Borough of Rugby.

ANNUAL REPORT

OF THE

HEALTH OF THE DISTRICT

FOR THE YEAR 1944,

BY

H. GIBBONS WARD, M.D., D.P.H.,

MEDICAL OFFICER OF HEALTH

OF THE

Warwickshire Combined Districts.

Leamington Spa :

A. TOMES LTD., PRINTERS, 46, BEDFORD STREET.

1945.

1, MILVERTON HILL,
LEAMINGTON SPA,
September, 1945.

To the Rugby Borough Council.

MR. MAYOR, MRS. GREEN, AND GENTLEMEN,

Herewith the Report for 1944, and it is of special personal interest to me as it marks the completion of 25 years in your service.

As instructed by the Ministry of Health, the Report is only a short statement of fact. For the first time for several years, statistics can be printed in connection with population, etc.; it is to be hoped that in the future it will be possible to give further details when printing, paper, etc., are more available.

With many thanks for much kindness on the part of the members of the Council and my colleagues.

I am, Mr. Mayor, Mrs. Green, and Gentlemen,

Your obedient Servant,

H. GIBBONS WARD,
Medical Officer of Health.

Borough of Rugby.

A. EXTRACTS FROM VITAL STATISTICS OF THE YEAR.

Population (estimated) Mid-year, 1944	43,930
Birth Rate	20.0
Still Births—Rate per 1,000 total births	23
Death Rate	9.3
Deaths from Diseases and Accidents of Pregnancy and Child-birth	{ From Sepsis ,, other causes		— 1
Death Rate of Infants under 1 year of age :—			
All Infants per 1,000 live births	34
Legitimate Infants per 1,000 legitimate live births	33
Illegitimate Infants per 1,000 illegitimate live births	35
Death from Measles (all ages)	—
,, ,, Whooping Cough (all ages)	1
,, ,, Diarrhoea (under 2 years of age)	1

B. GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

1. *Public Health Officers.*—Mr. E. R. R. Mengham resigned from the staff in March, and Mr. W. Henderson in October, 1944. It has not been possible to replace either by making temporary appointments.

6. *Laboratory Facilities.*—The following Table shows the number of bacteriological examinations by Birmingham University :—

	Positive.	Negative.	Total.
Diphtheria	4	93	97
Enteric Fever...	—	—	—
Tuberculosis	2	12	14
			111

C. SANITARY CIRCUMSTANCES OF THE AREA.

1. (1) *Water.*—(a) The supply has been satisfactory both in quantity and quality.

(b) Bacteriological examinations have been made of both raw and treated water, and samples submitted for chemical analysis. All gave satisfactory results.

(c) No contamination was found as a result of analyses or examinations.

(d) It is estimated that the population supplied by water main direct to houses in 1944 was 43,700, and by means of standpipes 240. The number of houses supplied being 11,930 and 70 respectively.

(2) *Drainage and Sewerage*.—Again, working under considerable war difficulties, the two sewage disposal works have continued to give satisfactory effluents.

The total number of cleansings of pail closets during the year was over 12,000.

2. *Rivers and Streams*.—Steady improvement in the condition of the River Avon can be reported, resulting from the action commenced last year and referred to in the Report for 1943, for the elimination of industrial effluents likely to give rise to pollution. An improvement in the river flow has been brought about by straightening, dredging and cleansing of the river bed by the Catchment Board.

3. *Closet Accommodation*.—(1) Approximately 230 pail and earth closets remain, no reduction having been accomplished during the year.

(2) *Public Cleansing*.—Refuse collection has been carried out in a reasonable manner by fortnightly collections of domestic refuse. Continued salvage work is maintained at a good level.

(3) *Swimming Baths*.—The purity of the water both in the open and closed baths has been maintained.

D. HOUSING.

General Observations.—No systematic house-to-house inspections have been carried out.

The total number of dwellinghouses inspected under the Public Health or Housing Acts during the year is 110 and the number of visits made for the purpose is 563. In consequence of 155 notices served in respect of houses found not to be in all respects reasonably fit for human habitation 83 houses were rendered fit.

E. INSPECTION AND SUPERVISION OF FOOD.

(a) *Milk Supply*.—During the year the following samples were taken :—

- (1) 7 ordinary milks for bacteriological examination.
- (2) 1 ordinary milk for biological examination.
- (3) 58 milks for chemical analysis.

Results of the examinations or analyses :—

- (1) 6 were satisfactory.
1 was not satisfactory.
- (2) 1 gave negative results.
- (3) All were genuine.

The vendors and producers of the unsatisfactory samples submitted for bacteriological examinations were notified of the results and advised in the methods of clean milk production.

Under the National Milk Testing and Advisory Scheme 491 samples were taken and forwarded to the Area Laboratory for examination. Participation in the Scheme was discontinued in July when the results of the examinations were refused to Local Authorities.

(b) *Meat Inspection*.—All slaughtering for Rugby and district has been carried out at the Ministry of Food Cattle Market Slaughterhouses, and all condemned meat and offals have been sent by the Ministry to a waste utilisation plant at Northampton.

It is necessary for an Inspector to be on duty during the whole of the time that slaughtering is taking place, and the Chief Sanitary Inspector and Mr. Masi act as Meat Inspectors for the Ministry. The centralisation of slaughtering has helped in the inspection of meat in the town, and the following is a summary of the animals slaughtered and the meat condemned during the year :—

	Beasts.	Cows.	Sheep.	Pigs.	Calves.	Total.
<i>Animals slaughtered and carcasses inspected</i> ...	2,305	633	15,954	286	2,099	21,277
<i>Meat condemned.</i>						
Tuberculosis.						
Whole carcasses...	18	33	—	3	7	61
Part carcasses and/or organs	246	189	—	41	6	482
% of animals affected ...	11.45	35.07	—	15.38	0.62	2.55

	<i>Beasts.</i>	<i>Cows.</i>	<i>Sheep.</i>	<i>Pigs.</i>	<i>Calves.</i>	<i>Total.</i>
Other diseases.						
Whole carcasses...	7	12	38	6	30	93
Part carcasses and/or organs	282	94	163	11	10	560
% of animals affected ...	12.54	16.74	1.32	5.94	1.91	3.07
% of total of animals affected ...	23.99	51.81	1.32	21.32	2.53	5.62

<i>Weight of meat condemned in pounds.</i>						
	<i>Whole Carcases.</i>	<i>Part Carcases.</i>	<i>Organs (estimated).</i>	<i>Total.</i>		
Beasts ...	9,729	2,806	15,320	...	27,855	
Cows ...	18,253	2,402	9,211	...	29,866	
Sheep ...	1,306	257	541	...	2,104	
Pigs ...	1,077	836	338	...	2,251	
Calves ...	1,286	23	324	...	1,633	
	<hr/> 31,651 <hr/>	<hr/> 6,324 <hr/>	<hr/> 25,734 <hr/>	...	<hr/> 63,709 <hr/>	

Making a total of 28 tons 5 cwts. and 93 lbs.

(c) *Bakehouses.*—There are 26 bakehouses, including factory bakehouses, on the Register, and these have been visited and supervised and are generally well maintained and kept in a clean condition.

(d) *Food and Drugs Act, 1938.*—The Corporation are responsible for the Administration of this Act, and during the year 180 samples have been taken by the Sampling Officers of the Corporation and submitted to the Public Analyst for chemical analysis. One hundred and sixty-one samples were reported upon as being genuine, and nineteen samples as not genuine.

VI. PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASE.

Incidence of Commoner Infectious Disease since 1935.

	Smallpox	Diphtheria.	Scarlet Fever.	Enteric Fever.	Pneumonia.	Encephalitis Lethargica.	Puerperal Pyrexia.
1936 ...	—	127	86	—	48	—	8
1937 ...	—	71	163	—	84	—	22
1938 ...	—	37	55	4	33	—	16
1939 ...	—	5	37	—	53	—	14
1940 ...	—	37	144	—	60	—	14
1941 ...	—	49	94	2	85	—	8
1942 ...	—	13	66	—	61	—	17
1943 ...	—	13	43	—	80	—	7
1944 ...	—	4	90	2	56	—	8

Reference to Table III. will give the age incidence of the cases notified during 1944.

Smallpox.—No cases were notified during the year.

Diphtheria.—During the past year there were 4 cases notified, with no deaths.

All the cases were taken to the Isolation Hospital.

The cases were distributed throughout the town. One case had been immunised.

Diphtheria Immunisation.—Continued during the year and at the end of 1944, 3,780 school children had been treated and 1,779 under school age, giving a total of 5,559.

Scarlet Fever.—There was a rise in the number of cases of Scarlet Fever, 90 as compared with 43 in 1943. There was nothing discovered which called for special comment. 81 cases went to Hospital.

School Closures.—Nil.

Non-notifiable Infectious Disease.—There was nothing of special note.

Notification of infectious disease occurring amongst the children at school is duly sent by the teachers.

PREVALENCE OF, AND CONTROL OVER, TUBERCULOSIS.

AGE—PERIODS	NEW CASES.				DEATHS.			
	Pulmonary.		Non-Pulmonary.		Pulmonary.		Non-Pulmonary.	
	M.	F.	M.	F.	M.	F.	M.	F.

65 and upwards	...	—	2	...	—	—	...	—
TOTALS ...	26	30	...	8	6	...	15	9
	—	—		—	—		—	—

During the past year there have been notified 70 cases. In 56 cases the lungs were affected, and the remaining 14 the disease affected other parts of the body.

Of the 70 new cases notified during the past year, 12 have died during the year.

Treatment.—During the past year 54 cases have been admitted to a Sanatorium for treatment.

50 cases were discharged after treatment.

REPORT OF SANITARY INSPECTOR.

A copy of this report has been received and kept for reference.
