To The Ramsey Urban District Council.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting my fourteenth Annual Report on the health and sanitary conditions of the District for the year ending 31st December, 1971.

The mid-year population of the District was again estimated by the Registrar General as unchanged at 5,620.

There were 74 live births during the year, being 10 less that in the previous year. This gave a crude birth rate of 13.2 per 1,000 and an adjusted rate of 13.1 per 1000 of the population. The rate for England and Wales was 16.0 per 1,000. The illegitimate live birth rate was 8% being the same as that for England and Wales. No infants under twelve months of age died during the year, neither were their any stillbirths.

There were 47 deaths during the year 27 males and 20 females, the crude death rate was 8.4 per 1,000 persons and the adjusted rate 9.2. The rate for England and Wales was 11.6.

The number of cases of notifiable infectious disease has fallen greatly over the last few years. This is due to improvement in living conditions and also to the immunisation facilities which are now widely available. Diphtheria and Poliomyelitis are now virtually a thing of the past in this Country, and Measles is now only a shadow of what it once was. We must beware however, these dieases could come back again at any time when the proportion of immunised persons in the population was insufficient. I do urge parents therefore to see to it that their children receive all the immunisations which are available to them.

The sewerage of the areas lying outside the town is now virtually completed. The number of pail closets in use being reduced from 170 to 75 during the year. Some of those now in use can still be replaced by W.C.'s connected to the sewer. The Council Houses on Herne Road, Ramsey St. Mary's which were outside the sewerable area are now supplied with septic tanks.

I am most grateful to the members of the Council and their Officers and Staff for all the help which they have given to me during the year.

Digitized by the Internet Archive in 2018 with funding from Wellcome Library

the proportion of intumined persons in the population was insulitoners.

completed. The number of pail closets in use boing reduced from 170 to 75 during the year. Some of those now in use can still be replaced by W.C.'s

connected to the sewer. The Council Houses on Horse Road, Margey St. Mary's

England and Wales	16	16	11.6	11.6		18	12

Comparability Factor Births 0.99

Comparability Factor Deaths 1.09

The comparability factors are figures by which the crude birth and death rates need to be multiplied so as to find the adjusted rates. The adjusted rates are then comparable with the rates for England and Wales or the adjusted rates of any other place in the Country. The Registrar General calculates the factors from information available to him concerning amongst other things the age and sex structure of the population.

REPORT OF THE PUBLIC HEALTH INSPECTOR FOR THE YEAR ENDED 31st DECEMBER, 1971

TO THE MEDICAL OFFICER OF HEALTH

Sir,

I beg to submit my report for the year ending 31st December, 1971.

Housing:

It has not been necessary to serve any notices for repairs under the Housing Acts, such work has been included in matters covered by other aspects of the work e.g. improvement and standard grants or has been carried out voluntarily.

Inspection of Houses during the year:

Total number of dwelling houses inspected for housing defects		04.1
(under Public Health Act and Housing Acts)	•••	314
Number of houses found to be in a state so dangerous or injurious	us	
to health as to be unfit for human habitation	•••	15
Number of inspections made for the purpose	•••	45
Number of houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation:-		
Council properties	•••	409
Others	•••	37
Action under Statutory Powers :		
Number of dwellinghouses in respect of which Demolition Orders		
were made	•••	4
Number of dwellinghouses demolished in pursuance of Demolition	Orders	5
Number of separate tenements in respect of which Closing Orders were made	•••	Nil
Number of written undertakings given by owners not to relet cottages for human habitation		2
Number of houses closed by agreement pending demolition	•••	7

DEPORT OF THE PUBLIC HEALTH THEFRANCE FOR THE VEAL BUILDS

HELIARI TO REDITED LADICES OF HEALTH

I beg to saimt my report for the year ending Mat December, 1971.

Housting

It has not been necessify to serve any notices for reprine under the liquidity Acts, such work has been included in matters covered by other between the standard greater or has been carried out volunterally.

Improvement Grants :

- 14 applications for Standard Grants were received during the year.
 - 8 applications for Improvement Grants (Discretionary) were received during the year.
- 14 Standard Grants were paid during the year.
 - 9 Discretionary Grants were paid during the year.

There now remain twelve Council houses which do not have amenities up to the Standard Grant level. Eight will be dealt with early next year and the remaining four will be improved when difficulties caused by occupation have been solved.

A 1919 Council house was converted into 2 one bedroom flats and provides accommodation to the requisite standard for elderly people. It has proved to be a worthwhile conversion and the tenants are happy. It is proposed to convert others as they become empty but the rising costs and difficulty in finding builders to do the work tends to make the jobs very drawn out.

With regard to grants generally, the Council operates fully the provisions as to improvement grants (discretionary) and provided there are no difficulties as to proof of title most applications for these are dealt with in six weeks and many standard grants in even shorter time.

In spite of encouragement given by Council Officers - and Councillors - the number of grant applications remains comparatively low.

8 applications for certificates of disrepair in connection with qualification certificates were received during the year.

4.00	

Improveque Grants

- A applications for Standard Grants were received during the year.

 8 applications for Improvement Grants (Discretionary) were reserved during the year.
 - 'As Standard Create were paid during the year.
 - 9 Discretionary Grants vore paid during the year.

Miscellaneous - paths, gates etc.	•••		•••	•••		55
Accumulations, deposits etc.			•••			14

Council Properties :

In all 827 complaints were received from the tenants of 409 of the Council's houses. During the year improvements were commenced at 72 of these houses and some 456 inspections were made of work in progress. It is anticipated that a further 2 substandard houses will shortly become vacant and can be demolished.

A 1919 Council house has been converted into 2 flats for elderly people and they have proved to be very acceptable and comfortable accommodation for two aged villagers who are happier than they might have been if they had been moved elsewhere. It is proposed to convert other houses of this type to flats both for young couples and elderly people.

Sewerage and Sewage Disposal:

112 new drainage systems were installed and tested during the year.
23 alterations to existing systems were also tested.

The Council give a free septic tank emptying service where necessary.

132 septic tanks being emptied in 1971.

At the end of the year there were 75 pail closets emptied twice weekly by a Contractor. A further 7 remote cottages have pail closets emptied by the occupiers.

Sewerage of the outside areas :

With the completion of the system the following areas are now sewered:-

(a) Ramsey Town.

(b) Ramsey Heights (the major part)

(c) Ramsey St. Mary's (the major part) (d) Forty Foot Bridge (the major part)

(e) St. Mary's Road.

At Ramsey St. Mary's the greater number of properties outside the sewerable area are Council houses and in these cases (20 in all) new septic tank systems have been installed.

The standard of effluent has, on occasions, been slightly below the standard required by the Great Ouse River Authority. These few departures from the acceptable standard were thought to be due to the full loading of the filters by the completion of connections in the villages. The reports of the Authority are closely considered in conjunction with the advice available from the Council's Consultant Engineers.

The following list shows the results of analyses carried out by the River Board during 1971:-

Glosets :

112 new drainingo systems were installed and tested during the year.

The Council give a free septic tenk captying service where necessary.

At the end of the year there were 75 pail closets emptied twice weekly by a Comirgotor. A further 7 remote cottages have pail closets emptied by the occupiers.

Sewarara of the outside menu

With the completion of the system the following areas are now severed:-

- (a) Remove Town.
 (b) Remove Hotgitts (the major part)
 (c) Remove St. Hary's (the major part)
 (d) Forty Foot Bridge (the major part)
 - (c) St. Mary's Road.

At Homsey Star Mary's the greater number of properties outside the sewing deverable area Council houses and in these cases (20 in all) new seption tank systems have been installed.

The standard of efficient has, on eccesions, been slightly below the standard to the Great Gues River Authority. These for departures from the acceptable standard were thought to be due to the full leading of the filters by the completion of commettens in the villages. The reports of the Authority are closely considered in conjunction with the advice available from the Council's Consultant Englecers.

The following list saws the results of smales earled out by the

Sample	No.	4676	Solids	in	suspension	_	10	ppm.	BOD	5	days	13	ppm.
11	No.	719	11	11	H	-	17	ppm.			days		-

11	No.	3331	11	tt	tt .			ppm.					ppm.
tt	No.	4534	11	11	11			ppm.					ppm.

The reception and treatment of sewage from Bury in accordance with the agreement with St. Ives R.D.C. is continuing without any administrative or technical difficulties.

Water Supply :

11 samples of domestic water were taken and were all satisfactory.

The Cambridge Water Company has sent me copies of analysts reports and these show that the water in the water tower is very satisfactory. The supply is adequate in quantity and pressures are good following mains extensions and renewals.

The water supply throughout the District is satisfactory, but contains less than 0.2 parts per million of fluoride. This district is agreeable to fluoridation of its water supply, but we are awaiting negotiations between the Cambridge Water Company and other bodies before more can be done in the matter. There are no standpipes in the area, and there are only about three houses in the District which do not receive mains water. The Council continues to have representatives on the Cambridge Water Company.

Swimming baths :

Three samples of water from a school swimming pool were taken. The first produced an unsatisfactory plate count. This was found to be due to under-chlorination following the mis-interpretation of testing equipment. This was rectified and further samples proved to be satisfactory.

Meat and Food Inspection :

There are no slaughterhouses in the district.

Unfit food is condemned following notification by the shopkeeper, or during routine inspections under the Food Hygiene Regulations.

Among foodstuffs condemned were:-

4,752 apples.

1,095 kilogrammes Onions.

1,000 kilogrammes Miscellaneous foodstuffs.

Number of premises registered under the Food and Drugs Act		20
Number of inspections of registered food premises		18
There are no ice-cream manufacturers in the district.		
Condemned foodstuffs are burned at the Refuse Tip.		
There are no poultry processing plants in the area.		

Common Lodging Houses :

There are none in this District.

Offices, Shops and Railway Premises Act 1963:

A total of 74 registered premises were on record on 31st December, 1971. One or more visits of inspection were made to 36 premises. Close liaison is maintained with the Fire Prevention Department of the County Fire Service and joint inspections are often made. The occasion occurs in a small authority such as Ramsey for shopkeepers and other people whose livelihood is controlled by this Act for them to seek advice informally at the office and their attention is directed to their responsibilities when plans for alterations of premises are under preliminary discussion. Some 60 visits in all were made to premises under this Act.

I good Frendees

Cales, Mentaurents, Hotels and Public Houses Bakars ... Braisi

Council Lodeline Houses

There are none in this District.

Offices. Shops and Rathway Fremises Act 1953 :

A total of 74 registered premises were on record on 31st December, 1971
One or more visits of inspection were made to 36 premises. Close listeon is
maintained with the fire Prevention Department of the County Fire Service and
joint inspections are often made. The occasion occurs in a small authority
such as mammaey for shopkeepern and other people whose livelihood is
controlled by this Act for them to seek advice informally at the office and
their attention is directed to their responsibilities when plans for
alterations of premises under preliminary discussion. Some 60 visits in
all were made to premises under this Act.

Factories Act 1961:

Premises	No. on Register.	Inspections.	Written Notices	Occupiers Prosecuted
Factories without power	-	-	-	-
Factories with power	18	14	-	-
Other Premises	9	18	-	-
Cases in which defects were found	223 1000	4	18	-
Outworkers	There are	no outworkers	in the Dis	trict.

Refuse Collection and Disposal:

Refuse collection is carried out by direct labour, two loader/drivers and a loader provide a weekly back door collection in the town and a weekly kerbside collection in the villages. The 35 cubic yard Bedford/Eagle refuse vehicle enables the crew to cope with the rounds and to accommodate the new dwellinghouses that are being occupied.

Refuse disposal is at the Ramsey Heights Tip and no complaints were received during the year from householders in the vicinity. Negotiations are in hand to lease part of the land adjoining the Tip as a Nature Reserve under the control of the Bedford and Huntingdonshire Naturalists Trust.

Rodent Control :

Rentokil have continued to do treatments to dwellinghouses on complaint and Council properties by regular servicing.

There has been no evidence of infestation in the sewers.

Rentokil have several farm contracts in the district and another contracting firm treats Ramsey Estates. Where infestations have been reported or noticed, informal action was all that was needed to have the necessary treatments carried out. No evidence of warfarin resistance in rats or mice was noticed.

The following table shows the inspections and treatments carried out:-

Refuse collection is carried out by direct labour, two loader/drivers and a loader provide a weekly back door collection in the town and a weekly lagic kerbaids collection in the villages. The 35 oubic yard Bedford/Bagic refuse vehicle enables the crew to cope with the rounds and to accommodate the new dwellinghouses that are being occupied.

Refuse disposal is at the Remove Heights Tip and no complaints were received during the year from householders in the vicinity. Megatiations are in hand to lesse part of the land adjoining the Tip as a Nature Reserve under the control of the Bedford and Huntingdonahire Returnists Trust.

Rodent Control :

Hentold I have continued to do treatments to dwellinghouses on complaint and Council properties by regular servicing.

There has been no evidence of infestation in the sewers.

Rentokil have several farm contracts in the district and another contracting firm treats Russey Estates. where infestations have been reported or noticed, infermal action was all that was needed to have the necessary treatments carried out. No evidence of warfarin resistance in rate or mice was noticed.

(b)	Number infested by (i) Rats (ii) Mice	30 10	-
3.(a)	Total number of properties inspected for rats and/or mice for reasons other than notification	55	6
(b)	Number infested by (i) Rats (ii) Mice	30 1	-

Caravan Sites :

The one residential site, which for some years had been troublesome, had, with the voluntary co-operation of the owner, closed down. One other individual caravan used for residential purposes was removed with the co-operation of the owner as it tended to develop into a sub-standard "transit dwelling" for young marrieds who were keen to get a Council house.

Appreciation is expressed of the interest and support of the Chairman and Vice-Chairman of the Health Committee, Members of the Council, the guidance of the Medical Officer of Health and the co-operation of the Council Staff.
