## ABBREVIATED ANNUAL REPORT FOR THE YEAR 1947.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting my Annual Report for 1947.

The vital statistics for the year are again very satisfactory with a birth rate equal to that of England and Wales, a lower death rate and an infantile mortality rate of only 28.5 as compared with 41.0 for the rest of the country, which latter figure constitutes a low record.

No deaths have occurred in connection with child birth and there have been no serious epidemics of infectious disease.

Immunisation against diphtheria has made steady progress and it is estimated that over 95% of school children have been fully immunised. No case of diphtheria has occurred.

38 Council houses have been completed and a further 17 were in the course of erection at the end of the year; 17 cases of overcrowding have been rehoused but unfortunately a further 17 such cases still remain. At the close of the year there were some 400 applicants for Council Houses.

## SECTION A. STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

|  |             |
|--|-------------|
| Area .....   | 1918 acres. |
| Population .....                                   | 10,480.     |
| Rateable Value .....                               | £68076.     |
| Sum represented by Penny Rate .                    | £270.       |
| Number of Inhabited Houses<br>from Rate Book ..... | 3160.       |

|                      |       |     |    |    |   |                            |
|----------------------|-------|-----|----|----|---|----------------------------|
| <u>Live Births.</u>  | Total | 210 | M. | F. | } | Birth Rate per 1,000       |
|                      |       |     |    |    |   | population - 20.0          |
|                      |       |     |    |    |   | Corresponding figure       |
|                      |       |     |    |    |   | for England & Wales - 20.5 |
| <u>Still Births.</u> | Total | 4   | 2  | 2  | } | Still Birth Rate per       |
|                      |       |     |    |    |   | 1,000 population - 0.37    |
|                      |       |     |    |    |   | Corresponding rate for     |
|                      |       |     |    |    |   | England & Wales - 0.50     |
| <u>Deaths.</u>       | Total | 116 | 53 | 63 | } | Death Rate per 1,000       |
|                      |       |     |    |    |   | population - 11.0          |
|                      |       |     |    |    |   | Corresponding figure       |
|                      |       |     |    |    |   | for England & Wales - 12.0 |

|  |    |

.....  
.....

### Death Rate of Infants under one year of age:-

|   |      |
|---|------|
| All Infants per 1,000 live births .....                 | 28.5 |
| Corresponding figures - all infants for England & Wales | 41.0 |
| Legitimate Infants per 1,000 legitimate live births ... | 28.5 |
| Illegitimate Infants per 1,000 illegitimate live births | nil. |

|  |      |
|--|------|
| Deaths from Measles (all ages) .....             | nil. |
| Deaths from Whooping Cough .....                 | nil. |
| Deaths from Diarrhoea (under 2 yrs of age) ..... | 1.   |

|  |     |
|--|-----|
| Increase in Birth Rate compared with 1946 ...  | 3.0 |
| Decrease in Death Rate compared with 1946 ...  | 1.9 |
| Increase in Infantile Mortality Rate 1946 of . | 6.0 |

### SECTION B. GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

#### LABORATORY FACILITIES.

Examinations of pathological specimens in connection with infectious diseases and bacteriological examinations of water supplies are carried out in the Ministry of Health Emergency Public Health Laboratory, Memorial Hospital, Peterborough, at an annual charge of £10. This service is of immense value in controlling epidemic diseases.

### SECTION C. SANITARY CIRCUMSTANCES IN THE AREA.

#### 1. WATER.

The water supply of the Borough is provided by the Stamford Water Works, owner, The Marquess of Exeter, K.G., C.M.G.

This is a piped supply derived from the following sources:-

|                        |             |
|------------------------|-------------|
| Bone Mill.             | (Well)      |
| Whitewater.            | (Springs)   |
| Wothorpe.              | (Springs)   |
| Northfields, Stamford. | (Bore Hole) |
| Ryhall Road, Stamford. | (Bore Hole) |

The Bone Mill supply can be augmented by springs situated on the Leicester Road, Thornhaugh and Burghley High Park. Both these supplies have been used during the year.

Water is derived from the Lincolnshire Limestone and all supplies with the exception of the Northfields and Ryhall Road bore holes are situated without the Borough, (South of the river Welland) in the high ground of the Soke of Peterborough.

All supplies have a high total and permanent hardness. 53 samples of raw water were taken for bacteriological examination during the year; all supplies, other than Whitewater have maintained a high and constant standard of purity. 52 Bacteriological examinations of chlorinated water have been carried out with very satisfactory results. Special precautions have been made for the chlorination of the Whitewater supply. 5 chemical examinations have been made.

Apart from chlorination, no other treatment is given to the water.

The number of dwelling houses supplied from public mains:-

|                           |      |
|---------------------------|------|
| (a) direct to house ..... | 3140 |
| (b) by stand pipe .....   | 80   |

representing a population of 12560 under (a) and 80 under (b).

#### INSPECTIONS.

No. of inspections for all purposes:-

|                               |             |
|-------------------------------|-------------|
| Meat and Foods .....          | 438         |
| Housing and overcrowding .... | 323         |
| Milk and Dairies .....        | 190         |
| Shops and Factories .....     | 125         |
| Miscellaneous .....           | 145         |
| Water Supplies .....          | 101         |
|                               | <u>1322</u> |

#### NOTICES SERVED.

|           | <u>Issued.</u> | <u>Complied with.</u> |
|-----------|----------------|-----------------------|
| Informal  | 35             | 31                    |
| Statutory | -              | -                     |

#### SECTION D. HOUSING.

##### Housing Inspection.

|   |     |
|---|-----|
| No. of visits .....                         | 323 |
| No. of Houses inspected .....               | 209 |
| No. of Houses inspected and recorded .....  | 114 |
| No. of inspections made for the purpose ..  | 164 |
| No. of Houses found unfit for habitation .. | 80  |
| No. of Houses not in all respects fit ....  | 57  |

##### Remedy of defects.

|   |    |
|---|----|
| No. of houses closed as a result of action under Sec. 11 of the Housing Act 1936 .. | 1  |
| No. of houses dealt with by accepting undertakings from owners .....                | 6  |
| No. of houses repaired as result of informal action .....                           | 34 |
| No. repaired as a result of action under Sec. 9 Housing Act 1936 .....              | -  |
| No. of new cases of overcrowding discovered   | 10 |
| No. of cases of overcrowding abated .....   | 17 |

##### Proceedings under Public Health Acts.

|   |     |
|---|-----|
| No. of houses in respect of which Notices were served .....   | nil |
| No. of houses repaired by owners .....  | nil |
| No. of houses without an indoor water supply representing a population of approximately 80 persons. | 80  |

At the close of the year there were some 478 applicants for Council Houses. 17 further known cases of statutory overcrowding have to be dealt with, together with many families either living in insanitary houses or lodgers; it seems therefore that the estimated figure (made in 1946) for 500 new houses was about correct.

#### MEAT INSPECTION.

The number of animals slaughtered in the Borough for sale for human consumption and inspected during the year was 4,952.

TABLE 1.

|   | <u>CATTLE.</u>     |              |               |              |              |
|---|--------------------|--------------|---------------|--------------|--------------|
|   | <u>Exclg.cows.</u> | <u>Cows.</u> | <u>Calves</u> | <u>Sheep</u> | <u>Pigs.</u> |

| Pairs of lungs.           | 132          | 121            | 7            | 1            |
| Livers.                   | 201          | 83             | 3            | -            |
| Plucks (complete)         | 1            | 3              | 8            | -            |
| Fats (mesenteric)         | 55           | -              | 5            | -            |
| Spleens.                  | 3            | -              | -            | -            |
| Hearts.                   | 1            | 8              | -            | -            |
| Kidneys.                  | 16           | -              | -            | -            |
| Udders.                   | 16           | -              | -            | -            |
| Forequarters (whole)      | 11           | 1              | -            | -            |
| Hindquarters (whole)      | 1            | -              | -            | -            |
| Other parts of carcasses  | 67           | 81             | 13           | -            |

The following imported meat has also been condemned:-

3 Forequarters, 7 part forequarters, 5 part hindquarters Beef.

The total weight of all meat condemned was 35,324 lbs.

## MILK AND DAIRIES.

There have been no changes in the Milk and Dairies Register during the year. The monthly sampling of milk from every source retailed in the Borough has been continued and the results are in the main very satisfactory. The extremely high temperature of last summer meant that a number of samples were inevitably taken under conditions when the average temperature exceeded 65°F and the results are therefore not recorded. In all 158 samples were taken and of these 47 were under unsuitable conditions, of the remainder the results were classified as under:-

| <u>No. of Samples.</u> | <u>Category A.</u><br><u>Marketable.</u> | <u>Category B.</u><br><u>Salvage.</u> | <u>Category C.</u><br><u>Reject.</u> |
|------------------------|--|---------------------------------------|--------------------------------------|
| 111                    | 94<br>84.7%                              | 14<br>12.6%                           | 3<br>2.7%                            |

These results represent a further improvement on those of last year.

26 samples of heat-treated milk were taken and submitted to the methylene blue and phosphatase tests, 3 being taken under unsuitable temperature conditions. Of the remaining 23 samples 22 passed the phosphatase test and 17 the methylene blue test.

Bulk samples of milk from 13 producers were taken from retailers in the town in conjunction with the County Council and submitted to the biological test for presence of Tubercle Bacilli and all were reported negative.

## SECTION F. PREVALENCE OF AND CONTROL OVER INFECTIOUS AND OTHER DISEASES.

### HOSPITAL ACCOMMODATION.

Owing to staff shortages it has not been possible to admit any case of infectious disease into Bourne Isolation Hospital.

By the kindness of Dr. Johnstone, Medical Officer of Health for Peterborough, all infectious cases including some patients with infantile paralysis requiring in-patient treatment, were admitted to the Peterborough City Isolation Hospital. In addition 3 cases of infantile paralysis were admitted to the centre Isolation Block of Stamford Infirmary, where accommodation for infectious cases was only available for a few weeks.

The Borough is in need of guaranteed isolation hospital accommodation.

### DIPHTHERIA IMMUNISATION.

Number of children known to be immunised during the year:-

|            |     |             |     |
|------------|-----|-------------|-----|
| 0 - 4 yrs. | 90. | 5 - 14 yrs. | 49. |
|------------|-----|-------------|-----|

Number of children immunised since commencement of scheme:-

|            |      |             |       |
|------------|------|-------------|-------|
| 0 - 4 yrs. | 851. | 5 - 14 yrs. | 1751. |
|------------|------|-------------|-------|

There have been no changes in the milk and butter  
 registers during the year. The monthly register of all  
 from every source recorded in the register has been continued  
 and the results are in the main very satisfactory. The  
 number of samples were increasing under conditions  
 when the average temperature exceeded 50° F and the results  
 are therefore not recorded. In all 115 samples were taken  
 and of these 47 were under satisfactory conditions, of the  
 remainder the results were classified as follows:-

| No. of Samples | Category A | Category B | Category C |
|----------------|------------|------------|------------|
| 111            | 47         | 47         | 17         |

|     |    |    |    |
|-----|----|----|----|
| 111 | 47 | 47 | 17 |
|-----|----|----|----|

These results represent a further improvement on  
 those of last year.  
 15 samples of past-sterilized milk were taken and sub-  
 mitted to the standard plate and photographic tests. A better  
 than average result was obtained under conditions of the re-  
 cording. 25 samples of milk were taken and 17  
 the following were found.

15 samples of milk from 15 dairies were taken  
 from registers in the town in connection with the County  
 Council and submitted to the standard test for presence  
 of tubercle bacilli and all were recorded negative.

## SECTION 2. INVESTIGATION OF THE SOURCES OF INFECTION AND

### OTHER MATTERS.

#### NEGATIVE INVESTIGATION.

During the year no investigation has been made possible  
 to detect any case of infectious disease late during  
 isolation hospital.  
 By the kindness of Mr. Johnston, Medical Officer  
 of Health for Peterborough, all infectious cases including  
 those patients with tubercle bacilli remaining in-  
 patient treatment, were visited in the Peterborough City  
 Isolation Hospital. In addition 5 cases of tubercle  
 bacilli were admitted to the central Isolation Block at  
 Bedford Infirmary, where accommodation for infectious  
 cases was only available for a few weeks.  
 The Borough is in need of improved isolation  
 hospital accommodation.

#### DIETETIC INVESTIGATION.

Number of children known to be infected during the  
 year:-  
 0 - 5 yrs. 30  
 5 - 10 yrs. 40  
 Number of children known to be infected during the  
 year:-  
 0 - 5 yrs. 30  
 5 - 10 yrs. 40

The Stamford Red Cross Detachment has for another year rendered invaluable help in staffing the Diphtheria Immunisation Clinic, which is now held at the Kesteven C.C. Infant Welfare and School Medical Service Clinic at Barn Hill House.

This concentration of services in one centre at Barn Hill, apart from providing excellent accommodation, has been a great help in health education, by the showing of films and the distribution of leaflets.

Valuable help has been given in this respect by certain members of the Infant Welfare Committee who have specialised in this work and devote their whole time to this subject at each clinic.

The response on the part of the mothers on all health matters has been most gratifying, but there is still need for education of those members of the community who do not attend clinics.

Full use was made of the summer Diphtheria Immunisation Campaign.

### SCABIES.

The Stamford Scabies Treatment Clinic under the Joint Kesteven County Council Scheme has functioned continuously throughout the year.

As compared with 1946, 10 less cases have been treated from Stamford Borough, and 28 less cases from the surrounding areas.

Patients from the Rural Districts are treated by contract with Kesteven County Council at 17/6d per case, of which sum the Borough receives 5/10d, to cover the cost of drugs, dressings and materials.

Cases are referred to the Clinic by General Medical Practitioners and the School Authorities. No formal notices for compulsory treatment were served.

### No. of patients treated during the year:-

|                        | Borough. | South<br>Kesteven<br>R.D.C. | Ketton<br>R.D.C. | Barnack<br>R.D.C. | Oundle &<br>Thrapston<br>R.D.C. | P'boro<br>R.D.C. |

Average number of attendances to complete a cure ..... 2

Maximum number of weekly notifications of fresh cases .... 10

Average number of weekly notifications of fresh cases .... 2

None reported. All the notification of one fatal case, all were supplied of the mild type involving no residual damage.

Details of all cases were reported to Cambridge under the Ministry of Health Infectious Diseases Survey.

Actual Clinic expenses incurred by the Borough, excluding nurses salaries, heating and lighting, which are the responsibility of the County Council, for all patients treated is ..... £17.12.3d.  
 Average cost per patient treated ..... 3.3 $\frac{1}{2}$   
 Amount refunded to the Borough by Kesteven C.C. in respect of patients in Column 3, 4, 5 & 6 above ... £ 6. 7.2d.

PHIDICULOSIS - INFESTATION by body and head lice.

Total number of houses wherein occupants were found to be infested with head lice ..... 7.  
 Total number of infested persons reported ..... 9.

All cases were treated at the Scabies Clinic.

Steps taken to combat infestation are the reporting of cases to the Medical Officer of Health by General Practitioners, School Medical Services and Health Visitor and Factory Surgeon; by visiting the homes of children found to be infested, and by arranging for simultaneous treatment under supervision at home or at the clinic.

Treatment for head lice is given either at the Scabies Clinic or by the parents in their homes under supervision of the School Nurse.

Flea infestation of houses is treated by Benzine Hexachloride Dust - results have been quite satisfactory.

BED BUGS.

9 houses have been disinfested for bed bugs.

NOTIFIABLE DISEASES REPORTED DURING THE YEAR.

During the year, 8 cases of infantile paralysis were reported. With the exception of one fatal case, all were happily of the mild type leaving no residual paralysis.

Details of all cases were reported to Cambridge under the Ministry of Health Infantile Paralysis survey.

Actual Clinic exposure is shown by the number  
 visiting clinics, hospital and laboratory  
 with the exception of the number of visits  
 for all patients treated in the hospital  
 which are not included in the above  
 figures. The number of visits to the hospital  
 is shown in column 2, 3 & 4 above. 2 3 4

# Summary of Clinic and Hospital Visits

Total number of persons whose accounts were  
 closed to be included with this list ..... 7  
 Total number of treated persons reported ..... 2  
 All cases were treated at the medical clinic.

When taken to medical treatment and the re-  
 sults of visits to the medical clinic of visits by  
 general practitioners, hospital medical officers and  
 health visitors and visiting surgeons by visiting the  
 house of children found to be included, and by  
 attending for miscellaneous treatment under special  
 orders of home or of the clinic.  
 Treatment for each case is shown at the end of  
 the medical visits to the persons in each house  
 under supervision of the medical team.

The information of houses is treated by  
 separate paragraphs with results from each visit  
 summarized.

## Key

3 houses have been included for this year.

## Summary of Clinic and Hospital Visits

During the year, a case of infectious mononucleosis  
 was reported. With the exception of one child case,  
 all were healthy at the time of the report and remained  
 healthy.  
 Details of all cases were reported to the medical  
 officer of health under the infectious diseases survey.

(a) CANCER.

No undue prevalence in the District.

Patients resident in Stamford are treated at Stamford Infirmary under the Kesteven County Council Scheme.

Treatment is also provided at the Scunthorpe Centre.

(b) PREVENTION OF BLINDNESS.

Nil.

The Borough Mortuary has been modernised and provided with good post mortem facilities which now meet with the complete approval of the Pathologist, Dr. Fulton of Peterborough.

TUBERCULOSIS.

Four fewer cases of tuberculosis were notified than in 1946.

The number of deaths from tuberculosis (4) remained the same as in 1946. Special consideration was given to persons suffering from active tuberculosis in the allocation of new houses.

I would like to record my appreciation and thanks for the help and co-operation of the members of the Health Committee and Public Health Department during the year.

I am, Ladies and Gentlemen,

Yours obedient Servant,

*B. Suley Hawes.*

July 1948.

Medical Officer of Health.
