COUNTY BOROUGH of SOUTHAMPTON
1945

ANNUAL REPORT
OF THE
Medical Officer to the Education Committee
ON THE
SCHOOL MEDICAL SERVICE

To the Chairman and Members of the Education Committee.

LADIES AND GENTLEMEN,

As Medical Officer to the Education Committee, I have the honour to submit my Fifteenth Annual Report. This document is the thirty-eighth in the series which deals with the work of medical inspection, treatment, and the physical condition of children attending Schools in the County Borough.

Although, happily, hostilities have ceased, I have not attempted to give a comprehensive survey of the work of the Service as has been my practice in pre-war years, but have again confined the report to the more essential statistical tables, and my remarks in this introduction to those matters which appear to call for special comment.

The Medical Inspection of school children was continued during the year, but owing to a further reduction in the medical staff, it was not possible to visit all the schools.

The rapid survey of those children not included in the three code age groups was discontinued during the latter part of the year, thus allowing a larger number of children to receive full routine inspection.

The routine cleanliness examinations took place at the commencement of each term, and all the schools were visited by the Health Visitors. All children found with nits or vermin were issued with a Form B. excluding them from attendance at school for 24 hours, and giving instructions to attend at the School Clinic for examination before returning to school. Every child excluded from school for this reason was re-examined at least once a month by the Health Visitors for the remainder of the term.

Certain of the old offenders were still found to be unclean on examination and where I considered such action to be warranted the Scabies Order of 1941 was employed, and in those cases where the instructions under the Order were disregarded legal proceedings were instituted.

The number of cases of uncleanliness during the year totalled 1,125 as compared with 1,004 cases during 1944, but this increase is not considered to be alarming in view of the fact that the Health Visitors carried out an additional 18,076 examinations during the year under review. Details of the work undertaken in connection with uncleanliness are given on page 10.

The incidence of scabies again showed a slight decrease during 1945 as compared with the previous year, 2,413 patients receiving treatment at the Treatment Centres.

The facilities for Remedial Exercises for school children were again extended during 1945 and a total of 16 centres are now established in the Schools where special Remedial Exercises for the correction of mild postural defects and flat feet are given. The work of these centres is carried out under the supervision of the Physical Training Organiser and the cases attending are kept under the observation of an Assistant School Medical Officer who visits the centres at monthly intervals. The centres are also visited by the Orthopaedic Surgeon from Alton, who reports favourably on the excellent progress made in this branch of the work.

The medical examination of the pre-school children attending the Day Nurseries is carried out by an Assistant School Medical Officer at monthly intervals, and children found to be suffering from defective conditions are referred either to private practitioners or to the appropriate clinics where the full facilities provided are made available.

Dental Inspection at the Day Nurseries is also carried out and again the facilities for treatment are made available for children referred for treatment by the dentist.

Facilities existed throughout the year for the provision of meals for school children and a considerable increase in the total number of meals supplied has been recorded. Detailed statistics concerning the provision of meals, together with details in connection with the supply of Cod Liver Oil and Malt, will be found on page 23.

During the year 2,621,806 third-pints of milk were consumed by children in school, 2,443,738 on payment and 178,068 free. The number of individual children served was 15,209, of whom 13,998 were supplied on payment and 1,211 were supplied free.

A branch clinic at Aldermoor School was opened in April, 1945, to cater for those children who in the past have had to travel some considerable distance to obtain treatment at Shirley Warren Branch Clinic. A Health Visitor attends the Clinic daily for the treatment of minor ailments and minor skin conditions.

During the year the new Dental Consent Scheme was put into general operation. Under this scheme parental consent to dental treatment is solicited for a child's whole school life, whereas in the past parental consent had to be obtained on each occasion when treatment was found to be necessary. Where the administration of a general anaesthetic is desirable, however, a separate form of consent is obtained.

In an effort to encourage the greater acceptance of diphtheria immunisation, a publicity campaign was arranged in May, lasting for approximately six weeks. This local campaign coincided with a similar appeal by the Ministry of Health, and full use was made of press advertisements, with film shows at schools and slides at local cinemas. In addition, attractive window displays depicting a case of diphtheria in hospital with a doctor and nurse in attendance were arranged at shop premises. A personal letter to parents was prepared and printed for distribution by the Head Teachers at the schools. The result of the campaign was most encouraging as is shown by the fact that 3,403 children received first injections and 3,095 second injections, as compared with the previous year's figures of 1,100 and 1,186 respectively. In addition 1,491 children who were previously immunised received an additional injection to ensure that full immunity was maintained.

The introduction of the Education Act, 1944, has considerable effect on the policy and work of the School Medical Service. Hitherto the medical examination of children has not been compulsory, but under the new Act unless reasonable excuse can be furnished by a parent, it is an obligation to present a child for medical examination when instructed.

The financial responsibility for the treatment of children attending maintained schools, both at Clinics and Hospitals, together with the provision of surgical appliances and glasses, now becomes a matter for the local Education Authority, who under the new Act are instructed to provide comprehensive facilities for free medical treatment.

Changes have also taken place in the categories of children suffering from physical handicaps or educational subnormality.

Dr. W. L. M. Bigby was transferred to the staff of the School Medical Department following the closing down of A.R.P. Medical Services. Dr. Bigby undertook duties from the 30th June to the 31st August, when he returned to private practice. Dr. E. L. Peet terminated her duties on the 1st October, 1945. Miss L. Ewart was appointed as temporary full-time dental officer on the 14th August, 1945. Other changes have taken place amongst the Health Visitors and clerical staff of the School Medical Service.

I recognise gratefully the support and encouragement which I have received at all times from the Chairman and Members of the

School Clinic (Joint) Sub-Committee, and the courtesy with which they have considered my many suggestions and recommendations.

In conclusion, I desire to thank the Education Department, the Teachers, the National Society for the Prevention of Cruelty to Children, the Southampton Mental Welfare Association, and the staffs of the Voluntary Hospitals for their co-operation and valuable assistance.

I wish to express my appreciation and thanks to all the members of the Medical, Dental, Nursing and Clerical Staff for their ready, willing and conscientious work performed under many difficulties, and involving since the outbreak of war many duties outside their normal appointments.

I am,

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

A. C. Mammie. Zickman?

School Medical Officer.

FINDINGS AT MEDICAL INSPECTION.

WEIGHT, HEIGHT AND CHEST MEASUREMENTS.

The weight and measurements of each child to be medically examined at routine inspections are ascertained by a Health Visitor.

The statistics given below for the routine age groups have been obtained by the same methods as in previous years, and comparative figures for the previous five years are also given.

COMPARATIVE TABLE OF CODE AGE PERIODS.

CLASSIFICATION OF THE NUTRITION OF CHILDREN INSPECTED DURING THE YEAR
IN THE ROUTINE AGE GROUPS.

| Age Groups. | No. Inspected. | A. | | B. | | C. | | D. | |
|----------------------|-------------------|------|-----------------|------|--------------|-----|------------------------------|-----|-----------|
| | | No. | Excellent. % | No. | Normal. % | No. | Slightly Sub-normal. % | No. | Bad. % |
| Entrants ... | 1721 | 257 | 14.9 | 1184 | 68.7 | 282 | 16.3 | — | — |
| Second Age Group ... | 1328 | 342 | 25.3 | 843 | 63.4 | 142 | 10.7 | — | — |
| Third Age Group ... | 1697 | 501 | 29.5 | 1080 | 63.6 | 115 | 6.7 | — | — |
| Totals ... | 4746 | 1100 | 23.2 | 3107 | 65.5 | 539 | 11.3 | — | — |

CLEANLINESS.

The Health Visitors have continued to carry out their periodic cleanliness examinations of all the children attending school. As a result of 75,209 examinations, 1,466 Forms B necessitating exclusion from school were issued.

In Southampton facilities are provided at the School Clinics for the cleansing of the children found unclean. The following details show the work performed:—

Number of individual children cleansed ... 1,125

| | | | | | |
|--|---|-------|---|---|--------------|
| Of this number 829 children attended once. | | | | | |
| " | " | 187 | " | " | twice. |
| " | " | 67 | " | " | three times. |
| " | " | 27 | " | " | four times. |
| " | " | 7 | " | " | five times. |
| " | " | 6 | " | " | six times. |
| " | " | 1 | " | " | seven times. |
| " | " | 1 | " | " | eight times. |
| Total | | 1,125 | | | |

There were, therefore, 1,598 attendances for cleansing, and in each case complete treatment was given.

DEFECTIVE VISION AND EYE DISEASE.

The following table shows the incidence of eye defects in the various age groups:—

DEFECTS OF THE EYES REQUIRING TREATMENT OR OBSERVATION
FOUND AT ROUTINE MEDICAL INSPECTION, 1945.

| Age Group. | Number Examined. | Defective Vision. | | Squint. | | Other Conditions. | | Total. | |
|------------------|---------------------|----------------------|------|---------|-----|----------------------|----|--------|------|
| | | No. | % | No. | % | No. | % | No. | % |

SOUTHAMPTON MENTAL WELFARE ASSOCIATION.

There were 50 Education cases on the Register of this Association on the 31st December, 1945, classified into the following grades :—

Under the age of 14 years.

| | Boys. | Girls. | Total. | |
|-------------------|-------|--------|--------|----|
| Feeble-minded ... | 8 | 10 | 18 | |
| Imbecile ... | 3 | 3 | 6 | |
| | | | — | 24 |

Over the age of 14 years.

| | | | | |
|-------------------|----|----|----|----|
| Feeble-minded ... | 11 | 13 | 24 | |
| Imbecile ... | 1 | 1 | 2 | |
| | | | — | 26 |
| | | | | — |
| | | | | 50 |
| | | | | — |

During the year 120 visits were paid to the homes of these children, and reports on the home circumstances and their general behaviour were sent to the Chief Education Officer and the School Medical Officer.

New cases during the year numbered 13.

The following cases were withdrawn :—

| | | |
|---|-----|---|
| Placed in Certified Institutions ... | ... | 1 |
| Placed under Statutory Supervision ... | ... | 3 |
| Transferred to Voluntary Supervision on attaining the age of 16 years ... | ... | 5 |
| Placed in Special Residential Schools ... | ... | 2 |
| Cases untraced ... | ... | 1 |
