steamer "MOREA" reported having landed a case of smallpox at Gibraltar on the 9th March 1925. The usual precautions were taken here.

On the 15th April the P. and O. Steamer "NARKUNDA" arrived from Bombay reporting that a case of smallpox had been landed at Marseilles on the 10th April. The crew numbering 415 persons and 118 passengers landing were medically examined and all precautions taken to prevent the spread of the disease.

On the 16th April the British India Steamship "MERKARA" arrived from Calcutta reporting having landed a case of smallpox at Colombo on the 16th March 1925. The crew of 169 and 33 passengers landing were medically examined and the usual precautions taken.

The number of hours nightwork for the year has been over 791 and it would be quite impossible for your Port Medical Officer to carry out the necessary work if it were not for the ready and able help afforded by the two Deputy Port Medical Officers, Dr. E. J. Hynes and Dr. G. D. Kettwell.

During the year 2,627 vessels, with a registered tonnage of 4,884,629 and carrying crews numbering 162,944 and having on board 149,309 passengers, 29,367 of whom landed here. In addition 9,039 passengers arrived here on coastwise vessels.

The floating population dealt with by your officials was therefore 344,592 a number considerably greater than that of the Borough.

There were 59 deaths and 625 cases of sickness reported by the Masters of Ships, Surgeons as having occurred during the homeward voyage, 463 being of an infectious nature notifiable to the Ministry of Health and Naval Health Officer, Mount Wise, and 70 cases were landed and removed to the Borough Hospitals, South Devon and East Cornwall Hospital, Greenbank Infirmary, Royal Albert Hospital, Local Nursing Homes, or sent direct to their homes for treatment.

Cases of an infectious nature are placed in your motor launch "GLYTHIE" and removed to the Hospital Ship "PLAMINGO" (22 beds) in the case of Cholera, Plague, Yellow Fever or Smallpox; other cases being transferred ashore where they are met by the Borough Motor Ambulance which takes them to the Borough Infectious Diseases Hospital, Mount Gold and Willey.

The Borough Disinfecting Apparatus is used for the disinfection of infected clothing etc., in the absence of the necessary appliances at the Hospital Ship. A special bathroom at the Borough Hospital, Mount Gold has been placed at the disposal of the Port Sanitary Authority for the cleansing of verminous persons under the Alien Order 1920, and the Port Sanitary Authorities (Infectious Diseases) Regulations 1920; and the steam disinfectors is used for the disinfecting of verminous clothing.

One member of the crew of a cargo vessel required cleansing during the year.

The Chief Diseases causing anxiety during the year were Smallpox, Malaria and Plague.

SMALLPOX.

On the 19th February the s.s. "MALDA" arrived from Calcutta. The ship's surgeon reported having landed a case of smallpox at Colombo during the homeward voyage. The usual precautions were taken to prevent the spread of infection. The crew and passengers landing here were medically examined, names and addresses of the latter being taken and forwarded to the Medical Officer of Health of their destinations. The vessel then proceeded to London, full particulars were forwarded to the Chief Medical Officer, Ministry of Health, and the Port Medical Officer, London.

On the 4th March the P. and O. Steamer "KAISAR-I-HIND" arrived from Bombay. After boarding the vessel the ship's surgeon informed me that he had landed a case of smallpox at Colombo on the 18th February. All precautions were taken here to prevent the spread of infection.

On the 12th March the P. and O. Steamer "MORLA" reported having landed a case of smallpox at Gibraltar on the 9th March 1925. The usual precautions were taken here.

On the 15th April the P. and O. Steamer "MANKUNDA" arrived from Bombay reporting that a case of smallpox had been landed at Marseilles on the 10th April. The crew numbering 415 persons and 118 passengers landing were medically examined and all precautions taken to prevent the spread of the disease.

On the 16th April the British India Steamship "MURKARA" arrived from Calcutta reporting having landed a case of smallpox at Colombo on the 16th March 1925. The crew of 169 and 35 passengers landing were medically examined and the usual precautions taken.

On the 27th April the British India Steamship "MODASA" arrived from Karachi reporting that a case of smallpox had been landed at Bombay on the 27th March. The crew numbering 145 and 162 passengers landing were medically examined and the usual precautions taken.

On the 22nd July the P. and O. S.S. "KAISAR-I-HIND" reported having a case of suspected smallpox on board. On examining the patient I was of the opinion that the case was not one of smallpox and the vessel proceeded to London.

On the 25th November the P. and O. S.S. "RANCHI" arrived at Plymouth from Bombay. The ships surgeon reported that a case of smallpox had been landed at Suez on the 15th November 1925. The ships crew and passengers landing here were examined and their names and addresses forwarded to the Medical Officers of Health of their destinations.

On the 15th August the Cunard Steamer "CARONIA" arrived here reporting two cases of suspected smallpox. On examination however, I was of the opinion that the cases were not smallpox.

Smallpox is therefore constantly knocking at our doors from the East, and now that the Hospital Ship "MAUD" has been sold, the provision of a smallpox Hospital ashore is more imperative than ever.

#### MALARIA.

During the year 213 cases were notified. The following were the most important of these.

On the 23rd February the s.s. "MULESERA" reported having 15 cases of Malaria on board.

On the 5th September the s.s. "DELTA" reported 14 cases of Fever. On examination these were found to be convalescent Malaria.

On the 14th October the s.s. "RANPURA" reported having 35 cases of sickness, 31 of these cases were Malaria.

On the 28th October the s.s. "CHINA" reported having had 60 cases of Malaria.

On the 7th December the s.s. "MERKARA" reported One Death from Heart Disease accelerated by Malaria, and also 20 cases of Malaria.

In most of these cases the ships surgeon reported that although anti-malarial precautions, such as fumigation to destroy mosquitoes, use of netting, and prophylactic doses of quinine were taken on the ship, the disease was contracted ashore at Bombay where mosquito destruction does not seem to be carried out as actively as is possible.

#### PLAGUE.

Although Plague has continued throughout the entire East the epidemic has considerably abated during 1925.

The Chief Ports infected with Plague during the year were : -

In Europe : Constantinople, Teneriffe, Salonica, Piraeus and Marseilles.

In Asia : Jaffa, Baghdad, Calcutta, Bombay, Rangoon, Karachi, Colombo, Singapore, Bangkok, and Shanghai.

In Africa : Alexandria, Algiers, Tunis, Port Said, Suez, Lagos, Madagascar and Mauritius.

In America : Los Angeles, New Orleans, Bahia, and Guayaquil.

There were 184 vessels arrived at Plymouth during the year from plague infected ports to discharge passengers. I am glad to say that there were no cases or suspected cases on any of them.

As the vessels only stay a few hours no attempt at rat destruction is possible here. This is done at the terminal port.

On the 27th April the British India Steamship "MODARA" arrived from Karachi reporting that a case of amaliop had been landed at Bombay on the 27th March. The crew numbering 145 and 102 passengers landing were medically examined and the usual precautions taken.

On the 22nd July the P. and O. S. S. "KALBAR-I-HIND" reported having a case of suspected amaliop on board. On examining the patient I was of the opinion that the case was not one of amaliop and the vessel proceeded to London.

On the 25th November the P. and O. S. S. "RANCHO" arrived at Plymouth from Bombay. The ship surgeon reported that a case of amaliop had been landed at Guas on the 15th November 1925. The ship crew and passengers landing here were examined and their names and addresses forwarded to the Medical Officers of Health of their destinations.

On the 15th August the Gunard Steamer "CARONIA" arrived here reporting two cases of suspected amaliop. On examination however, I was of the opinion that the cases were not amaliop.

Amaliop is therefore constantly knocking at our doors from the East, and now that the Hospital ship "MAUD" has been sold, the provision of a amaliop Hospital ashore is more imperative than ever.

### Malaria.

During the year 213 cases were notified. The following were the most important of these.

On the 23rd February the S. S. "MULBERRA" reported having 15 cases of Malaria on board.

On the 5th September the S. S. "DELTA" reported 14 cases of Fever. On examination these were found to be convalescent Malaria.

On the 14th October the S. S. "RANPURA" reported having 35 cases of sickness, 31 of these cases were Malaria.

On the 28th October the S. S. "CHINA" reported having had 60 cases of Malaria.

On the 7th December the S. S. "MERKARA" reported one Death from Heart Disease accelerated by Malaria, and also 20 cases of Malaria.

In most of these cases the ship surgeon reported that although anti-malarial precautions, such as fumigation to destroy mosquitoes, use of netting, and prophylactic doses of quinine were taken on the ship, the disease was contracted ashore at Bombay where mosquito destruction does not seem to be carried out as actively as is possible.

### Plague.

Although Plague has continued throughout the entire West the epidemic has considerably abated during 1925.

The Chief Ports infected with Plague during the year were :-

In Europe : Constantinople, Tenexite, Salonica, Piræus and Marseille.

In Asia : Jatta, Baghdad, Calcutta, Bombay, Rangoon, Karachi, Colombo, Singapore, Bangkok, and Shanghai.

In Africa : Alexandria, Algiers, Tunis, Port Said, Suas, Lagos, Madagascar and Mauritius.

In America : Los Angeles, New Orleans, Bahia, and Guayaquil.

There were 184 vessels arrived at Plymouth during the year from plague infected ports to discharge passengers. I am glad to say that there were no cases or suspected cases on any of them.

As the vessels only stay a few hours no attempt at rat destruction is possible here. This is done at the terminal ports.

RATS AND PLAGUE.

The campaign for the extermination of rats in the area of the Port Sanitary Authority has continued during the year with gratifying results.

At the beginning of the year a number of rats were sent to Dr. J. J. Simpson, Keeper of the Department of Zoology, National Museum of Wales, Cardiff, who very kindly identified them for us. He found that we had in the docks, not only the ordinary brown rat (*Rattus norvegicus*) but also two species of black rat (*Rattus rattus rattus*) and (*Rattus rattus alexandrinus*) as well. Although both brown and black rats transmit plague, the black is the most dangerous one because it is a climber and haunts houses. The brown rat is however one of its worst enemies. A careful search was made and it was found that the black rats were habitating the upper floor of one grain shed where they were taking refuge from the brown rats in the louvred windows. An active campaign was instituted by our rat catchers coupled with a request to have wire netting put over these windows and I am glad to say that for the past three months no black rats have been seen in the docks.

Preventive measures such as the proper mooring of vessels, the use of rat guards on hawsers, and the rat proofing of vessels have continued.

Several sheds have had concrete floors and sides put in instead of wood, and one shed in the Great Western Docks has been completely re-built, although not to the plan advised by the Port Medical Officer, it is a distinct improvement on the old shed.

In addition regular campaigns were made by the Port Sanitary Rat Officer and his assistant, the rat catchers of the Great Western Railway Company and by the owners of private stores and warehouses.

A temporary rat catcher has been employed to assist the Port Sanitary Authority Rat Officers when occasion has arisen.

Holes have been put in the doors of stores for the easy access of cats. One owner has tried mongeese for rat destruction and another pays 3d a head for all rats killed by his staff.

During the year 21,380 poison baits were laid in the various stores and sheds in the Docks, of these 10,439 were eaten or disappeared the results of which could not be ascertained as the rodents go to their burrows to die. In addition however, 2,879 dead bodies of rats killed by traps, cats and dogs were obtained. 1,282 of these I have examined macroscopically and 115 were sent to the Borough Pathologist (Dr. Eric Wordley) for bacteriological examination for Plague, with negative results.

SHELLFISH.

Oysters are cultivated in waters within the jurisdiction of the Plymouth Port Sanitary Authority, - in the River Yealm, in the River Tamar near Saltash, and in the River Lynher at Saltash.

The Yealm Oyster Fisheries are at Steer Point, Brixton, and the beds are used for relaying purposes. Samples have been sent to the Borough Pathologist for bacteriological examination with satisfactory results. They are not liable to sewage contamination.

The Oyster Fisheries in the River Tamar and River Lynher are liable to sewage contamination (sewage from Saltash), and are only permitted to be sold to the Macfisheries Limited for ~~relaying~~ restocking their grounds, Dutchy Oyster Farm, Port Navis Creek, and Helford River. Samples bacteriologically examined indicate sewage pollution.

Crabs and lobsters are caught in the Sound and regular bacteriological examinations of the waters of these fisheries have been conducted during the summer, details of which are attached. They indicate sewage contamination but since the crabs and lobsters are well boiled before being consumed they are not likely to be sources of infection.

The campaign for the extermination of rats in the area of the Port Sanitary Authority has continued during the year with gratifying results.

At the beginning of the year a number of rats were sent to Dr. J. L. Simpson, Keeper of the Department of Zoology, National Museum of Wales, Cardiff, who very kindly identified them for us. He found that we had in the docks, not only the ordinary brown rat (*Rattus norvegicus*) but also two species of black rat (*Rattus rattus*) and (*Rattus alexandrinus*) as well. Although both brown and black rats transmit plague, the black in the most dangerous one because it is a climber and enters houses. The brown rat is however one of the worst enemies. A careful search was made and it was found that the black rats were hiding in the upper floor of one grain shed where they were taking refuge from the brown rats in the lower windows. An active campaign was instituted by our rat catchers coupled with a request to have wire netting put over these windows and I am glad to say that for the past three months no black rats have been seen in the docks.

Preventive measures such as the proper mooring of vessels, the use of rat guards on hawsers, and the rat proofing of vessels have continued.

Several sheds have had concrete floors and sides put in instead of wood, and one shed in the Great Western Docks has been completely re-built, although not to the plan advised by the Port Medical Officer, it is a distinct improvement on the old shed.

A temporary rat catcher has been employed to assist the Port Sanitary Authority Rat Officer when occasion has arisen.

Holes have been put in the doors of stores for the easy access of rats. One owner has tried measures for rat destruction and another pays 3d a head for all rats killed by his staff.

During the year 21,380 poison baits were laid in the various stores and sheds in the docks, of these 10,459 were eaten or disappeared the results of which could not be ascertained as the rodents go to their burrows to die. In addition however, 2,879 dead bodies of rats killed by traps, cats and dogs were obtained. 1,382 of these I have examined macroscopically and 115 were sent to the Borough Pathologist (Dr. Eric Wordley) for bacteriological examination for plague, with negative results.

#### SHHELLFISH.

Oysters are cultivated in waters within the jurisdiction of the Plymouth Port Sanitary Authority, - in the River Yealm, in the River Tamar near Saltash, and in the River Lynher at Saltash.

The Yealm Oyster Fisheries are at Great Point, Brimston, and the beds are used for relaying purposes. Samples have been sent to the Borough Pathologist for bacteriological examination with satisfactory results. They are not liable to sewage contamination.

The Oyster Fisheries in the River Tamar and River Lynher are liable to sewage contamination (sewage from Saltash), and are only permitted to be sold to the Fisheries limited for resale restoring their grounds, Dutch Oyster Farm, Port Navi's Creek, and Helford River. Samples bacteriologically examined indicate sewage pollution.

Crabs and lobsters are caught in the Sound and regular bacteriological examinations of the waters of these fisheries have been conducted during the summer, details of which are attached. They indicate sewage contamination but since the crabs and lobsters are well boiled before being consumed they are not likely to be sources of infection.

BATHING POOLS.

Regular inspections of the bathing pools in the Port Sanitary Area have been made by your officials and samples of water taken at all different states of the tides for bacteriological examination. The results show the presence of bacillus coli in 1 cubic centimetre at most times and tides in the pools of the Sound.

The building of a swimming bath where some system of filtration or disinfection of the water could be introduced is a matter for consideration.

VENEREAL DISEASES.

On the 17th November 1925 the Ministry of Health notified Port Sanitary Authorities that an International Agreement had been ratified by His Majesty on behalf of Great Britain and Northern Ireland under which the contracting parties undertake that facilities shall be available at each of their chief sea and river ports for the gratuitous treatment of merchant seamen suffering from Venereal Disease, without distinction of nationality and for the provision of sufficient medical supplies to carry out necessary treatment during the voyage to their next port of call and that Port Sanitary Officers on first visiting ships shall furnish a supply of notices for the crew stating the address of the treatment centres for Venereal Diseases and the hours of the clinics. The Venereal Diseases Centre for the Port of Plymouth is the South Devon and East Cornwall Hospital and the Medical Officers in charge, Dr. G.D. Kettlewell and Dr. E.J. Hynes, are also the Deputy Port Medical Officers. Notices regarding this treatment centre have been given to the Masters and Crew of all vessels entering the port for some years past.

MEDICAL INSPECTION OF ALIENS UNDER THE ALIEN'S ORDER, 1920.

All aliens, except alien seamen, landing at Plymouth are either medically inspected or examined, the inspections being carried out on the vessels before the passengers are landed. Instructions are issued from time to time by the Ministry of Health as to the exclusion of persons suffering from certain diseases. A Statistical Table attached will give some idea of the work done.

SANITARY AND FOOD INSPECTION.

Your Inspector (Mr. R.W. Weale.) whom, I am glad you have granted two years extension of service, has continued to do good work in the inspection of vessels and foodstuffs.

His relations with owners, captains and crews of vessels arriving here have been such that in no case was any legal proceeding necessary either to seize unsound food or to have unsanitary conditions remedied.

During the year 179 informal notices were issued to remedy 912 insanitary defects, and full details will be found in your Inspector's reports.

WATER SUPPLY TO VESSELS.

Ships coming alongside the quays obtain their fresh water supply from the Borough Mains. Vessels in the Sound are supplied by water from the Borough, carried out by two water boats. These are regularly inspected as to cleanliness of tanks, hoses and appliances. Samples of water from the tanks of the water boats have been bacteriologically examined and as a result it was necessary to have the tanks in one case disinfected by steam.

On the 1st June 1925 the Public Health (Imported Food) Regulations 1925, came into force. These consolidate and amend the Public Health (First Series Unsound Food) Regulations 1908, the Public Health (Foreign Meat) Regulations 1908., and the Public Health (Foreign Meat) Amending Regulations 1909.

The provisions for dealing with food which is found on examination to be unsound are substantially the same as in the existing

BATHING POOLS

Regular inspections of the bathing pools in the Port Sanitary Area have been made by your officials and samples of water taken at all different stages of the slides for bacteriological examination. The results show the presence of bacillus coli in 1 cubic centimetre at most times and slides in the pools of the Sound.

The building of a swimming bath where some system of filtration or disinfection of the water could be introduced is a matter for consideration.

VENEREAL DISEASES

On the 17th November 1925 the Ministry of Health notified Port Sanitary Authorities that an International Agreement had been ratified by His Majesty on behalf of Great Britain and Northern Ireland under which the contracting parties undertake that facilities shall be available at each of their chief sea and river ports for the treatment of venereal diseases, without distinction of nationality and for the provision of sufficient medical supplies to carry out necessary treatment during the voyage to their next port of call and that Port Sanitary Officers on their visiting ships shall furnish a supply of notices for the crew stating the address of the treatment centres for Venereal Diseases and the hours of the clinics. The Venereal Diseases Centre for the Port of Plymouth is the South Devon and East Cornwall Hospital and the Medical Officers in charge, Dr. G.D. Kesteven and Dr. W.L. Symes, are also the Deputy Port Medical Officers. Notices regarding this treatment centre have been given to the Masters and Crew of all vessels entering the port for some years past.

MEDICAL INSPECTION OF ALIENS UNDER THE ALIEN'S ORDER, 1920.

All aliens, except alien seamen, landing at Plymouth are either medically inspected or examined, the inspections being carried out on the vessels before the passengers are landed. Instructions are issued from time to time by the Ministry of Health as to the examination of persons suffering from certain diseases. A Statistical Table attached will give some idea of the work done.

SANITARY AND FOOD INSPECTION

Your Inspector (Mr. R.W. Weale), whom I am glad you have granted two years extension of service, has continued to do good work in the inspection of vessels and foodstuffs.

His relations with owners, captains and crews of vessels arriving here have been such that in no case was any legal proceeding necessary either to seize unsound food or to have unsanitary conditions remedied.

During the year 1925 informal notices were issued to remedy 912 insanitary defects, and full details will be found in your Inspector's reports.

WATER SUPPLY TO VESSELS

Ships coming alongside the quays obtain their fresh water supply from the Borough mains. Vessels in the Sound are supplied by water from the Borough, carried out by two water boats. These are regularly inspected as to cleanliness of tanks, hoses and appliances. Samples of water from the tanks of the water boats have been bacteriologically examined and as a result it was necessary to have the tanks in one case disinfected by steam.

On the 1st June 1925 the Public Health (Imported Food) Regulations 1925, came into force. These consolidate and amend the Public Health (Food) Regulations 1908, the Public Health (Food) Regulations 1908, and the Public Health (Food) Regulations 1909.

The provisions for dealing with food which is found on examination to be unsound are substantially the same as in the existing

regulations but Article 6 makes it a definite offence to import any article of food which has at any stage in its preparation been condemned in another Country.

The classes of overseas meat are divided into two groups. Prohibited Meat consists of meat detailed in a schedule, the importation of which is unconditionally prohibited, and conditionally admissible meat detailed in a schedule in which importation is prohibited unless accompanied by a recognised official certificate of the country of origin. An official certificate is now required also for lard, dripping, edible tallow and other rendered fats.

In administering these Regulations at Plymouth a certain difficulty was experienced in the interpretation of the terms "other rendered fats" and a cargo of Premier Jus from Argentine was held up on the 20th October 1925 for a few hours until the Ministry of Health was informed and an instruction obtained that Premier Jus did not come under within the Regulations.

During the Year your Hospital Ship "FLAMINGO" was painted inside and out, and ten beds and other stores transferred to her from the Hospital Ship "MAUD" when the latter was sold for breaking up. At present she has 22 beds in readiness not only for the reception of cases of plague, cholera, and yellow fever, but also, temporarily, for smallpox.

On the 12th May it was reported to you that the mooring chains of the "FLAMINGO" were rubbing and as a result the Naval Dockyard Authorities removed her to a buoy and thoroughly repaired her moorings.

It is thirteen years since she was in dry dock and it is imperative that she should be overhauled in the near future.

Your motor launch "CLYTIS" had her 12 year old engine examined in October and it being found worn and defective, a new 15 horse power Kelvin Sleeve engine was installed and the boat thoroughly repaired and painted.

I wish to thank Dr. O. Hall, Chief Medical Officer of the Borough and his present successor Dr. A.T. Nankivell, for much kindly advice and help during the year.

I take this opportunity also of expressing my appreciation and thanks to Dr. G.D. Kettlewell, Dr. E.J. Hynes, to the whole of the Staff, and the various bodies in connection with the administration of the Port, viz: --- The Naval Authorities, H.M. Collector of Customs and Staff, the Superintendent and Officials of the Great Western Docks, the Immigration Officers, the Agents and Staffs of the various Shipping Companies and the Consular Body, for their cordial co-operation on all occasions.

I have the honour to remain,

Gentlemen,

Your obedient Servant,

*G.A. Borthwick*

Port Medical Officer.

regulations but article 6 makes it a definite offense to import any article of food which has at any stage in its preparation been condemned in another country.

The classes of overseas meat are divided into two groups. Prohibited meat consists of meat detailed in a schedule, the importation of which is unconditionally prohibited, and conditionally admissible meat detailed in a schedule in which importation is prohibited unless accompanied by a recognized official certificate of the country of origin. An official certificate is now required also for lard, dripping, edible tallow and other rendered fats.

In administering these Regulations at Plymouth a certain difficulty was experienced in the interpretation of the terms "other rendered fats" and a cargo of Premier Jams from Argentina was held up on the 20th October 1925 for a few hours until the Ministry of Health was informed and an instruction obtained that Premier Jams did not come under the Regulations.

During the Year Your Hospital Ship "PLAMINGO" was painted inside and out, and ten beds and other stores transferred to her from the Hospital Ship "MAUD" when the latter was sold for breaking up. At present she has 22 beds in readiness not only for the reception of cases of plague, cholera, and yellow fever, but also, temporarily, for smallpox.

On the 12th May it was reported to you that the mooring chains of the "PLAMINGO" were rubbing and as a result the Naval Dockyard Authorities removed her to a buoy and thoroughly repaired her moorings.

It is thirteen years since she was in dry dock and it is imperative that she should be overhauled in the near future.

Your motor launch "GLITHIE" had her 12 year old engine examined in October and it being found worn and defective, a new 15 horse power Kelvin sleeve engine was installed and the boat thoroughly repaired and painted.

I wish to thank Dr. O. Hall, Chief Medical Officer of the Borough and his present successor Dr. A.T. Hankivell, for much kindly advice and help during the year.

I take this opportunity also of expressing my appreciation and thanks to Dr. G.D. Kesteven, Dr. E.J. Hynes, to the whole of the Staff, and the various bodies in connection with the administration of the Port, viz:-- The Naval Authorities, R.M. Collector of Customs and Staff, the Superintendent and Officials of the Great Western Dock, the Immigration Officers, the Agents and Staffs of the various Shipping Companies and the Consular Body, for their cordial co-operation on all occasions.

I have the honour to remain,

Gentlemen,

Your obedient servant,

*W.A. G. G. G.*

Port Medical Officer

ANNUAL REPORT OF THE PORT SANITARY AND FOOD INSPECTOR FOR THE YEAR 1925.

PLYMOUTH PORT SANITARY AUTHORITY.

Port Sanitary Offices,  
Millbay Docks, Plymouth.  
31st December 1925.

Dr. G. A. Borthwick, M.D., D.P.H., etd.,  
Port Medical Officer and Medical Inspector of Aliens,  
PLYMOUTH.

Sir,

In accordance with the Ministry of Health Circular dated December 1925, I beg to submit my reports in respect of my duties as Sanitary and Food Inspector for the year 1925.

In dealing with vessels arriving from infected areas discharging cargoes or part cargoes, the Local Government Board Orders 1907, relating to Plague, Cholera and Yellow Fever were strictly adhered to.

Notices were issued to vessels of all classes, loading and unloading cargoes, to remedy insanitary defects, and without exception I have found the Masters of the vessels ever ready to comply with the Informal notices served.

Should however, circumstances prevent the defects from being remedied at this port, permission has been given to complete the work at their next port of call, during the round voyage or at their home port, and a copy of the notice served has been sent to the Port Medical Officer at their destination.

Instructions as to the survey of masters and crews spaces were borne in mind during the inspection of vessels and any infringement of the Regulations of the Board of Trade was reported to the local officials.

All foodstuffs landed from coastwise or foreign ports were systematically examined.

Under the Public Health (Imported Food) Regulations 1925, 587 vessels were visited including 23 carrying grain.

Over 183 tons of foodstuffs were condemned as unsound, unwholesome, or unfit for food during the past year consisting principally of fats of sorts, fish, canned goods, fruit, vegetables and grain.

Several consignments of Pigs Carcasses were imported from Rotterdam and landed at the Great Western Docks for local merchants. Each carcass was examined and found to be in a good and healthy condition.

Owing to the exceptionally dry spring, the fruit and vegetable supply from Brest was very much less than for the past two years. At the same time the quality was exceptionally good. The quantities of strawberries and green peas arriving at the docks during the past five years were as follows : -

1921.....	126,100 parcels.	1,193 tons.
1922.....	34,136 ..	363 ..
1923.....	253,553 ..	2,490 ..
1924.....	289,725 ..	2,869 ..
1925.....	170,262 ..	1,607 ..

This will give some idea of the traffic during the strawberry season between the various ports in the North of France and Plymouth.

Potatoes were very plentiful and of good quality and a constant supply was brought over from Brest, Perros, Paimpol, Treguier, Port Blanc, Lezardrieux, and St Malo in small ketches each carrying from about 20 to 40 tons.

PLYMOUTH PORT SANITARY AUTHORITY.

Port Sanitary Officer,  
Millbay Docks, Plymouth.  
21st December 1925.

Dr. G. A. Borwick, M.D., D.P.H., etc.,  
Port Medical Officer and Medical Inspector of Aliens,  
PLYMOUTH.

Sir,

In accordance with the Ministry of Health Circular dated December 1925, I beg to submit my report in respect of my duties as Sanitary and Food Inspector for the year 1925.

In dealing with vessels arriving from infected areas discharging cargo or part cargo, the Local Government Board Orders 1907, relating to Plague, Cholera and Yellow Fever were strictly adhered to.

Notices were issued to vessels of all classes, loading and unloading cargo, to remedy insanitary defects, and without exception I have found the Masters of the vessels ever ready to comply with the informal notices served.

Should however, circumstances prevent the defects from being remedied at this port, permission has been given to complete the work at their next port of call, during the round voyage or at their home port, and a copy of the notice served has been sent to the Port Medical Officer at their destination.

Instructions as to the survey of masters and crews spaces were borne in mind during the inspection of vessels and any infringement of the Regulations of the Board of Trade was reported to the local officials.

All foodstuffs landed from coastwise or foreign ports were systematically examined.

Under the Public Health (Imported Food) Regulations 1925, 287 vessels were visited including 23 carrying grain.

Over 185 tons of foodstuffs were condemned as unsound, unwholesome, or unfit for food during the past year consisting principally of fats of bones, fish, canned goods, fruit, vegetables and grain.

Several consignments of Pigeon Carcases were imported from Rotterdam and landed at the Great Western Dock for local merchants. These carcases were examined and found to be in a good and healthy condition.

Owing to the exceptionally dry spring, the fruit and vegetable supply from France was very much less than for the past two years. At the same time the quality was exceptionally good. The quantities of strawberries and green peas arriving at the docks during the past five years were as follows: -

1921.....	126.100 parcels.	1.193 tons.
1922.....	34.136 ..	303 ..
1923.....	253.553 ..	2,490 ..
1924.....	289.725 ..	2,809 ..
1925.....	170.202 ..	1,607 ..

This will give some idea of the traffic during the strawberry season between the various ports in the North of France and Plymouth.

Potatoes were very plentiful and of good quality and a constant supply was brought over from Brest, Pexos, Palmol, Treguier, Port Blanc, Landerneau, and St Malo in small keelboats each carrying from about 20 to 40 tons.

Folio 2.

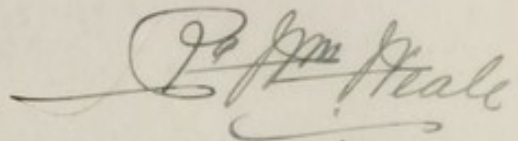

PORT SANITARY AND FOOD INSPECTOR'S REPORT

Concluded.

I have the honour to remain,

Sir,

Your obedient Servant,

A handwritten signature in cursive script, appearing to read "L. J. McKeale". The signature is written in dark ink and is positioned above the typed name.

Sanitary and Food Inspector.

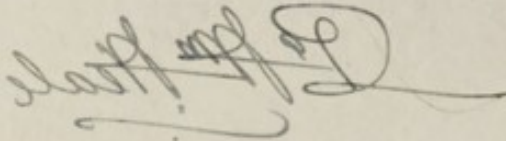

PORT SANITARY AND FOOD INSPECTOR'S REPORT

Completed.

I have the honour to remain,

Sir,

Your obedient servant,

Sanitary and Food Inspector.

# DETAILED LIST OF SANITARY DEFECTS FOR THE YEAR 1925.

During the year 179 vessels were found to be in an insanitary condition, the following defects being notified to the Masters, Owners or Agents : -

No. of defects.	Nature of defects.
2	Bath rooms to be cleansed and painted.
8	Bedding (sets of) to be destroyed.
3	Bedding (sets of) to be dried and aired.
17	Bedding (sets of) to be fumigated.
18	Bedding (sets of) to be thoroughly cleansed.
11	Bilges to be pumped out and cleansed.
1	Boy, crew, sent to Borough Hospital for delousing.
6	Bogey stoves to be repaired or replaced by new.
5	Bunks to be built for the use of the crew.
50	Bunks to be cleansed and painted.
1	Canvas screen to be fitted across hatchway in lieu of the bulkhead.
5	Cabins to be thoroughly cleansed.
1	Cabin to be fumigated.
14	Crews quarters to be fumigated.
26	Crews quarters to be dried and ventilated.
82	Crews quarters, to be cleansed, painted or limewashed.
24	Cowls to be fitted to ventilators.
12	Cookhouses to be cleansed and limewashed.
2	Chainlockers to be cleansed and limewashed.
4	Clothes and effects of patients fumigated.
6	Cooking Utensils (sets of) to be cleansed on the inside.
3	Deck lights to be repaired and made tight.
1	Deck over crews quarters to be washed down with Chloride of Lime.
12	Deck over crews quarters to be caulked and made tight.
1	Deck to be thoroughly cleansed and dried.
2	Food scattered over bunks to be stowed in food lockers.
170	Food lockers to be cleansed, painted or limewashed.
2	Flushing cisterns to be repaired.
9	Funnelling to be repaired or replaced by new.
2	Gulleys to be cut from W.C. Deck to scupper hole.
6	Holds to be washed down and cleansed after discharging.
1	Ladder leading to crews quarters to be repaired.
16	Louvres to be repaired and made workable.
4	Lamp in crews quarters to be repaired and made workable.
1	Mess table to be fitted for the use of the crew.
15	Mattresses to be destroyed and replaced by new.
1	Oil barrels to be removed from crews quarters.
4	Poultry Pens to be cleansed and limewashed.
2	Pigs Pens to be cleansed and limewashed.
12	Refuse and rubbish to be removed from crews quarters.
62	Rubber washers to be fitted to side lights.
1	Saloon to be fumigated.
26	Store room to be cleansed, painted or limewashed.
16	Sails and spare gear to be removed from crews quarters and stowed in bins fitted for the purpose.
43	Side lights to be repaired and made tight.
6	Seats to W.C.'s to be repaired.
2	Steam pipe leading into crews quarters to be repaired.
32	Ventilators to be freed from packing and coverings.
4	Ventilators to be repaired or replaced by new.
5	Water tank to be cleansed on the inside with steam.
3	Water tank, lid of, to be repaired or replaced by new.
27	Water barrels to be cleansed on the inside.
97	W.C.'s to be thoroughly cleansed, painted or limewashed.
2	W.C.'s to be repaired.
1	W.C. Pan to be fitted to replace bucket.
23	Plague and Cholera Orders issued and carried into effect.

Plague and Cholera Orders issued and carried into effect.  
W.C. Pan to be fitted to replace bucket.  
W.C.'s to be repaired.  
W.C.'s to be thoroughly cleaned, painted or limewashed.  
Water tanks, lid of, to be repaired or replaced by new.  
Water tank to be cleaned on the inside with steam.  
Ventilators to be repaired or replaced by new.  
Ventilators to be freed from packing and coverings.  
Steam pipe leading into crews quarters to be repaired.  
Seats to W.C.'s to be repaired.  
Side lights to be repaired and made tight.  
Pins fitted for the purpose.  
Sails and spare gear to be removed from crews quarters and stowed in  
Store room to be cleaned, painted or limewashed.  
Saloon to be fumigated.  
Rubber washers to be fitted to side lights.  
Refuse and rubbish to be removed from crews quarters.  
Pigs Pens to be cleaned and limewashed.  
Poultry Pens to be cleaned and limewashed.  
Oil barrels to be removed from crews quarters.  
Mastresses to be destroyed and replaced by new.  
Mess table to be fitted for the use of the crew.  
Lamp in crews quarters to be repaired and made workable.  
Ladders leading to crews quarters to be repaired.  
Holds to be washed down and cleaned after discharging.  
Galleys to be out from W.C. Deck to supper hole.  
Funneling to be repaired or replaced by new.  
Flushing alternates to be repaired.  
Food lockers to be cleaned, painted or limewashed.  
Food scattered over bunks to be stowed in food lockers.  
Deck to be thoroughly cleaned and dried.  
Deck over crews quarters to be caulked and made tight.  
Deck over crews quarters to be washed down with Chloride of Lime.  
Deck lights to be repaired and made tight.  
Cooking Utensils (sets of) to be cleaned on the inside.  
Glasses and effects of patients fumigated.  
Chainlockers to be cleaned and limewashed.  
Cookhouses to be cleaned and limewashed.  
Gowls to be fitted to ventilators.  
Crews quarters, to be cleaned, painted or limewashed.  
Crews quarters to be dried and ventilated.  
Crews quarters to be fumigated.  
Cabin to be thoroughly cleaned.  
Canvas screen to be fitted across passway in lieu of the bulkhead.  
Bunks to be cleaned and painted.  
Bunks to be built for the use of the crew.  
Bosky stoves to be repaired or replaced by new.  
Boy, crew, sent to Borough Hospital for delousing.  
Rifles to be pumped out and cleaned.  
Bedding (sets of) to be thoroughly cleaned.  
Bedding (sets of) to be fumigated.  
Bedding (sets of) to be dried and aired.  
Bedding (sets of) to be destroyed.  
Bath rooms to be cleaned and painted.

Salmon... 123 C/s  
Sauce... 1 C-sask.  
Sausages... 1 C/s  
Soups... 3 C/s  
Tomatoes... 31 C/s  
Tomato-purée... 4 C/s  
Tongues - Ox - .. 160 C/s

MISCELLANEOUS.

Biscuits... 54 C/s	Beans... 4 Bags.	Butter... 10 C/s.
and Carraway Seeds... 1 C/s.	Chicory... 3 Bags.	
1 Skip Cheeses... 148 Crates	Coffee Extract... 224 C/s.	
Coffee... 16 Bags	Cocoa-nut... 3 C/s.	
Cornflour... 3 C/s.	Farina... 1 C/s.	
Golden Syrup... 24 C/s.	Groats... 1 C/s.	
Glucose... 5 Brls	Lard... 157 C/s.	
Lentils... 6 Bags	Margarine... 185 C/s.	
Nutmegs... 2 C/s.	Pepper... 2 Kegs.	
Pearl Barley... 3 Bags	Rice... 49 C/s.	
Salt... 30 C/s.	Sugar... 44.7.0.0.	
	Flour... 9.12.0.0.	
	Tea... 57 C/s.	
	Tapiooca... 12 Bags.	

DIVISION IV.

FRESH FRUIT.

Apples... 10.4.2.2.  
Bananas... 1 Crate.  
Cabbages... 12.0.0.  
Carrots... 24.12.0.0.  
Cauliflowers... 230 Crates  
Cucumbers... 1.0.2.0.  
Grapes... 1.16.2.8.  
Grape Fruit... 9 Cases.  
Lemons... 114 Cases.  
Lettuce... 16 Crates.  
Melons... 3.11.0.0.  
Onions... 39.0.0.0.  
Oranges... 306 Cases.  
Parsnips... 1.14.0.0.  
Pears... 14 Cases.  
Peas... 4.3.0.14.  
Plums... 6 Cases.  
Pomegranates... 13 Cases.  
Potatoes... 225.0.2.0.  
Strawberries... 6.16.0.22.  
Tomatoes... 6.1.0.0.  
Vegetables in brine 15 Casks.

DRIED FRUIT. ETC.

Apple Rings... 16 C/s  
Almonds... 19 C/s  
Currants... 114 C/s  
Dry Plums... 44 C/s  
Dried Fruit... 13 C/s  
Dates... 50 C/s  
Figs... 28 C/s  
Lemon Peel... 4 C/s  
Nuts of sorts... 32 bags.  
Raisins... 51 C/s  
Sultanas... 75 C/s

DIVISION 5.

GRAIN.

Barley... 11.0.0.0.  
Maize... 114.2.0.0.  
Oats... 30.10.0.0.  
Wheat... 14.0.0.0.
