HEALTH SERVICES IN THE AREA

How Made.

There are two full time district nurse midwives in Steno.

Health Visiting.

The part time Health Visitor covers the Urban District of Steno.

How Made Service.

The local midwives are attached at the Riverside School Clinic building and are open from 9 a.m. - 5 p.m. on weekdays. The home help provides domestic service to the elderly in their own homes, maintaining domestic and social standards.

Riverside Clinic.

Home help service can be provided daily from 9 a.m. - 5 p.m.

Infant Welfare Clinic.

This is held weekly afternoon from 2 p.m. - 4 p.m. and a doctor is present.

Home Help Service.

School Clinic.

This is held on Monday mornings from 9 a.m. to 11 a.m. with a doctor in attendance. No appointment is required.

Regular Ophthalmic and ENT sessions which are attended by specialists are held at the school clinic for the benefit of school children.

Dental Clinics are held daily. Attendance by appointment.

Physiotherapy Clinics by appointment only on Mondays and Thursdays.

A Child Guidance Clinic is run by Dr. Vera Holdway by appointment.

Speech Therapy Clinics are held weekly.

Immunisation and Vaccination.

Diphtheria, whooping cough, tetanus and poliomyelitis immunisation is provided by the general practitioners under the County Council scheme free of charge. Smallpox vaccination is also provided free of charge by the local general practitioners under the County Council scheme.

Mothercraft and Relaxation Classes.

These are held at the Riversdale School Clinic.

Ambulance Service.

The headquarters of the County Council ambulance service is situated in Sleaford. The vehicles are fitted with radio and the transmitter is situated at the ambulance station in Sleaford.

Hospital Services.

These are provided by the Sheffield Regional Hospital Board at Lincoln, Boston and Grantham. The small maternity home in Sleaford serves a useful function for the Sleaford area.

Venereal Disease.

A clinic is held at Lincoln County hospital twice weekly.

Laboratory Facilities.

Bacteriological investigations are carried out at the Public Health Laboratory at Lincoln under the supervision of Dr. Croll.

PREVALANCE AND CONTROL OF INFECTIOUS DISEASES.

During the year 19 cases of infectious diseases were notified:-

Measles	9
Pneumonia	1
Food Poisoning	1

Tuberculosis

5 notifications of this disease were received during the year all being respiratory.

B. C. G. vaccination is a protection against tuberculosis. This is offered to families of contacts who are shown by a simple stain test to have no protection against the disease. This protection is also available as a routine to 13 year old school children.

Special Clinics

This is held on Tuesday mornings from 9 a.m. to 11 a.m. when a doctor is attached. An appointment is required.

Regular Consultants and the sessions which are attended by specialists are held at the normal clinic for the benefit of school children.

General Clinics are held daily. Attendance by appointment.

Physiotherapy Clinics by appointment only on Wednesdays and Thursdays.

A Daily Out-patient Clinic is run by Dr. Vera Holway by appointment.

Speech Therapy Clinics are held weekly.

Immunisation and Vaccination

Immunisation, including cough, tetanus and poliomyelitis immunisation is provided by the general practitioners under the County Council health area of charge. Smallpox vaccination is also provided free of charge by the local general practitioners under the County Council scheme.

Maternity and Gynaecological Clinics

These are held at the Riverside School Clinic.

Substance Abuse

The responsibility of the County Council substance service is situated in Bicester. The vehicles are fitted with radio and the transmitter is situated at the ambulance station in Bicester.

Headed Services

These are provided by the Bicester Regional Hospital based at Lincoln, Bicester and Bicester. The small maternity home in Bicester serves a useful function for the Bicester area.

General Surgery

A clinic is held at Lincoln County Hospital three weeks.

Laboratory Facilities

Bacteriological investigations are carried out at the Public Health Laboratory at Lincoln under the supervision of Dr. Goff.

PREVENTION AND CONTROL OF INFECTIOUS DISEASES

During the past few years of infectious diseases were notified:

Measles	1
Scarlet fever	1
Whooping cough	1

Pharmaceuticals

The population of this district was treated during the year 1955 with pharmaceuticals in a protective against tuberculosis. This is allowed to be used in the district and also in the surrounding areas. This protection is also available in the district. A total of 12 years old children.

1965

Section 47. National Assistance Act, 1948.

No action was taken under this section during 1965.

I remain

Your obedient servant

W. L. Kemp,
Medical Officer of Health

Considerable progress has also been made with regard to the clearance of unfit houses, five areas having been dealt with. There remains very little of the original Slum Clearance programme to be dealt with and proposals are in hand for further clearance areas. In regard to house improvements I would have liked to have been able to report an increase in the number of premises modernised. I cannot stress too often that if the stock of older houses is not to deteriorate into unfit housing steady progress with regard to improvements must be achieved.

In conclusion may I thank the Council for their support during the year and that of my fellow officers, particularly those of my own Department.

REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR,

1966.

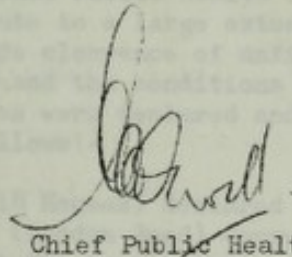

Mr. Chairman, Lady and Gentlemen,

I have pleasure in presenting my 19th Annual Report on the Environmental Health Services for the Urban District for the year ending 31st December, 1966.

I am pleased to be able to report a year of considerable progress. The benefit of an additional Public Health Inspector during a full year is apparent. It has been possible to carry out all the work necessary to complete an initial survey of premises registered under the Offices, Shops and Railway Premises Act, 1963 and by the end of the year the majority of the premises in the District covered by the Act and which were the responsibility of this Council were up to standard.

Considerable progress has also been made with regard to the clearance of unfit houses, five areas having been dealt with. There remains very little of the original Slum Clearance programme to be dealt with and proposals are in hand for further clearance areas. In regard to house improvements I would have liked to have been able to report an increase in the number of premises modernised. I cannot stress too often that if the stock of older houses is not to deteriorate into unfit housing steady progress with regard to improvements must be achieved.

In conclusion may I thank the Council for their support during the year and that of my fellow officers, particularly those of my own Department.

Chief Public Health Inspector.

December, 1967

REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR

1967

Mr. Chairman, Lady and Gentlemen,

I have pleasure in presenting my 1967 Annual Report on the Environmental Health Services for the Urban District for the year ending 31st December, 1967.

I am pleased to be able to report a year of considerable progress. The benefits of an additional Public Health Inspector during a full year is apparent. It has been possible to carry out all the work necessary to complete an initial survey of premises registered under the Offices, Shops and Railway Premises Act, 1953 and by the end of the year the majority of the premises in the District covered by the Act and which were the responsibility of this Council were up to standard.

Considerable progress has also been made with regard to the clearance of unfit houses, five areas having been dealt with. There remains very little of the original Slum Clearance programme to be dealt with and proposals are in hand for further clearance areas. In regard to house improvements I would have liked to have been able to report an increase in the number of premises modernised. I cannot stress too often that if the stock of older houses is not to deteriorate into unfit housing steady progress with regard to improvements must be achieved.

In conclusion may I thank the Council for their support during the year and that of my fellow officers, particularly those of my own Department.

Chief Public Health Inspector

December, 1967

COUNCIL HOUSING

The grouped dwellings at Eslaforde Gardens were completed during the early part of the year and despite the difficulties I referred to regarding letting in my 1965 report all were occupied within a reasonable time after completion.

The operation of the grouped dwellings has been entirely satisfactory and has enabled a number of persons to maintain an independent existence who but for the existence of a unit of this type would certainly be in other special accommodation. The difficulty in obtaining a Deputy Warden has presented some difficulty and for some reason this appointment seems unattractive. Nevertheless the importance of the Deputy is apparent since otherwise the full-time Warden receives no relief from her responsibilities to the tenants.

18 Flats in Northgate were completed and all were let.

41 Flats and maisonettes in course of construction on the Boston Road Estate were at a stage at the end of the year when the first maisonettes would shortly be ready for allocation, difficulty with the contractors in reaching completion having been experienced.

New accommodation becoming available and vacancies which occurred in existing houses enabled 42 houses and flats to be let to applicants on the general list. 22 tenancies were created at Eslaforde Gardens making a total of 64 in the year.

The list of Council House applicants was revised during February and March and at the 7th March, 1966, the closing date for renewals, there were on the list 170 names. This rapidly increased and allowing for deletion of persons re-housed, it reached a net figure of 250 on the list as at 31st December, 1966.

Improvement to pre-war houses continued and during the financial year 1966-7, 13 houses on the George Street Estate were improved. Maintenance apart from painting is carried out by direct labour. No particular problems arising out of maintenance have been experienced.

PRIVATE HOUSING

12 private houses were completed during the year. The first houses on the Goodson's Holt Site were occupied by the end of the year, but none had been commenced on the South Side of Boston Road where it was anticipated development would have taken place during the year.

Proposals to develop a site on the Lincoln Road were received and outline planning approval given. This scheme provides for approximately 100 dwellings.

UNFIT HOUSING

With the appointment of an additional Public Health Inspector it became possible during 1966 to concentrate to a large extent on bringing up to date the programme for the clearance of unfit houses. During the year 35 houses were surveyed and the conditions reported to the Council. Accordingly clearance areas were declared and Compulsory Purchase Orders subsequently made as follows:-

- (a) London Road Clearance Area (18 Houses) declared 18th May, 1966, the Sleaford Urban District (London Road) Compulsory Purchase Order, 1966 being made at the same time. Premises included - 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37, 39, 41, 43, 45 and 47 London Road.

GENERAL HOUSING

The grouped dwellings at Epsom Road were completed during the early part of the year and despite the difficulties I referred to regarding letting in my 1965 report all were occupied within a reasonable time after completion.

The operation of the grouped dwellings has been entirely satisfactory and has enabled a number of persons to maintain an independent existence who but for the existence of a unit of this type would certainly be in other special accommodation. The difficulty in obtaining a Deputy has been presented more difficultly and for some reason this appointment seems unattractive. Nevertheless the importance of the Deputy is apparent since otherwise the full-time Welfare Officer would have no relief from her responsibilities to the tenants.

16 flats in Northgate were completed and all were let.

At Epsom and completed in course of construction on the Epsom Road Estate were at a stage at the end of the year when the first contractors in reaching completion having been experienced.

Now accommodation becoming available and vacancies which occurred in existing houses enabled 45 houses and flats to be let to applicants on the general list. 55 vacancies were created at Epsom Road making a total of 100 in the year.

The list of Council House applications was revised during February and March and as the 7th March, 1966, the closing date for renewals, there were on the list 170 names. This rapidly increased and allowing for deletion of persons re-owned, it reached a net figure of 250 on the list on 31st December, 1966.

Improvement to pre-war houses continued and during the financial year 1965-6, 13 houses on the George Street Estate were improved. Maintenance work first being carried out by direct labour. No particular problems arising out of maintenance have been experienced.

PRIVATE HOUSING

15 private houses were completed during the year. The first houses on the Goodwin's Hill Estate were occupied by the end of the year but none had been completed on the South Side of Boston Road where it was anticipated development would have taken place during the year.

Proposals to develop a site on the Lincoln Road were received and outline planning approval given. This scheme provides for approximately 100 dwellings.

URBAN HOUSING

With the appointment of an additional Public Health Inspector it became possible during 1966 to concentrate to a large extent on bringing up to date the programme for the clearance of urban housing. During the year 55 houses were surveyed and the conditions reported to the Council. Accordingly clearance areas were declared and demolition contracts subsequently made as follows:-

- (a) London Road Clearance Area (18 houses) cleared 15th May 1966, the Greater Urban District (London Road) Corporation Purchase Order, 1966 being made at the same time.
- Properties included - 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37 and 38 London Road.

UNFIT HOUSING cont.

Objections against the order were received in respect of Numbers 39 and 47 London Road, a Public Inquiry being held on the 18th October, 1966.

- (b) Westgate Number 4 Clearance Area (6 Houses) declared 26th October, 1966, the Sleaford Urban District (Westgate Number 4) Compulsory Purchase Order, 1966 being made at the same time. Premises included - 29 and 31, Westgate, 11, Dunkirk and 2/4, 6 and 8, West Banks.
- (c) Westgate Number 5 Clearance Area (4 Houses) declared 26th October, 1966, the Sleaford Urban District (Westgate Number 5) Compulsory Purchase Order, 1966 being made at the same time. Premises included - 88, 90, 92, and 94, Westgate.
- (d) Hill's Court Clearance Area (3 Houses) declared on the 30th November, 1966, the Sleaford Urban District (Hill's Court) Compulsory Purchase Order, 1966 being made at the same time. Premises included - 3, 4, and 5 Hill's Court.
- (e) Sharpe's Court Clearance Area (4 Houses) declared on the 30th November, 1966, the Sleaford Urban District (Sharpe's Court) Compulsory Purchase Order, 1966 being made at the same time. Premises included - 1, 2, 3, and 4, Sharpe's Court.

None of these Orders were confirmed by the end of the year.

IMPROVEMENT GRANTS

5 Discretionary Grants were asked for and approved during 1966, a decrease compared to 1965. Standard Grants approved totalled 16 an increase of 5 over 1965. The total number of Grants made was again disappointing. There appeared however to be an increase in interest in improving older houses and a good deal of time was spent discussing proposals with owners of improvable houses and it is hoped that this will reflect on the number of houses modernised in the future. The 1964 Housing Act, to which I referred in my 1965 report enables the Council to declare areas to be Improvement Areas and some preliminary work was carried out in the Albion Terrace area with the intention of asking the Council to declare this to be an improvement area.

Standard Grants.

Number of applications received	16
Number of applications approved	16
Number of dwellings improved	8
Amount of Grant Paid	£911 14s. 6d.

Discretionary Grants.

Number of applications received	5
Number of applications approved	5
Number of dwellings improved	4
Amount of Grant Paid	£841 Os. Od.

The tables above exclude the 13 Council houses improved during the financial year 1966/67.

Of orders against the order were received in respect of
Number 39 and 47 Landon Road, a Public Inquiry being held on the
18th October, 1966.

(b) Westgate Number 4 Clearance Area (8 Houses) declared 28th
October, 1966, the Standard Urban District (Westgate Number 4)
Compulsory Purchase Order, 1966 being made at the same time.
Premises included - 29 and 31, Westgate, 11, Dunstirk and 2A, 6
and 8, West Bank.

(c) Westgate Number 5 Clearance Area (8 Houses) declared 28th
October, 1966, the Standard Urban District (Westgate Number 5)
Compulsory Purchase Order, 1966 being made at the same time.
Premises included - 88, 90, 92, and 94, Westgate.

(d) Hill's Court Clearance Area (3 Houses) declared on the 30th
November, 1966, the Standard Urban District (Hill's Court)
Compulsory Purchase Order, 1966 being made at the same time.
Premises included - 3, 4, and 5 Hill's Court.

(e) Sharpe's Court Clearance Area (4 Houses) declared on the
30th November, 1966, the Standard Urban District (Sharpe's Court)
Compulsory Purchase Order, 1966 being made at the same time.
Premises included - 1, 2, 3, and 4, Sharpe's Court.

None of these Orders were completed by the end of the year.

IMPROVEMENT GRANTS

5 Discretionary Grants were asked for and approved during 1966,
a decrease compared to 1965. Standard Grants approved totalled 16 in
number of 5 over 1965. The total number of Grants made was again
disappointing. There appeared however to be an increase in interest
in improving their houses and a good deal of time was spent discussing
proposals with owners of improvable houses and it is hoped that this
will result in the number of houses undergoing in the future. The 1964
Housing Act, to which I referred in my 1965 report enables the Council to
decide upon to be improved areas and some preliminary work was
carried out in the Alton Terrace area with the intention of asking the
Council to declare this to be an improvement area.

Standard Grants

Number of applications received	16
Number of applications approved	16
Number of dwellings improved	8
Amount of Grant Paid	£311 14s. 0d.

Discretionary Grants

Number of applications received	5
Number of applications approved	5
Number of dwellings improved	4
Amount of Grant Paid	£381 0s. 0d.

The tables above exclude the 15 Council houses improved during
the financial year 1966/67.

HOUSING STATISTICS

Inspections of dwelling houses during the year.

(a)	Total number of dwelling-houses inspected for housing defects under Public Health or Housing Acts	196
	Number of inspections made for the purpose	806
(b)	Number of dwelling-houses (included under sub-heading (a) above), which were inspected and recorded under the Housing Consolidated Regulations, 1925	36
(c)	Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	35
(d)	Number of dwelling-houses (exclusive of those referred to under preceding sub-headings) found not to be in all respects, reasonably fit for habitation	20

Remedy of defects during the year without service of Formal Notice

Number of defective dwelling-houses rendered fit in consequence of informal action by the local authority or their officers	20
---	----

Action under Statutory Powers during the year.

MEAT

1 Calf carcasses and all offal	Immaturity	35 lbs.
Beef	Bruising, oedema and	
	Broken leg	155 lbs.
Beef organs	Various conditions and	
	diseases	1,425 lbs.

SHEEP

3 Sheep carcasses and all offal	Oedema	137 lbs.
1 Sheep carcass and all offal	Bodily fluid	45 lbs.
Mutton	Bruising and oedema	311 lbs.
Sheep organs	Various conditions and	
	diseases	253 lbs.

PIGS

Pork	Arthritis, bruising and	
	oedema	161 lbs.
Pig heads	Phorbaculosis	377 lbs.
Pig organs	Various conditions and	
	diseases	729 lbs.

WIL (iii) Number of dwelling-houses demolished as a result of informal action.

WIL (iv) Number of dwelling-houses closed as a result of an undertaking given by the owner.

(d) Proceedings under Section 16 of the Housing Act, 1957.

WIL (i) Number of separate tenements or underground rooms in respect of which Clearance Orders were made.

WIL (ii) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenements or rooms having been rendered fit.

(e) Proceedings under Section 45 and 47 of the Housing Act, 1957

WIL (i) Number of Clearance Orders made.

2 (ii) Number of Compulsory Purchase Orders made.

WIL (iii) Number of dwelling-houses demolished in pursuance thereof.

MEAT AND OTHER FOODS

SLAUGHTERHOUSE.

The Church Lane Slaughterhouse continues to be maintained by a private Company as the only slaughterhouse in the town. The standards maintained during the year have been reasonably satisfactory having regard to the limitations of the premises.

MEAT INSPECTION.

100% meat inspection has been carried out in the slaughterhouse as previously. There has been a marked increase in the through-put in the slaughterhouse during the year particularly in the later months, the number of cattle slaughtered being up by 200, sheep almost doubled by an increase of 1,200 and pigs over one third by almost 300. This has involved a considerable increase in the time spent on inspection particularly in the evenings and at the latter end of the year at week-ends.

This increase arose from the use of the slaughterhouse by a large consumer and it is anticipated that the increase in the full year will show that the through-put and consequent meat inspection time needed has more than doubled.

The principal reasons for the condemnation of meat referred to follows:-

BEASTS.

1 Calf carcase and all offal	Immaturity	35 lbs.
Beef	Bruising, oedema and Broken leg	155 lbs.
Beast organs	Various conditions and diseases	1,939 lbs.

SHEEP.

3 Sheep carcasses and all offal	Oedema	137 lbs.
1 Sheep carcase and all offal	Badly bled	45 lbs.
Mutton	Bruising and oedema	511 lbs.
Sheep organs	Various conditions and diseases	253 lbs.

PIGS.

Pork	Arthritis, bruising and oedema	163 lbs.
Pig heads	Tuberculosis	377 lbs.
Pig organs	Various conditions and diseases	729 lbs.

SLAUGHTERHOUSE

The Carr's Law Slaughterhouse continues to be maintained by a private company as the only slaughterhouse in the town. The standards maintained during the year have been reasonably satisfactory having regard to the limitations of the premises.

MEAT INSPECTION

Meat inspection has been carried out in the Slaughterhouses as previously. There has been a marked increase in the throughput in the slaughterhouse during the year particularly in the latter months, the number of cattle slaughtered being up by 500, sheep almost doubled by an increase of 1,500 and pigs over one third by almost 500. This has involved a considerable increase in the time spent on inspection particularly in the evenings and at the latter end of the year at week-ends.

This increase arose from the use of the slaughterhouse by a large number of consumers and it is anticipated that the increase in the full year will show that the throughput and consequent meat inspection time needed has more than doubled.

The principal reasons for the continuation of meat referred to follow:-

BEAUF

1 Calf carcasses and all offal	Insufficiency	35 lbs.
Beef	Swelling, oedema and	
Beef organs	Broken leg	155 lbs.
	Various conditions and	
	diseases	1,333 lbs.

CHURCH

2 Sheep carcasses and all offal	Oedema	137 lbs.
1 Sheep carcasses and all offal	Belly fluke	45 lbs.
Mutton	Swelling and oedema	511 lbs.
Sheep organs	Various conditions and	
	diseases	553 lbs.

STIR

Pork	Arthritis, swelling and	
	oedema	163 lbs.
Pig heads	Tuberculosis	377 lbs.
Pig organs	Various conditions and	
	diseases	759 lbs.

1966	Cattle	Calves	Sheep & Lambs	Pigs

OTHER FOODS

The following premises are registered in accordance with Section 16 of the Food and Drugs Act, 1955:-

The manufacture of sausages, etc...	6
The manufacture, sale and storage of ice cream	3
Storage and sale only of ice cream	28

Food premises are classified as under:-

Grocers	19
Public Houses	15
Butchers	10
Bakers and Confectioners	5
School Canteens	5
Slaughterhouses	1
General Stores	4
Fish and Chip Shops	4
Fishmongers	2
Catering Premises	9
Hotels	3
Confectioners	4
Greengrocers	8
Egg Packers	1

I am pleased to be able to report that regular routine inspection of food premises was carried out during the year. Every premises where food is prepared, sold and stored received at least one inspection during the year. As a result a number of premises where unsatisfactory conditions were found were brought up to standard. It is however fair to say that the general standard of hygiene in food premises within the district is good. Most food traders are conscious of their responsibilities and have endeavoured to provide premises which can be regarded as satisfactory. It is nevertheless necessary to remind all food traders and food handlers that good food hygiene does not end with satisfactory premises. The conduct of those premises and the methods used in handling food products need to receive every attention if the interests of the public are to be safe guarded.

Apart from informal action the following was necessary during the year:-

The condition of a butcher's shop which was found continually to be unsatisfactory necessitated the Council giving a final warning to the Company concerned. The warning generally has achieved its purpose. Major re-construction of the rear of the premises was carried out and the hygiene and conduct of the shop generally has since caused little concern.

A warning letter was sent to a milk distributor regarding a complaint received of milk delivered in a dirty bottle.

Proceedings were taken under Section 2 and 106 of the Food and Drugs Act, 1955 against a retailer of milk for selling milk not of the quality demanded by the purchaser in that the milk contained a large piece of glass together with a number of small fragments. The case was dismissed.

A complaint of a maggot in a packet of chocolate biscuits was investigated. This was found to be a larva of a cacao moth. The complaint was taken up without success with the retailers, the wholesalers and the manufacturers in an effort to ascertain the point at which the infestation arose. No further action was considered necessary other than to warn all concerned of the need to guard against risks of infestation.

The following premises are registered in accordance with Section 10 of the Food and Drugs Act, 1939:-

6	The manufacture of messengers, etc.
3	The manufacture, sale and storage of ice cream
33	Storage and sale only of ice cream

Food premises are classified as under:-

19	Grocers
15	Public Houses
10	Butchers
2	Bakers and Confectioners
3	School Canteens
1	Signposters
4	General Stores
4	Fish and Chip Shops
5	Fishmongers
9	Carrying Premises
3	Hotels
4	Confectioners
8	Dairy Premises
1	Ice Factories

I am pleased to be able to report that regular routine inspection of food premises was carried out during the year. Every premises where food is prepared, sold and stored received at least one inspection during the year. As a result a number of premises were unsatisfactory conditions were found were brought up to standard. It is however felt to say that the general standard of hygiene in food premises within the district is good. Most food traders are conscious of their responsibilities and have endeavored to provide premises which can be regarded as satisfactory. It is nevertheless necessary to remind all food traders and food handlers that good food hygiene does not end with satisfactory premises. The control of those premises and the methods used in handling food products need to receive every attention if the interests of the public are to be fully safeguarded.

Apart from informal notices the following was necessary during the year:-

The condition of a butcher's shop which was found continually to be unsatisfactory necessitated the Council giving a final warning to the shop concerned. The warning generally has achieved its purpose. Major re-arrangement of the floor of the premises was carried out and the hygiene and control of the shop generally has since caused little concern.

A warning letter was sent to a milk distributor regarding a complaint received of milk delivered in a dirty bottle.

Proceedings were taken under Section 5 and 10 of the Food and Drugs Act, 1939 against a retailer of milk for selling milk not of the quality demanded by the purchaser in that the milk contained a large proportion of water together with a number of small fragments. The case was dismissed.

A complaint of a packet of chocolate biscuits was investigated. This was found to be a case of a name mark. The complaint was taken up without success with the retailer, the wholesalers and the manufacturers in an effort to ascertain the point at which the infestation arose. No further action was considered necessary other than to warn all concerned of the need to guard against risk of infestation.

MILK SUPPLY

The distributors supplying milk to the area were unchanged. Door to door deliveries are carried out by two distributors. A number of grocery and other shops also retail pasteurised or sterilized milk.

17 samples were taken from supplies which were pasteurised and 3 which were untreated. All were taken by the County Health Inspector and all were satisfactory. Two fresh cream samples taken by the Department were also found to be satisfactory.

ICE CREAM

One additional premises for the storage and sale only of ice cream was registered. An increase in inspections of ice cream premises indicated little on which to comment in regard to premises, but standards of mobile vehicles frequently revealed that they left much to be desired. Where the vehicles are not under the immediate control of the owners standards are often low. Letters were sent to the owners of vans found to fall short of the standards required, the general result being that these vehicles were not seen again.

OTHER FOOD CONDEMNED

- | | |
|----------------------------|--------------------|
| 14 Chickens | Contaminated. |
| 1 Rabbit | Unsound. |
| 4 lbs. Liquorice Allsorts | Damaged. |
| 2 Tins Meat (3lbs) | Decomposed. |
| 10 Tins Cream Rice (10lb.) | Blown and Damaged. |

The distribution of milk to the area was interrupted. Door to door collection was carried out by the distributor. A number of groups and other shops also retail pasteurized or sterilized milk. It is noted that milk supplied from pasteurized and sterilized sources was satisfactory. All were taken by the County Health Inspector and all were satisfactory. The fresh cream samples taken by the Department were also found to be satisfactory.

For additional purposes for the storage and sale only of the cream was registered. As indicated in the inspection of the cream producer indicated little or no comment in regard to practices, but at various of mobile vehicles frequently revealed that they felt such to be desired. Since the vehicles are not under the health control of the owner, whenever they are used, factors were sent to the owners of such farms to fall short of the standards required, the general result being that some vehicles were not used again.

- 10 This route (11th, 12th and 13th) - 1000 and 1000
 5 This route (11th) - 1000
 4 This route (11th) - 1000
 1 This route - 1000
 1000 and 1000 - 1000

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963.

By the end of the year every premises in the town which was registered under the Act or to which it was thought the Act might apply to had been inspected.

At the 31st December, 1966 there were registered premises as follows:-

REGISTRATIONS AND GENERAL INSPECTIONS

Class of Premises (1)	Number of premises registered during the year (2)	Number of registered premises at end of year (3)	Number of registered premises receiving a general inspection during the year (4)
Offices	12	44	37
Retail Shops	14	97	48
Wholesale shops, Warehouses	-	3	2
Catering establishments open to the public, canteens	4	17	15
Fuel storage depots	-	1	1
Totals:	30	162	103

TOTAL NUMBER OF VISITS OF ALL KINDS BY INSPECTORS TO REGISTERED PREMISES UNDER THE ACT

656

ANALYSIS OF PERSONS EMPLOYED IN REGISTERED PREMISES BY WORKPLACE

Class of workplace (1)	Number of persons employed (2)
Offices	305
Retail Shops	391
Wholesale departments, warehouses	17
Catering establishments open to the public	104
Canteens	1
Fuel Storage Depots	7
Total	825
Total males	342
Total females	483

By the end of the year every premises in the town which was registered under the Act of 1957 should have been inspected to have been inspected.

At the 31st December, 1955 there were registered premises as follows:-

REGISTRATION AND GENERAL INFORMATION

Class of premises (1)	Number of premises registered during the year (2)	Number of premises registered at end of year (3)	Number of registered premises receiving a general inspection during the year (4)
Offices	15	44	37
Retail shops	14	37	38
Wholesale shops, warehouses		3	2
Factories, establishments open to the public, restaurants	4	17	15
Public storage depots		1	1
Total	30	102	103

TOTAL NUMBER OF VISITS OF ALL KINDS BY INSPECTORS TO REGISTERED PREMISES UNDER THE ACT

ANALYSIS OF PREMISES EMPLOYED IN REGISTERED PREMISES BY WORKPLACE

Class of workplace (1)	Number of persons employed (2)
Offices	104
Retail shops	37
Wholesale departments, warehouses	17
Factories, establishments open to the public	104
Restaurants	1
Public Storage Depots	1
Total	264
Total males	183
Total females	81

Inspections made are as follows:-

Number of premises inspected initially	103
Total number of inspections including initial and re-inspections	656

ANALYSIS OF CONTRAVENTIONS FOUND DURING THE YEAR

Section	Number of Contraventions found		Section	Number of Contraventions found	
4	Cleanliness	20	13	Sitting facilities	2
5	Overcrowding	-	14	Seats (Sedentary Workers)	-
6	Temperature	37	15	Eating facilities	1
7	Ventilation	3	16	Floors, passage & stairs	11
8	Lighting	3	17	Fencing exposed parts machinery	2
9	Sanitary conveniences	44	18	Protection of young persons from dangerous machinery	-
10	Washing facilities	37	19	Training of young persons working at dangerous machinery	-
11	Supply of drinking water	4	23	Prohibition of heavy work	-
12	Clothing accommodation	4	24	First Aid General Provisions	42
			TOTAL		210

There were in addition a number of minor contraventions e.g. failure to exhibit abstracts not included above.

The main problems in administering the Act have been in regard to the lighting and temperature. In the absence of any statutory standard at the moment it has been the practice to assess each premises and part of each premises on its merits having regard to the operation which is carried on. Generally lighting standards have been found to be reasonably acceptable but have generally fallen short of the standards suggested by the Illuminating Engineering Society. Nevertheless every effort has been made to achieve such a standard in newly constructed premises or premises where re-organisation of the lighting has taken place.

The main problem with regard to temperature has been in shops constantly frequented by the public, particularly in food shops and the conflict with the effects of temperature on the keeping quality of perishable

ANALYSIS OF CONTRAVENTIONS FOUND DURING THE YEAR

Inspection made are as follows:-
 Total number of inspections including initial and re-inspections 638
 Number of premises inspected lastingly 109

Section	Number of Contraventions found	Section	Number of Contraventions found
1	4	Supply of drinking water	2
2	4	Cleanliness	42
3	37	Training of young persons working at dangerous machinery	-
4	4	Protection of young persons from dangerous machinery	-
5	37	Lighting	5
6	37	Temperature	11
7	4	Ventilation	-
8	3	Overcrowding	-
9	37	Classification	2
10	37	Sitting facilities	2
TOTAL			
638		638	

The main problem in administering the Act has been in regard to the lighting and temperature. In the absence of any statutory standard at the moment it has been the practice to assess each premises and part of each premises on the basis having regard to the operation which is carried on. Generally lighting standards have been found to be reasonably acceptable but have generally fallen short of the standards suggested by the Illuminating Engineering Society. Nevertheless every effort has been made to achieve such a standard in newly constructed premises or premises where re-organisation of the lighting has been planned.

The main problem with regard to temperature has been in shops generally frequented by the public, particularly in food shops and the conflict with the efforts at temperature on the keeping quality of perishable goods.

There were in addition a number of minor contraventions e.g. failure to exhibit notices not included above.

foods and the practicability of maintaining adequate temperatures in such shops is a constant one. The provision that where shop temperatures cannot be maintained employees must have facilities whereby they may warm themselves is extremely difficult to enforce and in my opinion frequently impracticable.

WATER SUPPLY

The public water supply in the area is provided by the Kesteven Water Board and supplies adequate in quantity and of good quality have been maintained during the year. Extensions to the mains system have been laid on the new Estate at Goodson's Holt. I am indebted to Mr. Ian Smith, Engineer to the Water Board for the following details of Chemical Analysis of a sample taken on the 10th June, 1966 from the Borehole at Clay Hill:-

This water contains per million parts:-

Total Solids dried 180°C	476.00
Suspended Matter	Absent
Chlorides as Chlorine	28.40
Nitrate Nitrogen	3.30
Nitrite Nitrogen	0.006
Ammoniacal Nitrogen	0.012
Albuminoid Nitrogen	0.024
Carbonate Hardness	205.00
Non-Carbonate Hardness	131.00
Excess Alkalinity as Sodium Carbonate	
Oxygen absorbed from	
N/80 KMnO ₄ in 4 hrs @ 27°C	0.00
pH Value	7.3
Odour and Taste	Normal
Colour - Hazen Units	Less than 5
Heavy Metals	Absent
Free Chlorine	Absent
Oil and Grease	Absent

In addition to regular chemical sampling bacteriological sampling has been regularly carried out by the Board and by myself, all samples having proved satisfactory.

In addition samples have been taken by my Department from private bores in the District all of which have proved satisfactory. A sample taken from one shallow well proved to be most unsatisfactory. Efforts to achieve a piped water supply at this small agricultural holding have as yet been unsuccessful.

SEWERAGE

Extensions to the existing sewerage system to the town were made by the construction of the necessary sewers on the Goodson's Holt Estate.

In Spetember the Council approved tenders for the provision of adequate pumping equipment to replace the existing insanitary arrangements to the rear of Springfield Cottages which over the years has caused nuisance and had become a liability. This scheme will allow for the ultimate sewerage of a large area of land in the vicinity of Mareham Lane which previously could not be drained.

foods and the practicability of maintaining adequate temperatures in such shops is a constant one. The provision that where shops temperatures cannot be maintained, employees must have facilities whereby they may themselves be suitably dressed in winter and in an opinion frequently impracticable.

WATER SUPPLY.

The public water supply in the area is provided by the Eastern Water Board and supplies adequate in quantity and of good quality have been maintained during the year. Extensions to the mains system have been laid on the new estate at Goodson's Hall. I am indebted to Mr. Ian Smith, Engineer to the Water Board for the following details of Chemical Analysis of a sample taken on the 10th June, 1966 from the borehole at Gully Hill:-

This water contains per million parts:-

472.00	Total Solids dried 180°C
Absent	Suspended Matter
28.40	Chlorides as Chlorine
7.30	Nitrate Nitrogen
0.008	Nitrite Nitrogen
0.012	Ammoniacal Nitrogen
0.024	Aluminium Nitrogen
205.00	Carbonate Hardness
134.00	Non-Carbonate Hardness
	Total Alkalinity as Sodium Carbonate
	Oxygen absorbed from
0.00	Winkler in 5 hrs at 27°C
7.7	pH Value
Normal	Odour and Taste
Less than 5	Colour - Hazen Units
Absent	Heavy Metals
Absent	Free Chlorine
Absent	Oil and Grease

In addition to regular chemical sampling bacteriological sampling has been regularly carried out by the Board and by myself, all samples having proved satisfactory.

In addition samples have been taken by my Department from private boreholes in the District all of which have proved satisfactory. A sample taken from one shallow well proved to be most unsatisfactory. Efforts to achieve a piped water supply at this small agricultural holding have as yet been unsuccessful.

SEWERAGE

Extensions to the existing sewerage system to the town were made by the construction of the necessary sewers on the Goodson's Hall Estate.

In October the Council approved tenders for the provision of adequate pumping equipment to replace the existing inefficient arrangements to the rear of Springfield Cottages which over the years has caused nuisance and had become a liability. This scheme will allow for the installation of a large area of land in the vicinity of Springfield Cottages which previously could not be drained.

REFUSE DISPOSAL

Refuse collection and disposal continues to be controlled by the Council's Surveyor a weekly collection of refuse being maintained. The brick yard tip reached the stage during the year when it became necessary to cease tipping. A small area of land adjoining and in the ownership of the Council was used and negotiations were satisfactorily concluded for the use of another small area next to that now in use. These arrangements can be considered very short term and the need for long term and satisfactory means of disposal of house refuse is indeed urgent.

MOVEABLE DWELLINGS

Residential site licences remain at 3. The site which was licenced in 1965 was nearing completion at the end of the year and it was anticipated that it would be in use early in 1967.

One caravan was found to be stationed on an unlicensed site. A warning was sent to the occupier of the land. He subsequently applied for a short term licence which was granted, the van occupier being engaged on contract work in the area. The licence was subsequently extended for 3 additional periods, the site being ultimately vacated.

No problem from casual users of sites occurred during the year.

RODENT CONTROL

No change in the arrangements for Rodent Control occurred during the year. The Rodent Control Operator continued to be available full-time when needed. The latter part of 1966 was a period of intense activity, there being a considerable increase in the rat population. The reason for this was difficult to determine but the large increase will be apparent from the fact that the total number of infested premises found rose from 220 in 1965 to 392 during the year under review. In spite of this very large increase by the end of the year infestations were generally under control and I have no reason to suppose that there will be any long-term deterioration in the rodent situation in the District.

The Council's sewers received their usual treatment, no evidence of major infestations being found. Westgate continued to be the main area of needing treatment with several small areas on the outskirts of the town.

Details of work carried out by the Rodent Control Operator during 1966 were as follows:-

	<u>1966</u>
Total number of premises inspected	1738
Total number of premises infested	392

REVISED REPORT

Unless solution was discovered within 30 days of the start of the
Council's survey a weekly collection of refuse being maintained. The
birds were trapped during the night when it became necessary to
close the city. A small area of land within the city was reserved for
Council use and negotiations were tentatively conducted for the use
of another small area next to that one in 1937. These arrangements were
considered very short and the need for long term and satisfactory means
of disposal of house refuse is being urgent.

HOUSEHOLD WASTE

Residential site license results at J. The site which was licensed
in 1935 was being completed at the end of the year and it was anticipated
that it would be in use early in 1937.

The survey was found to be situated on an abandoned site. A
warning was sent to the occupier of the land. It subsequently applied for
a short term license which was granted, the use of the site being subject to
certain work in the area. The license was subsequently extended for 5
additional periods, the site being ultimately vacated.

No problem has arisen since of sites occurred during the year.

ROBENT CONTROL

No change in the arrangements for Robent Control occurred during
the year. The Robent Control Operator continued to be available full-
time when needed. The latter part of 1936 was a period of intense activity,
there being a considerable increase in the rat population. The reason for
this was difficult to determine but the large increase will be apparent from
the fact that the total number of infested premises found rose from 120
in 1935 to 205 during the year under review. In spite of this very large
increase by the end of the year infestations were generally under control
and I have no reason to suppose that there will be any long-term deterioration
in the rodent situation in the district.

The Council's agents received their usual treatment, no evidence of
major infestations being found. Agents continued to be the main force of
keeping treatment with several well known on the outskirts of the town.

Results of work carried out by the Robent Control Operator during
1936 were as follows:-

1936	
1935	Total number of premises infested
1934	Total number of premises infested

FACTORIES ACT, 1961.

1. Inspections for purpose of provisions as to health (including inspections made by the Public Health Inspector)

Premises	Number on Register	Number of		Occupiers Prosecuted
		Inspections	Written Notices	
(i) Factories in which Sections 1,2,3,4, and 6 are to be enforced by Local Authority	11	-	-	-
(ii) Factories not included in (i) in which Section 7 is enforced by the Local Authority	82	19	-	-
(iii) Other premises in which Section 7 is enforced by the Local Authority (excluding out-workers premises)	-	-	-	-
TOTAL	93	19	-	-

2. Cases in which Defects were found

Particulars	Number of cases where defects were found				Number of cases in which prosecutions were instituted
	Found	Remedied	Referred		
			To H.M. Insp.	By H.M. Insp.	
Want of Cleanliness	-	-	-	-	-
Overcrowding	-	-	-	-	-
Unreasonable temperature	-	-	-	-	-
