1962

R.C.H.JONES ESQ. J.C.WAKEFORD ESQ., J.P.

Chairman Chairman of the Council C.M.T.Follett Esq. Vice Chairman of the Council

> W.G.BAYLISS ESQ. MISS E.BRISCOE E.H.H.DORMAN ESQ. T.C.FORD MSQ. J.D.GALLAGHER ESQ. F.JAMES ESQ. MRS. D.JOYCE E.J. MARTIN ESQ. W.T.R.OLD ESQ.

J.PARSONS ESQ. F.F. ROBERTS ESQ. H.M.ROWSE ESQ. W.G.SCOWN ESQ. I.C.WAITE ESQ. J.WARNE ESQ. S.WARNE ESQ. H.C.WILLIAMS ESQ. W.WINDLE ESQ.

To the Chairman and Councillors of the Urban District of St. Austell.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report on the health and sanitary circumstances of the District for the year 1962.

Dr. J.G.S.Turner was your Medical Officer of Health during 1962, and I am sure that he would have made some comment on the annual report, however, as I took up office in July, 1963 I shall let the figures speak for themselves.

I should like to thank the Officers who have contributed to this Report viz. Mr. Watts and the Public Health Department, Mr. King and Mr. Mules.

I wish to thank the Members of the Public Health Committee for their courtesy and interest at all times.

> I have the honour to be Your obedient Servant,

> > J.McGOVERN, Medical Officer of Health.

Abnormality	1
Broncho Pneumonia	2

SECTION A.

NATURAL AND SOCIAL CONDITIONS

AREA - (in acres) 18,379

The District is mixed Urban and Rural, the main aggregations of population being in St. Austell town, Mevagissey, St. Blazey and Par. Par and Charlestown are ports dealing with the China Clay trade, while Mevagissey deals with the fishing trade. The whole area is popular as a seaside resort and the population is greatly increased during the summer months.

POPULATION - 25,140

NUMBER OF INHABITED HOUSES

According to the Rate Book, the number of inhabited houses in the district was 8,679, the rateable value being £300,659 which gives £1,212 penny rate.

SECTION B.

GENERAL DIVISION OF HEALTH SERVICES

PUBLIC HEALTH OFFICERS OF THE LOCAL AUTHORITY

1. Medical Officer of Health

J.G.S.Turner, M.B., B.Sc., D.P.H.

Area Health Office, Moorland Road, ST. AUSTELL. Telephone - St. Austell 2206

2. Senior Public Health Inspector

C.H.Watts, C.R.San.I., Cert.Meat & Food Inspector.

3. Additional Public Health Inspectors

L.H.Sturtridge, M.R.S.H., M.A.P.H.I., M.R.I.P.H.H. Cert. Meat & Food Inspector.

C.F.Quantrell, M.A.P.H.I., A.M.R.S.H., Cert. Meat & Food Inspector.

LABORATORY FACILITIES

These were available at the Royal Cornwall Infirmary where all material for investigation was sent.

PROPHYLACTICS

Supplies of diphtheria, whooping cough and tetanus prophylactics were available in various combinations. Poliomyelitis vaccine became available in adequate amounts. Supplies were available to Medical Practitioners at the Area Health Office, St. Austell, on request.

AMBULANCE SERVICE

This service is controlled with other areas east of Truro from Bodmin. There has been no change in the method of obtaining help and the service maintained its high efficiencey.

NURSING AND OTHER SERVICES IN THE HOME

These services have worked well throughout the year. The establishment was as follows :-

(Contd).

- 7 -

STOL V.	District Nurse Midwife Health Visitor	Health Visitor (Full-Time)	General Nurse & Midwife	Total
Mevagissey	1	-		1
St. Blazey & Tywardreath	3	-		3
St. Austell & Treverbyn	2	3		8

All Nurses, as circumstances permit, are sent for further training or for practical post-certificate courses.

DOMICILLARY MIDWIFERY

This service operated smoothly throughout the year. The happy relationship which exists between the General Practitioners and Midwives contributes to the efficiency of the service.

CARE AND AFTER CARE

Children and old people discharged from hospital are followed up until fit.

ANTE AND POST-NATAL CARE

An ante-natal clinic was held weekly at Moorland Road, by a Specialist Obstretxician. In addition a weekly clinic was held by midwives. Relaxation classes have been established at Par, and in St. Austell. A Mother's club has been established in St. Austell and had very successful meetings.

INFANT CHILD WELFARE

Regular clinics are held at St. Austell, Bethel and Par. Emphasis is placed on health education.

DOMESTIC SERVICE

This service continued much in demand throughout the year. Many old people are the recipients of help, thus allowing them to continue their life in their own homes.

CARE OF OLD PEOPLE

With the co-operation of voluntary workers and of the County Welfare Department meals were delivered on four days each week.

The rest room is open for three afternoons each week and if suitable permanent premises could be obtained this service could be extended. In addition to helping tired elderly shoppers the centre provides a room where friendless old people may meet.

The Chiropidy service has met all demands.

HOSPITALS

The only hospital in the area is the St. Austell and District Hospital which deals with general medical and surgical cases. Cases requiring further examination and special treatment are sent to the Royal Cornwall Infirmary, Truro. Maternity cases go to Redruth and infectious diseases requiring isolation treatment are sent to the Isolation Hospital at Truro. Cases of tuberculosis and other chest conditions are admitted to Tehidy where accommodation is now more than adequate. The construction of a maternity block for the new hospital has been approved and building should begin early in 1963.

TREATMENT CENTRES AND CLINICS

(a) Clinics held at Moorland Road are as follows :-

Ante-natal and Gynaecology Orthopaedic Child Welfare

Speech Therapy E.N.T. Dental Child Guidance

Pyschiatric Family Planning

(b) Clinics held at the Hospital

General Medical & Surgical Orthopaedic Venereal Diseases Tuberculosis Skin Clinic Every Monday Every Tuesday First, Third & Fifth Wednesday of each month.

Every Wednesday As required Daily Second & Fourth Wednesday of each month Tuesday afternoons Fourth Friday evening & second Monday afternoon.

Daily Monday-fore-noon Tuesday afternoons Monday afternoon Thursday mornings

SECTION C.

SANITARY CONDITIONS OF THE DISTRICT

WATER

Consumer demands for water were adequately met in all parts of the district.

Bacteriological examinations have been made regularly on both raw and treated water from all sources, and were generally found to be satisfactory. Six samples are taken weekly.

The water supply in the district is soft and the high silica content provides a natural check on plumbo-solvency. Lead pipes are prohibited on drinking supplies, plastic or copper tubing being the standard materials used throughout the district.

Approximately 97% of the houses in the district have a piped water supply, and most have water indoors. Main laying at Ruddlemoor and Trethowal was completed during the year. Water mains at the Mount, Par, were extended to serve a housing estate.

SEWERAGE AND SEWAGE DISPOSAL

Sewers were laid at Par Beach and Polmear and sewer extensions at North Street, and Duporth Road, St. Austell, were completed.

DISINFECTION

Disinfection has been carried out as required and a total of 4 houses were disinfected during the year.

RATS AND MICE DESTRUCTION

This service was well maintained throughout the year. The work was done as follows :-

a) Private Dwellings

154 Treatments were carried out free of charge to the householder.

b) Business Premises

92 Treatments were carried out and the cost charged to the firms concerned. Most occupiers of these premises have agreement with the Local Authority for regular treatments.

(c) Sewers

The twice yearly baiting of sewers was carried out in April and November. The sewers were found to be in a very satisfactory condition. These treatments were administered under the 'Block Control' System as advised by the Ministry's Pest Officer in the interest of economy.

(d) <u>Refuse</u> Disposal Works

These were regularly surveyed and treatments carried out as

required.

PUBLIC CLEANSING

This activity is under the supervision of the Surveyor. A weekly refuse collection is in operation throughout the Urban Area, but in certain very congested places in Mevagissey, where there is no storage accommodation, collections are made three times a week. The refuse is disposed of at tips at Mevagissey and Par, and little or no nuisance is caused.

PUBLIC CONVENIENCES

The Urban District is moderately well served with conveniences, which are supervised by the Surveyor's Staff. A twice daily cleansing service is maintained in the town area and at Par and Mevagissey during the summer months.

the area is even greater than reflected in the Councils waiting list as owing to the rise in the cost of new houses and the consequential high rentals, man people prefer to reach in unsatisfactory cottages, where, however, the rent controlled and indeed in wany instances abnormally low.

The Council owns 1,903 houses and development is atil

.naibeocora

Details of house construction in the area during 19

w: sworrow as elen

Dwellings erected by the Council

22 Houses were in course of construction by the Counsil,

M.A. Many fimilies although not overerowded in a statutory sense are living under unactificatory conditions in over occupied houses).

SECTION D.

HOUSING

Details of applicants were as follows :-

Number without separate houses	336
Number of families with separate homes A. Living in unfit houses B. Living in over occupied houses	49 119
	-
	504

Applications from young people without separate homes heavily outweigh all other applications and overcrowding through the occupation of reasonably fit houses by two or more families is a major problem. Types required are as follows :-

	Bedroom	Type	1 30
2	Bedroom	Type	281
5	Bedroom	Туре	89
+	Bedroom	Type	4
			504

It is again emphasised that the housing shortage in the area is even greater than reflected in the Councils waiting list as owing to the rise in the cost of new houses and the consequential high rentals, many people prefer to remain in unsatisfactory cottages, where, however, the rent is controlled and indeed in many instances abnormally low.

The Council owns 1,903 houses and development is still

proceeding.

Details of house construction in the area during 1962

were as follows :-

Dwellings erected by the Council 16 Dwellings erected by private enterprise 167

22 Houses were in course of construction by the Council, and 150 by private enterprise.

> (N.B. Many families although not overcrowded in a statutory sense are living under unsatisfactory conditions in over occupied houses).

SLUM CLEARANCE

During the year, 36 persons, comprising 15 families living in unfit houses were rehoused by the Council. 22% of the dwellings allocated by the Council were let to Slum Clearance tenants.

39 Houses were represented to the Council as being unfit for human habitation and 2 Clearance Orders, 4 Closing Orders, and 14 Demolition Orders were made. 13 undertakings not to use and 2 undertakings to make fit were accepted.

HOUSING FOR OLD PEOPLE

The opposition to entering the new homes provided by Mue County Council is slowly disappearing. These new homes are smaller in size than the old workhouses, they are vastly more comfortable, and they respect human rights. As this has happened it has uncovered a need which was not known previously to exist. The same need has been found for the provision of small homes for those who prefer to be independent.

I am convinced that a generous provision of such houses is necessary throughout the district and that the need is best satisfied by providing a variety of housing types, with a warden service.

- 13 -

SECTION E.

INSPECTION AND SUPERVISION OF FOOD

MEAT

The daily visits by your Inspectors to the licensed slaughterhouses within the district, for the purpose of meat inspection, continued throughout the year. In order to maintain 100% meat inspection service your inspectors found it necessary to work late evenings and Sundays.

A large percentage of the animals slaughtered was for export to other towns and to the London Market.

As in previous years it is pleasing to note that the butchers in the Urban Area are still eager to deal in the best grades of meat.

The following table summarises the results of meat inspection.

in vastly more confortable, and they apponed it has uncovered a mood wintoh was sens fluid hit been found for the provision	Cattle Excluding Cows	Cows	Calves	Sheep and Lambs	Pig

SECTION E. (Contd)

ICE CREAM

Premises at which Ice-cream is manufactured and retailed, received continued attention by the Health Inspectors during the year. Collection of samples was maintained during the season and these were submitted to the Methylene Blue Reduction Test at the Pathological Department, Royal Cornwall Infirmary, Truro in accordance with Ministry of Health Testing and Advisory Scheme.

The results of these tests are shown below.

Grade	Total
1	39
2	5
3	0
4	0

SECTION F.

Prevalence of, and control over

Infectious and Other Diseases

The following notifications of infectious

disea	ses were	received :-		
		Scarlet Fever	assorts 1 bants	
		Measles	404	
		Meningococcel Infection	2	

DIPHTHERIA IMMUNISATION

The table shown below gives by year of birth the number of persons who were immunised.

	1962	1961	1960	1959	1958	1953-57	1948-52	Total
Primary	60	163	15	7	98 3	35	8	291
Booster					6	282	161	449

An attempt is being made to have all

children immunised against tetanus. As tetanus antigen only became available in 1955, this means a greatly extended programme in the schools. It is considered well worth while to avoid unpleasant symptons which may arise should it be necessary to give anti-tetanus serum.

The level of protection against diphtheria

is still much too low.

POLIOMYELITIS

Oral vaccine has almost entirely replaced

salk vaccine.

SMALLPOX

A total of 291 primary vaccinations and 449 re-vaccinations were carried out during the year.

TUBERCULOSIS

The total number of cases in the register at the 31st December, 1962 was as follows :-

	Pulmonary	Non-Pulmonary	
Male	80 (87) 50 (48)	9 (9) 17 (18)	
Female	50 (48)	17 (18)	
	1 30 (1 35)	26 (27)	
	Fi	igures for 1961 are given	in }

Figures for 1961 are given in brackets.

- 16 -

SECTION F. (Contd)

The table given below shows the age and sex distribution of new cases and of deaths during 1962

Transfers in	2	2	0	0
Transfers Out	1	0	0	0
Recoveries	8	3	0	0

- 17 -

TUBERCULOSIS PREVENTION

The Cornwall County Council for several years past has offered B.C.G vaccination against tuberculosis to all suitable school leavers following preliminary skin testing. The suitable children are those who have not had previous B.C.G vaccination or previous tubercular infection, and therefore react negatively. In 1962 it was decided to lower 1 age groups to the 12 and 13 year old children. 1,203 Children were examined and 961 received B.C.G. vaccine. These figures are for Health Area IV and not St. Austell Urban District only, since the St. Austell schools receive many pupils from the surrounding Rural District.

ACCIDENTS IN AND AROUND THE HOME

The Committee has continued to meet and discuss ways and means of preventing home accidents. There are many difficulties to be surmounted including the primary one of ascertaining the number of accidents and how they occur.

It is considered that our best way to proceed is to adopt the same prodedure as with road accidents and to make the children conscious of the danger from their earliest years.

This is being done by having talks in schools by Health Visitors, by appointing children as Home Safety Officers, giving them a little booklet on accident prevention and by having ample publicity material.

The parents are approached through posters and lectures at meetings of various organisations.

FOR THE YEAR ENDED 31 ST DECEMBER, 1962

To the Chairman and Members of the St. Austell Urban District Council

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present my twenty-fifth Annual Report for the year ending 31 st December, 1962.

A total of 6,853 visits were made by your Inspectors during the year. The majority of these visits were made in carrying out their Statutory duties under the Public Health, Housing, Food and Drugs Acts and Regulations.

I HOUSING

Visits to, and inspections of,

houses, occupied a great deal of time.

A. SLUM CLEARANCE

39 Houses were represented to the Council as being unfit for human habitation and 6 of these houses were included in 2 Clearance Orders which were submitted to the Minister of Housing and Local Government for confirmation. 14 Demolition and 4 Closing Orders were made and 13 Undertakings not to relet were accepted. In addition 2 undertakings to make fit were accepted.

8 Houses subject to Demolition Orders and 21 houses included in Clearance Orders were demolished.

B. CERTIFICATES OF DISREPAIR

4 Applications for Certificates were received but when the landlords were informed of the Council's intention to issue the Certificates, 1 undertaking to remedy the disrepair was submitted and accepted and 3 Certificates of Disrepair were issued.

2 Applications for cancellation of Certificates of Disrepair were received and as the disrepair complained of had been remedied both certificates were cancelled.

2 MEAT INSPECTION

A considerable amount of your Inspectors time has been devoted to this important aspect of their work. In order to maintain 100% inspection of all carcases and offal of animals slaughtered, it has been necessary, once again, to work during the evenings of each weekday and every Sunday throughout the year.

A total of 15,434 animals were slaughtered during the year. This is a decrease of 709 on the previous year.

1,025 Visits were paid to the slaughterhouses in the district when the following carcases (and Offal) were inspected.

BOVINE		2934
a) Steers b) Heifers c) Cows d) Calves e) Bulls	1,502 502 331 595 4	
SHEEP		6562
PIGS		5938
		1 54 344

The following table shows the comparison between 1960, 1961 and 1962.

		1960		1961	o kidney	1962

3. THE SLAUGHTER OF ANIMALS ACT

There were 27 licensed slaughtermen on the register at the end of the year.

4. OTHER FOODS

Numerous routine visits were paid to wholesale and retail premises for the examination of foodstuffs and as a result the following were condemned as being unfit for human consumption.

		o adl 987.4 .deliver	Tons.	Cwts.	Qtrs.	Lbs.	Ozs.

5. FISH INSPECTION

During the year 132 quarter-casks and 157 half casks of pickled pilchards, 108 lbs of crayfish, 4,789 lbs of crawfish, 13,180 lbs of crabs and 4,311 lbs of lobsters were exported from Mevagissey to the Continent.

As a result of routine visits to wholesale and retail fish merchants, the following were condemned as unfit for human consumption :-

4 Stone coley fillets) 2 Stone haddock fillets) 2 <u>1</u> Stone smoked cod fillets) 14 Stone cod fillets) 8 <u>1</u> Stone megrims)	Decom
31 Stone	

Decomposing.

6. ICE CREAM

A total of 44 samples of ice-cream were collected and submitted for bacteriological examination. The results of these tests were as follows :-

Provisiona	l Grade	I	39
e " 23		II	5
"		III	0
n		IV	0
		- 24	-

6. ICE CREAM (Continued)

Table for comparison with previous years.

	Grade I	Grade II	Grade III	Grade IV
1960	90.0%	7.5%	2.5%	0.0%
1 961	83.0%	17.0%	0.0%	0.0%
1962	88.6%	11.4%	0.0.	0.0%

During the year 14 premises were registered for the storage and retail sale of ice-cream making a total of 160 registered premises within the Urban District.

7. CAMPING SITES

31 Licences in respect of 49 residential and 96 holiday caravans were granted by the Council during the year. These werein addition to the 30 licences granted in respect of 110 residential and 902 holiday caravans during previous years and which were valid through 1962.

It is interesting to note that not a single appeal was made against the conditions attached to all the licences issued.

8. PREVENTION OF DAMAGE BY PESTS ACT

The destruction of rats and mice continued throughout

the year.

Warfarin was used as the chief rodenticide but zinc phosphide was employed on refuse tips, sewage works and sewers.

299 Properties were inspected or surveyed and 260 were found to be infested with rats or mice. All of these infestations were cleared up by normal treatment methods.

The public sewers of the district were test baited during April and September and only 7 complete or partial takes were recorded which indicated that the rat population of the sewers was of very limited numbers.

	Manholes	April	September
1.	Testbaited	1 35	122
2.	Bait Taken	3	4

9. WATER SUPPLIES

Of the 64 samples obtained from mains supplies 8 were unsatisfactory and of the 146 samples obtained from private supplies 57 were unsatisfactory.

In all cases where the results were unsatisfactory the consumers were advised to boil the water before using it for drinking purposes

10. IMPROVEMENT GRANTS

69 Applications for Discretionary and 42 for Standard Grants were received and 42 and 36, respectively, were approved.

Improvements in respect of 83 applications were completed and the Council contributed £16,472 towards the cost of the work involved.

The Council is to be congratulated in its foresight in continuing to encourage house owners to improve their property with financial assistance.

11. STAFF

The Staff of Inspectors during the year consisted of myself, Mr. L.H.Sturtridge and Mr. C.F.Quantrell.

12. CONCLUSION

I would now take the opportunity of thanking the Members of the Council for their help and support given during the year, and also to Dr. Turner for his invaluable help and co-operation at all times. Also I would like to thank Mr. Saunders, Mr. King, my colleagues, Messrs Sturtridge and Quantrell and all members of the staff for their loyal co-operation and support.

I have the honour to be

Your obedient Servant,

CHARLES H. WATTS

Senior Public Health Inspector.

Public Health Department, Municipal Offices, Truro Road, ST. AUSTELL.
