BOROUGH OF EUDSKY

SECTION I

To the Chairman and Members of the Health Committee

Madam Chairman and Gentlemen,

I have pleasure in presenting my report of the Health of the Borough during 1971, and the work of the environmental health services provided to maintain and improve it.

The Registrar General estimated that the population of the Borough rose by 500 during the year, 125 being natural increase, that is the difference between the numbers of births and deaths. The number of births was almost the same as in the previous year, but there was some rise in the deaths. However, most of the rise was due to deaths of elderly persons. The general level of personal health has remained high as shown by the number of claims for sickness benefit from the Department of Health and Social Security, from the incidence of notifiable infectious diseases, and from our knowledge of the health of school children and infants in the Borough.

In that part of the report dealing with the environmental health services, prepared by Mr Holmes, the extensive work which has been done in connection with slum clearance, housing improvement and clean air, the programmes for which are well ahead of schedule, are outlined. Our activities in these fields as well as in those of provision of greater facilities for the personal health services are spurred on by the knowledge that in 1974 the Borough will become part of a large authority of nearly 800,000 population and the personal health services will pass from the existing health authorities to the newly reorganised National Health Service. In the larger authorities of which we will only form a small part, and in the shakedown period which is likely to persist for a long time after the change over, it is quite probable that schemes which are not well advanced could be left completely in abeyance. While most of the environmental health work will remain with the reorganised local government the post of Medical Officer of Health will disappear, and the notifications of births, deaths, and infectious disease will be transferred to the Area Health Authority of the National Health Service, as will the provision of clinics and health centres and the school health service with which I am associated as Divisional Medical Officer. Arrangements are to be made for close liaison between the new authorities, but it appears that the direct responsibility of the Medical Officer to a Local Authority will cease.

In the midst of all these changes it is most helpful to me and to the other officers of the Health Department to receive the support and encouragement of the Committee which we have enjoyed during the year. I am particularly grateful to you for your kindness and forbearance during my illness in the spring and to Dr Mitchell for deputising for me, and I would also thank Mr Holmes and the other officers of the Council for their help and co-operation at all times.

A. TELFORD BURN

MEDICAL OFFICER OF HEALTH

To the Chairman and Members of the Health Committee

Madam Chairman and Gentlemen,

I have pleasure in presenting my report of the Health of the Borough during 1971, and the work of the environmental health services provided to maintain and improve it.

The Registrar General estimated that the population of the Borough rose by 500 during the year, 125 being natural increase, that is the difference between the numbers of births and deaths. The number of births was almost the same as in the previous year, but there was some rise in the deaths. However, most of the rise was due to deaths of elderly persons. The general level of personal health has remained high as shown by the number of claims for sickness benefit from the Department of Health and Social Security, from the incidence of notifiable infectious diseases, and from our knowledge of the health of school children and infants in the Borough.

In that part of the report dealing with the environmental health services, prepared by Mr Holmes, the extensive work which has been done in connection with slum clearance, housing improvement and clean air, the programmes for which are well ahead of schedule, are outlined. Our activities in these fields as well as in those of provision of greater facilities for the personal health services are reported on by the knowledge that in 1974 the Borough will become part of a large authority of nearly 800,000 population and the personal health services will pass from the existing health authorities to the newly reorganised National Health Service. In the larger authorities of which we will only form a small part, and in the shake-down period which is likely to persist for a long time after the change over, it is quite probable that schemes which are not well advanced could be left completely in abeyance. While most of the environmental health work will remain with the reorganised local government the post of Medical Officer of Health will disappear, and the notifications of births, deaths, and infectious diseases will be transferred to the Area Health Authority of the National Health Service, as will the provision of clinics and health centres and the school health service with which I am associated as Divisional Medical Officer. Arrangements are to be made for close liaison between the new authorities, but it appears that the direct responsibility of the Medical Officer to a local authority will cease.

In the midst of all these changes it is most helpful to me and to the other officers of the Health Department to receive the support and encouragement of the Committee which we have enjoyed during the year. I am particularly grateful to you for your kindness and forbearance during my illness in the spring and to Dr Mitchell for deputising for me, and I would also thank Mr Holmes and the other officers of the Council for their help and co-operation at all times.

A. TELFORD BURN

MEDICAL OFFICER OF HEALTH

BOROUGH OF PUDSEY

SUMMARY OF VITAL STATISTICS

SECTION I

GENERAL AND VITAL STATISTICS

Population (Registrar General's Estimate for mid 1971)	38,240
Area of the Borough in acres	5,323
Rateable value	£1212,545
Income of a penny (1p) rate	£11,645

BIRTHS

There were 584 infants (302 boys and 282 girls) born alive to mothers normally resident in the Borough during the year, almost the same as the number of live births in 1970. However, because of the increase in total population the live birth rate per thousand fell from 15.6 to 15.3. For comparison with the national rate, and that of other areas the rate is adjusted by a factor which takes into account the sex and age composition of the population. The adjusted rate is 14.5 compared with a rate for England and Wales of 16.0. 31 births were illegitimate, equivalent to 5.3% of all live births. The national illegitimacy rate was 8%.

In addition to the live births there were four stillbirths. In 1970 there were 11 stillbirths but in 1969 the figure was the same as in this year. All the stillbirths were legitimate as they were last year.

17 infants (11 boys and 6 girls) died before reaching their first birthday. Five of these died during the first 24 hours of life, and two others died a day or two later from severe congenital malformations. Two children died from smothering in their cots, and two other children were found dead in their cots from fulminating infections of the lungs and bronchi, a condition which so far, medical research has not been able to anticipate and prevent. At 29 per thousand births this is one of the highest infantile mortality rates which we have had in recent years, and comes at a time when the figure for England and Wales has fallen to 18 per thousand.

DEATHS

459 residents (233 male and 226 female) died during the year, equivalent to 12.0 per thousand of the population, which is slightly higher than last year. It rises to 12.8 when adjusted for comparison with the national rate of 11.6. Heart disease continues to be the major cause of death being responsible for 165, cerebrovascular disease (stroke etc) and cancers with 93 and 92 deaths respectively are the next major causes. The highest single form of fatal cancer was that affecting the lungs which caused 20 male and two female deaths.

I append a table showing the causes of death at different ages and by sex from which it can be seen that over half the female deaths occurred at over 75 years, while there was a much wider spread in the ages at which male deaths occurred.

There were no maternal deaths associated with pregnancy, abortion or childbirth.

SECTION I

GENERAL AND VITAL STATISTICS

Population (Registrar General's Estimate for mid 1971)	38,240
Area of the Borough in acres	2,323
Ratable value	£121,545
Income of a penny (1p) rate	£11,645

BIRTHS

There were 584 infants (305 boys and 282 girls) born alive to mothers normally resident in the Borough during the year, almost the same as the number of live births in 1970. However, because of the increase in total population the live birth rate per thousand fell from 15.6 to 15.3. For comparison with the national rate, and that of other areas the rate is adjusted by a factor which takes into account the sex and age composition of the population. The adjusted rate is 14.5 compared with a rate for England and Wales of 16.0. 31 births were illegitimate, equivalent to 5.3% of all live births. The national illegitimacy rate was 8%.

In addition to the five births there were four stillbirths in 1970 there were 11 stillbirths but in 1969 the figure was the same as in this year. All the stillbirths were legitimate as they were last year.

17 infants (11 boys and 6 girls) died before reaching their first birthday. Five of these died during the first 24 hours of life, and two others died a day or two later from severe congenital malformations. Two children died from smothering in their cots, and two other children were found dead in their cots from suffocating infections of the lungs and bronchi, a condition which so far, medical research has not been able to anticipate and prevent. At 22 per thousand births this is one of the highest infantile mortality rates which we have had in recent years, and comes at a time when the figure for England and Wales has fallen to 18 per thousand.

DEATHS

452 residents (233 male and 220 female) died during the year, equivalent to 12.0 per thousand of the population, which is slightly higher than last year. It rises to 12.8 when adjusted for comparison with the national rate of 11.6. Heart disease continues to be the major cause of death being responsible for 165, cerebrovascular disease (stroke etc) and cancers with 93 and 92 deaths respectively are the next major causes. The highest single form of fatal cancer was that affecting the lungs which caused 20 male and two female deaths.

I append a table showing the causes of death at different ages and by sex from which it can be seen that over half the female deaths occurred at over 75 years, while there was a much wider spread in the ages at which male deaths occurred.

There were no maternal deaths associated with pregnancy, abortion or childbirth.

Infectious diseases leading hospital admissions are dealt with at Scarcroft Hospital, Leeds, or Leeds Road Hospital, Bradford.

SECTION II

GENERAL PROVISION OF HEALTH SERVICES FOR THE BOROUGH

LOCAL HEALTH AUTHORITY SERVICES

Services under Part III of the National Health Service Act 1946 are provided by the West Riding County Council. The Borough forms part of the County Health Division No. 5 and the Medical Officer of Health is also Divisional Medical Officer. During the year the supportive services for mentally handicapped and mentally ill at home were transferred from the County Health Department to the Social Services Department as was the provision of Home Helps. Towards the end of the year the Tyersal Infant Welfare Clinic was transferred from the mobile unit to a special extension built by the Borough Council as part of the pavilion at the Tyersal Sports Ground. The School Health Clinic at Richardshaw Lane was closed but the Dental Clinic continues to operate there.

Clinic services are provided at five centres:

St Lawrence House, Pudsey Park (ante-natal, infant welfare, cervical cytology, chiropody).

Farfield House, Farsley (ante-natal, infant welfare, chiropody).

Chapel Street, Calverley (ante-natal, infant welfare, chiropody).

Cringleber, Bradford Road, Thornbury (ante-natal relaxation, infant welfare).

Tyersal, Tyersal Park (infant welfare).

The ambulance service operates from Westroyd, Farsley, but since the vehicles are radio controlled all calls are made through the County Ambulance Headquarters, Birkenshaw, Bradford (telephone Bradford 682211).

A report on the work of the Divisional Health Services is appended to the main report.

HOSPITAL SERVICES

General hospital services are available in Leeds and Bradford.

Geriatric cases are usually admitted to St Luke's Hospital, Bradford, or St James Hospital, Leeds, in the first instance.

Maternity services are available at the general practitioner maternity unit at Four Gables, Horsforth. Consultant obstetric beds are at St Lukes' Hospital, Bradford, or Leeds Maternity Hospital, which also provides "Flying Squad" services.

Infectious diseases needing hospital admission are dealt with at Seacroft Hospital, Leeds, or Leeds Road Hospital, Bradford.

SECTION II

GENERAL PROVISION OF HEALTH SERVICES FOR THE BOROUGH

LOCAL HEALTH AUTHORITY SERVICES

Services under Part III of the National Health Service Act 1946 are provided by the West Riding County Council. The Borough forms part of the County Health Division No. 5 and the Medical Officer of Health is also Divisional Medical Officer. During the year the supportive services for mentally handicapped and mentally ill at home were transferred from the County Health Department to the Social Services Department as was the provision of Home Help. Towards the end of the year the Tyersal Infant Welfare Clinic was transferred from the mobile unit to a special extension built by the Borough Council as part of the pavilion at the Tyersal Sports Ground. The School Health Clinic at Richmanshaw Lane was closed but the Dental Clinic continues to operate there.

Clinic services are provided at five centres:

St Lawrence House, Pudsey Park (ante-natal, infant welfare, cervical cytology, chiropody).
Fairfield House, Farsley (ante-natal, infant welfare, chiropody).
Chapel Street, Calverley (ante-natal, infant welfare, chiropody).
Gringleber, Bradford Road, Thornbury (ante-natal relaxation, infant welfare).
Tyersal, Tyersal Park (infant welfare).

The ambulance service operates from Westroyd, Farsley, but since the vehicles are radio controlled all calls are made through the County Ambulance Headquarters, Birkenshaw, Bradford (telephone Bradford 68221).

A report on the work of the Divisional Health Services is appended to the main report.

HOSPITAL SERVICES

General hospital services are available in Leeds and Bradford.

Geriatric cases are usually admitted to St Luke's Hospital, Bradford, or St James Hospital, Leeds, in the first instance.

Maternity services are available at the general practitioners' maternity unit at Fort Gellie, Huddersfield. Consultant obstetricians are at St Luke's Hospital, Bradford, or Leeds Maternity Hospital, which also provides "Flying Squad" services.

Infectious diseases needing hospital attention are dealt with at Beckett Hospital, Leeds, or Leeds Road Hospital, Bradford.

LABORATORY SERVICES

Bacteriological examinations are provided by the Public Health Laboratory Service at Bradford.

Chemical examination of water, milk or foods is undertaken by Messrs. Richardson and Jaffe, Bradford.

NATIONAL ASSISTANCE ACT 1948 - SECTION 47

No action was taken during the year to apply for the compulsory removal to hospital or welfare accommodation of any person who was unable to look after themselves and not receiving care from others, as provided for in this section of the Act.

Tuberculosis

We have had a sharp reminder that tuberculosis is still with us, in that we have had one of the highest incidences of this disease in recent years. In particular we were reminded of its high infectivity, in that four cases, one of them fatal, occurred in one family.

At the end of the year there were 115 pulmonary and 21 non-pulmonary cases remaining on the register.

NATIONAL ASSISTANCE ACT 1945 - SECTION 47

No action was taken during the year to apply for the compulsory removal to hospital or welfare accommodation of any person who was unable to look after themselves and not receiving care from others, as provided for in this section of the Act.

SECTION III

INFECTIOUS DISEASES

There was a marked reduction in the number of cases of infectious disease notified during the year as compared with 1970, mainly due to the occurrence during the latter of an extensive outbreak of measles, from which we were fortunately free during 1971. However, after a year free from whooping cough we did have 21 cases this year. There were 29 cases of bowel infections, two of which required hospital care, one proving fatal. These were mainly family outbreaks. While almost all of the dysentery cases were bacteriologically positive, only three of the food poisoning cases were confirmed. These were all due to an organism which had been very rare in this country before 1970, but which has been recovered frequently since then in certain meat products.

Tuberculosis

We have had a sharp reminder that tuberculosis is still with us, in that we have had one of the highest incidences of this disease in recent years. In particular we were reminded of its high infectivity, in that four cases, one of them fatal, occurred in one family.

At the end of the year there were 115 pulmonary and 21 non-pulmonary cases remaining on the register.

INFECTIOUS DISEASES

There was a marked reduction in the number of cases of infectious disease notified during the year as compared with 1970, mainly due to the occurrence during the latter of an extensive outbreak of measles, from which we were fortunately free during 1971. However, after a year free from whooping cough we did have 21 cases this year. There were 29 cases of bowel infections, two of which required hospital care, one proving fatal. These were mainly family outbreaks. While almost all of the dysentery cases were bacteriologically positive, only three of the food poisoning cases were confirmed. These were all due to an organism which had been very rare in this country before 1970, but which has been recovered frequently since then in certain meat products.

Tuberculosis

We have had a sharp reminder that tuberculosis is still with us, in that we have had one of the highest incidences of this disease in recent years. In particular we were reminded of its high infectivity, in that four cases, one of them fatal, occurred in one family.

At the end of the year there were 115 pulmonary and 21 non-pulmonary cases remaining on the register.

Public Health Inspectors Department,
27, Lidget Hill,
Pudsey,
LS28 7LF

August 1972

To: The Chairman and Members of the Health
Committee of the Borough of Pudsey.

Madam Chairman and Gentlemen,

I have pleasure in submitting my report on the work of the Public Health Inspectors' Department for the year 1971. As in previous years, the report places on record the work of the administrative, technical, clerical and manual staff of the department in such varied fields as slum clearance, refuse collection and disposal, food hygiene, shop and office administration and clean air. In these and many other fields good progress was made during the year.

Mr. Fraser, who had been with us as a student public health inspector for five years, obtained his diploma from the Public Health Inspectors Education Board and took up a post in September with the County Borough of Halifax. There were no other staff changes during the year and this was helpful from the point of view of work continuity which is so necessary in a small department.

1971 saw no lessening of the increasing pressure on our time, noted in the report for 1970. Reference to the statistical section will show that upwards of 25,000 inspections and visits were made and to these could be added many thousands of enquiries, interviews and telephone calls. Furthermore, the effects of new legislation, which seemed to arrive in the office daily, contributed increasingly to the work-load so that so far as the Health Department was concerned, 1971 was another busy year.

In December the department was transferred to new office accommodation in Lidget Hill, as the site of the office in Church Lane was required for shop and office redevelopment. The department had been housed at Church Lane since April 1965 and, during its tenancy there, had been instrumental in carrying through many projects leading to substantial environmental improvements in the borough. The virtual completion of the Council's slum clearance programme and the dramatic reduction in atmospheric pollution were two such projects as was the bringing into use of the new refuse disposal plant to replace tipping of refuse at Uppermoor Quarry. Our pleasure at the prospect of moving into the new office accommodation had, though, been dimmed somewhat by the uncertainty of our prospective length of tenancy, an uncertainty which had been brought about by the publication of the Government's Local Government Bill dealing with local government reorganisation.

Under the terms of the Bill, Pudsey in 1974 is to become part of a large metropolitan district council based on Leeds and covering some 250 square miles and having a population of approximately three quarters of a million. The prospect is not a happy one as, having had the experience of working for authorities of various sizes, I do not contribute to the belief that an organisation has to be large to be effective and efficient. In fact, I think that more often the opposite is the case and that above an optimum size a local government unit ceases to be "local" and that the personal approach, which is so essential in good public relation work, becomes increasingly difficult

Public Health Inspector Department,
W. L. Adams Hill,
Punjab,
1971
August 1971

For The Chairman and Members of the Health
Committee of the Borough of Parnham.

My Dear Chairman and Members,

I have pleasure in submitting my report on the work of the Public Health Inspector Department for the year 1971. As in previous years, the report places on record the work of the administrative, technical, clerical and manual staff of the department in such varied fields as environmental, refuse collection and disposal, food hygiene, shops and office administration and other etc. In these and many other fields good progress was made during the year.

Mr. Brown, who had been with us as a student public health inspector for five years, obtained his diploma from the Public Health Inspector Examination Board and took up a post in Parnham with the County Borough of Halifax. There were no other staff changes during the year and this was helpful from the point of view of work continuity which is so necessary in a small department.

1971 saw no lessening of the increasing pressure on our time. Noted in the report for 1970. Reference to the statistical section will show that upwards of 25,000 inspections and visits were made and to these could be added many thousands of enquiries, interviews and telephone calls. Furthermore, the efforts of new legislation, which seemed to arrive in the office daily, contributed immensely to the workload so that so far as the Public Health Inspector Department was concerned, 1971 was another busy year.

In December the department was transferred to new office accommodation in Adgate Hill, at the site of the office in Church Lane was required for shop and office redevelopment. The department had been housed at Church Lane since April 1965 and, during the interim there, had been considerable in carrying through many projects leading to substantial environmental improvements in the borough. The virtual completion of the Council's air clearance programme and the domestic protection in atmospheric pollution were two such projects as was the bringing into use of the new refuse disposal plant to replace tipping of refuse at Spence's Quarry. Our pleasure at the prospect of moving into the new office accommodation had, though, been dimmed somewhat by the uncertainty of our prospective length of tenure, an uncertainty which had been brought about by the publication of the Government's Local Government Bill dealing with local government reorganisation.

Under the terms of the Bill, Parnham in 1974 is to become part of a large metropolitan district council based on Leeds and covering some 250 square miles and having a population of approximately three quarters of a million. The prospect is not a happy one and, having had the experience of working for authorities of various sizes, I do not compare to the belief that an organisation has to be large to be effective and efficient. In fact, I think that many of the aspects of the case and that show an optimum size a local government unit seems to be "local" and that the personal approach, which is so essential in good public relations work, becomes increasingly difficult

to achieve. I found it hard to believe that the proposed reorganisation would do anything to remove the short-comings which are supposed to exist in the present service, rather than the ensuing remoteness from the public would lead to a more apathetic attitude towards community affairs. I regret having to sound what must seem to be a pessimistic note in a report which should record progress and achievement but my feelings on the proposed form of reorganisation laid down by the Government are shared by many others in the service and I can only hope that events will prove that our fears are ill-founded. I am sure that the majority of those directly involved, elected representatives and officers alike, will strive after April 1974, as in 1971, to provide the best possible service in their areas.

HOUSING

The Council's Clearance Area Programme entered its final phase in 1971. It is unlikely that in future further large areas of unfit houses will be recommended for Clearance Area treatment. Individual houses will need to be closed or demolished but greater emphasis is now being given to improvement of our older housing stock both individually and by area treatment.

The following Clearance Areas were declared by the Council in September and acquisition was recommended by Compulsory Purchase:-

The Brayshaw Street and Peel Street, Pudsey,
Clearance Area No. 97.

The Carlisle Street, Mulberry Street, Westfield
Street and Beechwood Street, Stanningley,
Clearance Area No. 98.

The Brayshaw Street and Peel Street, Pudsey, Clearance Area No. 97 comprised 34 houses and the Carlisle Street, Mulberry Street, Westfield Street and Beechwood Street, Stanningley, Clearance Area No. 98 40 houses.

During the year the following Orders were confirmed by the Secretary of State for the Environment:

The Lowtown, Pudsey, No. 89 Clearance Order, 1970
in January.

The Valley Road, Pudsey, No. 86 Compulsory Purchase
Order, 1970 in March.

The Bethel Terrace and Intake Road, Pudsey, No. 96
Compulsory Purchase Order, 1971, in October

and
The Primrose Hill, Watson Square and Richardshaw Lane,
Stanningley, Nos. 93 and 94 Compulsory Purchase Orders, 1971

and
The Croft Street and Ebenezer Street, Farsley, No. 95
Compulsory Purchase Order, 1971 in November.

Properties in Albert Street, Pudsey, Lowtown, Pudsey, Valley Road, Pudsey, Laburnum Street, Pudsey, Mulberry Street, Stanningley, Back St. Lawrence Terrace, Pudsey, Crimbles Road, Pudsey, Woodhall Road, Calverley, Uppermoor, Pudsey, Smalewell Road, Pudsey, Carlisle Street, Stanningley, Woodvine Street, Stanningley, Peel Street, Pudsey, Lane End, Pudsey and South Parade, Pudsey, were dealt with by way of Closing Orders or Demolition Orders and the occupants were re-housed by the Council.

In the private housing section the tendency towards owner/occupation which has been noted in recent years, continued and this tendency has inclined towards an improvement in the general condition

of the private houses. Owner/occupiers are, naturally, more prepared to invest in improvements and repairs than the owners of tenanted houses. The availability of Improvement Grants and Improvement Loans from the Council contributed in no small way during 1971 to this improvement in the situation.

The increase in property values continued during 1971 and the department had many enquiries regarding houses which were the subject of Closing Orders. Some such houses, which could not be made fit to live in at a reasonable cost only a relatively short time ago, are now, in the changed circumstances and with the help of grants and loans, "desirable properties" and are in some demand.

One aspect of house improvement which gave rise to quite acute problems during the year was the recently introduced process of stone cleaning by the sand-blasting method. There is no doubt that the treatment improves the external appearance of buildings but, whilst it is being carried out, nuisance from air-borne dust and sand can occur at nearby premises. The law dealing with the abatement of statutory nuisance does not help in the matter due to the time delay involved and, although the Department of the Environment was approached in the matter, no assistance was forthcoming.

FOOD HYGIENE

The inspection of shops, vehicles, stalls and other premises where food is stored, prepared for sale or sold forms an important part of the department's work. Much time was spent in 1971 in informal discussions and persuasion in order to maintain a satisfactory standard of food hygiene throughout the borough. Only in those cases where informal action failed were cases reported to the Health Committee with a recommendation that statutory action be taken. Unfortunately it was found necessary to institute proceedings in six cases under the Food & Drugs Act, 1955 and twelve cases under the Food Hygiene (General) Regulations, 1970.

I am satisfied that a good standard exists throughout the town. In most cases it is not possible to inspect premises more often than once a year but we are helped increasingly by members of the public whom we find to be more and more food hygiene conscious and who soon inform us if they feel that everything is not right.

Routine sampling of milk and ice-cream was continued during the year and swabs were taken from food equipment, mainly canteen utensils, and subjected to bacteriological examination.

REFUSE COLLECTION AND DISPOSAL

A very satisfactory service was maintained throughout the year in what is, after all, one of the most basic of local government functions. Our aim was to give a regular weekly collection from each of the 15,000 or so premises in the borough and this we achieved.

The practice of closing the refuse collection section for one week in August was not followed in 1971 which meant that more men were on holiday each week during the "summer" season. This strained the section's resources a little but the General Foreman, Mr. William Hodgkinson, and his staff were able to cope in such a way that the service did not suffer.

It is ironical to note that the successful operation of the refuse collection service can have its own disadvantages. I am familiar with places where the collection of refuse is irregular to say the least but where the public accept the situation, apparently without complaint.

In Pudsey we have reached the stage now where if, say, the dustbin was emptied at 9 a.m. last Tuesday and the men have not arrived by 10.30 a.m. the following Tuesday, it is possible that the housewife will ring the department to see what has gone wrong!

The refuse disposal plant continued to operate satisfactorily although we continued to have problems with the screenings sticking in the hoppers and with the refractory work in the trades waste incinerator cell. The defects were not such as to prevent the day-to-day operation of the plant and they were referred again to the plant manufacturers, Messrs. Redman, Heenan, Froude Ltd., together with other minor items.

Residue from the plant was disposed of in the disused railway cutting between Mount Pleasant Road and Lowtown but not without problems. Residents of houses in the Rosemont area nearby complained about smells allegedly arising from the tipped material and we resorted to the daily spraying of industrial deodorants which led to a cessation of complaints.

The salvaging of saleable material from the refuse continued in 1971 and for the first time income from this source topped the £10,000 mark. This in spite of the fact that for much of the year our despatches of waste paper were subjected to quota limits because of the general stagnation of the national economy.

It was gratifying to note that the cost of refuse collection per head of population and the income from salvage sales were the lowest and the highest respectively of authorities in the immediate Leeds area, a further justification, perhaps, of the view that authorities of a certain size can operate at optimum efficiency.

The manual labour force remained fairly static during 1971 due, no doubt, to the relatively high local rate of unemployment and also, perhaps, to the improved rates of pay which were received. The weekly wage of £20 for a refuse collector was still, in my opinion, not over generous particularly when one considers the onerous nature of the work which is carried out in all types of weather. The time is surely fast approaching when the services of men engaged in this very necessary work are more adequately rewarded.

In all 8,014 tons of refuse were collected during the year, an increase of 530 tons over the 1970 total.

CLEAN AIR POLICY

When the Council's Clean Air Policy was first published, the target date for completing the programme of Smoke Control Areas was 1980. Our penultimate Smoke Control Area was surveyed in 1971 and it is anticipated that work on the last area will commence early in 1972. The whole of the borough should be subject to Smoke Control Orders by 1973 or early 1974 at the latest. This means that the programme will be completed six of seven years in advance of the target date.

1971 saw a further reduction in the amount of solid impurities in the air in Pudsey. On average, throughout the year, there were 45 microgrammes of smoke, dirt, etc. present in each cubic metre of air. When one considers that ten years ago this figure was over 200 microgrammes, one gets some measure of the effect of the Council's Clean Air Programme.

In the early days of the Clean Air Campaign it was anticipated that the open fire with its bituminous coal, which was the principal means of house heating, would be replaced by appliances burning solid smokeless fuel, such as coke. This anticipation was justified in the late 1950's and early 1960's but, with the discovery and exploitation

In 1969 we have received the same amount as in 1968, but the weather was
wetter at 2.5 in. last Friday and the rain was heavier at 10.5 in. on
the following Tuesday. It is possible that the weather will bring the
department to see what we can do.

The water disposal plant continued to operate satisfactorily
although we continued to have problems with the sewerage system in
the highway and with the industrial work in the water works installation.
The problems were not such as to prevent the day-to-day operation
of the plant and they were referred again to the plant management.
However, the plant, located 1000 ft. higher than the other plants.

During 1969 the plant was disposed of in the ground water
system between the plant and the highway and the water was not
disposed of in the ground water system. The water was not
disposed of in the ground water system and was not disposed of in the
ground water system. The water was not disposed of in the ground water
system and was not disposed of in the ground water system.

The extension of water supply from the plant to the highway
was not completed. The water was not disposed of in the ground water
system and was not disposed of in the ground water system. The water
was not disposed of in the ground water system and was not disposed of
in the ground water system.

It was decided to move the plant to the highway and the water was
not disposed of in the ground water system and was not disposed of in
the ground water system. The water was not disposed of in the ground
water system and was not disposed of in the ground water system.

The water supply from the plant to the highway was not completed
and the water was not disposed of in the ground water system and was
not disposed of in the ground water system. The water was not disposed
of in the ground water system and was not disposed of in the ground
water system.

In 1969 the water supply from the plant to the highway was not
completed and the water was not disposed of in the ground water system
and was not disposed of in the ground water system.

CONCLUSION

The water supply from the plant to the highway was not completed
and the water was not disposed of in the ground water system and was
not disposed of in the ground water system. The water was not disposed
of in the ground water system and was not disposed of in the ground
water system.

It was decided to move the plant to the highway and the water was
not disposed of in the ground water system and was not disposed of in
the ground water system. The water was not disposed of in the ground
water system and was not disposed of in the ground water system.

In the early days of the water supply from the plant to the highway
the water was not disposed of in the ground water system and was not
disposed of in the ground water system. The water was not disposed of
in the ground water system and was not disposed of in the ground water
system.

of North Sea Gas and the diminishing production of coke, the trend of conversions has been increasingly to the use of the labour-saving "piped" fuels. In 1971 the vast majority of conversions were from coal to gas heater appliances.

GENERAL

The daily cleaning of the Public Conveniences continued during the year. New conveniences were put into use at Waterloo and were almost immediately subjected to vandal damage. The other conveniences were subjected to similar attacks and the damage at Hainsworth Park at Farsley was so bad that the building was closed as the conveniences were more often than not out of use.

I again represented the Council on the Executive Committee of the West Riding Advisory Council for Clean Air and Noise Control and on the Yorkshire Divisional Council of the National Society for Clean Air. I attended several meetings during the year.

Reference to the statistical section which follows outlines the type and volume of work undertaken by the department during the year. In this I acknowledge with thanks the ready co-operation and assistance which was always made available by colleagues in other departments of the Council. The successful completion of the year's programme was made possible only by virtue of the devotion to duty of the department's manual, professional, clerical and technical staff. For their loyalty and effort during 1971 I record my deep appreciation as I do to the Chairman and members of the Health Committee for their continued support and interest.

Yours faithfully,

G. HOLMES,

Chief Public Health Inspector

of North Sea and the distilling production of oil, the trend of
conversion has been increasingly to the use of the "low-boiling" types.
In 1921 the vast majority of conversions that took place were
better appliances.

GENERAL

The daily cleaning of the Public Convenience Committee during
the year. New conveniences were put into use at Waterbury and were almost
immediately subjected to sanitary checks. The other conveniences were
subjected to similar checks and the same at Waterbury Park at Waterbury
and no less than 100 buildings were checked as the conveniences were more
often than not out of use.

I also represented the Council on the Executive Committee of
the West Riding Sanitary Council for Clean Air and Water Control and on
the Yorkshire Divisional Council of the National Society for Clean Air.
I attended several meetings during the year.

Reference to the statistical section which follows outlines
the type and volume of work undertaken by the department during the year.
In this I am indebted with thanks to the many co-operation and assistance
which was always made available by colleagues in other departments of the
Council. The successful completion of the year's programme was made
possible only by virtue of the devotion to duty of the department's
technical, professional, clerical and technical staff. For their loyalty
and effort during 1921 I record my deep appreciation as I do to the
Chairman and members of the Health Committee for their continued support
and interest.

Yours faithfully,

C. HODGKIN.

SUMMARY OF WORK DONE

Floors repaired	65	<u>CIVIC AMENITIES</u>	
Wallplaster repaired	54	Abandoned vehicles removed	21
Ceilingplaster repaired	60	<u>NOISE ABATEMENT</u>	
Windows repaired	138	Noise abated	1
Doors repaired	57	<u>FACTORIES</u>	
Fireplaces repaired	5	Ventilated space provided	1
Staircases repaired	5	Conveniences repaired	3
Sinks replaced/repared	24	Conveniences cleansed	7
Waste pipes repaired	16	<u>FOOD PREMISES</u>	
Water supply repaired	7	Cleansed	23
Water supply improved	8	Improved	33
Roofs repaired	35	Food Hygiene swabs taken	76
Chimneys repaired	29	<u>PETROLEUM REGULATIONS</u>	
Walls repaired	37	Petroleum Regs. complied with	17
Eavesgutters repaired/renewed	57	Petroleum tanks tested	9
R.W.Ps repaired/renewed	28	Petroleum tanks provided	5
Vent Shafts	9	Petroleum tanks inspected	22
W.Cs provided	18	Petrol lines tested	10
W.Cs repaired	13	Petrol lines inspected	8
W.Cs cleansed	1	Petrol pumps tested	35
W.Cs abolished	17	Petrol pumps inspected	38
Paillosets replaced	1	<u>CLEAN AIR ACT</u>	
Dustbins provided	110	Fireplaces converted	261
Rooms disinfected	4	Remedial measures taken	1
Rooms disinfested (vermin)	118	<u>MISCELLANEOUS</u>	
Premises disinfested (rats)	149	Offensive Accum. removed	11
Premises disinfested (mice)	64	Wasps nests destroyed	4
Houses demolished	45	<u>OFFICES, SHOPS & RAILWAY PREMISES</u>	
Houses closed	22	Cleansed	1
Qualification Certificates issued	42	Temperature improved	4
Drains tested	183	Thermometer provided	7
Drains cleared	211	Ventilation improved	1
Drains repaired	39	Abstracts posted	7
Drains provided	14	First Aid Equipment provided	7
Inspection chamber provided	12	<u>Sanitary Conveniences:</u>	
Inspection chamber repaired	7	1. Repaired	5
Cesspools emptied	34	2. Cleansed etc.	1
Septic tank & filters repaired	3	Hot water provided	1
Septic tank & filters provided	4	<u>Floors, Passages, Stairs:</u>	
Dampness excluded	56	1. Lighted	1
Culverts repaired	1	2. Cleansed	2
Watercourses cleansed	3	3. Stairs renewed	4
Tip fences provided	2	4. Handrails provided	2
		5. Floors repaired	2

Refuse Collection and Disposal

(Weight in long tons - Avoirdupois)

Statistical information showed that during the year 8,014 tons, 2 cwts. 2 qrs. of refuse were received at the Disposal Plant. 7,114 tons, 18 cwts of refuse passed through the entire plant and 319 tons, 9 cwts of trade refuse were incinerated direct in the trade waste furnace cell. 38 tons, 6 cwts of incombustible refuse were disposed of at the tip.

Waste paper collected by trailer amounted to 541 tons, 9 cwts, 2 qrs, and 159 tons, 5 cwts, 3 qrs. were removed by hand from the picking belt.

Glass and other miscellaneous rubbish amounting to 391 tons, 7 cwts, 1 qr. were removed by hand from the picking belt.

392 tons, 1 cwt, 3 qrs. of tins were removed by the overband magnetic separator. 88 tons, 17 cwts, 2 qrs. of other metal objects and 8 cwts, 2 qrs. of rags were removed by hand.

2,481 tons, 10 cwts, 2 qrs. of dust, small cinder and other fine refuse were extracted by the rotary screen. Although the material has a horticultural value as a soil lightener only a small proportion was taken by the trade, the main being tipped upon the Corporation's tip, together with 1,303 tons, 14 cwts of furnace clinker residue.

Referring to the refuse collection graph, there are two peaks of collection which reflect the accumulated refuse after the Christmas and Easter holidays, the antipodes indicated by the troughs of low collection. It is interesting to note only three months of "low" collection in July, August and September.

Refuse Collection and Disposal Staff

At the end of the year the normal establishment was:

- 1 - General Foreman
- 1 - Assistant Foreman
- 1 - Plant Engineer/Vehicle Mechanic
- 6 - Chargehands
- 18 - Dustmen
- 3 - Paper Balers
- 1 - Tin Baler
- 10 - Drivers
- 1 - Hopper Attendant
- 2 - Furnace Men
- 2 - Picking Belt Attendants
- 1 - Cleaner (part time)

The number of vehicles comprised:

- 1 - S. & D. Pakamatic (20 cu.yd.)
- 1 - Karrier Musketeer (18 cu.yd. air space)
- 2 - S. & D. Fore & Aft. tippers with compression plates (18/25 cu.yds.)
- 2 - Karrier Ramillies Compression vehicles (35 cu.yds.)
- 1 - Karrier Gamecock side loader, dual purpose (10/12 cu.yds.)
- 1 - Karrier Dual Tip with bin lifter (25 cu.yds.)
- 1 - Austin 5 ton tipping truck.
- 1 - Austin van.
- 1 - Morris van.
- 1 - Fordson Super Major Tractor with bulldozer blade.
- 1 - J.C.B. loading shovel.
- 1 - Land Rover.

Salvage Scheme

The total amount of salvage collected in the year 1971 realised the sum of £10,442.

Since salvage work commenced in the Borough in July 1940 the total amount collected is 15,635½ tons, valued at £105,881.

Refugee Collection and General Staff

At the end of the year the normal establishment was:

- 1 - General Foreman
- 1 - Assistant Foreman
- 1 - Plant Engineer/Assistant Foreman
- 6 - Gangmen
- 10 - Drivers
- 5 - Power Siders
- 1 - Tin Sider
- 10 - Drivers
- 1 - Support Assistant
- 2 - Pattern Men
- 2 - Working Bell Assistants
- 1 - Cleaner (part time)

The number of vehicles owned:

- 1 - 1964 Daimler (30 cu. yd.)
- 1 - 1964 Daimler (18 cu. yd. air space)
- 2 - 1964 Daimler & 1964 Daimler with compression plates (10/12 cu. yd.)
- 2 - 1964 Daimler compression vehicles (22 cu. yd.)
- 1 - 1964 Daimler with 1964 Daimler, dual purpose (10/12 cu. yd.)
- 1 - 1964 Daimler with 1964 Daimler (22 cu. yd.)
- 1 - 1964 Daimler 5 ton lifting truck
- 1 - 1964 van
- 1 - 1964 van
- 1 - 1964 Super Motor Transport with 1964 Daimler
- 1 - 1964 Daimler 1964 Daimler
- 1 - 1964 Daimler

Refugee Reports

The total amount of money collected in the year 1961 was £10,000.

Since money was collected in the month of July 1962 the total amount collected is £12,000, value at £10,000.

GENERAL PUBLIC HEALTH WORK

During the year 166 nuisances were dealt with as compared with 164 in 1970. The number of complaints made to the department was 740. Visits made by the inspectorial staff cover a wide field as shown in the statistics. Amongst the visits were:-

373 primary visits to inspect drainage work.

183 visits to test drains (tests include the hydraulic, colour and chemical tests).

638 visits were made to supervise the refuse collection service.

25 visits were made to investigate infectious diseases.

536 visits were made to applicants for Council houses who pleaded overcrowding or living in insanitary conditions.

Water Supply

All the 14,235 dwellinghouses within the borough are connected direct to the public supply. The water is supplied in bulk by Bradford County Borough Council, and has a natural fluoride content of between 0.1 and 0.2 parts per million.

The quality of the supply has been satisfactory but the quantity in certain pockets of older property is only fair, being in the main due to inadequate service pipes which elderly owner/occupiers are unwilling to replace.

During the year 1,506 metres of 4" main extension have been effected and the replacement of the 9" main in Carr Road, Calverley has been completed.

The number of outdoor facilities which the various areas are
followed by type-

Nature of Work	(1)	Section 12					Section 13	
		to be collected in 1970 by the Department of Health (1970/10)	to be collected in 1970 by the Department (1970/10)	to be collected in 1970 by the Department (1970/10)	to be collected in 1970 by the Department (1970/10)	to be collected in 1970 by the Department (1970/10)	to be collected in 1970 by the Department (1970/10)	to be collected in 1970 by the Department (1970/10)

GENERAL PUBLIC HEALTH WORK

During the year 1969, various work was done in connection with the
in 1970. The number of visits made to the Department was 100. Visits
made by the Department were made under a wide field of work in the
Department of Health.

100 visits were made to inspect drainage work.

100 visits were made to inspect drainage (sewer) works, colour and
chemical waste.

100 visits were made to inspect the refuse collection service.

100 visits were made to inspect the refuse collection service.

100 visits were made to inspect the refuse collection service.
Overseas or living in temporary conditions.

Water Supply

All the 100% water supply within the District are connected
to the water supply. The water is supplied in bulk by the
County Council, and has a natural fluoride content of between 0.1
and 0.2 parts per million.

The quality of the water has been satisfactory but the quantity
in certain parts of the District is only fair, being in the range of
to 100 parts per million.

During the year 1969, various work was done in connection with the
and the Department of Health. The water is supplied in bulk by the
County Council, and has a natural fluoride content of between 0.1
and 0.2 parts per million.

No chemical or plumbo solvency samples have been taken but samples were submitted for examination as follows:

Bacteriological

<u>Total</u>	<u>Satisfactory</u>	<u>Unsatisfactory</u>
44	42	2

Swimming Baths and Bathing Pools

There is one public swimming bath and one private school swimming bath within the borough.

2 samples of the bath water were taken and proved to be satisfactory.

Sewerage and Sewage Disposal

The arrangements for sewerage and sewage disposal within the borough are reasonably adequate. 99.5% of the houses are served by waterclosets, and there are 75 private domestic disposal installations.

Parts of the borough requiring sewers are:

Roker Lane, Pudsey,
Part of Woodhall Road, Calverley,
Calverley Bridge, Rodley.

During the year approximately 1,506 metres of new sewers were constructed in connection with building development and the reconstruction of the storm water overflow at Carr Bottom, Calverley, to serve the outfall sewer has been carried out.

Common Lodging Houses

There are no Common Lodging Houses or Houses Let in Multiple Occupation within the area.

INSPECTION OF FOOD AND SUPERVISION OF FOOD PREMISES

(1) Milk Supply

The Ministry of Agriculture, Fisheries and Food is responsible for the supervision of the production side of the milk trade. This authority is responsible for ensuring satisfactory distribution.

Milk (Special Designation) Regulations, 1949 to 1960

37 samples of designated milk were taken in the borough for bacteriological examination as follows:

	<u>Satisfactory</u>	<u>Unsatisfactory</u>
Untreated Milk	37	2
Pasteurised	-	-
Brucella abortus	197	3

14 samples of milk have been taken for analysis under the Food and Drugs Act.

No chemical or physical analysis samples have been taken but samples were submitted for examination as follows:

Microbiological

<u>Sample</u>	<u>Quantity</u>	<u>Total</u>
1	10	44

Subsiding Tanks and Drainage Ponds

There is one public subsiding tank and one private subsiding tank within the borough.

2 samples of the tank water were taken and found to be satisfactory.

Streets and Public Places

The arrangements for drainage and sewage disposal within the borough are reasonably satisfactory. 75% of the houses are served by waterworks, and there are 15 private domestic supply installations.

Parts of the borough including streets and

Water Lane, Railway.

Part of Northall Road, Calverley.

Deliveries Road, Wetherby.

During the year approximately 1,500 cases of new sewage were connected in connection with building development and the reconstruction of the sewer system at East Bottom, Calverley, to serve the outfall sewer has been carried out.

General Sanitation

There are no known lodging houses or houses let in multiple occupation within the area.

THE PRODUCTION OF FOOD AND FEEDSTUFFS

(1) Milk Supply

The Ministry of Agriculture, Fisheries and Food is responsible for the supervision of the production and sale of milk. This authority is responsible for the marketing and distribution of milk.

Milk (Statistical) Production, 1947 to 1950

37 samples of milk were taken in the borough for bacteriological examination as follows:

<u>Sample</u>	<u>Quantity</u>	<u>Quantity</u>
1	10	37
2	10	10
3	10	10

14 samples of milk have been taken for analysis under the Food and

Ice Cream

16 samples of Ice Cream were submitted for bacteriological examination, 13 proved to be satisfactory.

(2) Registration of Food Premises

156 premises are registered under section 16 of the Food and Drugs Act, 1955 and 234 visits were made during the year. These food premises, by type, and the number of visits made to each are as follows:

	<u>Premises</u>	<u>Visits</u>
Ice Cream Premises	70	50
Fish and Chip Shops	25	41
Cafes, Snack Bars etc.	18	92
Meat Products	42	51

Premises registered for the manufacture of Ice Cream: 1.

(3) Food Premises

The number of food premises in the borough, by type of business is:

Bakehouses	17
Ice cream Manufacturing	1
Fish and Chip Shops	25
Butchers	33
Grocers etc.	120
Greengrocers	38
Confectioners	33
Fishmongers	12
Sweet shops	40
Restaurants, Cafes, Snack Bars	18
Ice Cream Retailers	70
Supermarkets	4

There are no slaughterhouses or poultry processing premises within the district.

Milk and Dairies (General) Regulations, 1959

There are 50 registered distributors of milk within the borough and 2 registered dairy premises.

Bacteriological Examination of Food Equipment

During the year 76 swabs of food equipment were submitted for

16 samples of ice cream were submitted for bacteriological examination, 11 passed as satisfactory.

(2) Registration of Food Establishments

The following are registered under section 14 of the Food and Drug Act, 1930 and 1931 and were made during the year. These food establishments, by type, and the number of visits made to each are as follows:

Establishment	Visits
Ice Cream Parlors	70
Witch and City Shops	25
Cafes, Lunch Bars, etc.	10
Restaurants	45

Establishments registered for the maintenance of the Food Act 1.

(3) Food Establishments

The number of food establishments in the province, by type of business

Restaurants	17
Ice cream manufacturing	1
Witch and City Shops	25
Cafes	22
Lunch bars, etc.	120
Restaurants	10
Restaurants	32
Witch and City Shops	12
Witch and City Shops	40
Restaurants and Cafes, Lunch Bars	10
Ice Cream Parlors	10
Restaurants	4

There are no establishments or food establishments registered under the Food Act.

Milk and Butcher (General) Regulations, 1930

There are 20 registered establishments of this nature in the province and 2 registered milk producers.

Bacteriological Examination of Food Establishments

During the year 16 samples of food establishments were submitted for

bacteriological examination to determine the degree of contamination. The results revealed that the highest colony counts were from Works canteen equipment. There was only one high colony count from retail premises.

In all the cases of high counts appropriate measures were taken to secure an improvement.

Swab sampling is of great benefit to identify to the food handler, malpractices and unhygienic equipment.

Food and Drugs

Six prosecutions were taken under section 2 of the Food and Drugs Act, 1955 resulting in fines of £156-00 being imposed on the defendants. Twelve prosecutions were instituted under the Food Hygiene (General) Regulations, 1970, fines of £100 being imposed on the defendants.

botanical examination to determine the degree of deterioration. The results revealed that the latest colony counts were from 1948 and 1949. There was only one high colony count from 1948.

In all the cases of high colony counts appropriate measures were taken to prevent an improvement.

Each sampling is of great benefit to the food handler, hygienists and laboratory equipment.

Food and Hygiene

Six prosecutions were taken under section 2 of the Food and Hygiene Act, 1955 resulting in fines of £150-200 being imposed on the defendants. Twelve prosecutions were instigated under the Food Hygiene (General) Regulations, 1970, fines of £100 being imposed on the defendants.

ATMOSPHERIC POLLUTION

General

The Borough Council has continued to support the Department in the drive to reduce the atmospheric pollution of the area, and excellent progress has been made.

The Chatsworth, Ederoyd & Waterloo Smoke Control Order No. 10 involving 1,891 premises received confirmation on the 7th September 1971, and the Stanningley West Smoke Control Order No. 11, 1971 involving 1,749 premises received confirmation on the 6th September 1971, both Orders to become operative on the 1st July 1972.

The survey of the Pudsey Central and Stanningley East Smoke Control Order No. 12, 1972 involving 3,186 premises was completed during the latter part of the year.

There is only one further area to survey involving approximately 2,000 premises, and the whole of the Borough should be the subject of confirmed Smoke Control Orders in 1973.

Householders carrying out adaptation work are preferring the labour saving fuels to the traditional open fires.

Daily measurements of suspended solids and sulphur dioxide continued to be taken by the apparatus situated in the Department and the records verify the Corporation's determination to carry out the Clean Air Programme.

Graph 1 illustrates the monthly average concentrations of smoke and sulphur dioxide in the air in Pudsey during 1971.

Graph 2 shows how the level of smoke in the air in Pudsey has fallen between the winter of 1961/62 and the winter of 1971/72. The peaks on the graphs are the high concentrations of pollution measured in winter whilst the troughs are the summer measurement.

Smoke Control Orders made by the Borough Council

ENVIRONMENTAL POLLUTION

Control

The Toronto Council has continued to support the Department in the drive to reduce the atmospheric pollution of the area, and excellent progress has been made.

The Chairman, George A. Hargrove, stated that the Department has received a letter from the Ontario Ministry of the Environment dated May 11, 1972, regarding the Department's request for a copy of the report on the air quality in the area of the City of Toronto for the year 1971.

The report of the Ontario Ministry of the Environment dated May 11, 1972, regarding the report on the air quality in the area of the City of Toronto for the year 1971, is being reviewed by the Department.

There is also a further need to survey existing air quality data, and the report of the Department should be the subject of a meeting with the Ontario Ministry of the Environment in 1973.

Environmental pollution and atmospheric pollution are presenting the most serious threat to the health of the people of the City of Toronto.

Health is dependent on the quality of the air we breathe, and the quality of the water we drink. The Department is working to ensure that the air and water are of the highest quality.

Graph 1 illustrates the monthly average concentrations of smoke and sulphur dioxide in the air in Toronto during 1971.

Graph 2 shows the level of smoke in the air in Toronto during the winter of 1971/72 and the winter of 1972/73. The graph shows that the level of smoke in the air in Toronto during the winter of 1971/72 was higher than during the winter of 1972/73.

Graph 1 illustrates the monthly average concentrations of smoke and sulphur dioxide in the air in Toronto during 1971.

	3917.77	7109	1946	9528

207 observations were made on domestic premises within operational Smoke Control Orders and 29 warnings were issued. Only two cases of the illegal sale of coal were noted and appropriate warning was issued to the merchants.

Industrial Pollution

Local industry is aware of the economical and aesthetic benefits to be gained from the policy of clean air and their co-operation has been maintained throughout the year. 103 observations were made but it was necessary to prosecute only in one case for contravention of section 1 of the 1956 Act. A demolition contractor, after disregarding repeated warnings for burning piles of debris, was successfully prosecuted under section 1 of the 1968 Act.

Notification of New Furnaces

Five notifications of new furnaces were received under section 3 of the Clean Air Act, 1956.

<u>Type</u>	<u>Number</u>
Oil fired furnaces	2
Gas fired furnaces	1
Solid fuel furnaces	2

Height of Chimneys

Four applications were received for chimney height approval and alterations were required in two cases. An application for the installation of a new cupola was rejected because of insufficient stack height.

Number of Certificates issued under section 25

CIVIC AMENITIES ACT, 1967

Abandoned Motor Vehicles

Number dealt with by department	20
Number removed by owners after notice	NIL
Number removed by Corporation in default of owners	8
Number incapable of removal	NIL
Number removed by persons unknown	2
Number being dealt with at end of year	10

MISCELLANEOUS DUTIES

(a) Petroleum (Consolidation) Act, 1928

Licences were granted in respect of premises under this Act as follows:

Licences to store Petroleum Spirit: 55

147 visits and revisits were made to such premises.

(b) Diseases of Animals Acts

The department co-operated with the West Riding County Police in this matter.

(c) Pests Act, 1949

A free advisory and disinfestation service for destruction of mice and rats has been given to householders over a period of many years. Furthermore, practical assistance at reasonable charges and free advice on rat-proofing has been available to occupiers of industrial premises.

532 visits and revisits were made by the Public Health Inspectors in respect of 213 rat and mouse infestations.

I am satisfied that the incidence of infestation in the borough remains at a comparatively low level.

345 visits were made in connection with sewer baiting.

(d) Rag Flock and Other Filling Materials Act, 1951

There is one registration in the borough under this Act.

(e) West Riding County Council (General Powers) Act, 1951

50 hairdressers are registered under section 120 of this Act and 37 visits were made to inspect premises.

30 hawkers are registered under section 76 of the Act and 2 visits were made in this connection.

CIVIL SERVICE ACT, 1906

Abandoned Motor Vehicles

20	Number dealt with by department
111	Number removed by owners after notice
6	Number removed by Corporation in default of owners
111	Number incapable of removal
2	Number removed by persons unknown
10	Number being dealt with at end of year

MINING AND QUARRYING ACT, 1926

(a) Petrolium (Consolidation) Act, 1928

Licences were granted in respect of petrolium under this Act as follows:

Licences to store Petrolium Oil:

147 visits and revists were made to such premises.

(b) Licensing of Animals Act

The department co-operated with the West Riding County Police in this matter.

(c) Game Act, 1949

A first advisory and disinfection service for destruction of rats and mice has been given to householders over a period of many years. Furthermore, practical assistance of reasonable charges and free advice on rat-proofing has been available to occupiers of industrial premises.

522 visits and revists were made by the Public Health Inspectors in respect of 217 rat and mouse infestations.

I am satisfied that the incidence of infestation in the borough remains at a comparatively low level.

362 visits were made in connection with sewer blocking.

(d) Gas Works and Other Building Materials Act, 1921

There is no registration in the borough under this Act.

(e) West Riding County Council (General Powers) Act, 1921

20 buildings were registered under section 123 of this Act and 27 visits were made to inspect premises.

30 houses are registered under section 76 of the Act and 2 visits were made in this connection.

(f) Animal Boarding Establishments Act, 1963

4 licences to keep premises for the boarding of animals were issued for the twelve months period of this report.

(g) Pet Animals Act, 1951

5 licences were issued to keep a Pet Shop in the borough.

(h) Riding Establishments Act, 1964 & 1970

2 licences were issued in this connection for a period of twelve months. The premises in question were inspected and found to be satisfactory.

(1) Animal Testing Facilities Act, 1963

A license is not required for the housing of animals used for the testing of drugs or chemicals.

(2) Animal Testing Act, 1971

Licenses were issued to keep a few dogs in the house.

(3) Animal Testing Act, 1971 & 1970

Licenses were issued in this connection for a period of twelve months. The question in question was inspected and found to be satisfactory.

MIDWIFERY AND MATERNITY SERVICES

1. Births

The births notified during the year assignable to the Division were as follows:

District	Domiciliary		Institutional		Total
	Live	Still	Live	Still	
Padsey M.B.	50	-	538	4	592
Horsforth U.D.	16	-	311	5	332
Aireborough U.D.	18	-	461	4	483
Ilkley U.D.	5	-	267	1	275
Otley U.D.	3	1	229	3	236
Wharfedale R.D.	2	-	52	-	54
Total:	94	1	1860	17	1972

The proportion of institutional births - 94.32% is above the national average, and is probably accounted for by the fact that there are three general practitioner maternity units in the Divisional Area.

2. Domiciliary Midwifery

There are six Midwives and four Home Nurse/Midwives in the Division one of whom undertakes relief duties.

93 domiciliary confinements were attended during the year.

Ten domiciliary midwives are qualified to administer Analgesics in accordance with the requirements of the Central Midwives' Board and are equipped with the necessary apparatus. Analgesics were administered by domiciliary midwives as follows:-

Pethidine only	Trilene	
	Alone	With Pethidine
14	35	12

3. Institutional Confinements

All applications for Regional Hospital Board maternity accommodation for expectant mothers in this Divisional area are made by the ante-natal clinic or the patient's own doctor to the Wharfedale Hospital.

1. Births

The births notified during the year are as follows:

District	Domestic		Institutional		Total
	Live	Still	Live	Still	
London M.B.	50	-	338	4	388
Essex U.D.	16	-	311	5	326
Alford U.D.	18	-	461	4	479
Ilkeley U.D.	5	-	267	1	272
Gloucester U.D.	3	1	229	3	235
Worcester R.D.	2	-	52	-	54
Total:	94	1	1353	17	1454

The proportion of institutional births - 94.3% is above the national average, and is probably accounted for by the fact that there are three General Practitioner maternity units in the Division.

2. Domestic Midwifery

There are six midwives and four Home Nurse/Midwives in the Division one of whom undertakes relief duties.

93 domestic confinements were attended during the year.

Ten domestic midwives are qualified to administer Anaesthetics in accordance with the requirements of the General Midwives' Board and are equipped with the necessary apparatus. Anaesthetics were administered by domestic midwives as follows:-

Pethidine only	Trilene	
	Alone	With Pethidine
14	35	12

3. Institutional Confinements

All applications for Regional Hospital Board maternity accommodation for expectant mothers in this Division are made by the ante-natal clinic or the patients' own doctor to the Worcester Hospital.

Management Committee, and accommodation is booked in one or other of the following General Practitioner Maternity Units according to the wishes of the patient:-

Four Gables Maternity Home	..	..	..	20 beds
St Winifred's Maternity Home	..	..	..	14 beds (closed 16.10.71.)
Wharfedale Hospital Otley	..	..	..	11 beds

At each of these units it is possible for the patient's own doctor to attend the confinement if desired.

Prior notice of the discharge of maternity cases from the Maternity Units under the control of the Ilkley and Otley Hospital Management Committee is sent direct to the Divisional Public Health Office, thus enabling immediate follow-up by the midwife, or health visitor, as appropriate, to be arranged.

4. Ante-Natal and Post-Natal Clinics

Prior to the inception of the National Health Service ante-natal care was mainly provided at the ante-natal clinics of local authorities. Now an increasing number of general practitioners are providing ante-natal care for their booked patients under the Maternity Medical Service of the National Health Service and more women are seeking a bed in hospital.

The following attendances were made during the year:-

Name and address of Ante-Natal/Post Natal Clinic (whether held at Infant Welfare Centre or other premises)	Number of separate sessions held during year					No. of women in attendance (including combined infant welfare & ante-natal sessions)		Total No. of attendances (including combined infant welfare and ante-natal sessions)	
	Local Health Autho- rity Medical Offi- cers	Mid- wives (exclu- ding mother- craft and relaxa- tion	General practi- tioners employed on ses- sional basis	Hospi- tal medical staff	T o t a l	Ante- Natal	post- natal	Ante- natal	Post- Natal
FARSLEY Ante-natal and Post-natal Clinic now closed January 1974	-	-	1	-	1	-	-	-	-
CALVERLEY Ante-natal and Post-natal	-	-	24	-	24	27	26	174	29
RAWDON Ante-natal and Post-natal	-	-	12	-	12	47	-	177	-
TOTALS	-	-	37	-	37	74	26	351	29

Management Committee, and accommodation is booked in one or other of the following General Practitioner Maternity Units according to the wishes of the patient:-

Wharfedale Hospital Only 11 beds
 St Wilfrid's Maternity Home 14 beds (closed)
 Four Gables Maternity Home 20 beds
 16.10.71.)

At each of these units it is possible for the patient's own doctor to attend the confinement if desired.

Prior notice of the diagnosis of maternity cases from the Maternity Units under the control of the Lillies and Otley Hospital Management Committee is sent direct to the Division 4 Public Health Office, thus enabling immediate follow-up by the midwife, or health visitor, as appropriate, to be arranged.

4. Ante-Natal and Post-Natal Clinics

Prior to the inception of the National Health Service ante-natal care was mainly provided at the ante-natal clinics of local authorities. Now an increasing number of General Practitioners are providing ante-natal care for their booked patients under the Maternity Medical Service of the National Health Service and more women are seeking a bed in hospital.

The following attendance were made during the year:-

Name and address of Clinic (whether held at Infant Welfare Centre or other premises)	Local Health Authority Medical Officer or other person	Midwife (exclusive of those employed on non-stationary basis)	General Practitioner employed on non-stationary basis	Hospital Medical Staff	No. of women in attendance (including combined infant & ante-natal sessions)				Total No. of attendances (including combined infant & ante-natal sessions)	
					Ante-Natal	Post-Natal	Infant	Combined	Ante-Natal	Post-Natal
FABRIEY Ante-natal and Post-natal Clinic now closed January 1971	-	-	1	-	1	-	-	-	-	-
DALEHEAD Ante-natal and Post-natal	-	-	24	-	24	28	27	79	22	22

TOTAL	376	44	519	24	543	3039	147	3106

6. Dental Treatment of Expectant Mothers

Facilities are available for expectant and nursing mothers to receive priority dental treatment through the County Council's Scheme at the County Dental Clinic at Pudsey, or from Messrs. G. H. G. Dentist. The services of a private dental practitioner can, however, only be utilised under the scheme when it is not reasonable to expect the patient to attend a County Dental Clinic. Under the scheme all treatment, including the provision of dentures, is entirely free. Dental treatment for nursing mothers under the County Scheme extends up to twelve months after confinement.

With effect from the 15th May 1961 the N.H.S. Dental Service undertook provision of free dentures to expectant or nursing mothers, thus providing a service identical with the County Scheme. This causes a substantial reduction in the number of applications for dental treatment through the Clinic Service.

5. Ante-Natal Relaxation Exercises Clinics

These clinics, by teaching the mother the functions of labour pains and the course of labour, by teaching her relaxation and preparing her for labour by a course of ante-natal exercises, can do much to help her to approach her confinement with understanding and confidence.

The following attendances were made during the year:-

6. Dental Treatment of Expectant Mothers

Facilities are available for expectant and nursing mothers to receive priority dental treatment through the County Council's Scheme at the County Dental Clinic at 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100. The scheme is not intended to expect the patient to attend a County Dental Clinic. Under the scheme all treatment, including the provision of dentures, is entirely free. Dental treatment for nursing mothers under the County Scheme extends up to twelve months after confinement.

With effect from the 15th May 1961 the N.E.S. Dental Service undertook provision of two dentures to expectant or nursing mothers, thus providing a service identical with the County Scheme. This causes a substantial reduction in the number of applications for dental treatment through the Dental Service.

PREMATURE INFANTS

Special equipment for use in the nursing of premature babies at home is stationed at the Pudsey (Westroyd, Farsley) Ambulance Depot and Menston (Buckle Lane) Ambulance Depot, from which it can be delivered to a home at any time day or night, at the request of a doctor or midwife.

Provision is made on the notification of birth card for the birth weight of the infant to be stated, and if it is $5\frac{1}{2}$ lbs or less, the infant is considered to be premature.

Of the 94 premature babies born alive during the year, 91 were born in hospitals or maternity homes and 3 were domiciliary births. There were no premature births referable to this Division in private nursing homes.

Those born alive and surviving over 28 days numbered 90, and this gave a survival rate of 90% as compared with 84% for 1970.

PREMATURE BABIES BORN DURING 1970 TO MOTHERS NORMALLY RESIDENT IN THE DIVISION

Care of the Unmarried Mother and her Child

The Health Visitors visit all unmarried mothers and their children who come to the notice of the Health Department to give any necessary help and advice. Effective co-operation exists between the Divisional Public Health Office, and the various statutory and voluntary bodies who may be concerned in dealing with the many social problems which these cases frequently present.

The County Council accept financial responsibility within prescribed limits for unmarried mothers admitted to Homes established for their care by voluntary bodies or other authorities, as the authority itself has no such provision.

The number of illegitimate live births in the Division during the year is as follows:-

Area	Illegitimate live births	Percentage of Total live births
Pudsey M.B.	19	3.09
Horsforth U.D.	7	2.139
Aireborough U.D.	16	3.34
Ilkley U.D.	9	3.28
Otley U.D.	12	5.17
Wharfedale R.D.	4	7.40

Child Welfare Centre, Manor Square, Otley	Thursday	10.0 a.m. to 12 noon
		2.0 p.m. to 4.0 p.m.

HEALTH VISITING

Prior to 1946 the health visitor was concerned mainly with the welfare of mothers and young children under five years, and although this still continues to be an important part of her work, she is now also concerned, as health teacher and family adviser, with the promotion of health within the whole family. This extension of her work is reflected in the number of other visits made by the health visitors.

During the year practical work was arranged in the Division for health visitor students, who were taking the course of training arranged jointly by Local Health Authorities and the University of Leeds, for the Health Visitors' Certificate.

Details of the health visitors' work are given in the following table:-

Cases visited by health visitors	No. of cases (i.e. first visits)
1. Total number of cases	14,928
2. Children born in 1971	1,962
3. Children born in 1970	2,054
4. Children born in 1966-69	5,343
5. Total number of children in lines 2 - 4	9,359
6. Persons aged 65 or over (excluding 'domestic help only' visits)	2,085
7. Number included in line 6 who were visited at the special request of a general practitioner or hospital	540
8. Mentally disordered persons	61
9. Number included in line 8 who were visited at the special request of a general practitioner or hospital	21
10. Persons, excluding maternity cases, discharged from hospital (other than mental hospitals)	190
11. Number included in line 10 who were visited at the special request of a general practitioner or hospital	138
12. Number of tuberculous households visited (i.e. visits by health visitors not employed solely on tuberculosis work)	277
13. Number of households visited on account of other infectious diseases	193
14. Other cases	2,624
15. Number of tuberculous households visited by tuberculosis visitors (i.e. employed <u>solely</u> on tuberculosis work)	NIL

HOME NURSING

The work undertaken by the Home Nursing Service continues to be very heavy. The Service has, however, by enabling more patients to be nursed at home and by making possible the early discharge of patients from hospitals, fulfilled an urgent need by relieving the pressure on hospital accommodation.

The number of cases attended during the year was 2,379.

The practice whereby extensive use is made of the home nurses by general practitioners for the giving of injections is still considerable and visits made by the nurses for this purpose only continues at a very high level.

Very close and effective liaison is maintained with general practitioners and the various hospitals in relation to this service.

Each nurse has under her care articles of equipment for loan to patients who are being nursed at home. Large articles of equipment such as wheelchairs etc. are stored in the Division and are available for loan to patients as required.

The work performed by Home Nurses during the year is indicated by the following figures:-

Type of Case	No. of cases attended by Home Nurses	No. of visits paid by Home Nurses
Medical	1817	46109
Surgical	472	9389
Infectious Diseases	33	350
Tuberculosis	14	632
Maternal Complications	34	318
Other	9	147
Totals	2379	56945
Patients included in above who were aged 65 or over at the time of the first visit during the year	1449	39514
Children included in above who were under 5 years at the time of the first visit during the year	85	421
Patients included in above who have had more than 24 visits during the year	660	40749

IMMUNISATION AND VACCINATION

Immunisation and vaccination procedures are carried out free of charge at all the Infant Welfare Clinics, at special sessions held in the schools, or by private medical practitioners.

Children can be protected against Diphtheria, Whooping Cough, Tetanus, Poliomyelitis, Measles, Rubella, and Tuberculosis by vaccination and immunisation.

The following programme shows how this can be done.

This schedule may not suit all children however, and parents are advised to discuss the matter with their family doctor or at the clinic soon after the baby is born so that suitable arrangements may be made to ensure early protection against certain of these diseases.

USUAL AGE	FOR PROTECTION AGAINST
6 months	Diphtheria, Poliomyelitis, Whooping Cough and Tetanus (1st dose)
8 months	- do - (2nd dose)
14 months	- do - (3rd dose)
16 months	Measles Vaccination
5 years	Diphtheria, Tetanus, Poliomyelitis and Smallpox Re-vaccination
11 years	Rubella
11-12 years	Tuberculosis
15 years	Poliomyelitis, Tetanus and Smallpox Re-vaccination

IMMUNIZATION AND VACCINATION

Immunization and vaccination procedures are carried out in the absence of all the Infant Welfare Clinics, at special meetings held in the schools, or by private medical practitioners.

Children can be protected against Diphtheria, Whooping Cough, Tetanus, Polio-myelitis, Measles, Rubella, and Tuberculosis by vaccination and immunization.

The following programme shows how this can be done.

This schedule may not suit all children however, and parents are advised to discuss the matter with their family doctor or at the clinic soon after the baby is born so that suitable arrangements may be made to ensure early protection against certain of these diseases.

USUAL AGE	FOR PROTECTION AGAINST
6 months	Diphtheria, Polio-myelitis, Whooping Cough and Tetanus (1st dose)
8 months	- do - (2nd dose)
14 months	- do - (3rd dose)
16 months	Measles Vaccination
2 years	Diphtheria, Tetanus, Polio-myelitis and Squalix Re-vaccination
11 years	Rubella
11-12 years	Tuberculosis
12 years	Polio-myelitis, Tetanus and Squalix Re-vaccination

POLIOMYELITIS VACCINATION

From the commencement of the scheme to the end of 1971, 57,893 persons had been vaccinated in the area.

TUBERCULOSIS

There has been close co-operation between the Chest Physicians and the Health Department. Under the agreement reached between the Leeds Regional Hospital Board and the County Council, the Chest Physicians employed full-time by the Board undertake on behalf of the County Council certain specified duties in relation to the care, after-care and prevention of tuberculosis.

Tuberculous patients in the Division are visited by the Health Visitor for the area in which they reside.

A more realistic appraisal is now made of the patients before extra nourishment is recommended, and the number still receiving free milk at the end of the year was 8.

One hundred and eighty-six contacts of known cases of tuberculosis in the Division were vaccinated by the Chest Physicians on behalf of the County Council during the year.

B.C.G. VACCINATION OF 13 YEAR-OLD SCHOOL CHILDREN

B.C.G. vaccination continues to be available to the 13 year-old school children so that they may be given opportunity of immunisation against tuberculosis before they leave school and come into contact with the mass of the general public when risk of infection is greater.

1. Acceptances

4	Acquired abnormalities of heart and vessels

REGISTRATION AND INSPECTION OF NURSING HOMES

The following Nursing Homes which are registered under the Public Health Act, 1936, were inspected by the medical staff of the Division during the year:-

<u>Name and Address</u>	<u>No. of beds provided</u>
Jesmond Nursing Home New Street, Farsley	7
St Joseph's Convalescent Home Outwood Lane, Horsforth	44
Oakbank Nursing Home Outwood Lane, Horsforth	13
Marie Curie Nursing Home Ardenlea, Queen's Drive, Ilkley	33
Hanford House Nursing Home Ben Rhydding, Ilkley	7
Beckfield House Church Lane, Pudsey	8

REGISTRATION AND INSPECTION OF DISABLED AND OLD PERSONS' HOMES

The following Homes, registered under the National Assistance Act, were inspected jointly with the Divisional Social Services Officer:-

Champion House, Clara Drive, Calverley
 Ernest Ayliffe Home for Deaf and Dumb, Rawdon
 Gratton Home for Aged Ladies, Otley
 Haversham Court, Ben Rhydding
 Methodist Home for the Aged (Glen Rosa) Ilkley
 Ghyll Court, Ilkley
 Brooklands, Harper Lane, Yeadon
 Lynwood, 18 Alexandra Road, Pudsey (Closed 1971)
 Wynccliffe, Wilton Road, Ilkley
 Welland Villa, 53 Richardshaw Lane, Pudsey (Closed 1971)
 Fellstow, 5 Clifton Road, Ilkley

REGISTRATION AND INSPECTION OF NURSING HOMES

The following Nursing Homes which are registered under the Public Health Act, 1936, were inspected by the medical staff of the Division during the year:-

<u>Name and Address</u>	<u>No. of beds provided</u>
Lesmond Nursing Home New Street, Parsley	7
St Joseph's Convalescent Home Outwood Lane, Horsforth	44
Oakbank Nursing Home Outwood Lane, Horsforth	13
Maria Curie Nursing Home Ardenlea, Queen's Drive, Ilkley	33
Hamford House Nursing Home Ben Wydding, Ilkley	7
Beckfield House Church Lane, Pudsey	8

REGISTRATION AND INSPECTION OF DISABLED AND OLD PERSONS' HOMES

The following Homes, registered under the National Assistance Act, were inspected jointly with the Divisional Social Services Officer:-

Champion House, Clara Drive, Calverley
Ernest Ayliffe Home for Deaf and Dumb, Rawdon
Granton Home for Aged Ladies, Otley
Haverham Court, Ben Wydding
Methodist Home for the Aged (Glen Ross) Ilkley
Opill Court, Ilkley

YOUTH EMPLOYMENT SERVICE

Very close co-operation is maintained with the Youth Employment Officers regarding children leaving school who are medically unfit to follow certain types of occupation.

EMPLOYMENT OF CHILDREN

The County Council's byelaws require that where a child of compulsory school age is employed there shall within fourteen days from the date when the employment began be produced to, and endorsed by, the employer a certificate from the School Medical Officer that such employment will not be prejudicial to his health or physical development and will not render him unfit to obtain proper benefit from his education. 36 children were medically examined for this purpose during the year.

Sixty-six children were also examined as to their fitness to take part in entertainment under the provisions of the Children and Young Persons Act 1933.

AUDIOLOGY CLINIC

A Specialist Audiology Clinic is held monthly in Otley at the premises in Manor Square, Otley.

During the year 19 individual children were referred, of these 4 were found to have significant hearing loss and 2 are at present undiagnosed.

Three children were recommended to wear hearing aid, one recommended to sit in front of the class, two recommended for speech therapy, ~~three~~ recommended for special supervision by Peripatetic Teacher and six were referred to Ear, Nose and Throat Consultant.

Very close co-operation is maintained with the Youth Employment Officers regarding children leaving school who are medically unfit to follow certain types of occupation.

EMPLOYMENT OF CHILDREN

The County Council's bye-laws require that where a child of compulsory school age is employed there shall within fourteen days from the date when the employment began be produced to, and endorsed by, the employer a certificate from the School Medical Officer that such employment will not be prejudicial to his health or physical development and will not render him unfit to obtain proper benefit from his education. 36 children were medically examined for this purpose during the year.

Sixty-six children were also examined as to their fitness to take part in entertainment under the provisions of the Children and Young Persons Act 1933.
