Cert. S.I. Board

Cert. Meat and Food Inspection R.S.I.

Clerk: Mrs. BARBARA WISEMAN.

To the
Chairman and Members of the Selby Urban District Council.

Ladies and Gentlemen,

I have the honour to present to you my thirteenth Annual Report on the health of the Urban District and the work of the Public Health Department for the year 1959.

There were 148 live births registered, an increase of 5, giving a Birth Rate of 14.5 per thousand population (Adjusted Birth Rate 14.5). The West Riding County Birth Rate for Urban Districts was 16.1 and for England and Wales 16.5.

140 deaths occurred, giving a Crude Death Rate of 13.7 (Adjusted Death Rate 13.6). The aggregate County Rate was 12.4 and the Rate for England and Wales 11.6. Births exceeded deaths by 8.

Two infants died under the age of one year, one of them in the first week of life, giving an Infant Mortality Rate of 13.5. The National Rate was 22.0, a new low record.

Of the 360 cases of notified infectious disease, 344 were measles. Most of these cases occurred in January and February, and the epidemic was the largest since measles became notifiable twenty years ago. There were no deaths and few complications.

Protective immunisation is freely available at the County Health Centre, at present held in the Standerling Hall, or from general practitioners, against the following: Diphtheria, Whooping Cough, Tetanus, Poliomyelitis, Smallpox and, for selected ages, Tuberculosis. A record of protection is an inheritance every child has the right to expect from its parents.

Finally, I record my appreciation of the continued support of the Members and Officers of the Council during 1959, and my thanks to the Voluntary Committee at the Clinic, and to the W.V.S. for the distribution of welfare foods.

I remain, Your obedient servant,

S. KENNAUGH APPLETON,

Medical Officer of Health.

July, 1960.

Cinemas.

No complaints received during the year and they were generally well kept.

Periodical inspections were carried out and any minor defects reported to the respective managers remedied without the service of notices,

Meat and Other Foods.

Meat.—Total weight of meat condemned: 7 cwts. 18 lbs.

Food.—Total weight of food condemned: 1 ton, 8 cwts., 3 qrs., 9 lbs.

Rats and Mice Destruction. Rodent Operative.

Number of visits and re-visits				739
Number of complaints received				49
Notices given to ratproof premises				15

Rat Infestation of Sewers.

The sewers are treated twice each year. The method of treatment is as follows: A 10% baiting test is placed in the inspection chambers, this gives an indication as to which sections are rat infested. The infested sections are then treated with Zinc Phosphide and from the amount of this poison taken it would seem that a large number of rats were killed.

Water Supply.

All houses are provided with piped water from the Council's deep wells at Brayton. During the year 3 samples were taken for bacteriological examination. All were satisfactory.

Clean Air Act.

Seventeen smoke observations were made, each of 30 mins. duration. Interviews with stokers were held regarding methods of firing.

Twelve letters were sent out to various factories, drawing attention to heavy emissions of smoke.

Market Stalls and Vehicles.

Forty verbal warnings were given for minor infringements of Byelaws. In all cases the matter complained of was rectified.

Public Baths.

The water fed to the baths is from the town mains and is chlorinated in the Pumphouse at Brayton Barff. Breakpoint chlorination of the swimming water is also carried out at the Baths before the water enters the bath. The swimming water is changed every 4 hours. Two samples were taken for bacteriological examination and both were classed as satisfactory.
