To the
Chairman and Members of the Selby Urban District Council.

Madam and Gentlemen,

I have the honour to present to you my seventh Annual Report on the health of the Urban District and the work of the Public Health Department for the year 1953.

There were 167 live births registered, giving a Birth Rate of 16.5 per thousand population (Adjusted Birth Rate 17.1). This is a slight decrease but compares favourably with the aggregate County Rate for urban districts of 15.4 and the National Rate of 15.5.

The Crude Death Rate was 12.2 (Adjusted Death Rate 11.5), an improvement on 1952. The aggregate County Rate was 12.5 and the Rate for England and Wales 11.4. Births exceeded deaths by 43.

Eight infants died under the age of one year, giving an Infant Mortality Rate of 47.9, and again prematurity and congenital defects were mainly responsible. The National Rate was 26.8, a new low record.

Infectious disease notifications at 57 were satisfactorily low. Although sporadic cases of scarlet fever in a mild form were troublesome no epidemic of any kind occurred. One case of acute poliomyelitis occurred. One case of suspected food poisoning was reported but all investigations proved negative and as hundreds more of the commodity were consumed by the public on the same day without ill effect the case may be dismissed as an idiosyncrasy.

It is gratifying to be able to report that there has been a marked diminution in the number of verminous heads among school children, only 94 being discovered during the year. As this is only about one-third of the number previously recorded it shows that this nuisance could be eliminated with due care and attention. Unfortunately there are a few families who seem to have parents quite incapable of keeping their children free from infestation, and who are quite indifferent to the trouble and anxiety they cause other parents.

In conclusion, I take this opportunity of expressing my appreciation to the Members and Officers of the Council for their assistance during 1953, and to the voluntary workers at the Clinic for their services.

I remain, Your obedient servant,

S. KENNAUGH APPLETON,

July, 1954.

Medical Officer of Health.

NATIONAL ASSISTANCE ACTS, 1948 and 1951.

A man, aged 81 years, was found to be aged and infirm and living in insanitary conditions and unable to devote to himself, and not receiving from other persons, proper care and attention. He was removed to an institution under the 1951 Act and a Court Order was secured later under the 1948 Act, section 47. Subsequently he gave an undertaking to remain voluntarily in the institution.

----------------------------	------	------	------	------	------	----

Cinemas.

No complaints were received during the year and they were generally well kept.

Periodical inspections were carried out, all defects found were reported to the respective managers and remedied without service of formal notices.

Inspection of Food.

Total found unfit—15 cwts. 3 qrs. 5 lbs. Details as follows:

Pork (Carcase Meat)	363 lbs.
Bottled Foods	57 lbs.
Tinned Foods	1067 lbs.
Packeted Foods	37 lbs.
Other Foods	244 lbs.

An appreciable amount of this food is used for animal feeding; the remainder, too decomposed, is burned in the Baths furnace.

Clean Food.

It is very gratifying in these days to note that dogs are rarely seen in food shops. This is, at least, one step in the right direction. When one reads, however, of cases appearing before the magistrates due to cigarette ends having been found in food sold to the public, one wonders if the cigarette is replacing the dog as a threat to clean food.

The public read these articles and can, of course, do a lot. One refusal to buy from a shop which is not clean and in which such habits are prevailing could do more good than half-a-dozen inspections by sanitary inspectors. In these matters a good deal depends on the outlook of the personnel who actually handle the food,

Managers cannot be always watching, nor can inspectors be for ever inspecting; there are other duties to be attended to. Those responsible for the methods employed in the different food trades should stress the importance of a high standard of cleanliness in all aspects of the business carried out. The co-operation of the traders has been good as a result of which various improvements have been carried out, particularly, and most important, the provision of constant hot water together with soap and towels for use of those handling food.

Licensed Premises.

There are 27 in the town. Slowly, but surely, improvements are being carried out and I hope soon to see every licensed house properly equipped with up-to-date sanitary conveniences and glass-washing facilities.

Rats and Mice Destruction, 1953.

Number of visits and re-visits	1002
Number of complaints received	29

During the year a new poison called Warfarin was introduced. With this substance the rats and mice seem to prefer to die under cover, therefore it is difficult to assess the kill. Nevertheless, a goodly number of premises were cleared. Warfarin is not used on places like the refuse tips. The poison Zinc Phosphide is used and with this substance a good number of the rats are found dead in the open. Altogether 109 rat bodies were found on the tips, and if we apply the Ministry's formula (for every one body found six undiscovered) the kill would be approximately 654.

Thanks to the efforts of the Surveyor and his staff the tips are now kept in much better order which makes the work of the rodent operative much easier.

Rat Infestation of Sewers.

As in previous years the sewers were treated twice. First a 10% baiting test in the inspection chambers to determine which sections, if any, were rat infested. Where infestation was found, poisoning with Zinc Phosphide was resorted to. The very good takes of poison would seem to indicate that a large number of rats were killed.

Water Supply.

All houses are provided with piped water from the Council's deep wells at Brayton. During the year one chemical and ten bacteriological samples were taken and analysed. All were satisfactory.

* Undertakings given to make houses fit for human habitation.

Staff.

I am pleased to say that Mr. Philpot and Miss Smith carried out their duties in a courteous and efficient manner, very often in most trying circumstances. I take this opportunity to thank them for their willing service.

I remain, Your obedient servant,

WILKINSON LITTLE,

Senior Sanitary Inspector.
