SELBY URBAN DISTRICT COUNCIL.

Chairman: Councillor S. B. Mooney, J.P.

Vice-Chairman: Councillor N. E. Reasbeck.

GENERAL PURPOSES COMMITTEE.

Chairman: Councillor the Very Rev. Dean L. J. Flynn.

Vice-Chairman: Councillor D. Foster.

Medical Officer of Health:

S. KENNAUGH APPLETON, M.D., Ch.B., D.P.H., D.T.M.

Senior Sanitary Inspector:

WILKINSON LITTLE, M.S.I.A.,

Cert. S.I. Board,

Cert. Meat and Food Inspection R.S.I.

Pupil Assistants:

ERIC K. PHILPOT (on National Service from July, 1950).

JOHN BASIL SAWDON.

Clerk: JOAN SMITH.

To the Chairman and Members of the Selby Urban District Council.
Gentlemen,

I have the honour to present to you my fifth Annual Report on the health of the Urban District, and the work of the Public Health Department for the year 1951. Incorporated in the Report for your information and interest is a summary of the work of the County Health Services in Selby during the year.

The Birth Rate of 16.1 per thousand of population shows a slight increase on the previous year and is rather higher than the rate for the County and England and Wales as a whole.

The Infant Mortality Rate of 31 per thousand live births, although less satisfactory than the 1950 rate, is comparable with the aggregate for West Riding Urban Districts. The national rate of 29.6 is again a record. There were no deaths from maternal causes.

The Crude Death Rate was 15.0 per thousand population and is the highest figure recorded since 1918. Two-fifths of the deaths resulted from diseases of the heart and circulation, and there was a sharp rise from respiratory diseases, which included eight deaths attributable to influenza. The Tuberculosis Death Rate of 0.10 per thousand (one death) is the lowest ever recorded.

The expected epidemic of measles occurred in the early part of the year and accounted for 216 of the 245 cases of infectious diseases notified. There was one death from this cause. No cases of diphtheria or poliomyelitis were notified.

A figure in the School Health Section calls for comment. 356 children, or approximately 25% of the school population, were found to be infested with head lice. This is a marked increase and is the more regrettable in that it is an entirely unnecessary infliction in these days of quick curative and preventive preparations. Most, but not all of the infested children, are girls, and some of them are old enough to care for their own hair.

One can sympathise with the horrified mother making her first acquaintance with this pest, knowing that treatment will be thorough and supervision afterwards adequate. What of the mother who at one time or another sends all her children to school lousy, and who has to be persuaded or threatened into temporary improvement? Having cleansed the child, how many mothers think of checking their own hair and that of other females in the home?

A few mothers are too mentally defective to be able to care for their children's hair, and in these cases the Health Visitors must assume responsibility for the cleansing. For the others there is no excuse. A persistently lousy child is indicative of an indifferent, indolent and, probably, lousy mother or guardian.

Although the School Health Service will continue by persuasion and education to combat the head louse, it is enlightened public opinion which will ultimately defeat this pest.

I would draw your attention to the Senior Sanitary Inspector's comments on the last page of his report, regarding staff requirements, which I strongly support.

In conclusion I would record my appreciation of your co-operation and that of the Officers of the Health Department and Council, and of the continued assistance of the voluntary workers at the Clinic.

I remain, Your obedient servant,

S. KENNAUGH APPLETON,

July, 1952.

Medical Officer of Health.

GENERAL STATISTICS, 1951.

Area of Urban District	3,883 acres
Population (mid 1951)	10,110
Number of Inhabited Houses	3,059
Rateable Value	£59,588 (Mar. 1952)
Product of Penny Rate	£224/15/5 (Mar. 1952)

VITAL STATISTICS.

WEST RIDING COUNTY DIVISIONAL HEALTH SERVICES IN SELBY, 1951.

The Public Health Nursing Staff in this Division no longer works according to County District boundaries. Most of the figures in the following summaries refer to Selby U.D., but in a few cases the figures are those for the Urban and Rural Districts combined, or for Division No. 10 as a whole.

1. BIRTHS.

Live Births	163
Stillbirths	3
Illegitimate	3
Males	85
Females	81

2. PREMATURE BABIES. Babies weighing 5½ lbs. or less at birth.

				Living	Stillborn
(i) Born at home	6	1
(ii) Born in an institution	4	0
				—	—
Total			10	1

3. HEALTH VISITING (Selby U.D. and R.D.).

			First Visits	Other Visits	Total
Expectant Mothers		45	111	156
Children under 1		215	2365	2580
Children between 1 and 5			—	1324	1324
Other cases	47	538	585
Ineffective	—	—	685
			—	—	—
Total			307	4338	5330

4. CHILD WELFARE CLINICS.

(a) Total number of children under 5 yrs. of age who first attended the Clinics during the year, and who at the date of their first attendance were:

(i) under 1 year	69
(ii) over 1 year	11

- (b) Total number of children under 5 years of age who attended the Clinics during the year and who at the end of the year were:

(i) under 1 year	76
(ii) over 1 year	131

Number of Sessions held:

Selby Methodist School Room	50
Total Attendance	1689
Average per session	33.8

5. SCHOOL HEALTH SERVICE.

Attendances at Clinic (S.U.D. and S.R.D.)	1185
Number attending Pædiatric Consultant (at Goole)	3	
Number attending Orthopædic Surgeon (at Goole)	22	
Number attending County Oculist	168
Number prescribed spectacles	38
Number attending Speech Therapy	9
Number inspected in School by School M.O.	390
Number inspected in School by School Nurse	4251
Number of verminous heads	356
Tests for mental defect, primary	7
Re-examinations	6
Reported to M.D. Authority as ineducable	1
Recommended for Residential Schools	5

The following defects were found at medical inspections:

	Requiring treatment	For observation
Verminous heads	356	—
Skin	0	2
Vision	33	21
Other eye conditions	5	7
Hearing	0	0
Other ear defects	6	2
Nose and throat	14	16
Speech	5	5
Cervical glands	5	3
Heart and circulation	0	4
Lungs	0	2
Developmental	1	2
Orthopædic	9	20
Nervous system	1	2
Psychological	0	1
Other conditions	5	3

6. MATERNITY SERVICES.

Ante-natal Clinics:

Number of patients attending	167
Total number of attendances	688
Number of sessions held	49
Average attendance per session	14

Mothers Confined in Hospital.

Leeds Hospitals	11
York Maternity Home	17
Hazlewood Maternity Home	48
Harrogate Maternity Home	1
London	1
Total					78

County Midwives.

There were 81 domiciliary confinements in Selby Urban District in 1951.

The following summary of the work of the County Midwives is for Division 10 as a whole:—

Number of Cases	449
Number of Visits	13995
Gas and air analgesia	269
Number of midwives	11

7. HOME NURSING.

Number of new cases	89
Number of visits	2787

8. HOME HELPS.

There were 3 full-time and 4 part-time Home Helps employed during the year and they attended the following cases:

Lying In	30	Expectant Mothers	3
Illness	9	Aged and Ill 4

9. IMMUNISATION AGAINST DIPHTHERIA.

Immunised during 1951.	Children under 5 years	170
	Children over 5 years	31
		<hr/>
		201
	Refresher Dose	128
		<hr/>
	Total	329

Total number of children under 15 years of age who have been immunised up to the 31st December, 1951:

Age—Years	0—1	1—2	2—3	3—4	4—5	5—10	10—15	Total
Number	13	106	106	130	143	743	654	1895
Percentage	61.41%					100%		85.55%

10. MENTAL HEALTH.

The number of mentally defective persons under supervision at the end of 1951 was as follows:

	Male	Female	Total
Under Guardianship	0	0	0
Under Statutory Supervision	6	2	8
Under Voluntary Supervision	0	0	0
On Licence from Institutions	0	3	3

11. COUNTY AMBULANCE SERVICE.

The following are the details of patients from Division No. 10 carried by the W.R.C.C. ambulances during 1951:

Maternity cases	238
Accident cases	310
Other urgent cases	236
Journeys made	3878
Total patients carried	10205
Mileage travelled	166151 miles

A large proportion of cases were taken to hospitals in Leeds, Wakefield and York, but journeys were made over a large area of the West and East Ridings.

CLINICS.

The following Child Welfare, Maternity, School Health Service, and Specialists' Clinics are now held in the Methodist School Room, Selby:—

Monday 10-12: Minor Ailments	Dr. E. M. R. Bell-Syer Miss C. M. Richardson
Monday 2-4: Ante-Natal Clinic	Dr. E. M. R. Bell-Syer Miss A. Ridsdale Miss C. M. Richardson
Tuesday 2.30-4: Remedial Exercises		Miss E. M. Alderson (physiotherapist)
Friday 10-12: Minor Ailments	Miss A. Ridsdale Miss C. M. Richardson
Friday 2-4: Child Welfare	Dr. E. M. R. Bell-Syer Miss C. M. Richardson Miss A. Ridsdale

The School Oculist holds eye-testing sessions 3 times a month in the Selby Abbey School.

The Children's Specialist and Orthopædic Surgeon have a monthly session in Goole which is available to the children of Selby. Speech therapy and sun-ray treatment are also available at Goole.

SANITARY INSPECTOR'S ANNUAL REPORT.
Inspection Work, 1951.

Inspections (including re-inspection of dwellinghouses)	1032
Visits in connection with Letting of Houses	202
Visits in connection with Verminous Premises	33
Visits in connection with Infectious Disease	52
Factories inspected	33
Inspection of Milkshops and Dairies	19
Street work in connection with Milk and Dairies	
Acts and Orders	35
Inspection of Food	192
Premises used for the preparation and sale of food	294
Pigstyes and premises used for keeping of animals	6
Tents, vans and sheds	33
Water Samples taken	9
Water Supply, Inspection	35
Rats and Mice Destruction Acts	1136
Drains inspected	197
Cinemas, Visits	36
Other visits, unclassified, interviews, no access, miscellaneous	672
Total Number of Visits	4016
Housing Applicants interviewed in Office	904

During the year, 78 notices were served under the Public Health and Housing Acts, of which number 64 were complied with.

Details of Sanitary Improvements effected as a result of Inspections made and Notices issued under Public Health and Housing Acts:—

Dwellinghouses.

Roofs repaired and made weatherproof	154
Rainwater gutters repaired or renewed	35
Rainwater downspouts repaired or renewed	19
External walls repaired	28
Fireranges and firegrates repaired or renewed	22
Walls plaster repaired	28
Ceiling Plaster repaired	10
Floors repaired	28
Window frames repaired	67
Doors repaired or renewed	15

Deficient water supply remedied	15
Sinks provided	13
Worn and defective sinks renewed	11
Sink waste pipes repaired or renewed	7
Paving of yards repaired	15

Water Closets.

Roofs repaired	17
Basins renewed	19
Flushing apparatus repaired	15
Doors Repaired or renewed	12
Seats repaired or renewed	13
Provision of Additional W.C.s	5

Drainage.

Defective drains repaired	10
Inspection chambers provided	15
Choked drains cleansed	253
New drains constructed	11

Storage of Refuse.

Defective dustbins renewed	85
---------------------------------	----

Water Supply.

All houses in the District, except two, have piped water supplied by the Urban District Council. During the year 9 samples were taken and tested, 8 bacteriologically and 1 chemically. All samples were found to be satisfactory.

Cinemas.

No complaints were received during the year, nevertheless, the conveniences were inspected periodically and all defects were remedied.

Inspection of Food.

Food found to be unfit: 19 cwts., and 14 eggs.

Not all unfit food is destroyed, about 80% is collected by pigkeepers and used for feeding purposes, the other 20% is too far gone and has to be destroyed, usually in the furnace at the Baths.

Clean Food.

During the year all shopkeepers selling food of any description were provided with, and asked to place where they could be seen, cards requesting customers to prevent their dogs entering the shops. It is pleasing to observe that most shopkeepers have displayed these cards. Whatever one may think of this, it is now generally accepted that for dogs to enter food shops is an undesirable practice.

One of the most important problems of food hygiene is the one of dirty hands. This does not necessarily mean hands showing visible dirt, it means hands that have not been washed after visiting the toilet. The hands are the most frequent medium through which contamination reaches the food; the establishment of regular hand washing would do much to reduce the incidence of food-borne diseases. In saying this I do not in any way underestimate the importance of clean premises, utensils, etc., but if personal hygiene is neglected all other precautions, however well devised and applied, will fail to afford protection of the food from contamination.

With the object of facilitating the hand washing shopkeepers selling food from premises without running hot water, sinks, etc., have been requested to provide same. The response has been good and eventually it is hoped to see every food shop properly equipped in this manner.

Sweeping of footpaths in the main streets by shopkeepers is still carried on without any thought, apparently, of what happens to the clouds of dust thus raised. Why sweep up the dirt from the footway to send it flying up to and in to your own premises? Surely it would be better to sprinkle water first and sweep afterwards. Again, who wants to breathe in dust? We all want clean, fresh air, not contaminated air.

Licensed Premises.

There are 27 of these in the town. During the year a survey was made of the sanitary accommodation and the washing facilities for glasses.

Where the sanitary accommodation and washing facilities were defective and inadequate, letters were sent to the companies concerned. I am pleased to report that improvements are in hand.

Rats and Mice Destruction, 1951.

Rats.

No. of Visits (incl. primary visits and re-visits)	1101
No. of Complaints (Dwellings, Business Premises and S.U.D.C. property)	65
No. of Unpoisoned baits laid	1095
No. of Poisoned baits laid	366
No. of Poisoned baits taken	334
No. of Bodies found	427
Kill, according to Ministry's formula	2562
(for every one body found six undiscovered)	

ANALYSIS	Dwelling houses	Business premises	Selby UDC Tips, etc. property,	TOTALS

Mice.

No. of Visits	35
No. of Complaints	8
No. of Unpoisoned baits laid	68
No. of Poisoned baits laid	46
No. of Poisoned baits taken	31
Bodies found	53

Sewers.

The sewer system of the town was treated twice. In the first instance a 10% test was carried out to reveal any infested sewer sections. The infested sections were treated, and six months later these sections were again treated; results in both instances were very good. It is difficult to estimate how many rats were killed in the sewers, but the poison takes were very good, indicating that a high proportion of the sewers' inhabitants were wiped out.

Bondgate and Richard Street Tips.

The above tips were both inspected and treated regularly, with good results, but indiscriminate tipping by tradesmen

and factories in the town make baiting a rather difficult and hazardous task.

It is a significant feature of the rat infestations in dwelling houses that in 90% of the cases the householder is in the habit of throwing out food for the birds, or keeping "swill" in an open container for collection by a pig keeper. The rats are therefore provided with all the food they need, consequently it is no small wonder that they make their residence as near the source of food as possible.

Insect Infestations.

Disinfestations carried out.—Ants	8
Bedbugs	1
Flies	2

HOUSING ACTS.

Herewith find particulars of condemned properties:—

The following Tables show the amount of work which has been accomplished under the Housing Acts since 1912.

CLEARANCE AREAS.

Situation	Number of Houses		No. of Persons Displaced
	Demolished or to be Demolished	Provided	
1. Clarkson's Yard	7	7	41
2. Cape's Yard	3	3	9

* Undertakings given to make houses fit for human habitation.

The writing of this part of the Annual Report gives me the opportunity to pay tribute to Mr. Sawdon for the excellent work he did during his short stay with the Selby U.D.C. Mr. Sawdon commenced duties as a workman in November, 1950, studied hard, and passed the qualifying examination for Sanitary Inspector in June, 1951. As so often happens after qualifications are obtained, the individual soon seeks new pastures, and so Mr. Sawdon left the Selby Urban for Selby Rural on the 12th January, 1952. During his stay it was possible to commence duties it would have been impossible to start without proper qualified assistance, as it is not possible for one inspector to carry out all the duties laid down. What is needed in the Health Department is a properly qualified additional sanitary inspector and this should be given sympathetic consideration at an early date.

It is expected that Mr. Eric Philpot will resume duty in July or August, 1952. He will, however, still only be a pupil assistant and when he qualifies will probably also seek fresh pastures. Quite frankly, I do not think the appointment of pupils solve the staffing problem of your Health Department. No sooner do they become of real use than away they go and one has to start training some other pupil.

I also would pay tribute to the very loyal services given by Miss Smith, her cheerful and tactful handling of callers is all that can be desired; in short, she is a very efficient clerk and I hope she stays with us a long time.

WILKINSON LITTLE,

Senior Sanitary Inspector.
