## ROTHERHAM RURAL DISTRICT COUNCIL

### Members of the Public Health Committee:-

CHAIRMAN: Councillor G. E. Griffin

### COUNCILLORS:

Mrs. M. F. Jenkins

W. A. Black

J. J. Bradley

J. C. Cawdron, M.M.

L. Clarke, J.P.

V. Clements

W. Ducker

J. W. Duckham

F. J. C. Howlett

A. Jones

W. L. Jones

C. C. Newsholme

S. Ogley

F. H. Pawson, J.P.

R. Pembleton

L. Pyatt

S. Shore

T. Swancott, J.P.

B. Varney

J. H. Wilson

CHAIRMAN OF THE COUNCIL: Councillor T. Swancott, J.P.

### PUBLIC HEALTH DEPARTMENT STAFF :-

Medical Officer of Health:

Dr. J. M. Watt

Senior Assistant Medical

Officer:

Dr. M. E. O'Neill

Assistant County Medical

Officer:

Dr. M. J. Hallinan

Chief Public Health

Inspector:

Mr. L. H. Cook

Deputy Chief Public Health

Inspector:

Mr. J. Eastwood

Additional Public Health

Inspector:

Mr. J. Turner

To the Chairman and Members of the Health Committee  
of Rotherham Rural District

A nation-wide epidemic of measles began in September 1960 and ended in October 1961 with more cases than any outbreak in post-war years. It is perhaps significant that none of the healthy resistant pre-school or infant school children who developed the disease, died.

A comparatively limited outbreak of influenza which lasted from the middle of January for six weeks caused ten deaths, mainly among elderly people.

1961 was a disappointing year for the welfare of babies with a sharp uprise in deaths against the usual downward trend. Of the 45 infant deaths, 37 occurred during the first week of life, proving that the problem was mainly one of childbirth, prematurity and congenital defects and that lack of domestic attention for the child was not an important factor.

Deaths from violence showed an increasing importance and 31 were recorded, including 9 due to motor vehicle accidents.

Bronchitis and pneumonia accounted for 61 deaths. The principal speaker on this subject at the Annual Health Congress said, "Britain has the highest incidence of bronchitis in the world due to heavy industrialisation, high housing density, a fickle, moist, climate and reprehensible smoking habits. The noise made by Britain awakening on a winter's morning is fearsome - coughing, hawking and vomiting resounding throughout our cities. Thirty thousand die each year from bronchitis; over 30 million working days are lost by the insured population. The Clean Air Act, adequately enforced, is the means by which our skies can be prevented from becoming a gigantic aerial sewer".

In commenting upon the 46 deaths due to cancer, attention should be paid to the increased help given to patients by the Marie Curie Memorial Foundation and the National Society for Cancer Relief.

As the number of old age pensioners increases each year, the proportion of deaths due to old age and particularly degenerative heart disease goes upwards.

The death-rate of the area, adjusted for age and sex, is very similar to the national rate for England and Wales.

J. M. WATT

Still-birth rate per 1,000 live and still-births	...	...	...	...	...	...	21.7
Total live and still-births	...	...	...	...	...	...	1,288
Infant deaths	...	...	...	...	...	...	45
Infant mortality rate per 1,000 live births - total	...	...	...	...	...	...	35.6
Infant mortality rate per 1,000 live births - Legitimate	...	...	...	...	...	...	34.1
Infant mortality rate per 1,000 live births - Illegitimate	...	...	...	...	...	...	1.5
Neo-natal mortality rate (deaths under 4 weeks), per 1,000 live-births	...	...	...	...	...	...	25.4
Early neo-natal mortality rate (deaths under 1 week) per 1,000 live births	...	...	...	...	...	...	23.8
Peri-natal mortality rate (still-births and deaths under 1 week) per 1,000 live and still-births	...	...	...	...	...	...	45.0
Illegitimate live births per cent of total live births	...	...	...	...	...	...	2.8
Maternal Deaths (including abortion)	...	...	...	...	...	...	1
Maternal mortality rate per 1,000 live and still-births	...	...	...	...	...	...	0.78
Deaths	...	...	...	...	...	...	506
Death-rate (comparable) per 1,000 population	...	...	...	...	...	...	12.6

### Population

The increase in population was maintained during 1961, the estimated mid-year total being 59,800. This was 700 more than 1960. The census for 1961 recorded 59,100 people living in the area.

The following table gives the census population for 1961, the estimated parish distribution of the population for 1961, based on 3.3014 persons per house and the number of houses in the area.

The 1961 census proved that the estimates had been remarkably accurate over the past ten years; the variation being less than 100 out of 59,000 or .002%.

PARISH	Census 1961	Estimated at 3.3014 persons per house	Number of Houses
Aston-cum-Aughton	8,954	9,023	2,733
Bramley	4,492	4,478	1,356
Brampton Bierlow	3,826	3,780	1,145
Brinsworth	5,530	5,806	1,759
Catcliffe	1,932	1,997	605

Thurcroft	7,689	7,742	2,345
Treeton	2,346	2,328	705
Ulley	211	218	66
Wentworth	1,503	1,499	454
Whiston	4,077	4,104	1,243
Wickersley	5,274	5,470	1,657
Totals:	59,100	59,800	18,113

### Births

A total of 1,260 live births was notified in the Rotherham Rural District during 1961. This gave a crude rate of 21 per thousand and a comparable rate of 19.2 per thousand population.

The still-birth rate for the same period was 21.7 per thousand live and still-births, 28 still-births having been recorded.

# Parish Distribution of Live and Still-births

Institutional Admissions

Cases investigated during 1961 - 227

The hospitals and maternity homes ask for home circumstances reports on any cases applying for admission, on which the hospital authority require further information. The patients' homes are visited by a health visitor who submits her reports to me; as a result, I can then give my recommendations to the hospital or maternity home on form O.P.M.9. Priority 1 recommendations are made by the Medical Officer in charge of the hospital and such cases are not referred to me for reports.

## DEATHS

506 deaths were allocated by the Registrar General to the Rotherham Rural District area for the year under review. The causes and sex distribution were as follows:-

<u>Causes of Death</u>	<u>Males</u>	<u>Females</u>	<u>Total</u>
Tuberculosis ... ..	1	1	2
Syphilitic disease ... ..	2	-	2
Other infective and parasitic diseases ...	2	1	3
Malignant neoplasm, stomach ... ..	7	7	14
Malignant neoplasm, lung & bronchus ...	18	1	19
Malignant neoplasm, breast ... ..	-	4	4
Malignant neoplasm, uterus ... ..	-	4	4
Other malignant & lymphatic neoplasms ...	26	16	42
Leukaemia, aleukaemia ... ..	1	1	2
Diabetes ... ..	-	5	5
Vascular lesions of the nervous system ...	26	31	57
Coronary disease, angina ... ..	52	26	78
Hypertension, with heart disease ... ..	6	5	11
Other heart disease ... ..	23	30	53
Other circulatory disease ... ..	8	8	16
Influenza ... ..	4	6	10
Pneumonia ... ..	11	14	25
Bronchitis ... ..	28	8	36
Other diseases of the respiratory system	5	3	8
Ulcer of stomach and duodenum ... ..	1	3	4
Gastritis, enteritis and diarrhoea ...	-	1	1
Nephritis and nephrosis ... ..	3	-	3
Hyperplasia of prostate ... ..	5	-	5
Pregnancy, childbirth, abortion ... ..	-	1	1
Congenital malformations ... ..	5	4	9
Other defined and ill-defined diseases ...	33	28	61
Motor vehicle accidents ... ..	7	2	9
All other accidents ... ..	9	9	18
Suicide ... ..	3	1	4

The crude death-rate was 8.4 per thousand and the comparability factor was 1.50, giving a comparable rate of 12.6 per thousand.

## Infant Deaths

45 infants under oneyear of age died in 1961. The infant death-rate was 35.6 per thousand live births. Particulars of the infant deaths are as follows:-

<u>Birth Weight</u>	<u>Age at Death</u>	<u>Cause of Death</u>
4 lbs.	15 hours	1a Asphyxia. b Pulmonary Atelectasis. c Prematurity.
6 lbs. 8 ozs.	15 hours	1a Multiple congenital abnormalities of heart. b Deficient diaphragm on right side.
1 lb. 15 ozs.	10 hrs. 25 mins.	1a Pulmonary Atelectasis. b. Severe prematurity. c 24 weeks gestation.
5 lbs. 12 ozs.	10 months	Encephalitis.
6 lbs.	3 days	1a Asphyxia. b Pulmonary Atelectasis.
3 lbs. 14 ozs.	2 days	1a Asphyxia. b Cerebral oedema. Twin birth - prematurity.
7 lbs. 14 ozs.	2 months	Shock due to inhalation of regurgitated stomach contents due to acute Encephalitis.
7 lbs. 12 ozs.	5 months	1a Broncho-pneumonia. b B. Coli. Meningitis which caused Hydrocephalus.
8 lbs.	2 months	1a Cerebral Haemorrhage. b Hepatitis.
7 lbs. 1 oz.	6 days	1a Broncho-pneumonia. b Spina bifida - with c Meningomyelocoele.
1 lb. 12 ozs.	9 hours	1a Pulmonary Atelectasis. b Prematurity. 24 weeks gestation.
3 lbs. 14 ozs.	18 hrs. 40 mins.	1a Asphyxia. b Pulmonary Atelectasis. c Tentorial tear. 2. Prematurity.
5 lbs. 12 ozs.	1 month	1a Coliform Meningitis and septicaemia. b Meningomyelocoele. 2. Congenital Hydrocephalus.
8 lbs.	6 days	1a Erythroblastosis Foetalis.
6 lbs. 8 ozs.	4 hours	Cerebral Haemorrhage.
5 lbs. 14 ozs.	12 hours	Cerebral Haemorrhage. Prematurity.
2 lbs. 3 ozs.	16 hours	1a Pulmonary Atelectasis. b Prematurity.
8 lbs. 2 ozs.	1 week	Broncho-pneumonia.

<u>Birth Weight</u>	<u>Age at Death</u>	<u>Cause of Death</u>
6 lbs. 4 ozs.	2 months	1a Broncho-pneumonia.
5 lbs.	3 days	1a Broncho-pneumonia. b Pulmonary Atelectasis.
8 lbs. 3 ozs.	6 weeks	1a Broncho-pneumonia.
1 lb. 2 ozs.	2 hours	1a Prematurity.
6 lbs.	1 hour	1a Corencephalic infant.
1 lb. 12 ozs.	30 minutes	1a Prematurity. 7 months gestation.
2 lbs. 15 ozs.	6 hours	1a Intracranial Haemorrhage. b Prematurity.
3 lbs. 15 ozs.	5 hours	1a Birth trauma. b Tentorial tear in Breech presentation. c Prematurity.
3 lbs. 2 ozs.	8 hours	1a Intracranial Haemorrhage. b Tentorial tear. c Prematurity.
3 lbs. 8 ozs.	1 day	1a Bilateral Pulmonary Atelectasis. b Prematurity.
7 lbs. 10 ozs.	3 months	1a Acute Gastro-enteritis.
8 lbs. 4 ozs.	1 hour	1a Cerebral Haemorrhage. b Tentorial tear. 2. Pulmonary Atelectasis. Hiatus hernia.
1 lb. 8 ozs.	1 hour	1a Prematurity.
5 lbs. 3 ozs.	11 days	1a Meningitis. b Broncho-pneumonia. c Prematurity.
5 lbs. 8 ozs.	1 day	1a Aspiration. b Pneumonia. c Prematurity.
9 lbs.	10 months	1a Pneumococcal Meningitis.
2 lbs. 4 ozs.	12 hours	1a Prematurity.
8 lbs.	7 months	1a Broncho-pneumonia. b Acyanotic. c Congenital heart disease with heart failure.
4 lbs. 8 ozs.	3 days	1a Broncho-pneumonia. b Cerebral oedema. c Prematurity.
5 lbs. 8 ozs.	7 weeks	1a Broncho-pneumonia. b Meningomyelocoele. c Hydrocephalus.
6 lbs. 7 ozs.	50 hours	1a Congestive heart failure. b. Patent ductus arteriosus. c Tentorial tear.
1 lb. 13 ozs.	1 day	1a Pulmonary Atelectasis b Cerebral oedema. c Prematurity.

<u>Birth Weight</u>	<u>Age at Death</u>	<u>Cause of Death</u>
4 lbs. 14 ozs.	4 days	1a Haemorrhagic Disease of the newborn. b Prematurity.
4 lbs. 5 ozs.	5 days	1a Haemorrhagic Disease of the newborn. b Prematurity.
7 lbs. 12 $\frac{1}{2}$ ozs.	1 month	1a Peritonitis. b Meconium Ileus. c Mucoviscidosis.

From these details, it will be seen that of the 45 infants who died, only 8 lived more than four weeks. The neo-mortality rate was 25.4 per thousand live births.

Trend of Infant Deaths over the Past Ten Years:-

YEAR	Live Births	Infant Deaths	Infant Death Rates
1952	894	29	33
1953	947	39	38
1954	973	31	32
1955	1,031	35	34
1956	1,163	37	32
1957	1,154	37	32
1958	1,246	37	29
1959	1,166	22	19
1960	1,242	29	23
1961	1,260	45	36

## MATERNITY AND CHILD WELFARE SERVICES

### Administration of Inhalational Analgesics (Divisional Table)

Cases where analgesia was administered by Domiciliary Midwives:-

	Peth- idine Alone	Gas and Air		Trilene	
		Alone	With Peth.	Alone	With Peth.
(a) When doctor was present at delivery	31	2	7	18	72
(b) When doctor was <u>not</u> present at delivery	105	21	31	107	349

### Statutory Notices

The following statutory notices were received from midwives in the Division during the year:-

Death of child	...	...	...	...	...	1
Still-births	...	...	...	...	...	5
Liability to be a source of infection:-						
Contact with puerperal pyrexia cases						11
Contact with other conditions				...		3
Medical aid	...	...	...	...	...	161

### Medical Aid

General practitioners were called to give medical aid at, or in connection with, domiciliary confinements in 161 instances, as analysed below:-

Pregnancy	...	...	36
Labour	...	...	82
Lying-in	...	...	22
The Child	...	...	21

### Dental Treatment of Expectant and Nursing Mothers

138 expectant and nursing mothers received dental treatment under the West Riding County Council scheme which provides dental treatment for mothers up to 12 months after the birth of their children.

### Ophthalmia Neonatorum

No cases were notified in the Division during 1961.

### Phenylketomuria Testing

Number of babies tested	...	...	...	1,607
During the fourth week of age or under ..				472
Over 4 weeks but less than 6 weeks	...			293
Six weeks of age or over	...	...	...	842
Number of tests found to be negative	...			1,607

## Distribution of Dried Milk and Other Foods

The County scheme for the supply of dried milk and other foods, together with the supply of Ministry Welfare Foods, still occupies a considerable amount of time and effort in the Child Welfare Clinics. In this I am grateful to the members of the various voluntary committees who give their time week after week to attend the clinics for the purpose of selling these foods, weighing babies, etc.

### Ante-Natal Clinics

CLINIC	Number of women who attended during the year.	Total number of attendances made.
Bramley	12	24
Brinsworth	57	255
Cortonwood	28	441
Dalton	78	370
Swallownest	140	752
Thurcroft	101	304
Totals:	416	2,146

### Care of the Unmarried Mothers and Their Children

66 cases were reported and dealt with in the Division during 1961.

17 mothers were under 20 years, 34 were 20 to 30 years and 15 were over 30 years.

43 were single women.

19 were married women, but had illegitimate pregnancies and 4 were widows.

Settlement of these cases was as follows:-

- 39 mothers kept their babies.
- 3 babies were taken by the grandparents.
- 13 babies were adopted.
- 2 babies were fostered.
- 3 cases were settled by marriage.
- 3 cases were referred elsewhere for action.
- 3 babies died.

### Care of Premature Babies

(i.e. babies weighing  $5\frac{1}{2}$  lbs. or less at birth)

The Sorrento cots maintained at the Ambulance Depot, Maltby, were called for on two occasions during the year.

### Children Neglected or Ill-treated in Their Own Homes

Meetings of the Committee for the care of neglected children were held at Maltby and Swallownest in March and September 1961. Over 20 members attended these meetings and 14 cases of neglect were considered.

No prosecutions of parents for child neglect were made during the year, which is in accordance with modern practice, because terms of imprisonment rarely benefit the parents and sometimes end in the break-up of the homes.

No eviction proceedings were taken by the three local Councils against problem families and no claims were made to the County Council for rent guarantees. This again, is as it should be, because turning a problem family out into the street may alleviate feelings of exasperation held by neighbours and the housing committee, but it has serious consequences to the children who are brought up in an institution at the expense of the County Council and to their parents who may find it impossible to set up a home again.

**SUMMARY OF VISITS PAID BY HEALTH VISITORS (Divisional Table)**

## CARE AND AFTER-CARE SERVICE

### Home Nursing

The following table gives details of the work carried out by Home Nurses in the Division.

Of the 60,867 visits made, 28,946 were for injections only.

Classification	No. of cases attended by Home Nurses during the year	No. of visits paid by Home Nurses during the year.
Medical	1,045	41,128
Surgical	400	11,812
Infectious Diseases	2	142
Tuberculosis	25	7,497
Maternal complications	31	288
	1,503	60,867
Patients included above who were aged 65 or over at the time of the first visit during the year.	635	35,436
Children included above who were under 5 years of age at the time of the first visit during the year.	69	785
Patients included above who have had more than 24 visits during the year.	210	13,967

## Home Help Service (Divisional Table)

Number of Home Helps employed in the Division at 31.12.61 - 110

Cases provided with domestic help during the year:-

Type of Case	Number of Cases			Hours Employed
	From previous yr.	New Cases	Total	
Maternity (including expectant mothers)	9	11	119	9,214½
Tuberculosis	8	2	10	2,590½
Chronic Sick:-				
65 years and over	316	117	433	93,394½
Under 65 years	18	18	36	5,063½
Others	4	22	26	749½
Totals -	355	269	624	111,012

### Chiropody

This service continues the rapid expansion noticeable from the date of commencement.

During the year, the duties of Chiropody Secretary were taken over by Mr. Hill of this department, thus relieving Mr. Wilshaw for other duties on the Old People's Welfare Service and at the same time, enabling a much closer liaison between my department and the Welfare Committee, a more rapid turnover of accounts and approvals for treatment and a more direct contact with the Chiropodists. In addition, approval was obtained from the County Medical Officer for renewal recommendations to be made by the Chiropodists. This has greatly reduced the inconvenience to the patients and avoided a break in service.

### Convalescent Home Treatment

During 1961, 5 cases were dealt with as follows:-

Female, aged 64	Suffering from Depression.	Sent to St. Annes on 18th August.
Female, aged 35	Suffering from Bronchitis.	Sent to Hunstanton on 11th August.
Male, aged 56	Chronic Bronchitis and Emphysema.	Sent to Hunstanton on 2nd October.
Female, aged 67	Fractured metatarsal & nervous exhaustion.	Sent to Harrogate on 2nd October.
Female, aged 48	Operation for Hydrometra.	Sent to St. Annes on 27th October.

### Cancer

Cases are referred by the Radiotherapy Centre, Tree Root Walk, Sheffield, or by the Health Visitor for financial help either by cash grants from the Marie Curie Memorial Foundation or by recommendations to the National Society for Cancer Relief for a weekly allowance and, in some cases, an initial grant to purchase necessities, such as bedding, etc.; these grants are disbursed from the Divisional Office, either direct to the patient or in some cases, to the Health Visitor, who then purchases the items needed.

Number of cases removed from register.	17	8	7	3
Number of cases remaining on the register at 31st December 1961.	139	109	23	24

### Domiciliary Visiting

1,035 effective visits plus 175 ineffective visits were made to households of tuberculosis patients during the year. From these visits, recommendations were made for cases to receive free milk.

With all new cases of tuberculosis, an attempt was made to trace the source of infection. As expected, this ended in failure in a high percentage of cases, but it gave a purpose and method to the work in tracing and examining contacts.

Sometimes, it was found that obvious contacts in the same household were not as important as social contacts or contacts at the place of employment. Special attention was given to elderly relatives not living with the family. Difficult problems were set by unmarried male patients who moved about from one lodging to another and by food handlers during convalescence.

Close contact was kept with all five Chest Clinics and the Assistant Health Visitor on tuberculosis work attended the weekly clinic for contacts at Rotherham.

In the after-care of tuberculosis cases, considerable help was given by National Assistance Officers, by the Housing Committees and by Rotherham and District After-Care Committee.

The outlook in tuberculosis is optimistic because of the success of treatment with antibiotics, drugs and surgery.

#### Care and After-Care

The Rotherham Tuberculosis Care Committee continues to cover the Divisional area, excluding Brampton Bierlow, which is included in the purview of the Mexborough Chest Clinic. A grant is made by the West Riding County Council each year and this, together with the proceeds from Christmas Seals sales, etc., provide essential help for more needy cases.

Training Centre

The intake of trainees continues to rise and, in spite of staffing difficulties, etc., the scope of work is being steadily expanded. During the year, the Male Handicrafts Instructor commenced a course of training lasting ten months and a temporary replacement was appointed.

Plans are now well advanced for a further extension to the centre, increasing the accommodation to take 116 trainees. This will provide for a Junior and Senior Centre in the same grounds and will afford a considerable improvement in the facilities available.

Three buses are now running daily to convey the trainees to and from the Centre and cover the Divisional area. In addition, children are being collected from Braithwell by one of the buses.

Number of patients referred to Local Health Authority during year ended 31st December, 1961.

## Cleanliness of School Children

A total of 13,329 children were examined by Health Visitors and School Nurses at cleanliness surveys in schools. 346 were found to have head nits.

## Diseases of the Skin

During the year, 17 children were treated for impetigo and 32 for other skin conditions.

## Minor Ailments

964 pupils received treatment for minor ailments during 1961.

## Specialists' Clinics - Rotherham Rural District

### Ear, Nose and Throat Clinic

Number of dwellings known to be overcrowded at end of year	10
Number of families dwelling therein	17
Number of new cases of overcrowding reported during year	4
Number of cases of overcrowding relieved during year by Local Authority	-

## Slum Clearance

The following statement indicates the progress made since 1951 in the rehousing of families living in slum clearance property:-

### Action taken resulting in rehousing

	<u>1951/52</u>	<u>1953</u>	<u>1954</u>	<u>1955</u>	<u>1956</u>	<u>1957</u>	<u>1958</u>	<u>1959</u>	<u>1960</u>	<u>1961</u>
Demolition										
Orders	12	5	11	8	9	11	13	70	34	20
Closing										
Orders	-	3	3	-	1	1	5	3	3	3
Undertakings	6	4	-	-	-	-	-	-	-	-
Clearance										
Areas	3	-	2	54	10	11	6	4	27	1
Unfit Houses owned by the Council.	-	-	-	-	2	12	4	2	-	-

24 families living in unfit houses were rehoused by the Council during the year and there are now 14 families awaiting rehousing under the official Slum Clearance Programme.

As a result of preliminary housing survey work, 5 houses were found to be in an advanced state of disrepair and are being included in the current programme.

At the end of the year, one clearance area containing 6 houses was awaiting confirmation.

Two Closing Orders were determined during the year. One case involved the conversion of a back-to-back house into a through house and in the other case, a semi-detached cottage was reconditioned and improved.

### Grants for conversion or improvement of housing accommodation

42 applications were received for grants for conversion or improvement of housing accommodation, all of which were approved. In 71 cases, works of improvement were completed during the year.

### RENT ACT 1957

This Act now seems to have lost its impetus and there was very little activity during the year.

One Certificate of Disrepair was issued and one Certificate was cancelled.

### NUISANCES

Nuisances outstanding at end of 1960	...	...	...	244
Nuisances found in 1961	...	...	...	232
Total requiring abatement	...	...	...	476

Informal notices complied with	...	...	...	196
Statutory notices served	...	...	...	25
Statutory notices complied with	...	...	...	21

## DRAINAGE AND SEWERAGE

No. of houses connected to sewers	...	...	...	...	17,536
No. of houses with unsatisfactory drainage	...	...	...	...	78
No. of houses with satisfactory private drainage	...	...	...	...	379

The construction of new Sewage Disposal Works at Slade Hooton is now in progress.

Many sewage treatment plants are inadequate due to housing development and the following schemes are awaiting approval or are in course of preparation:- Fence Pumping Station; Ravenfield Sewage Disposal Works; Catcliffe, Treeton, Brinsworth, and Whiston Sewage Disposal Works; Ulley Pumping Station; Bramley/Maltby Joint Sewage Disposal Works; Swallownest Sewage Disposal Works.

Sewers at Ravenfield and Ulley are in need of improvements.

12 privy conversions were carried out during the year; 9 of these were in the unsewered outlying parts of Brampton Bierlow parish and it was necessary to provide cesspools for the drainage of the premises.

99.27% of the houses in the area are now on the water-carriage system.

A cesspool emptying service is operated by the Public Health Department. Three Dennis cesspool emptying vehicles are maintained for this purpose and two of the vehicles are employed full time.

In outlying parts of the district which are not sewered, there are 327 houses drained to 249 cesspools. (In some cases two or more houses are drained to one cesspool).

A minimum storage capacity of 1,400 gallons per house is specified for each cesspool which enables a fortnightly emptying service to be maintained throughout the year.

## WATER SUPPLY

Water is supplied by Sheffield Corporation, Rotherham Corporation, Wath-upon-Deane Urban District Council and Doncaster Corporation and distributed by the Rural District Council to all parishes with the exception of Wentworth Parish and part of the Parish of Brampton Bierlow.

Earl Fitzwilliam's Wentworth Estates Company distributes water in the parish of Wentworth and the South West part of Brampton Bierlow parish. Water is bought in bulk from Sheffield Corporation and is supplemented by the Dearne Valley Water supply.

Last year it was reported that a fault had developed in the borehole belonging to Wath-upon-Deane Urban District Council. There was further deterioration in the yield from this source and at present 95% of the water is obtained from Sheffield Corporation.

Water supplied by Doncaster Corporation is also obtained from Sheffield Corporation.

This information explains the similarity in the chemical composition of the water sample results which are summarised hereunder:-

- Sample No. 1. Wath-upon-Deane Urban District Council.
- Sample No. 2. Doncaster Corporation.
- Sample No. 3. Sheffield Corporation.

Physical CharacterSamples

Albuminoid Nitrogen	0.056	0.056	0.025
Free Chlorine	0.10	0.20	0.20
pH Value	6.5	6.3	6.6

Although there has been improvement in the supply of water as a result of the installation of booster pumps the situation in some parts of the district during peak periods continues to be unsatisfactory. At one period, in the Bole Hill area of Treeton, the position became so serious that it was found necessary to instal a static tank from which people could obtain water when, due to lack of pressure, they were unable to obtain supplies from taps in their homes.

Two houses in Brampton Bierlow Parish suffered an acute shortage of water during the year. It was necessary for the Water Undertakers, Earl Fitzwilliam's Wentworth Estates Co., Ltd., to carry water frequently to the householders. Representation regarding this matter was made to the Water Undertakers and work is in progress which will restore a constant supply of water to the houses.

Water samples are submitted regularly for bacteriological examination and the reports indicated that the quality of the water is satisfactory.

Water samples are examined periodically for plumbo-solvency and all samples examined during the year were found to be satisfactory.

The tenants of the following houses obtain their water supply from stand pipes which are on public water mains, there being no supply piped into the houses:-

Bungalow, Mansfield Road, Aston.  
Howarth Hall Lodge, Whiston.

The following houses have private water supplies:-

The Danes, Dalton Parva. Spring Supply.  
Spa Farm, Treeton. Spring Supply.

Spa Farm Cottages, Treeton (2 houses).	Spring Supply.
Howarth Hall, Whiston.	" "
Howarth Hall Cottage, Whiston.	" "
No. 2 Moat Lane, Wickersley.	Well Supply.

The quality of the water from the Spring supplies of three of the houses is satisfactory.

The water supply to the remaining four houses is not satisfactory. Three of these houses are on sites remote from the public supply and the fourth is a wooden bungalow, owned and occupied by an aged couple, and will be eventually demolished.

#### TENTS, VANS and SHEDS

In this district, the law relating to the control of caravans, contained in the Public Health Act, 1936, is superseded by the Rotherham Rural District Act, 1931.

This local Act makes it illegal for anyone to occupy a tent, van, shed or similar structure without obtaining the prior approval of the Council, the effect of which is to make it possible to exercise a greater measure of control over this type of dwelling.

All applications for permission to occupy caravans in the area are considered by the Public Health Committee and, where circumstances warrant it, permission is granted for specific periods and extended permission is granted as circumstances require.

32 applications were received during the year; 21 of the applicants were granted permission to occupy caravans in the area for periods varying from three to six months and 11 applications were refused.

3 applications were received for extended permission from persons living in caravans in the area; all applications were granted.

On the 31st December, 1961, there were 15 caravans sited in the area compared with 1 on the 31st December, 1960.

There has been a sharp increase in the number of caravans coming into the area which is largely due to mobile workers visiting the district to work on development sites.

At the end of the year, consideration was being given to proposals for the licencing of two sites for the sole use of employees engaged on Parkgate Iron & Steel Company Ltd., site development works and British Railway's Tinsley Marshalling Yard.

#### FACTORIES ACT, 1937 and 1948

Inspections for purposes of provisions as to health:-

<u>Premises</u>	<u>Number on Register</u>	<u>Number of Inspections</u>	<u>Written Notices</u>	<u>Occupiers Prosecuted</u>
1. Factories in which Secs. 1, 2, 3, 4 & 6, are to be enforced by Local Authorities.	11	4	-	-
2. Factories not included in (1) in which Sec. 7 is enforced by the Local Authority.	101	44	4	-
3. Other premises in which Sec. 7 is enforced by Local Authority (excluding Outworkers' premises).	53	23	1	-

Cases in which defects were found:-

<u>Premises</u>	<u>Found</u>	<u>Remedied</u>	<u>Referred to</u>		<u>Number of cases in which prosecutions were instituted</u>
			<u>To H.M. Inspector</u>	<u>By H.M. Inspector</u>	
Want of cleanliness	-	-	-	-	-
Overcrowding	-	-	-	-	-
Unreasonable temperature	-	-	-	-	-
Inadequate ventilation	-	-	-	-	-
Ineffective drainage of floors	-	-	-	-	-
Sanitary Conveniences:-					
a. Insufficient	2	2	-	-	-
b. Unsuitable or defective	2	1	-	-	-
c. Not separate for sexes	1	-	-	1	-
Other offences against the Act (not including offences relating to outwork)	-	-	-	-	-
	<u>5</u>	<u>3</u>	<u>-</u>	<u>1</u>	<u>-</u>

ATMOSPHERIC POLLUTION

This Council is a constituent Member of the Sheffield & District Clean Air Committee but the administration of the Clean Air Act, 1956, (Smoke Control Areas) is the responsibility of the Council.

This district is on the South Yorkshire coalfield and at least 80% of the families are associated with the mining industry.

Although the question of forming Smoke Control Areas is being reviewed from time to time in the light of national agreements in connection with miners' concessionary coal, no progress has yet been made.

RODENT CONTROL

One full-time Rodent Operative is employed in the department.

The following premises were treated for infestations during the year:-

	<u>Local Authority Premises</u>	<u>Dwelling Houses</u>	<u>Business Premises</u>
Rat infestations:-			
Major	11	-	-
Minor	35	434	13
Mice infestations:-			
Major	-	-	-
Minor	-	24	27
Totals -	<u>46</u>	<u>458</u>	<u>40</u>

The cost of treating business premises was recovered from the occupiers of the premises on a labour/material/establishment charge basis.

The work done by private contractors at farms in the area continues to be effective in the control of infestations and satisfactory liaison exists between these contractors and the Public Health Department.

In no case was it found necessary to take formal action during the year.

Two sewer maintenance treatments were carried out during the year.

## SUPERVISION OF FOOD SUPPLY

### Milk Supply

The licensing of retail milk dealers under the various regulations is now administered by the West Riding County Council.

During 1961, 206 samples of milk were taken compared with 318 samples taken in 1960.

Whenever samples of Tuberculin Tested Milk are reported as being unsatisfactory, the results are forwarded to the Milk Production Officer for such action as he may consider necessary.

The following table gives a summary of milk sample results:-

	<u>Satisfactory</u>	<u>Unsatisfactory</u>
Tuberculin Tested (Past.)	63	Nil
Pasteurised	68	Nil
Sterilised	54	Nil
Tuberculin Tested	16	5

## SLAUGHTERING FACILITIES

There were 9 licenced slaughterhouses in the area during the year but this number will be reduced as from 1st January, 1962, which is the day appointed by the Minister for the construction regulations to apply to all slaughterhouses in this area.

It was expected that 5 slaughterhouses would comply with the construction regulations by the appointed day, but it now seems likely that of that number only three will remain licenced.

## MEAT INSPECTION

I hereunder submit statistical data relating to the meat inspection service for the year ended 31st December, 1961:-

### Carcases and Offal Inspected and Condemned in Whole or in Part

	<u>Cattle</u> <u>Excluding</u>			<u>Sheep</u> <u>and</u>		
	<u>Cows</u>	<u>Cows</u>	<u>Calves</u>	<u>Lambs</u>	<u>Pigs</u>	<u>Horses</u>

- 1 Liver (Parasitic)

Pigs

- 4 Livers (Cirrhosis)

No case of Cysticercus Bovis was found during 1961.

The treatment of Cysticercus Bovis carcasses is carried out at the Rotherham Municipal Market by arrangement with Rotherham Corporation. Carcasses are delivered for refrigeration treatment and returned to the owners on production of a letter from the Chief Public Health Inspector, addressed to the Market Superintendent, authorising release.

The disposal of condemned meat is by burying in the case of small quantities; carcasses are sent to knackers' yards for processing, after being coloured with naphthalene green G.S. dye, a supply of which is kept at each slaughterhouse and each district inspector carries a container spray.

All condemned meat is coloured with the dye after the owner has signed a certificate of surrender.

The slaughter of Animals Register contains the names and addresses of 42 licensed slaughtermen:-

13 are licensed for the slaughter of pigs only.

29 are licensed to slaughter all animals except horses.

The Cash Captive Bolt is the instrument in general use for the stunning of animals.

#### Unfit Food

The following quantities of foodstuffs were found to be unfit for human consumption and voluntarily surrendered by the owners:-

<u>Canned Foods</u>	<u>Cans</u>	<u>Weights</u>	
Boiled Ham	15	118 lbs.	5 ozs.
Meat	56	175 lbs.	- ozs.
Fruit	26	27 lbs.	3 ozs.
Tomatoes	27	18 lbs.	9 ozs.
Fish	7	3 lbs.	6 ozs.
Soup	7	5 lbs.	2 ozs.
Beans	8	7 lbs.	- ozs.
Peas	6	4 lbs.	14 ozs.
Golden Syrup	1	2 lbs.	- ozs.
Tomato Juice	4	2 lbs.	8 ozs.
Spaghetti	1		8 ozs.
Chicken	1		5 ozs.
Mincemeat	3	2 lbs.	10 ozs.
Rice Pudding	1		8 ozs.
	<u>163</u>	<u>367 lbs.</u>	<u>14 ozs.</u>

#### Other Foods

Bacon and Ham	27 lbs.	- ozs.
Sausage	33 lbs.	4 ozs.
Butter	8 lbs.	
Suet	1 lb.	8 ozs.
Pearl Barley	56 lbs.	- ozs.
Lentils	28 lbs.	- ozs.
Split Peas	47 lbs.	- ozs.
Cheese Slices	4 Packets	
Cornflakes	3 Packets	

#### ICE-CREAM PREMISES

There are 143 premises in the area registered for the sale and storage of ice cream and 1 shop registered for the manufacture, storage and sale of ice cream.

86 visits were made to registered premises during the year and in all cases the premises were found to be satisfactory.

99 samples of ice cream were taken during the year and the results were as follows:-

Samples classified in Provisional Grade 1	...	...	95
" " " " " 2	...	...	4
" " " " " 3	...	...	Nil
" " " " " 4	...	...	Nil

Retailers are notified of all sample results and unsatisfactory results are sent to the manufacturers and to the local authority in whose area the ice cream is manufactured.

## SUPERVISION OF FOOD PREMISES

The following is a classified list of food premises in the area:-

Grocers and General Dealers	...	...	...	184
Hotels and licensed Premises	...	...	...	51
Butchers' Shops	...	...	...	44
Fish Frying Premises	...	...	...	32
Canteen Premises	...	...	...	34
Bakehouses	...	...	...	6
Registered Food Preparation Premises	...	...	...	32
Slaughterhouses	...	...	...	10
Chemists' Shops	...	...	...	10
Cafes	...	...	...	3

Special attention was again given to the inspection of premises under the Food Hygiene Regulations.

476 visits were made to food premises and, as a result of these visits, 16 informal notices were addressed to the occupiers of premises.

No application was received for a Certificate of Exemption under Regulation 31 of the Food Hygiene Regulations.

In connection with Regulations 15, 16 and 19, of the Food Hygiene Regulations, all occupiers of food premises, whether self-contained shops or house shops, are required to provide separate fixed wash basins and sinks with a constant supply of hot and cold water from taps over the sinks. The washing facilities (personal and equipment) are required to be sited in convenient positions on the premises having regard to the purposes for which they are required.

### PUBLIC CLEANSING

The Chief Public Health Inspector is also Cleansing Superintendent and is responsible for the operation of the refuse collection and cesspool emptying services of the Council.

The public cleansing fleet consists of:-

- 8 Dennis (10 cubic yard) side loading refuse vehicles.
- 1 Dennis Diesel (16 cubic yard) vehicle, fitted with Shefflex Fore and Aft tipping body.
- 1 Dennis (12 cubic yard) vehicle fitted with Shefflex Fore and Aft tipping body.
- 1 Dennis vehicle converted for the carrying of covering material for use at tips.
- 3 Dennis cesspool emptying vehicles.
- 1 Chaseside mechanical shovel.
- 1 Bedford van for use of mechanics.

The district is divided into 8 collection areas and each vehicle is manned with a driver and 2 loaders; additional labour being directed to the districts according to seasonal requirements.

Generally, a weekly collection is maintained throughout the district, but during holidays, (particularly statutory holidays) the interval of collection extends to 10 days until the position is restored with the assistance of spare vehicles and labour.

The refuse collection bonus scheme continues to work satisfactorily and is invaluable in maintaining a satisfactory service in that it attracts labour and introduces a sense of urgency to the work.

The Council operate a scheme for the supply of all dustbins in the area for the storage of house refuse. Under this scheme, the following bins were supplied during 1961:-

Dustbins supplied to new private houses	...	...	307
Replacement dustbins to private houses	...	...	665
Dustbins supplied to new Council houses	...	...	143
Replacement dustbins supplied to Council houses	...	...	283
Private sales	...	...	20
A total of 1,418 dustbins were issued at a cost of £2,795.8s.3d.			

All refuse is disposed of by controlled tipping at 5 refuse tips in the area.

#### Operational Statistics

Total amount of refuse collected and disposed of	...	21,600 tons
Number of premises from which refuse was collected	...	18,555 premises
Average haul by vehicles to disposal point	...	2 $\frac{1}{2}$ miles

# CLINICS HELD IN ROTHERHAM RURAL DISTRICT (July 1962)

## INFANT WELFARE CLINICS

<u>Clinic</u>	<u>Day and Time</u>	<u>Doctor Attending</u>
BRAMLEY, Miners' Welfare Hall, Cross Street.	*Wednesdays a.m. Alternate H.V. Wednesdays p.m.GP/HV	Dr. M. Dibb
