THE

Rawdon Arban District Council.

ANNUAL REPORT

OF THE

MEDICAL OFFICER,

WALTER W. CHAMBERLAIN, M.O.H.

1905.

YEADON:

WILLIAM WALMSLEY, GENERAL PRINTER, WEST BAR, 1906.

Digitized by the Internet Archive in 2018 with funding from Wellcome Library

RAWDON URBAN DISTRICT COUNCIL.

ANNUAL REPORT, 1905.

The number of *Deaths* during the year, 46, is the highest I have record of—the nearest approach being 41 in 1896. Twelve—over one quarter—were upwards of 70 years. Death-Rate=14·2 per 1000 per annum—Last year an exceptionally low rate of 9·3 per 1000 per annum was recorded.

There were 49 Births, only 3 more than the Deaths and only 1 more than the lowest I have recorded viz: 48 in 1902. Considering the reputation which I think Rawdon has now established for health, neither of these rates can be looked upon as satisfactory. As regards the deaths in addition to the very aged included, nearly half the total occurred in January and December the other months remaining fairly normal. Certainly the weather with the long summer and mild early winter cannot be held responsible. As regards the Births for some years the rate has tended steadily to decline as unfortunately is the case in other parts of the country.

Thirty cases of Infectiuos Disease were reported

Scarlet Fever, - 24.

Enteric Fever, - 3.

Diptheria, - - 3.

Eighteen of these were removed to the Isolation Hospital at Menston, and it would be well if parents generally in the township were better acquainted with the advantages gained by consenting to the removal of their children. In Scarlet Fever which has been of late so prevalent, in addition to the nursing and care bestowed upon them during the more acute stage, there is not that irksome confinement for so many weeks in a small and often ill-ventilated room frequently occupied by two, three or more persons. All bedding and infected clothing too are removed with patients so that there is no need for the destruction of the many articles which, when treatment is carried out at home, is found essential. In January the National School was closed for a short period so that both the buildings and their contents might be thoroughly disinfected cleansed.

From the Spring quarter onwards both Measles and German Measles were more or less prevalent. This latter complaint, which has not been with us in epidemic form for at any rate the last 10 years, has been of an unusually severe type and bearing a curious resemblance to Scarlet Fever both during its course and in some of its sequelae.

There have been a few cases of Chicken Pox, and as usual Influenza was prevalent both early and late in the year.

I am pleased to note one great improvement in Cowsheds, viz: that at Carr's Farm—where a large well ventilated, well lighted and well drained building stands in marked contrast to the old sheds it replaces, these latter being amongst the chief offenders so frequently referred to in these reports.

The Slaughter Houses, four in number, are in good condition and kept in a satisfactory manner.

The Water Supply continues both good and plentiful. Rumours of scarcity were abroad during the drought but it remained fairly constant. At this time the private supply in the old village was very inadequate, owing to leakage from one of the reservoirs but since the summer months a considerable amount of labour has remedied this and in addition, the number of houses supplied has been materially reduced.

WALTER W. CHAMBERLAIN,

MEDICAL OFFICER OF HEALTH.

FOR WHOLE DISTRICT.

		15	0			NUMBER.
		ω	ω			NUMBER. No. on No. In- Register spected
		Slowly improving.	Very fair.			GENERAL CONDITION?
-						LEGAL PROCEEDINGS [if any].

Cowsheds—Give date of Regulations in force under D.C.M. Order, September, 1887, new regulations now under Condesideration. Inspection made during 1905? Two. Any action taken by outside Authorities, e.g., under 'Slifk Clauses' concerning milk supplied from this district? No.

Infectious Disease—What disinfecting apparatus is available? None except that at Menston Isolation Hospital.

How are dwellings disinfected? with Sulphur. Any placards or handbills issued during 1905? No.

Factory and Workshop Act—[NOTE—Please fill up and attack the Home Office Tuble—Form 572]. Any cases of anthrax in factories or workshops during 1965? No.
Midwives Act 1962—No. of cases of Persperal Fewer occurring in the practice of Midwives, O. No. of such Midwives disinfected by Sanitary Authority under Rule E. 5 of the Central Midwives Board. O. Schools—No, closed during 1905 on account of sickness, One Total duration of such closure, about 10 Days. Any alment or contegious disease associated particularly with school life during 1905? German Messless and to a less extent Scarlet Fever.

Dwellings-No. of habitation, No. of Houses built during 1904, 1. General Character, £35 Rental. Any occupied houses unfit for

Nuisances—Total No. of Nuisances in band at close of 1904. 3. At close of 1905. 3. Reported during 1905, 15. Abated during 1905, 12. Total No. of Legal Notices served for Abatement of Nuisances during 1925, 0. Total No. of Summoness or other Legal Proceedings, 0. No. of Sink wasted disconnected during 1905. No. of Sink wastes trapped during 1905. 3. No. of Closets newly constructed during 1905, 7. Kinds, Water Closets. Any over crowding of persons in houses? No. Any action taken under the Housing of the Working Classes Act? No. is house-to-house inspection systematically made? No.

Meteorology-Mean Temperature for year 1905.

What action has been taken in regard to the following matters? Seizure of Unsound Food, O. Prosecutions, O. Samples under Sale of Food and Drugs Acts, O. Prosecutions, O. Has there been any poisoning during 1905 attributable to arsenied beer? O. Promines? O. Lead-contaminated water? O. River Pollution? None. Smoke observations taken, O. Logal Notices, O. Summones, O. Burial Grounds—No. in District, S. Any need for (a) extension? No. (b) Closure, No. Mortuaries—No. in District (a) for accidents, O. (b) Other O.

Births during 1905-Males. 21. Females, 28. Total, 49. Number Illegitimate, included in the above ? O. Number Still Births (not included)

Deaths during 1905—(1) GROSS DEATHS, i.e., Total actually registered in the district, without any correction, 46 (2) NETT DEATHS on which the rates are calculated—Males 26. Females 22. Total 48. Number uncertified included in the above, 4.

Sanitary Requirements of District, and Suggestions of Medical Officer of Health:—
A continuance of recent improvements in condition of Cowsheds.

West Riding Sanitary Forms, No. 9. Supplementary Tables for Annual Reports, 1-1-06.
