MEDICAL OFFICER'S REPORT OF THE
BIRTHS AND DEATHS,

FOR THE YEAR ENDED JANUARY 2nd, 1904.

*To the Mayor, Aldermen and Councillors of the
Borough of Stalybridge, being the Urban
Sanitary Authority for the said Borough.*

GENTLEMEN,

I beg to present my Thirtieth Annual Report, which I commence with the usual formal record of the Births and Deaths for the last twelve months.

During the year ended January 2nd, 1904, the number of Births registered in the Borough was 730; of these 354 were males and 376 females. The Deaths registered during the same period numbered 504; of these 257 were males and 247 females.

The birth rate for the year was 25.8, and the death rate 17.8 per 1,000 persons living.

Fifty deaths were recorded from the seven principal zymotic diseases, which gives a zymotic death rate of 1.7 per 1,000 persons living for the past twelve months.

The death rate per 1,000 persons living of the following diseases, viz.:—

Phthisis	1.2
Bronchitis, Pneumonia and Pleurisy..	3.5
Infant Mortality	4.9

The Borough is divided into four wards, and the following is the death rate in each ward:—

Lancashire Ward.....	18.2
Staly Ward	18.9
Dukinfield Ward	18.6
Millbrook Ward	11.2

Thirty-seven deaths occurred in the Workhouse, Ashton-under-Lyne, of persons removed there from the Borough, and twenty deaths in the Infirmary, and one at Ashton-under-Lyne Borough Hospital, which I have included in my general death rate, and also apportioned them to the ward in which they lived before removal.

The deaths of children under one year of age to 1,000 births registered for the past year are 190, and the average for the last ten years—1894 to 1903—is 206.

The deaths of children under one year of age to 1,000 births registered in the different wards for the year 1903 is as follows, viz. :—

Lancashire Ward	200
Stayley Ward	202
Dukinfield Ward	187
Millbrook Ward	116

The population of the Borough is based on the Census taken in April, 1901, with the increase of births over deaths added to it, and brought down to the end of the year, and the population is as follows, viz. :—

Lancashire Ward	6069
Stayley Ward	10954
Dukinfield Ward.....	8100
Millbrook Ward	3099
	<hr/>
Total	28222
	<hr/>

I now give a detailed account of the Sanitary Work of the Borough during the past year, viz. :—

ZYMOTIC DISEASES.

In July, 1891, the Council at their meeting adopted the Infectious Diseases (Notification) Act, 1889, and the Infectious Diseases (Prevention) Act, 1900. The working of the Infectious Disease Compulsory Notification Act has given serviceable direction to much of the work of general inspection of the Borough. All premises specified in notifications of infectious diseases are at once visited by myself and the Inspector of Nuisances, and many minor sanitary defects are thus discovered and remedied.

A few facts relating to these diseases are now appended.

Small Pox.—I regret to have to report seven cases were notified, viz.: five cases in February, one in May and one in July. Five of the cases were removed to Ashton Borough Hospital, and two to Hyde Infectious Hospital. In all cases the patient was at once removed to an Infectious Hospital, the house fumigated, &c., the bedding, &c. burnt, and all the inmates of the houses were re-vaccinated and the houses were kept under my observation, for a fortnight. No second case occurred in any of the houses, showing that there is only one way of stamping out Small Pox, and that is by vaccination and re-vaccination.

The Sanitary Committee met on February 5th, 1903, and approved of all that had been done to prevent the spreading of the disease, and ordered a handbill to be delivered at every house in the Borough, warning them of the danger of Small Pox, and advising everybody to be re-vaccinated, which would be performed gratuitously with Calf Lymph by all Medical men in the Borough, and the Corporation would pay the fee of 2/6 in each case, and nearly 300 persons availed themselves of this opportunity to be re-vaccinated. I reported the outbreak of Small Pox to the Local Government Board, and to Dr. Vacher, Medical Officer of Health for the County of Cheshire. The Sanitary Committee—afterwards approved by the Council—made arrangements with the Borough of Ashton-under-Lyne to erect a Small Pox Hospital, capable of holding 12 beds, on a plot of land where Ashton had already a Small Pox Hospital. The Sanitary Committee—afterwards approved by the Council—have also joined with Ashton-under-Lyne and other Sanitary Authorities to form a special Sanitary Authority, who have purchased land and will erect a permanent Small Pox Hospital.

Measles.—Although this is not one of the diseases specified in the above Act required to be notified, one death occurred.

Scarlet Fever.—Thirty-one cases were notified, and four deaths occurred.

Diphtheria.—Twenty cases were notified, and five deaths occurred.

Membranous Group.—Five cases were notified, and two deaths occurred.

Whooping Cough.—Though not included in the above-named Act, caused nineteen deaths.

Typhoid Fever.—During the year twenty-six cases were notified, and four deaths occurred:

With regard to Typhoid Fever, which exists in our Borough in an intermittent form all the year round, I can only repeat what I have said in my last four reports, that I believe the cause to be the old fashioned privy and ashpit which exist so extensively in our Borough, and which arrangement is universally condemned by all Medical Officers of Health, and the Local Government Board, and the chief ground of condemnation is that the accumulation of filth close to the back doors of cottage houses must be and is detrimental to the health of the people.

With regard to the question of the old fashioned privies, many of these have been converted into the Water Carriage System, and many are in course of conversion, no less than 396 having been altered during the past six years.

Mr. Oliver, the Inspector of Nuisances, sees that all ash-pits, in connection with property where Typhoid Fever has been notified, are emptied at once, and the walls, and all surroundings washed with the following solution:—

R. Hyd. Bichlorone ounce.
Acid Hydrochloricone ounce.
Aniline Blue.....	four grains.
Aquæ.....	three gallons.

On receipt of a notification of Typhoid Fever, a pail, hermetically sealed, is supplied to each house to receive all discharges from the patient, and the following special instructions are left at each house, viz. :—

BOROUGH OF STALYBRIDGE.—HEALTH DEPARTMENT.

TYPHOID FEVER INSTRUCTIONS.

1. A person suffering from Typhoid Fever should, if possible, be placed in another room, and all unnecessary furniture and articles must be removed.

2. The room must be thoroughly ventilated and disinfectants freely used.

3. No person must enter the room except those attending upon the patient, and such persons must keep their hands thoroughly clean.

4. All discharges from the patient must be at once disinfected by Chloride of Lime being freely put into the utensil receiving the discharge, and the discharges whether arising from vomiting or otherwise, must be fully covered over with the Chloride of Lime.

5. All Bed-Clothes and Body Linen taken from the patient must, before removal from the room, be forthwith placed in a tub or vessel containing water mixed with some disinfectant.

6. Any food left by the patient must be burned at once.

7. Disinfectants and all necessary assistance to carry out these instructions will be given free of charge by the Corporation Officials.

8. All persons failing to carry out the above requirements are liable to heavy and serious penalties.

F. J. ROBERTS-DUDLEY,

Medical Officer of Health for the Borough of Stalybridge.

Infectious diseases included in the Infectious (Notification) Act, 1889, notified during the year, 1903, and the number of deaths from same, viz. :—

	Number of Cases.	Number of Deaths.
Small Pox	7	1
Scarlet Fever	31	4
Diphtheria	20	5
Membranous Croup	5	2
Typhoid Fever	26	4
Erysipelas	9	1
Puerperal Fever.....	1	0
	<hr/>	<hr/>
	99	17
	<hr/>	<hr/>

During the year I have visited my district with the Inspector of Nuisances, and on many occasions we have been accompanied by the chairman (Alderman Simpson), the Vice-Chairman (Dr. Hancock), and other members of the Sanitary Committee.

I attend all meetings of the Sanitary Committee, and advise them on all matters relating to the health of the Borough.

Lodging Houses.—I have many times during the year visited all the registered lodging-houses within the Borough, and in April and October have been accompanied by the Inspector of Police (Mr. Bamforth), and found them in a fairly sanitary condition.

I also beg to report that owing to the prevalence of Small Pox in the surrounding neighbourhood I have, during the last year, visited all registered lodging-houses weekly, and have required each lodging-house keeper to furnish me (Section 83, Public Health Act, 1875) with a list of every person who resorted to such house during Sunday night.

Water Supply.—The Water supply to the Borough is absolutely pure.

Sale of Food and Drugs Act, 1875.—The Chief Constable (Mr. John Bates) forwarded to the Borough Analyst (Mr. J. Carter Bell) the following Articles to be analysed during the year 1903, viz. :—

The following is a copy of the Report rendered by Inspector Bamforth, under the Foods and Drugs Act, 1875 :—

40 SAMPLES.

10	Milk	Pure.
9	Butter	„
3	Sugar	„
2	Coffee	„
2	Tea	„
2	Cheese	„
1	Margarine Cheese	„
2	Barm	„
1	Pepper	„
1	Treacle	„
2	Lard	„
1	Linseed Meal	„
1	Oatmeal	„
1	Chicory	„
1	Rum	„
1	Whiskey	„

All were reported as pure, except one sample of Milk.

Proceedings were taken against the vendor of Milk, who was fined 10s., and 8s. for costs.

JAMES BAMFORTH,

Inspector under the Foods and Drugs Act.

During the past twelve months sanitary improvements have been carried out at the following properties, under the supervision of the Borough Surveyor's (Mr. J. N. White) Department, and in some cases by the Corporation Workmen.

SITUATION OF PROPERTY.	OWNER.
Grove Inn, High Street.....	Messrs. Groves & Whitnall.
Wakefield Road and Church Street..	Exors. of Geo. Webb.
Vaudry and Cross Leech Streets ...	Exors. of T. Seel.
Caroline and Castle Streets	Robert Sykes, Esq.
Vaudry Street	Exors. of Jos. Rothwell.
Rose & Crown Inn.....	Messrs. Shaw and Harry V. Sutton.
Harrop Street	
Moulders' Yard	John Jackson, Esq.
Harrop Street Mill	Messrs. Bottomley & Hyde.
Drill Hall	4th V. B. C. R.
Church Inn, Huddersfield Road ...	Mr. W. T. Rothwell.
Hunters' Refuge	Messrs. Groves & Whitnall.
Montague Street	Mr. Samuel Elliot.
Borough Brewery.....	Exor. of J. Heginbotham.
Eagle Iron Works and adjoining Property	Messrs. Bailey & Garnett.

With regard to the sanitary state of the Borough during the year, I beg to append to my report the following statement furnished by Mr. Oliver, the Inspector of Nuisances, viz. :—

YEAR 1903.

Number of general nuisances abated during the year...	619
Number of houses fumigated	83
Number of smoke observations taken.....	134
Number of smoke notices served.....	26
Number of canal boats inspected	24
Number of notices served on owners	4

I beg to give a return of the number of ashpits emptied and loads removed during 1903, viz. :—

	ASHPITS.	LOADS.	BINS.
January	1992	620½	—

	<hr/>	<hr/>	<hr/>
	19411	7561	7821
	<hr/>	<hr/>	<hr/>

FACTORY AND WORKSHOP ACT.

I beg to report that in my last Annual Report I gave a full account of my visit with the Sanitary Inspector, Mr. Oliver, to all the Workshops, Bakehouses, &c., and we now have a register of all the Factories and Workshops in the Borough. This year I have paid visits to most of the workshops in the Borough, and have found them fairly clean, especially some of them which had only been recently limewashed.

AIR SPACE.—In Workshops and Workplaces notices must be exhibited in each room specifying maximum number of persons employed therein. Each person in a Factory or Workshop must be allowed 250 cubic feet of air space, or 400 during overtime. Last year very few of the occupiers of workrooms, &c. had complied with this requirement, but now most of them, I am glad to report, have done so.

BAKEHOUSES.—I have twice visited with the Sanitary Inspector, Mr. Oliver, all the Bakehouses in the Borough, and found them satisfactory.

CLOSET ACCOMMODATION.—The Factory and Workshop Act, 1901 (Section 9), requires every Factory and Workshop to have suitable sanitary conveniences, with separate provisions for each sex, where necessary. In some Mills this regulation is very satisfactory and efficiently carried out. In others it is

very unsatisfactory, and I have supplied the Borough Surveyor, Mr. White, with a list of those that require his attention, and which he will have to proceed with under Public Health Act, 1890 (Section 22).

CANAL BOATS.—I beg to give Mr. Oliver's (Inspector of Canal Boats) Report :—

Sanitary Office, Town Hall,
Stalybridge,

December 26, 1903.

TO THE CHAIRMAN AND MEMBERS OF THE
SANITARY COMMITTEE.

Gentlemen,

In presenting the Annual Report of Canal Boats for 1903, I beg to state that twenty-four boats registered for sleeping accommodation have been inspected during the year.

Such boats were occupied by 42 males, 7 females, and 5 children. All appeared to be in good health and free from infectious disease.

During the year four notices have been served for offences under the Acts: one for absence of certificate, painting and repairing; two for want of painting; one for absence of water vessel and certificate.

Yours obediently,

J. OLIVER,

Inspector under the Canal Boats Acts.

DESTRUCTOR.

I beg to report that the Sanitary Committee have been considering during the year the provision of a Destructor, and in October the Council unanimously accepted the recommendation of the Sanitary Committee to accept a tender to erect one. The necessary plans, specifications, &c., with regard to the cost are now being prepared, and when complete, application will be made to the Local Government Board to borrow the money.

The Sanitary Committee have also decided to erect a small house with bathroom attached, and also a steam-disinfector, so that when complete we shall be able to thoroughly disinfect all persons—and their clothing—who have been exposed to any infectious disease, especially Small Pox.

The following table will show the number of deaths in each year from the seven chief zymotic diseases, as well as the various Death-rates for the past ten years, and also the deaths of children under 1 year of age to 1000 births registered:—

	1894	1895	1896	1897	1898	1899	1900	1901	1902	1903
