Clerk:

Mrs. BARBARA WISEMAN,

To **The Chairman and Members of the Selby Urban District Council.**

Ladies and Gentlemen,

I have the honour to present to you my Fifteenth Annual Report on the health of the Urban District and the work of the Public Health Department for the year 1961.

**Population.**

1961 was Census year and the accurate assessment of the population every ten years is always received with interest. The provisional figure given showed an unexpected decrease of 349 since 1951, the first decrease this century. The mid-1961 figure, calculated only a few weeks after the Census and, therefore, almost identical, has now been corrected by the Registrar General to 10,440, and that can be taken as the census figure for 1961 and shows an increase of 222 since 1951. This is exactly the excess of births over deaths during the ten years.

|--------|------|------|--------|----------|-------|
| Census | 1901 | .... | 7,786  |          |       |
|        | 1911 | .... | 9,049  | Increase | 1,263 |
|        | 1921 | .... | 9,984  | Increase | 935   |
|        | 1931 | .... | 10,064 | Increase | 80    |
|        | 1951 | .... | 10,218 | Increase | 154   |
|        | 1961 | .... | 10,440 | Increase | 222   |

**Vital Statistics.**

There were 158 live births registered, an increase of 2, giving a Birth Rate of 15.1 per thousand population (Adjusted Birth Rate 15.1). The West Riding County Birth Rate for Urban Districts was 16.7 and for England and Wales 17.4.

143 deaths occurred, giving a Crude Death Rate of 13.7 (Adjusted Death Rate 13.1). The aggregate County Rate was 12.8 and the rate for England and Wales 12.0. Births exceeded deaths by 15.

Two infants died under the age of one year, giving an Infant Mortality Rate of 12.7. The National Rate was 21.4, a new low record.

**Infectious Diseases.**

The incidence of notifiable diseases was low. Measles accounted for 57 of the 76 notified cases. Diphtheria has been absent from the District for fifteen years; a tribute to the good response to immunisation in the past. A high level of immunisation must be maintained if this happy state is to continue.

No case of poliomyelitis has occurred since 1958.

**Poliomyelitis Prevention.**

The steady demand for protection by injections was met throughout the year until late autumn when Salk vaccine was in short supply and no vaccination, except for certain priority groups, was done during the last quarter. The shortage was due to the heavy demand for vaccine in those parts of the country experiencing sharp outbreaks of the disease. A number of Selby residents working in or visiting Hull in October availed themselves of the oral vaccine which was used there to control an outbreak. (Sabin oral vaccine became available for all up to the age of 40 years in March, 1962).

### **Mental Health.**

A modern Training Centre was opened at Rawcliffe in November. This provides training for persons found to be unable to benefit from education in normal or special schools. At present three trainees from this District attend.

### **County Clinic.**

After years of endeavour a long-felt need was met when in October a fine, well-equipped Clinic was opened in Raincliffe Street to provide adequately for the County Health Services. Maternity and Child Welfare and School Health Services, which have done good work for a long time under trying conditions, can now do even better work, and for the first time the School Dental Service in Selby has a static Centre.

Finally, I record my appreciation of the continued support of the Members and Officers of the Council during 1961, and my thanks to the Voluntary Committee at the Clinic, and to the W.V.S. for the distribution of welfare foods.

I remain, Your obedient servant,

S. KENNAUGH APPLETON,

Medical Officer of Health.

July, 1962.

#### **Cinemas.**

No complaints received during the year and they were generally well kept.

Periodical inspections were carried out and any minor defects reported to the respective managers remedied without the service of notices.

**Meat and Other Foods.**

Meat.—Total weight of meat condemned: 8 cwts. 3 qrs.

Food.—Total weight of food condemned: 50 cwts. 2 qrs.

**Rats and Mice Destruction. Rodent Operative.**

**Rat Infestation of Sewers.**

The sewers are treated twice each year. The method of treatment is as follows: A 10% baiting test is placed in the inspection chambers, this gives an indication as to which sections are rat infested. The infested sections are then treated with Zinc Phosphide and from the amount of this poison taken it would seem that a large number of rats were killed.

**Water Supply.**

All houses are provided with piped water from the Council's deep wells at Brayton. During the year 5 samples were taken for bacteriological examination. All were satisfactory.

**Clean Air Act.**

Ten smoke observations were made, each of 30 minutes' duration. Interviews with stokers were held regarding methods of firing.

Six letters were sent out to various factories, drawing attention to heavy emissions of smoke. Interviews were also held with the respective managers.

**Market Stalls and Vehicles.**

Forty verbal warnings were given for minor infringements of Byelaws. In all cases the matter complained of was rectified.

**Public Baths.**

The water fed to the baths is from the town mains and is chlorinated in the Pumphouse at Brayton Barff. Breakpoint chlorination of the swimming water is also carried out at the Baths before the water enters the bath. The swimming water is changed every 4 hours.
