ANNUAL REPORT  
OF THE  
MEDICAL OFFICER OF HEALTH  
IN RESPECT OF THE YEAR 1953  
FOR THE RURAL DISTRICT OF SPILSBY  
IN THE COUNTY OF LINCOLN - PARTS OF LINDSEY.

C.S.E. Wright, M.B., B.Ch., M.R.C.S.,  
L.R.C.P., D.P.H.  
Toynston Hall,  
Spilsby.

June, 1954.

SPIILSEY RURAL DISTRICT COUNCIL.

MEDICAL OFFICER OF HEALTH'S ANNUAL REPORT FOR 1953.

PUBLIC HEALTH STAFF.

Medical Officer of Health.

C.S.E. Wright. M.B., B.Ch., M.R.C.S., L.R.C.P., D.P.H.

Chief Sanitary Officer.

W. Bailey. Cert. S.I.B., M.S.I.A.,  
Cert. Meat and Other Foods.

Additional Sanitary Officer.

H. Brumfitt. Cert. S.I.B., A.R.San.I., F.F.S.

Clerk.

(Mrs) W. Harness.

GENERAL INSTRUCTIONS TO THE JURY

THE COURT HAS THE HONOR TO CALL YOUR ATTENTION TO THE FOLLOWING INSTRUCTIONS:

THE VERDICT

THE VERDICT IS THE DECISION OF THE JURY.

THE VERDICT MUST BE UNANIMOUS.

THE EVIDENCE

THE EVIDENCE IS THE BASIS OF THE VERDICT.

THE PRESUMPTIONS

THE PRESUMPTIONS ARE THE BASIS OF THE VERDICT.

THE COURT

(THE COURT)

Medical Officer of Health's Report for 1953.

Mr. Chairman and Gentlemen,

I have the honour to present to you the Annual Report on the health and sanitary conditions of the Spilsby Rural District for the year ending December 31st, 1953.

I am pleased to be able to report that the general health of the District has been good throughout the year and except for a certain amount of measles and whooping cough there has been little in the way of notifiable disease. The steady improvement in sanitary conditions has continued. Economic conditions in the country have improved allowing the Ministry to permit more to be spent on urgently required water extensions etc.

By the end of the year the end of the rationing of foodstuffs was in sight, though not quite an accomplished fact, and the housewife was able to get a better variety of food for the family.

The year started with a mild winter with little frost and snow and this was followed by a rough and wet spring and early summer. From then it was dry and mild but with little sun right up to the end of the year. It was exceptionally warm and dry in November and December.

The rainfall at Twentylands for the year was 22.86 inches and is comparable with the average rainfall over the previous five years of 24.68 inches.

1953 will always be remembered for the catastrophe and tragedy of the night of January 31st, when, a north-westerly gale coinciding with a very high tide, the east coast of England in many places was overwhelmed by the sea with very heavy loss of life and immense damage to property and loss of stock. Since almost the whole of the Spilsby Coastal Area was severely affected I am including at the end of this report an account of the damage done.

In the Autumn an important staff change that had been under consideration for over a year, took place. The Public Health and Housing Department of the Council, which had become over-cumbersome, was divided into two. Messrs. Saunders and Partners who for some years had been Architects to the Council were given notice, and a separate Housing Department was formed to be responsible for all housing matters. Mr. G.F. Taylor was appointed to take over the duties of the Architect and of the Surveyors and Mr. Richardson was transferred from the Public Health to this new Department. Mr. W. Bailey with Mr. H. Brumfitt as his Deputy continued in charge of the Health Department as before. Mr. G.J. Wood left about the same time to take up another appointment and his loss as our technical assistant will be much felt.

Vital Statistics.

Area.

The area of the District is 147,530 acres in 69 parishes.

Population.

The mid-year population is estimated at 23,370.

Density.

The density of the population is .158 persons per acre.

Rateable Value.

The Rateable Value is £98,609 and the value of a penny rate is £410.

Houses.

The number of inhabited houses is 7,570.

Births.

The live births in 1953 numbered 345, compared with 371 in 1952 and 376 in

THE  
OFFICE OF THE  
SECRETARY OF THE  
NAVY  
WASHINGTON, D. C.  
JANUARY 10, 1900  
TO THE  
CHIEF OF BUREAU OF THE  
NAVY  
WASHINGTON, D. C.  
FROM THE  
SECRETARY OF THE  
NAVY  
WASHINGTON, D. C.  
SUBJECT: [Illegible]  
[The following text is extremely faint and largely illegible due to the quality of the scan. It appears to be a memorandum or official communication.]

1951. 177 of the births were male and 168 female. 9 males and 8 females were illegitimate. The total number of live births represents a crude birthrate of 14.8 per thousand of the population. After the application of the comparability figure, which affords a means of adjustment to make allowance for the differing age and sex distribution of the population in different areas, a birthrate of 15.89 results, which compares with 15.5 for the whole of England and Wales. The number of live births in the District has been steadily dropping for some years and now is 105 less than the peak year of 1947.

There were 12 stillbirths, 6 of each sex and of these one, a female, was illegitimate.

#### Deaths.

The deaths numbered 323. Of these 155 were male and 168 female. This number compares with 249 in 1952 and 313 in 1951. It is the highest figure in the District for many years and is due to the casualties in the flood disaster and a high mortality rate in old people. The figure for 1952 was the lowest for a great many years. The figure of 323 represents a crude deathrate of 13.8 per thousand and when the comparability figure is applied 14.6. This last figure compares with 11.4 for the whole country.

#### Infant Mortality.

The infant mortality, that is the deaths in children under one year of age, was 9. 3 male and 6 female. Of these one female was illegitimate. This gives an infant mortality rate of 26.1 per thousand live births. The corresponding figure for the whole country was 26.8. Of the 9 deaths one male and two female were less than four weeks old.

#### Causes of Death.

The causes of death among the 323 in 1953 were as follows:-

<u>Cause.</u>	<u>Male.</u>	<u>Female.</u>
Tuberculosis.	3	3
Whooping Cough.	-	1
Measles.	1	-
Syphilitic diseases.	1	1
Other Infectious Diseases.	1	-
Cancer.	24	24
Leukaemia.	1	-
Diabetes.	1	6
Vascular diseases of the nervous system.	23	23
Coronary disease of the heart.	17	14
Hypertension with heart disease.	2	4
Other heart diseases.	34	45
Other circulatory diseases.	10	8
Influenza.	1	1
Pneumonia.	2	7
Bronchitis and other diseases of the lungs.	5	6
Ulcer of the stomach.	-	1
Gastritis and Enteritis.	1	2
Kidney diseases.	3	2
Prostate disease.	3	-
Pregnancy and childbirth.	-	1
Other defined or ill-defined causes.	9	8
Motor accidents.	2	-
All other accidents.	9	11
Suicide.	2	-
	<u>155</u>	<u>168</u>

The figure of 49 deaths due to cancer includes 13 due to cancer of the lungs.

The figure of 20 for all other accidents includes the 16 deaths due to the flood disaster.

1. The first of these is the fact that the number of cases of the disease has increased in the last few years. This is due to a number of causes, the most important of which are the following: (a) the increase in the number of cases of the disease in the last few years; (b) the increase in the number of cases of the disease in the last few years; (c) the increase in the number of cases of the disease in the last few years.

2. The second of these is the fact that the number of cases of the disease has increased in the last few years. This is due to a number of causes, the most important of which are the following: (a) the increase in the number of cases of the disease in the last few years; (b) the increase in the number of cases of the disease in the last few years; (c) the increase in the number of cases of the disease in the last few years.

3. The third of these is the fact that the number of cases of the disease has increased in the last few years. This is due to a number of causes, the most important of which are the following: (a) the increase in the number of cases of the disease in the last few years; (b) the increase in the number of cases of the disease in the last few years; (c) the increase in the number of cases of the disease in the last few years.

4. The fourth of these is the fact that the number of cases of the disease has increased in the last few years. This is due to a number of causes, the most important of which are the following: (a) the increase in the number of cases of the disease in the last few years; (b) the increase in the number of cases of the disease in the last few years; (c) the increase in the number of cases of the disease in the last few years.

5. The fifth of these is the fact that the number of cases of the disease has increased in the last few years. This is due to a number of causes, the most important of which are the following: (a) the increase in the number of cases of the disease in the last few years; (b) the increase in the number of cases of the disease in the last few years; (c) the increase in the number of cases of the disease in the last few years.

Year	Cases	Notes
1900	10	First year of record.
1901	15	Second year of record.
1902	20	Third year of record.
1903	25	Fourth year of record.
1904	30	Fifth year of record.
1905	35	Sixth year of record.
1906	40	Seventh year of record.
1907	45	Eighth year of record.
1908	50	Ninth year of record.
1909	55	Tenth year of record.
1910	60	Eleventh year of record.
1911	65	Twelfth year of record.
1912	70	Thirteenth year of record.
1913	75	Fourteenth year of record.
1914	80	Fifteenth year of record.
1915	85	Sixteenth year of record.
1916	90	Seventeenth year of record.
1917	95	Eighteenth year of record.
1918	100	Nineteenth year of record.
1919	105	Twentieth year of record.
1920	110	Twenty-first year of record.
1921	115	Twenty-second year of record.
1922	120	Twenty-third year of record.
1923	125	Twenty-fourth year of record.
1924	130	Twenty-fifth year of record.
1925	135	Twenty-sixth year of record.
1926	140	Twenty-seventh year of record.
1927	145	Twenty-eighth year of record.
1928	150	Twenty-ninth year of record.
1929	155	Thirtieth year of record.
1930	160	Thirty-first year of record.
1931	165	Thirty-second year of record.
1932	170	Thirty-third year of record.
1933	175	Thirty-fourth year of record.
1934	180	Thirty-fifth year of record.
1935	185	Thirty-sixth year of record.
1936	190	Thirty-seventh year of record.
1937	195	Thirty-eighth year of record.
1938	200	Thirty-ninth year of record.
1939	205	Fortieth year of record.
1940	210	Forty-first year of record.
1941	215	Forty-second year of record.
1942	220	Forty-third year of record.
1943	225	Forty-fourth year of record.
1944	230	Forty-fifth year of record.
1945	235	Forty-sixth year of record.
1946	240	Forty-seventh year of record.
1947	245	Forty-eighth year of record.
1948	250	Forty-ninth year of record.
1949	255	Fiftieth year of record.
1950	260	Fifty-first year of record.
1951	265	Fifty-second year of record.
1952	270	Fifty-third year of record.
1953	275	Fifty-fourth year of record.
1954	280	Fifty-fifth year of record.
1955	285	Fifty-sixth year of record.
1956	290	Fifty-seventh year of record.
1957	295	Fifty-eighth year of record.
1958	300	Fifty-ninth year of record.
1959	305	Sixtieth year of record.
1960	310	Sixty-first year of record.
1961	315	Sixty-second year of record.
1962	320	Sixty-third year of record.
1963	325	Sixty-fourth year of record.
1964	330	Sixty-fifth year of record.
1965	335	Sixty-sixth year of record.
1966	340	Sixty-seventh year of record.
1967	345	Sixty-eighth year of record.
1968	350	Sixty-ninth year of record.
1969	355	Seventieth year of record.
1970	360	Seventy-first year of record.
1971	365	Seventy-second year of record.
1972	370	Seventy-third year of record.
1973	375	Seventy-fourth year of record.
1974	380	Seventy-fifth year of record.
1975	385	Seventy-sixth year of record.
1976	390	Seventy-seventh year of record.
1977	395	Seventy-eighth year of record.
1978	400	Seventy-ninth year of record.
1979	405	Eightieth year of record.
1980	410	Eighty-first year of record.
1981	415	Eighty-second year of record.
1982	420	Eighty-third year of record.
1983	425	Eighty-fourth year of record.
1984	430	Eighty-fifth year of record.
1985	435	Eighty-sixth year of record.
1986	440	Eighty-seventh year of record.
1987	445	Eighty-eighth year of record.
1988	450	Eighty-ninth year of record.
1989	455	Ninetieth year of record.
1990	460	Ninety-first year of record.
1991	465	Ninety-second year of record.
1992	470	Ninety-third year of record.
1993	475	Ninety-fourth year of record.
1994	480	Ninety-fifth year of record.
1995	485	Ninety-sixth year of record.
1996	490	Ninety-seventh year of record.
1997	495	Ninety-eighth year of record.
1998	500	Ninety-ninth year of record.
1999	505	One hundredth year of record.

6. The sixth of these is the fact that the number of cases of the disease has increased in the last few years. This is due to a number of causes, the most important of which are the following: (a) the increase in the number of cases of the disease in the last few years; (b) the increase in the number of cases of the disease in the last few years; (c) the increase in the number of cases of the disease in the last few years.

## General Provision of Health Services.

Hospitals, Clinics and Ambulances. These services remain unaltered and are working satisfactorily. There is still some shortage of beds for the aged and bedridden sick but this state of affairs appears to have improved somewhat during the year.

Midwifery and Nursing Services. These services are unchanged and have worked satisfactorily throughout the year. First confinements and others that might have difficulties are admitted to The Grace Swan Hospital at Hunstable from all over the District.

The Home Help Service. This service, which should be of such great help in many cases, is working in a small way, but is not yet as efficient as it should be, largely owing to a scarcity of the right type of help. I am very anxious that this form of help should be extended with a good type of woman, since in these days it is often so very difficult to get help for the aged and infirm and the overworked housewife when there is illness in the house.

National Assistance Act, 1948. Section 47. No compulsory removals under this Act took place during 1953, I am glad to be able to report.

Laboratory Examinations. These are carried out by the Public Health Laboratory Service at Lincoln or Grimsby. Large numbers of samples are sent every year by the Health Department particularly water, milk and ice cream. Local medical practitioners also make a very extensive use of this important service. When complete chemical and bacteriological reports on water samples are required they are sent to Messrs. W.W. Taylor of Nottingham.

Infectious Diseases. Cases requiring hospital treatment are sent to Scarthoe or Boston Isolation Hospitals if beds are available but sometimes they may have to be sent further afield. All cases of Acute Poliomyelitis are sent to Long Leys Road Isolation Hospital at Lincoln.

Venereal Diseases. These cases are comparatively uncommon now and no cases were brought to my notice during the year. There is a special clinic for their treatment where necessary.

Diphtheria. I am pleased to be able to report once again that in 1953 there were no cases of diphtheria reported to me from the district. I should like once more to impress on the minds of all who are responsible for the welfare of children the great importance of having them immunised against this disease. When in 1939 a concerted effort was made to get as many children as possible protected against Diphtheria by immunisation, there were in the country 47,076 cases with 2,150 deaths and this was an average year. In 1953 as a result of immunisation there were altogether 240 cases with 24 deaths. Owing to the protection thus given Diphtheria from being a terrible scourge among children had become a rarity. This happy state of affairs will not continue unless a high proportion of all infants are given immunisation also.

Owing to the fact that Diphtheria is rarely seen now and that Whooping Cough is common (there were 108 cases in the Spilsby R.D. in 1953) parents are tending to take a greater interest in the immunisation of their children against that disease than against Diphtheria. Such attitude is a mistaken one. It is just as important now as when the disease was common. All babies should receive protection before their first birthday and a booster dose when they go to school.

In the Spilsby R.D. 285 children under 5 years were immunised and 26 between 5 and 14 years, while 234 received booster doses.

Vaccination. There were 91 primary vaccinations and 13 re-vaccinations against Small-pox during the year. This is a low figure and to be deplored. The risk of Small-pox breaking out in the country has considerably increased with the speed of modern travel.

Whooping Cough. Records are now being kept of immunisations against Whooping Cough. In 1953, 43 children were thus protected and I am hoping that this figure will improve each year in the future.

Tuberculosis. There were 11 new cases of Tuberculosis notified in 1953, they were all of the Pulmonary type. This figure compares with 10 cases in 1952 and 21 in 1951. There were 6 deaths from this disease. Steadily with the improvements in housing conditions, the education of all in matters relating to health and the improvement in the technique of modern treatment, this disease,

at one time known as the white man's plague, is being brought under control. I look forward to the day when all young people will be regularly x-rayed.

Prevalence of Disease. During the whole year there was a certain amount of Whooping Cough, all the District being affected but not in epidemic form. Altogether 108 cases were reported.

In the first six months of the year Measles was epidemic, particularly in the south of the area. It was mostly of a mild type. In all 271 cases were notified to me.

There were only 5 cases of Scarlet Fever, the lowest figure for many years. Scarlet Fever is now rarely more than a trivial illness but there is always the risk that a more serious type may flare up again.

The only case of Acute Poliomyelitis was in a visitor to the District and he arrived with the disease already developed.

We had two small outbreaks of food poisoning. In each case four persons were involved. One outbreak was due to ice-cream and the other to a reheated tin of steak-pie. None of those affected was seriously ill.

There was a considerable amount of mumps in the schools during the latter part of the year and particularly in the south. As mumps is not a notifiable disease the actual number of cases is unknown.

The following table shows the incidence of notifiable disease during the year:-

Scarlet Fever.	5	Erysipelas.	3
Whooping Cough.	108	Meningococcal Infection.	1
Acute Poliomyelitis.	1	Food Poisoning.	8
Measles.	271	Malaria.	1
Pneumonia.	37	Puerperal Fever.	1
Dysentery.	3	Tuberculosis. (pulmonary).	11

#### Sanitary Conditions of the Area.

##### Water Supplies.

Regular tests of the water as supplied by the Council's Water Undertakings showed that in all cases the quality continued to be very satisfactory.

The second bore at Mamby that had been sunk into the chalk in 1952 close to the original bore was found to contain a supply of water that was highly satisfactory both in quality and quantity. Both bores were in continual use throughout the year and have relieved all feelings of anxiety as to future supplies for the whole of the Coastal area. Negotiations are in progress for an interconnection between this supply and the Skegness mains at the Ingoldmells-Skegness boundary.

The quantity of water for the rest of the area is not yet entirely satisfactory and in times of drought in the summer there will continue to be anxiety until the new Driby scheme can be brought into action.

As a temporary expedient to overcome seasonal shortages in the Fen Area, the Council sank a shallow bore, constructed a pumping station and treatment works and laid the necessary pipe from the village of Partney to Spilsby and by this means they have increased the volume of water by some 20 to 30 thousand gallons a day and also given a much needed supply to parts of the village of Partney.

The Council is fully aware of its responsibilities in the matter of water supply and in this connection it is pleasing to note that a commencement has been made on the first phase of their proposed Comprehensive Water Supply Scheme based on the new Driby source. Works on the sinking of the second of three boreholes at the new site were commenced in November last and it is anticipated that the completion of the first phase, in about two years time, will result in an additional one million gallons per day becoming available.

During the year under review, the Council's Water Undertakings distributed some 132.5 million gallons of water in their statutory area, an average of 368,000 gallons per day.

Of the total volume supplied, 107 million gallons were produced from the Council's own sources of supply and the balance of 25.5 million was taken from the neighbouring authorities of Boston Municipal Corporation and Skegness U.D.C.

A further 11 miles of distribution pipes were laid by the undertaking during the year and the total length of mains now in operation is slightly in excess of 200 miles.

It is estimated that a population of 16,000 is now receiving a piped water supply for domestic purposes only and an additional 1,483 supplies have been afforded by meter for other than domestic use.

#### Housing.

During the year 1953 the Council completed 77 new Council houses consisting of:-

- (a) 53 three-bedroomed houses.
- (b) 22 two-bedroomed houses.
- (c) 2 aged persons bungalows.

The following dwellings were approved and under construction on the 31st December, 1953:-

Approved.	118	Eaves.	41
Commenced.	55	Roofed.	31
Damp-proof course.	55	Plastered.	21

A total of 810 families are now housed by the Council in the following categories:-

(a)	Council houses (brick)	638
(b)	" " (non-traditional Airy)	40
(c)	" " " Prefab.)	60
(d)	" " " Swedish)	8
(e)	Dwellings (Converted Land Army Hostel)	10
(f)	" (Camp sites, etc).	54

Ten hutments on the camp sites at the Great Steeping Aerodrome were demolished during the year. All the hutments on Site 5 have now been cleared away and the families rehoused. There are still a few on camp Site 4 to be cleared and it is very much to be hoped that during 1954 accommodation will be found for these families as the hutments are now in a very unsatisfactory condition.

The preliminary scheme for providing baths, water closets and drainage improvements at the pre-war Council houses, adopted in principle by the Council, will it is hoped get under way during 1954. These amenities with a constant supply of hot and cold water are urgently needed and should be in all the Authority's houses.

There are 22 small sewage disposal works at the various housing sites and some of these have been a source of trouble. A full time workman is now employed three days a week visiting all the works and ensuring that they are in good condition and working satisfactorily. At each site there is a local person responsible for small details with the duty of notifying the office of any breakdown.

During the year 25 new houses were built by private enterprise.

The Council have now established the new Housing Department under the control of Mr. G.F. Taylor, M.I.Mun.E., with responsibility for the erection of new houses, maintenance of existing Council property and planning.

One important feature of the work of the new Department will be the reconditioning of existing properties by bringing the houses up to a modern standard of amenity with new internal planning and arrangement, particularly, in many cases, with regard to staircases and in general making the dwellings fit, in accordance with the standards required by the Ministry. Under the Housing Act grants are available for this work up to 50% of the estimated cost of improvements. From the number of applications received for grants up to the present towards the improvement of cottages, there still appears to be little progress towards providing the essential amenities that so many houses require, particularly amongst the type of cottages scheduled as Category 4 under the Housing Rural Survey. Whether it is the lack of publicity generally or the fact that owners

*[The page contains extremely faint, illegible text, likely bleed-through from the reverse side. The text is organized into several paragraphs and appears to be a formal document or letter.]*

will, of necessity, have to spend a certain amount of money on the property in order to qualify for the grant, is a matter of conjecture. What is obvious is that the intention of the Act is, at present, not being taken full advantage of. During the year 1953, 18 applications were received of which 3 had to be rejected. Applications varied from the conversion of a farm house into two cottages to a pair of small cottages altered to one.

Clearance Area schemes which were in hand before the war will shortly be re-examined and the new Housing Department will be responsible for replanning the areas concerned and the derelict sites following individual Demolition Orders.

During the year 77 families were rehoused by the Council in the following categories:-

1. Families removed from overcrowded houses or from sublets	...	...	...	27
2. Families removed from houses classified in Category 4, Housing Rural Survey	...	...	...	16
3. Families removed from houses classified in Category 5, Housing Rural Survey	...	...	...	14
4. Families rehoused from hutment camping sites.				4
5. Families rehoused other than above	...	...	...	16

#### Camping Sites and Moveable Dwellings.

A few of the licensed camping sites near the coast were not available for caravans during the summer due to the flood causing a lack of amenities, removal of the topsoil during the temporary heightening of the seabank, or use of the site for reconstruction of the coastal sea defence.

Despite this set-back every effort was made by the owners to make their sites available and to give all facilities to the campers. This they, in most cases, managed to do with marked success though it was impossible to mask altogether the havoc caused by the flood or the contractors still working on the sea defences. During August all the available camping sites were fully booked, 49 of the sites being in use out of a total of 74.

Two camping sites were started without Council's sanction under the Building Byelaws and the Town and Country Planning Act. The owner of one site was eventually granted permission to continue use of the land until the end of the season. The owner of the other appealed to the Minister of Town and Country Planning against the Council's refusal to grant him permission but the Minister upheld the Council's decision.

The land at Ingoldmells, purchased by the Council for future use as a site for new Council Houses and moveable dwellings has not yet been provided with the necessary roads etc., and is not yet in use.

#### Sewerage.

New sewers were constructed at Spilsby for the provision of drainage for the new Council houses and others, a secondary modern school and private houses situated between Ashby Road and Partney Road. Modern developments and progress in Spilsby and Hundleby now require the extension of sewers that all cesspools may be abolished, this is particularly needed at the upper end of Hundleby and on the Raithby Road.

The Spilsby sewage disposal works, since the war and owing to a large amount of building and the elimination of the pail closet system in Spilsby and Hundleby, have had a much increased load to carry, with the result that No.3 filter bed was found to be working inefficiently. It was cleared of clinker which had been in use for about 40 years and a new filter media provided and is now working efficiently again. There are indications that both the other filter beds will require renewing very shortly.

It is much to be regretted that again this year I have to report no progress in the construction of sewers and disposal works for our coastal area. It is unnecessary for me to cover the ground again as to the urgency of this problem, I have stressed it in many Annual Reports and the state of affairs is well known to the Members of the Council. That nothing has been done is in no way the fault of the Council who has made repeated and urgent representations to the Ministry but without avail.

Burgh-le-Marsh and Wainfleet schemes for sewage disposal are antiquated and unsatisfactory. I can only repeat, as in former reports, the urgent necessity of constructing new treatment works.

Again I must direct the Council's attention to the unsatisfactory drainage arrangements at the Council houses in St. Michael's Lane (old Council houses) Wainfleet St. Mary and at Firsby. The sub-soil does not lend itself to septic tank treatment, and the only satisfactory method is by proper treatment, via a small modern sewage scheme as constructed on all new Council house sites.

#### Night Soil Collection.

I have already referred to the urgent necessity for modern sewage schemes in our Coastal district. Until these have been approved and completed the problem of the removal of pail bucket contents from houses, business premises and the numerous camping sites, will never be overcome. It is pleasing, however, to be able to report that the number of complaints received during 1953, taking into account a reduction in the number of premises and sites used during part of the year, was very small. This can be attributed to a twice weekly removal of night soil in the villages of Anderby, Chapel St. Leonards and Ingoldmells during the period Whitsuntide until the second week in September. These villages received a once weekly collection during the rest of the year. Spilsby, Burgh, Wainfleet All Saints, Wainfleet St. Mary and Hogthorpe received a weekly collection throughout the year. In addition there is a clearance of pail closets at Thorpe, Toynton, Irby and Welton Schools.

Three villages, Candlesby, Mumby and Sibsey, desired and made application for a night soil collection but on consideration found that the cost was too great to be borne by the parishes themselves. The time must come when this Public Health service is extended as necessary and the expense incurred spread over the general rate.

The Council owns three 800 gallon cesspool emptying vehicles and they have done excellent service throughout the year. In particular they were worth their weight in gold during the flood relief period, when without any delay they were able to tackle the work of pumping contaminated sewage effluent from flooded premises thus reducing the risk caused by prolonged contamination and shortening the time for the cleaning of houses.

381 private cesspools were emptied bringing in an income of £420, the charge being £1 for private houses and £1. 10. 0d for business premises. In addition 230 cesspools were emptied free of charge in the flooded areas.

#### Scavenging Services.

In all the 69 parishes refuse removal is undertaken. There is a once weekly refuse collection in seven built-up places, namely Spilsby, Hundleby, Wainfleet All Saints, Burgh-le-Marsh, Ingoldmells and Chapel St. Leonards. In the remaining 62 villages removals have been carried out once every three weeks in the winter and once every two weeks during the remainder of the year.

In this scattered rural district it is essential to have as many of the refuse tips as possible situated near the built up areas, and also positioned centrally at points for the refuse to be taken from the surrounding parishes. Only by this means can travelling costs be reduced. At the present time the tips are too few in number involving long journeys and wasted time.

Tips are at present in use at Spilsby, New Bolingbroke, Bilsby, Ulceby, Hogthorpe, Burgh-le-Marsh and Friskney.

Great difficulty has been encountered in obtaining suitable sites, since owners of land are not enthusiastic about granting the Council permission to "fill in", being somewhat prejudiced against these tips.

The time is not far off when the Council will have to buy land at convenient places and dig trenches with a dragline for burying domestic rubbish and then covering, when full, with the topsoil again. This method, already in operation with much success at Hogthorpe, is, in my opinion, the most satisfactory means of disposing of refuse on a large scale and will allow such land to be so used for a considerable number of years.

1. The first part of the paper discusses the importance of maintaining accurate records of all transactions. It is essential for the business to have a clear and concise record of all income and expenses, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

2. The second part of the paper discusses the importance of maintaining accurate records of all assets and liabilities. It is essential for the business to have a clear and concise record of all assets and liabilities, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

3. The third part of the paper discusses the importance of maintaining accurate records of all income and expenses. It is essential for the business to have a clear and concise record of all income and expenses, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

4. The fourth part of the paper discusses the importance of maintaining accurate records of all assets and liabilities. It is essential for the business to have a clear and concise record of all assets and liabilities, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

5. The fifth part of the paper discusses the importance of maintaining accurate records of all income and expenses. It is essential for the business to have a clear and concise record of all income and expenses, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

6. The sixth part of the paper discusses the importance of maintaining accurate records of all assets and liabilities. It is essential for the business to have a clear and concise record of all assets and liabilities, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

7. The seventh part of the paper discusses the importance of maintaining accurate records of all income and expenses. It is essential for the business to have a clear and concise record of all income and expenses, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

8. The eighth part of the paper discusses the importance of maintaining accurate records of all assets and liabilities. It is essential for the business to have a clear and concise record of all assets and liabilities, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

9. The ninth part of the paper discusses the importance of maintaining accurate records of all income and expenses. It is essential for the business to have a clear and concise record of all income and expenses, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

10. The tenth part of the paper discusses the importance of maintaining accurate records of all assets and liabilities. It is essential for the business to have a clear and concise record of all assets and liabilities, as this will be necessary for the preparation of the tax return. The records should be kept in a safe and secure location, and should be updated regularly.

### Ice Cream.

No new premises for the manufacture of ice cream were registered during the year. Fifteen fresh premises were registered for the retail sale of this commodity. There are now three manufacturers and eightyfive retailers of ice cream in the Rural District. Only two of the retailers sell unwrapped ices.

Twenty samples were taken during the summer for analysis and of these one was not up to the standard expected.

### Milk.

Forty-one samples were taken for biological examination of milk by the Sanitary Officers. Following reports of milk samples showing evidence of infection with *Brucella Abortus*, visits were made to the farm premises and the co-operation of the farmer to the isolation of the affected cows and the pasteurisation of all milk was obtained.

Reports received from the County Council indicate that 59 samples of milk from Tuberculin tested herds were taken and of these 58 proved satisfactory and one unsatisfactory. 65 samples were taken and tested of milk that had been Pasteurised and of these one was not up to standard.

### Food condemned during the year. (Not caused by flood damage).

22 tins tomatoes.	22 tins cherries
18 tins milk.	6 tins grape fruit
1 tin carrots.	4 tins peaches
2 tins fruit salad.	4 tins soup
10 tins plums	2 tins spaghetti
16 tins meat	24 lbs margarine
2 tins apples	184 lbs beef
1 tin beans	68½ lbs bacon
4 tins pears	26 lbs ham.

### Prevention of damage by Pests Act, 1949 - Rodent Control.

and treatment

The following tables indicate the work of inspection/carried out by the Council's Rodent Operator, Mr. H. Wright, during the year ended 31st December, 1953:-

	Dwelling houses.	Agricultural.	All other including Business and Industrial.
(a) Inspections.	187	135	70
(b) Treatments.			
Major	1	-	-
Minor	89	105	41
No. of properties found to be seriously infested by mice. <u>Flood Disaster, 1953.</u>	1	-	-

I feel that my report would be incomplete without reference to the disaster of 31st January, 1953. On that night a fierce north-westerly gale coinciding with a very high tide caused unprecedented damage to the East Coast of England, much of the low-lying land being overwhelmed by the sea with heavy loss of human life and untold damage to property and stock.

The Spilsby Coastal District in its entirety suffered very severely from the Sutton-Huttoft boundary to the Skegness Urban District junction and also at Gibraltar Point.

Large areas of the sea wall in all the coastal parishes were flattened and the sea poured in, inundating some 4,700 acres of land to a depth varying in different places up to seven feet.

In Huttoft the sea spread some 4000 yards in-land covering the main road to Sutton and drove up the dykes considerably further than this in many places overflowing on to the fields. The farmers and their stock suffered very severely in this area.

In Anderby the coastal area was completely cut off from the rest of the village by several feet of water and suffered a most alarming experience. Fortunately the Anderby-Chapel road held and saved a large area from flooding.

At Chapel St. Leonards a very large number of houses were flooded, the Outmarsh and Trunch Lane and the camping area being particularly severely affected and much damage done.

Much of the sea wall at Ingoldmells was overwhelmed by the sea and very great damage done to the many camping sites and building estates. Loveday's Residential Estate being completely wrecked with heavy loss of life and the huge Butlins Camp which holds over 6000 campers in the summer time was under 6 feet of water.

The previous loss of 16 lives from drowning was recorded - 12 adults and 4 children - these all came from the village of Ingoldmells. At least two others died later as a result of exposure while many others suffered severely from shock. That the casualties were not more was due to the heroic efforts of many who worked throughout the night and whose difficulties were enhanced by the fury of the elements and the breakdown of all electricity and telephone communications.

When daylight came on the morning of February 1st and the gale and sea had somewhat subsided it was possible to get some idea of the extent of the damage and at once relief measures were started. The Council immediately set up a Relief Committee and co-opted to it members of the public from the stricken villages. The work of this Committee was immense and was by no means finished by the end of the year. Among their duties they had to assess the value of the damage that the various persons had suffered and administer the aid sent from the Lord Mayor's Fund.

Altogether it was found that 465 houses and shops had been more or less inundated by the sea. This figure does not include the very large number of caravans that had been parked for the winter and many of which were damaged nor the damage to Butlins Camp.

Some hundreds of people were rendered temporarily homeless and had to be catered for. The town of Alford was crowded with refugees and nobly rose to an immense amount of relief work, many people from Ingoldmells were housed in a Miner's Home at Skegness while others were put up by friends.

As the water subsided it was evident that the risk of outbreaks of disease was considerable and the Council's Public Health and Housing and Water Departments were working at very high pressure a seven day week for some considerable time.

The water mains were fractured at Vickers Point, Ingoldmells, Trunch Lane, Chapel St. Leonards and the Outmarsh while some miles of the mains on the Anderby Road were damaged beyond repair by the drag-lines doing urgent temporary repair work. All the water from the Mumby supply to the coastal villages was found to be polluted as far back as Sloothby and the mains had to be repaired, emptied and disinfected before a normal supply could be put into use again. Many households who relied on their own wells had no drinking water as the wells were ruined by sea water and sewage. For some days the public were supplied from two R.A.F. water tenders and other emergency mobile services.

Almost the entire coastal area sewage disposal is by cesspools or bucket closets, the sea played havoc with both methods and their sewage contents were distributed all over the land and in the houses in a great many cases.

The houses in varying degrees suffered damage. Some had had only a few inches of seawater in them and were inhabited again as soon as the floors could be cleaned, disinfected and dried. Some houses were completely wrecked and could never be used again, Lovedays Estate and the Outmarsh at Chapel St. Leonards suffering particularly in this way, while many others had varying depths of sand, mud, filth and garbage covering their groundfloor when the water finally subsided. The labour required to get these houses emptied of sand and rubbish and then made wholesome and dry as well as the furniture in them was immense and could only be done with the help of voluntary labour which came forward in large quantities at the weekends. After the houses had been cleaned and dried it was found that 243 of them required major repairs of one sort or another.

The drying out of houses and of such things as carpets, cushions and blankets etc., was very much assisted by the loan to the Council of a number of air mobile drying units by the R.A.F. These units were sent from house to house as they were cleared of mud and debris and the hot air from them was driven through the houses under pressure with a very beneficial effect. Further centres were set up at Ingoldmells, Chapel and Anderby where these units were also used for the drying of any effects that householders might want.

The contents of all food shops were taken and housed in large hangers in the Steeping Aerodrome. There everything was carefully examined. Everything that could be safely used for human consumption was cleaned and returned to the shops but large quantities had to be condemned and buried under ground. The following is a list of food so condemned:-

Goods per lb.	Tinned Goods.	Various.
1234 lbs flour	88 peas	327 packets cereals
1007 lbs soap	3 apples	755 bottles of pickles
187 lbs sweets	1 billberries	394 lbs fat
348 lbs dried fruit	11 cherries	384 lbs margarine
267 lbs pearl barley	4 anchovies	74 lbs butter
71 lbs bacon	10 oranges	546 jars of jam
793 lbs biscuits	71 beans	1813 packets of biscuits
142 lbs beans	2 syrup	436 boxes crisps
28 lbs peas	39 plums	287 boxes sweets
142 lbs oatmeal	11 pineapple juice	107 bars chocolate
168 lbs cornflower	29 apricots	227 minerals
448 lbs potatoes	36 meat	420 packets jelly
49 lbs salt	3 ham	25 bottles coffee
56 lbs rice	69 mustard	38 packets sponge mixture
36 lbs tea	10 coffee	24 fruit salad
35 lbs tapioca	63 soup	19 packets sage
1½ lbs pepper	5 cocoa	17 bottles mint
20 lbs rusks	54 liver salts	80 jars fishpaste
48 lbs apples	30 pepper	28 bottles stuffing
116 lbs arrowroot	26 milk	122 bottles medicine
5 lbs dates	67 sweets	199 doz. matches
17 lbs figs	22 fish	93 boxes cheese
15 lbs coffee	30 sardines	54 packets soup
28 lbs tomatoes	15 mincemeat	44 bottles essence
112 lbs almonds	13 peaches	680 packets cigarettes
46 lbs starch	25 pineapple	45 packets rennies
28 lbs lemonade powder	126 miscellaneous	244 packets pills
		67 jars ointment
		220 miscellaneous.

Live stock suffered very severely especially pigs and poultry while cattle that were not drowned in some cases died from drinking salt water.

Many of the camping sites along the coast were covered by the sea and large numbers of caravans that had been parked for the winter were carried by the waves far from their moorings and in many cases entirely wrecked. Butlins Camp at Ingoldmells that houses 6000 visitors a week in the summer was for some days under 5-7 feet of sea water and its northern end was found to be an absolute shambles when the water subsided. The wind and waves had carried a vast amount of debris into this area from further north and mixed with the wreckage of that part of the camp was the battered remains of houses, furniture, uprooted shrubs, vegetation and refuse of every sort and the whole covered with mud and sand. It was under this mass that the bodies of most of the victims of the catastrophe were found.

That we had subsequently no ill effect to the health of those living in the stricken area was due to the really magnificent work put in by the staff and members of the Public Health and Housing and Water Departments, all of whom worked long and arduous hours directing and controlling the rescue and rehabilitation work without grumbling or complaint. I should like also to thank all the many voluntary workers who came in large numbers to help. The W.V.S. did a great work, within 15 hours of the disaster they were providing hot meals and rest accommodation to the exhausted refugees and throughout the emergency their assistance was never asked for in vain. Through their organisation clothing, furniture and household requisites were supplied to all

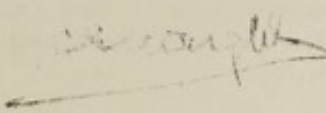

those in need and distress. The Red Cross and St. John's Ambulance Service also did splendid work in the formation and staffing of various 1st Aid Posts along the villages while many voluntary parties of helpers came in bus loads and cars to work under the Sanitary Officers in clearing houses and gardens of untold tons of sand, filth and rubbish and in the search for lost valuables. It is impossible to name all who helped, but as the officer responsible for the health of the District I should like to thank everyone who came forward to assist us in this time of crisis.

I have the honour to be, Mr. Chairman and Gentlemen,

Your obedient Servant,

H.B., B.Ch., M.R.C.S., L.R.C.P., D.P.H.

Public Health Department.

Report of work done by Sanitary Inspector for the year 1953.

Total number of houses erected during the year:-

(i)	By the Local Authority.	...	...	77
(ii)	By other Local Authorities.	...	...	-
(iii)	By other bodies or persons.	...	...	25

Inspection of dwelling houses during the year:-

(1) (a)	Total number of dwelling houses inspected for housing defects (under the Public Health or Housing Acts) including building licences, grant schemes, housing rural survey inspections. (Note : Premises inspected under Flood Section not included in this column)	...	...	314
(b)	Number of inspections made for the purpose.	...	...	360
(2) (a)	No. of dwelling houses (included under Sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925.	} Already recorded & altered in Rural Survey.		
(b)	No. of inspections made for the purpose.			
(3)	No. of houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation.	...	...	9
(4)	No. of dwelling houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation.	...	...	238

Remedy of Defects during the year without service of Formal Notices.

No. of defective dwelling houses rendered fit in consequence of informal action by the Local Authority or their Officers, including building licences, Council houses, grant aided schemes and premises following Housing Rural Survey inspections.	292
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Flood Section.

(a)	Total number of dwelling houses inspected.	...	...	319
(b)	Estimated number of first aid repairs supervised, i.e., drying out process, repairs to doors, windows, raising floor boards, etc.	...	...	233
(c)	Detailed specifications prepared and number of houses completely repaired.	...	...	55
(d)	Detailed specifications prepared and number of houses where works have commenced	...	...	121
(e)	Detailed specifications prepared and number of houses where orders have been placed but not commenced.	...	...	67
(f)	Estimated re-inspections of properties covering (a), (b), (c), (d) and (e) above, excluding caravans.	...	...	1050

Action under Statutory Powers during the year.

(a)	Proceedings under Sections 9, 10 and 36 of the Housing Act, 1936:-	
(1)	No. of dwelling houses in respect of which notices were served requiring repairs.	2
(2)	No. of dwelling houses which were rendered fit after service of formal notices by owners.	2
(b)	Proceedings under Public Health Acts.	
(1)	No. of dwelling houses in respect of which notices were served requiring defects to be remedied.	1
