## Diphtheria Prophylaxis:

During the year the following received a full course of injections -

(1) Children from 0-5 yrs	179
(2) Children from 5-15 yrs	153
	<hr/>
Total	<u>332</u>

The first group includes a few children just under 1 year old - younger children not being submitted to inoculation.

It is estimated that approximately 74% of the 0-5 year children have been immunised and 79% of the 5-15 year old. The boys of the Royal Hospital School, Holbrook, are not included in these figures.

These results compare very favourably with those obtained in other counties. I would like to place on record the help the District Nurses have given in this as regards the children in the 0-5 age group.

I have the honour to be,

Your obedient Servant,

(Signed) A. G. ATKINSON.  
Acting Medical Officer of Health

Typhoid Prophylaxis:

During the year the following received full course of injections -

179	(1) Children from 0-5 yrs
153	(2) Children from 5-15 yrs
<hr/>	
<u>332</u>	Total

The first group includes a few children under 1 year old - younger children not being admitted to inoculation.

It is estimated that approximately 74% of the 0-5 year children have been immunised and 70% of the 5-15 year old. The boys of the Royal Hospital School, Holbrook, are not included in these figures.

These results compare very favourably with those obtained in other countries. I should like to place on record the help the District Nurses have given in this as regards the children in the 0-5 age group.

I have the honour to be,

Your obedient servant,

(Signed) A. G. ATKINSON.  
Acting Medical Officer of Health
