CITY OF STOKE-ON-TRENT.

PUBLIC HEALTH DEPARTMENT.

To the Lord Mayor, Aldermen and Councillors of the City of Stoke-on-Trent.

LADIES AND GENTLEMEN,

I have the honour to present to you my Annual Report for the year 1947.

The estimated civil population at the middle of the year was 270,200, an increase of 5,380 as compared with the previous year. Since this estimate was made a number of the previous residents have returned to the district and the population is estimated by the Registrar General as being 273,510 on December 31st, 1947.

The Birth Rate is higher, being 23.5 as compared with 22.2 for the previous year. That for the large towns was 23.3 compared with 22.2 last year.

The Death Rate is 12.1 being the same as last year. The rate for the large towns was 13.0 or 0.3 higher than in 1946.

The Infantile Rate was 61 compared to 55 for last year and 50 for 1945.

The Maternal Mortality Rate is higher, being 1.53 compared with 0.66 per thousand total births. There were 10 deaths compared with 4 in 1946.

No death occurred from Scarlet Fever during the year although 777 cases were notified. The percentage of cases removed to Hospital is steadily declining.

The number of Diphtheria deaths was nil as compared with 6 in 1946, the case fatality was o.o.

The need for immunisation at an early age is as urgent as ever. It is estimated that 72% of the children of school age have been immunised and about 51% of children under 5 years of age. Special clinics are being held each week. The School Medical Staff is also co-operating, and many of the Departments have now a percentage immunised of over 90.

The number of deaths from Gastro Entritis was 96, the highest number since 1926.

There were 59 cases of Acute Anterior Poliomyelitis notified, 43 of which were confirmed. There was one death.

The deaths from Pulmonary Tuberculosis were 144, a decrease of 21 over 1946.

Cancer deaths show a decrease on last year, 477 compared with 500 in 1946 and 455 in 1945. The number of deaths from Cancer is steadily increasing in spite of the slight decrease this year.

Influenza caused 18 deaths compared with 67 in 1946.

Organic Heart Disease caused 910 deaths, a decrease of 15 over 1946.

I wish to thank the Chairman and all Members of my Committees for their assistance, and the staff for their loyal help during the past year.

I am, Ladies and Gentlemen,

Your obediant Servanr,

ALLAN WOTHERSPOON,

Medical Officer of Health.

Public Health Department, Stoke-on-Trent, July, 1948.

AREA AND POPULATION.

The City is 21,190 acres in area. It is 10 miles long, and in no part more than 5 miles wide. About 150 acres are covered with water.

The Registrar General gives the civilian population of the City as 270,200 at the middle of 1947. This figure is an increase of 5,380 on the figure supplied by the Registrar General for the previous year.

The populations at the Cencus periods were as follows :-

	Census 1911	Census 1921 (Extended Area)	Census 1931	Middle of 1947
TUNSTALL	27,390	27.791	27,890	25,250
BURSLEM	41,566	42,462	43,368	38,090
HANLEY	66,255	67,876	66,199	53,380
STOKE	36,218	39.277	44,293	43,030
FENTON	25,626	26,718	26,154	22,140
LONGTON	37,479	42,629	44,297	50,340
SMALLTHORNE, NORTON, BUCK- NALL, etc., Wards 27 and 28		20,894	24,438	37.970
Totals	234,534	267,647	276,639	270,200

The distribution of the population over the whole area at the time of the 1901 Census averaged 18.6 persons per acre, during the year 1911, 21.0 persons per acre, and in 1921, 22.0 persons per acre. The number of persons per acre for the extended City in 1931 was 13.05.

INHABITED HOUSES.

The number of inhabited houses at the Census of 1931 for the City was 58,687. The number of inhabited houses at the present time is estimated at 72,152.

During the year 1947, 609 permanent houses, 441 dwellings and 158 temporary bungalows were certified for habitation, in addition one house was converted into two flats; 383 houses, 441 dwellings and 158 temporary bungalows were built by the Corporation, and 226 houses were built by private owners, and the house converted into two two flats was done so by a private owner.

TABLE. 1-Areas, Population and Persons per Acre in Existing Wards.

28	3,106.00	7,505	10,578	22,260	7.05
	21,190.00	273,238	276,639	270,200	12.75

RATEABLE VALUE.

The rateable value of the city for the purposes of the General Rate at 1st April, 1948 was £1,336,129, compared with £1,312,178 at 1st April, 1947.

BIRTHS.

There were 6,360 births registered and allotted to the City in 1947, giving a birth rate of 23.5 per 1,000 of the population.

The rate for the 126 large towns of England and Wales was 23.3 per thousand and for England and Wales 20.5

The rate is 1.3 higher than in 1946.

The ratio of births of males to births of females during the year was 1,060 to 1,000. For the year 1946 the ratio was 1,046 males to 1,000 females.

The natural increase of population, that is, excess of births over deaths was 3,083. The previous year it was 2,663, a difference of 418 lives, the number of births registered being 486 more than in 1946, while the number of deaths was 68 more.

ILLEGITIMATE BIRTHS.

Of the total births, 288, or 4.53 per cent., were illegitimate, compared with 350, or 5.96 per cent., in the previous year.

STILL-BIRTHS.

Under the Notification of Births Act, all still-births must be notified to the Medical Officer of Health. 167 were notified during the year under the Act, and of these 67 were attended by midwives, 22 by medical men, and 78 took place in an institution.

The number registered during the 12 months ending 31st December was 200, of which 35 were children of mothers from outside the city area.

Taking the number of still-births that occurred in 1947 as 165, it is equal to 2.53 per cent of the total births. In 1946 there were 205 still-births, equal to 3,37 per cent.

DEATHS.

The number of deaths registered in the City during the year 1947 was 3,551. This gives a death rate of 13.1 per 1,000 of the population. Of the total deaths, 1,622 occurred in public institutions in the district. If the deaths of non-residents which occurred in the district be excluded and the deaths of residents which occurred beyond the district be included the nett deaths belonging to the district is 3,277 (1,721 males and 1,556 females), and the death rate 12.1 per 1,000.

The death rate for the 126 large towns of England and Wales was 13.0 per 1,000 and for the whole of England and Wales, 12.0.

The death rate of 12.1 per 1,000 was the same as that of 1946.

The death rate for the 126 large towns of England and Wales was 0.3 higher in 1947 than in 1946.

INFECTIOUS DISEASES.

Scarlet Fever.

Number of cases notified		 777
Number of cases removed to l	nospitals	 327
Percentage of cases removed		 42.1
Number of cases in which d	3.0	754
Number of deaths		 0
Case fatality per cent		 0.0

The attack rate for the City during the year was 2.88 per 1,000 of the population.

The mortality rate in the district during 1947 was 0.000. The mortality rate for the disease in England and Wales was 0.00 per 1,000 of the population, and in the 126 large towns 0.00 per 1,000.

Diphtheria.

Number of cases notified		38
Number of cases removed to hospitals		38
Percentage of cases removed		100
Number of cases in which diagnosis confirmed	was	16
Number of deaths		0
Case fatality per cent		0.0

The attack rate for the City was 0.14 per 1,000 of the population.

The death rate from Diphtheria in the City was 0.00 compared to 0.01 in the 126 large towns, and 0.01 in England and Wales.

Typhoid and Para Typhoid Fever.

Number of cases notified		3
Number of cases removed to hospitals		3
Percentage of cases removed		10.0
Number of cases in which diagnosis confirmed	was	3
Number of deaths		0
Case fatality per cent		0.0

Arrangements have been made for the inoculation against Enteric Fever, free of charge.

Smallpox.

During the year no cases of Smallpox occurred.

Erysipelas.

There were 63 cases notified during the year and in all but four cases the diagnosis was confirmed and there was one death. In 1946 56 cases were notified with no deaths.

Cerebro-Spinal Fever.

Twenty-seven cases were notified as Cerebro Spinal Fever during the year and eighteen confirmed bacteriologically. There were five deaths.

Acute Encephalitis Lethargica and Acute Polio-Encephalitis.

There were no cases of Acute Encephalitis Lethargica notified during the year.

Acute Anterior Poliomyelitis.

There were fifty-nine cases notifed during the year, in 43 cases the diagnosis was confirmed. There was one death. Details of these fifty-nine cases will be found on pages 23 and 24.

Malaria and Dysentery.

There was one case of Dysentery notified during the year.

There was no case of malaria notified during the year.

Influenza, Pneumonia and Broncho Pneumonia.

The number of cases notified during the year was:—Influenzal Pneumonia, 21 and Pneumonia and Broncho Pneumonia, 287. The number of deaths was:—Influenza, 18, being equal to a rate of 0.067 per 1,000 of the population; and Pneumonia and Broncho Pneumonia, 187, being equal to a rate of 0.692 per 1,000 of the population.

These diseases were more prevalent than in 1946.

SCHOOLS.

The Medical Officer of Health is the School Medical Officer.

No school was closed on account of infectious disease.

CITY INFECTIOUS DISEASES HOSPITAL, BUCKNALL.

During the year 1947, 635 cases were admitted.

The following table shows the cases admitted during the year with diagnosis uncorrected, and the number of deaths:—

					Cases	Deaths
Scarlet Fever				 	334	I
Diphtheria				 	41	_
Enteric Group	disease			 	9	3

Diphtheria.

There were 13 cases of true diphtheria admitted, the remaining 28 were proved not to be diptheria. There were no deaths.

Meningitis.

30 cases were admitted, notified as suspected Cerebro Spinal Fever. Of these, 18 proved to be true cases, and two deaths occurred among those cases. In addition there were two deaths from Tubercular Meningitis among the wrongly notified cases.

Diphtheria Immunisation.

There were 4,876 children immunised at the school clinics, the special sessions held at the Infant Welfare Centres and the weekly clinics at Richmond Lodge Welfare Centre, held each Monday afternoon. 3,464 of those immunised were under school age.

Respiratory Diseases.

During the year there were 356 deaths from Respiratory Diseases, giving a death rate of 1.32 per 1,000 of the population, as compared with 1.34 for the year 1946.

The distribution of these deaths is shewn below :-

No. of deaths from Bronchitis		 82
No. of deaths from Pneumonia		 187
No. of deaths from Fibroid Phthisis		 2
No. of deaths from Pleurisy		 5
No. of deaths from Silicosis		 34
No. of deaths from other Respiratory Diseases	3	 46
TOTAL		 356

Lead Poisoning.

This is an affection which is associated with pottery manufacture. Through careful supervision, and under the Special Rules of the Home Office, lead poisoning has diminished. According to the Report of the Departmental Committee there were engaged in 1907 as lead workers under the Earthenware and China Rules in North Staffordshire, 5,299 persons (3,371 males and 1,928 females). In 1939 there were 5 cases of lead poisoning, in 1940 4 cases, in 1941 5 cases, in 1942 8 cases, in 1943 2 cases, in 1944 no cases, in 1945 no cases, in 1946 no cases, and in 1947 there were no cases. In 1939 there were no deaths attributed to lead poisoning, in 1940 two, in 1941 three, in 1942 four, in 1943 one, in 1944 none, in 1945 none, in 1946 none and in 1947 there were no deaths.

Cancer.

The total number of deaths from cancer was 477, a decrease of 23 from the previous year. This is equal to a death rate of 1,765 and in England and Wales the rate was 1,853.

Acute Anterior Poliomyelitis.

Fifty-eight cases were admitted as Acute Anterior Poliomyelitis. In addition once case notified as Meningitis proved to be Anterior Poliomyelitis making a total of fifty nine cases treated during the year. Of these sixteen proved not to be true cases, leaving forty-three definite cases.

Totals	I	13	9	4	-	27
	-			-	-	-

From the above Tables it is seen that males and females have been almost equally affected. The big majority of the cases have been in young children.

In this district, the epidemic has been fairly mild. Only one death has occurred, a man of 34 years of age, who was treated in the Respirator at the City General Hospital, but died of Bulbar Paralysis.

One case occurred where all four limbs were completely paralysed, but in the majority of cases only one or two limbs were affected.

As regards the ultimate fate of the patients, it is impossible at the moment to state this with accuracy. All cases requiring further remedial treatment have been transferred to the Orthopaedic Hospital, Hartshill as In or Out Patients.

It is believed that the majority of the patients will recover full use of their limbs and there will be very little permanent incapacity.

Tuberculosis.

No persons have been compulsorily removed to Hospital under either the Public Health Acts, 1925, and no action has been taken under the Public Health (Prevention of Tuberculosis) Regulations, 1925, with reference to Dairy workers.

Pulmonary Tuberculosis.

Three hundred and seventeen cases were notified in accordance with the provisions of the Public Health (Tuberculosis) Regulations.

Out of the 144 deaths from Pulmonary Tuberculosis during the year, 28 had not been notified, a percentage of 19.4. There were 22 deaths from other forms of Tuberculosis, and 13 of these had not been notified, a percentage of 59.1 which is much too high a figure and it is hoped that it will be considerably reduced by more careful attention to notification.

The 144 deaths is equal to a death rate of 0.533 per 1,000; in 1946 there were 165 deaths and a death rate of 0.62 per 1,000. In England and Wales, in 1947, the death rate was 0.470 per 1,000 (Males 0.593, Females 0.362).

There were 22 deaths in the year from forms of tuberculosis other than Pulmonary, equal to a rate of 0.081 per 1,000 of the population. In 1947 the rate for England and Wales was 0.079 (Males 0.092; Females .075).

The total death rate from all forms of tuberculosis was 0.614 per 1,000. In 1947 the rate for England and Wales was 0.549 per 1,000 of

the population.

Other Forms of Tuberculosis.

There were 51 cases notified of other forms of Tuberculosis, and 22 deaths, giving a rate of 0.081 per 1,000 of the population. Of these deaths, seven occurred among children between the ages of one year and five years. Of the 22 deaths, 13 had not previously been notified. There were 10 deaths from Tubercular Meningitis.

Table shewing the number of cases notified as suffering from other forms of Tuberculosis during 1947.

Totals		. 2	13	16	6	11	2	1	51

Of the 51 cases of other forms of Tuberculosis notified 16 were Tubercular Glands, compared with 17 in the previous year.

The work of the Tuberculosis Department is carried out from the Central Dispensary at Shelton, which provided facilities for the early diagnosis, treatment, and supervision of cases of Pulmonary Tuberculosis.

The following table is compiled from the Ministry of Health Returns (37 T. Rev.)

Return relating to the work of the Tuberculosis Dispensary during the year ending 31st December, 1947.

The following table gives a detailed report and comparison of the work carried out at the Dispensary during the years 1943-1947:—

	1943	1944	1945	1946	1947
New cases examined (excluding contacts)	1,865	2,058	2,154	2,259	2,364
New contacts examined	330	369	403	410	336
Patients' attendances	10,107	11,154	11,810	13,122	13,331
X-ray examinations made in connection with Dispen- sary work	6,659	7,501	9,403	10,383	11,855
Sputum examinations made in connection with Dis- pensary work	3,576	4,238	3,745	4,270	4,512
Artificial pneumothorax refills given at the Dispensary		2,517	3,061	3,544	3,605
Examinations of persons referred by Medical Boards under the N.S. (Armed Forces) Act, 1939	151	182	130	59	42
Visits by tuberculosis health visitors to patients'					
homes*	6,030	4,851	3,507	4,904	3,859

^{*} The decline in the number of visits by tuberculosis nurses is due to shortage of staff since 1943.

The number of T.B. plus cases on the Dispensary Register on 31st December, 1947, was 683.

There are 91 beds available at Stanfield Sanatorium and 48 at Cheshire Joint Sanatorium for adult male and female patients, whilst 50 beds are available to Bagnall Sanatorium for children.

Admissions to Bagnall, Stanfield and Cheshire Joint Sanatoria (excluding observation cases) have been as follows:—

		Stanfield	Cheshire Joint	Bagnall
Males		74	38	_
Females		50	43	-
Children		I	I	35
Тота	AL	125	82	35

The conditions of patients on discharge has been as follows:-

		Stanfiel	d	Cheshire Joint	Bagnall
Improved		67		35	31
Stationary		39		23	3
Worse		1		8	-
Deaths		13		I	-
Тота	L	120		67	34

Included in the admissions to Stanfield Sanatorium are 4 Service cases which were transferred from hospitals for examination by a medical board and discharge from the Services.

At the beginning of the year, there were 46 observation cases in the three Sanatoria, and 123 cases were admitted for observation during the year. The number of observation cases discharged was 138, the diagnosis on discharge being: "tuberculous," 3; "non-tuberculous," 81; and "doubtful," 54. At the end of the year, there were 31 undiagnosed cases in the Sanatoria.

The following table refers to work carried out at Stanfield Sanatorium during the years 1943-1947:—

	1943	1944	1945	1946	1947
Artificial pneumothorax inductions	19	17	23	- 23	10
Artificial pneumothorax refills	486	424	753	768	749
X-ray examinations	735	424	923	789	869
Tuberculin treatment	597	809	389	302	342
Erythrocytes Sedimentation Rate			306	248	420

MINISTRY OF HEALTH MEMORANDUM 266/T.

At the beginning of year, 70 patients were receiving Tuberculosis Maintenance Allowances and 139 applications were received during the year. Of these, 19 were ineligible and maintenance allowances have been granted to 120 patients. At the end of the year, 85 patients were receiving Tuberculosis Maintenance Allowances.

During the year, 9 Discretionary Allowances were granted. At the end of the year, 4 patients were receiving Discretionary Allowances.

AFTER-CARE.

The work of this voluntary Committee has been maintained at the high standard of previous years.

During the year, 15 cases of persons requiring assistance were considered. Financial assistance was granted in 13 cases, 1 person was supplied with clothing and 1 with bedding. Special grants of 10/- each for Christmas were paid to 23 patients in addition to those already in receipt of weekly grants.

Owing to the system of points in allocating council houses, no recommendations from this Committee are now sent to the Housing Committee.

SURGICAL TUBERCULOSIS.

The Corporation had an agreement with the North Staffs. Cripples Aid Society for the use of twelve beds for the treatment of children suffering from Surgical Tuberculosis, six beds for children under five years of age (non-tubercular), and six beds for adult Surgical Tuberculosis cases. Owing to war conditions this agreement is in abeyance at present and temporary arrangements have been made.

Dr. D. Wainwright reports as follows:

"During the year 1947, 303 cases of Surgical Tuberculosis in children of the City of Stoke-on-Trent, were under treatment at the Orthopaedic Hospital, Hartshill.

Twenty-nine of these cases were treated as in-patients for a longer or shorter period according to their necessities. Twenty have been discharged as cured or improved, and one has died.

1947	 12	16	40 28

The following is a return as to the work carried out at the Out-Patient Clinic at the North Staffs. Royal Infirmary:—

(1) Total number of persons deal with and suffering from :-

				Number of persons dealt with during the year for the first time
(a) Syphilis (b) Soft Chancre				82
				3
(c) Gonorrhoea				92
(d) Conditions other	er than	Ven	ereal	222
	Total			399

(2) Total attendances of all patients: City, 4313; Staffs. County, 4,913; and outside the district other than the County, 434.

VACCINATION.

Statement of Vaccination for the year ending 31st December, 1946.

(Furnished by the Vaccination Officer).

Births			6,443
Successfully vaccinated			2,221
Insusceptible			6
Had Smallpox			-
Died unvaccinated			260
Postponed by Medical Authority			16
Certificates of Exemption (Consciention	ous objecti	on)	1,953
Removals certified			493
Removals not found and not accounted	ed for		255
Not dealt with for various reasons			1,239

Of the total births, only 34.5 per cent. were vaccinated during the year; previous year 37.3.

No re-vaccinations have been performed by the Medical Officer of Health under the Public Health (Smallpox Prevention) Regulations, 1917, amongst contacts where immediate vaccination was not otherwise possible.

CITY GENERAL HOSPITAL.

ANNUAL REPORT OF PROGRESS AT CITY GENERAL HOSPITAL FOR YEAR ENDING 4th JULY, 1948.

The Consulting Staff of the Hospital has been increased to eleven Full-time Specialists, following the offer by the Ministry of Health to give three further members of the staff Temporary Consultants Status.

There are now-Four General Surgeons.

Two Physicians.

Two Anaesthetists.

Pathologist.

E.N.T. Surgeon.

Obstetrician and Gynaecologist.

There has been delay in some of the Schemes for Adaptation of buildings to Special Purposes. Hospital ten Block is under conversion to new Theatres and I hope may be functioning fully in three months' time.

Our present Single Operating Theatre has operating Sessions every Morning and Afternoon and Emergencies almost without exception nightly, and only rests when the nurses prepare stock and sterilise (on Sundays). The number of operations has increased by four hundred over the last year.

Midwifery.—Following the sad death of Dr. Hancock, for over a decade R.M.O. at the Limes, the Public Health Committee decided to make Dr. Lewis also Medical Superintendent of the Limes, and a further Obstetrical Resident who lives at the City General Hospital was added to the City General Hospital Staff. The three Obstetrical and Gynaecological Assistants resident at City General Hospital now in turn do the Gynaecology, the Ante-Natal Clinics or the ward Obstetrical work at the City General Hospital and the Limes.

In July the Royal College of Obstetricians and Gynaecologists recognised the Maternity Wards at the City General Hospital and the Limes for the purposes of study for three Obstetrical Residents for the D.R.C.O.G. The demand for Maternity accommodation has become greater. We decided to book only sixteen cases per week for the City General Hospital of the classes (I) Needing admission because abnormal

clinical findings. (2) Those for whom Sociological conditions demand admission. Having booked sixteen per week to leave the remainder of beds for Emergencies—we still found cases sent back by the Health Visitors who said: "This case must be admitted. Conditions impossible at home." This has pushed our bookings up to twenty-seven per week, excluding Emergencies.

The opening of the new sixteen bed Annexe at the Limes has only been postponed owing to shortage of midwives. For the first time our bookings for future pupils are so good that we hope to open the Annexe in about three months' time. The Ante-Natal Clinics hitherto conducted at the Limes have all been transferred on special days to the Ante-Natal Clinic at the City General Hospital, and the Potteries Motor Traction Co., kindly have put on special 'buses from Stoke to help transport women to City General Hospital Clinics.

Out-Patient Clinics have been further extended and the following lists gives the times of each.

Medical, Surgical, Gynaecological and Obstetrical Clinics for consultation, with a view to admission into the City General Hospital, will be held here at the following times:—

Days. Medical, Surgical, Gynaecological. Obstetrical.

Monday. 9-30 a.m. . . . 9-30 a.m. New Obstetrical Cases 2 p.m. Mr. Crowe. Surgical Cases (C.G.H.)

2 p.m. Ante-Natal Clinic. Re-visits

Tuesday. 9 a.m. Mr. Norrish. Surgical Cases... 9-30 a.m. New Ob. Cases. Limes
Mr. Jordan. E.N.T. Cases. 2 p.m. Ante-Natal Clinic. Re-visits.
(C.G.H.)
2 p.m. Dr. Muldoon. Medical Cases. 9-30 a.m. (C.G.H.).

Wednesday, 1-30 p.m. Mr. Burton. . . 9-30 a.m. Ante-Natal Clinic (C.G.H.)

Gynaecological Cases 2 p.m. Ante-Natal Clinic (C.G.H.).

THURSDAY, 9-30 a.m. Mr. Crowe. Surgical ... 9-30 a.m. New Ob. Cases. (C.G.H.).

Cases 2 p.m. Ante-Natal Clinic. Revisits. (Limes).

FRIDAY, 9-30 a.m. Dr. Muldoon. Medical . . 9-30 a.m. Post-Natal Clinic. Cases. (C.G.H. and Limes). Mr. Jordan. E.N.T. Cases.

2 p.m. Mr. Norrish. Surgical Cases. 2 p.m. Ante-Natal Clinic. Re-visits. (Limes).

Pathology.—Dr. Christopher Giles has worked rapidly to fill the urgent need for Pathological work on the spot at the City General Hospital. Part of the 1st floor of the Old Male Infirm Block was taken over, and work commenced in it before actual benching could be installed. It is now one of the busiest departments in the Hospital.

Chronic Wards.—The first floor of "A" Block which originally was bedroom accommodation for Housemen some years ago and which then was considered unfit to adapt for any function as Hospital Wards has, with a minimum expenditure, been slightly altered and equipped, and now functions most satisfactorily—providing comfortable accommodation for forty-eight Females and forty-eight Males of the chronic bedridden class. The total number of beds in the City General Hospital is now 1,006. Apart from the Mental cases there are now no walking cases except convalescents in the Acute Wards. All Infirm cases who could sit up have been transferred to Chell Institution, and from Chell Institution forty-eight bedridden sick were taken in exchange. We have forty-three beds closed in "Hospital four" from shortage of Nursing Staff.

The New Dispensary is now in full functioning order with three dispensers, and is our best example of an old workhouse block being converted for modern requirements—in this case, into an excellent modern Dispensary.

There are several plans for adaptation of other buildings which the difficulty in procuring permits and materials delays. Thus the Old Stick Chopping Shed is to be converted into a shop and canteen. The shop will sell tobacco, cakes, sweets, etc., so that long-stay patients will have the pleasure of spending the pocket money of their Old Age Pensions or National Health Allowances. Another part of the building will provide refreshments in a cafeteria for those relatives who have to spend hours in Hospital by the bedside of their seriously ill relatives.

The Physiotherapy and Occupational Therapy units have moved to occupy more easily accessible accommodation on the Ground Floor of the Old Male Infirm Block. Here they have much bigger and more convenient accommodation for their individual needs.

MATERNITY AND CHILD WELFARE.

Midwives' Act, 1936.

The following is a summary of the work carried on under the Midwives' Act.

At the end of the year there were 34 midwives employed by the authority. Eleven midwives continue in independent practice, and one works in conjunction with Voluntary Associations.

During the year, the midwives employed by the Council attended a total of 3,431 cases; of these, 365 were attended as maternity nurses. In 1946 the total number of cases attended was 3,044.

The midwives in independent practice attended a total of 374 cases as midwives, and 148 as maternity nurses. The remaining midwife who works in conjunction with a Voluntary Association attended 15 cases as a midwife, and two as a maternity nurse.

A total number of 358 visits was paid to the midwives during the year. The records were found to be well kept and their bags and equipment satisfactory.

No midwife has been reported to the C.M.B. during the year for any breach of rules.

During the year 1947 there were received from Midwives :-

- 1,414 Records for calling in Medical Aid.
 - 23 Notifications of death of new-born child.
 - I Notification of death of the mother
 - 208 Notifications re Failure to Breast-feed.

The 1,414 records for calling in Medical Aid were divided as follows:

- 126 for abnormality or complication during pregnancy.
- 936 for abnormality or complication during labour.
- 117 for abnormality or complication during lying-in period.
- 235 for abnormality or complication in case of the child.

Under the Midwives' Act, 1918, claims were made by doctors for the payment of fees in 969 cases, out of 1,414 instances in which medical aid was called. The 969 claims amounted to £1,888 is. od., compared with £1,413 iis. od. in the year 1946.

Infantile Mortality.

The total number of deaths of infants under the age of one year was 391 being equal to an infantile mortality rate of 61 per 1,000 births. In 1946 the rate was 55.

Of the 391 infants who died in the City before reaching the age of 12 months, 144 or 36.8 per cent. occurred in children under one month old, compared to 54.0 per cent in 1946.

TABLE 8.—Infantile Mortality occurring in the City and Six Districts, 1947.

ANTE-NATAL CLINICS.

During the year, 2,218 expectant mothers attended the Municipal Ante-natal Clinics. In addition, 790 attended the City Matern ty Hospital Ante-Natal Clinic, and 908 the City General Hospital Clinic.

The attendances for the year amounted to 4,521 at the Ante-natal Centres, 5,002 at the City Maternity Hospital, and 9,672 at the City General Hospital Clinic. In addition 47 visits were paid by the Hearth Visitors to the homes of the expectant mothers who attended at the Municipal Ante-natal Clinics.

Children Act.

Infant Life Protection.

The following returns give a summary of the number of children, etc., under the care of the Local Authority during the year :—

I.	Notifications.		
	(i) Numbe	r of foster-parents on the Register :-	
	(a)	at the beginning of the year	18
	(b)	at the end of the year	12
	(ii) Numbe	er of children on the Register :-

Maternal Mortality.

Ten women died in, or in consequence of, childbirth, during the year. The deaths were classified as follows:—

From Sepsis o
From other Peurperal causes... 10

Eight of the cases died in Institutions.

		Puerperal Sepsis	Other Puerperal Causes	Total Puerperal Mortality
1947 Per 1,000 Total Births	 	0.00	1.53	1.53
England and Wales	 	0.26	0.91	1.17
1946 Per 1,000 Total Births	 	0.00	0.66	0.66
England and Wales	 	0.31	1.12	1.43

Infectious Diseases.

Disease	Number of cases notified during the year	Number of cases visited by officers of the Council	Number of cases for whom home nursing was provided by the Council	Number of cases removed to hospitals
(1) Ophthalmia Neonatorum	32	32	21	-
(2) Pemphigus Neonatorum	-	-	_	-
(3) Puerperal pyrexia	28	10	- 1 min	8

NURSERIES.

Demands for admission to the six Day Nurseries and the Residental Nursery are heavy, and nurseries have waiting lists. A high standard of child care is maintained, and children after a few months in the nursery show a good state of nutrition.

During the year the nurseries began training girls from school nurseries in the care of the child under two years of age. This training will enable the girls to sit for the National Nursery Certificate. Under the exchange system girls attached to day nurseries went to school nurseries. The extra educational training now given to students is valuable, but it puts a strain on the staffing of the nurseries.

Hanley Day Nursery has formed a Mothers' Club at which simple talks on the care of the young child, and food demonstrations have proved of great interest to the mothers.

Ophthalmia Neonatorum.

The total number of cases notified by medical men in 1947 was 32, as compared with 38 in 1946.

Ophthalmia Neonatorum has been compulsorily notifiable throughout the whole area since 1911.

Nurses were supplied by the Corporation in 20 cases.

ases of O	phthalmia 1	Neonatorum				
Notified	Treated		Vision unimpaired	Vision	Total	D
Notified	At home	In hospital	unimpaired	impaired	Blindness	Deaths
32	32	-	32		_	_

Day and night nurses are supplied in all cases where necessary. Arrangements also exist for a specialist to consult with the medical attendants free of charge.

ILLEGITIMATE BIRTHS.

Report of 224 cases born in the City :-

- 80 Births occurred in Hospital.
- 61 Infants were multiple births.
- 23 were under 20 years of age, and 175 were first births.
- 13 infants were premature.

The follow-up of these infants give these figures :-

Adopted .. 12

Died .. 9 (5 of these were premature).

The Health Committee has an arrangement with the Lichfield Diocesan Association to deal with selected cases. During the year, 43 girls have come under their supervision. In other cases, the girls received advice and assistance from the Maternity and Child Welfare Medical Officer and the Health Visitors.

The Day Nurseries and the Residential Nursery are also very helpful in the care of the infants while the mother is employed.

HOME HELPS.

During the year Home Helps have been supplied in sixteen cases. In all cases the Department paid and the householder contributed according to her means.

It is not easy to retain the Home Helps. Women do not care for work which is rather of the casual type and in different places.

STILLBIRTHS.

Number of stillbirths, 167.

The steady drop in the proportion of stillbirths continues.

They formed 2.60% of the total births and almost half of them were in the premature baby group.

The ratio of males to females was :-

Males, 90; Females, 77. Total, 167.

In the premature group, this ratio was :-

Males, 44; Females, 29. Total 73.

Seventy-four of the stillbirths were first babies.

Eighty were born at Home.

Eighty-seven were born in Hospital.

Nine babies were multiple births.

PREMATURE BABIES.

All babies are weighed at birth and records are kept of those weighing $5\frac{1}{2}$ lbs. or under.

Total number born alive, 384. (Males, 170; Females, 214).

The number of births of all infants born alive was 6,360.

The premature infants form 6.04% of all live births.

Premature infants born alive in Hospital . . 212

Premature infants born alive at home .. 172

Eighty-four infants were twin births.

A special baby basket was supplied to fifty-two infants born at home.

Thirteen infants born at home were transferred to hospital.

A Nurse who is both State Registered and a Midwife and who has had special premature baby training, visits the infants. This service is very valuable. It enables the mother to remain in her own home surroundings and breast-feed her infant and have skilled advice on the welfare of the infant.

The following figures are of interest :-

Weigh	t of Babies at Birth.	Alive	at end of one month.
(a)	Over 5 lbs	181 (47.1%)	163 (90%)
(b)	Between 4 and 5 lbs.	125 (32.5%)	108 (86.4%)
(c)	Between 3 and 4 lbs.	37 (9.6%)	23 (62.1%)
(d).	Under 3 lbs	41 (10.6%)	6 (14.6%)
		384	300

Infants alive at end of 1st month.

(a)	Home Cases	131 (76.1%)
	**		

(b) Hospital Cases . . 169 (79.7%)

This Table gives the parity and age of 347 mothers:-

Parity	y 1st Birth	is 2nd Births	3rd and 4th Births	5th or more Births	Total
	202	67	55	23	347
Age	Under 19 years	Between 20 and 29 years		Over 40 years	Total
	10	212	III	14	347

It is now possible to review after 12 months, the premature babies born in 1946. Excluding cases resident outside the City and stillbirths, there were 368 premature babies. The following Table shows the position at the end of one year from the birth:—

Number of Maternal deaths during the year		-
Ante-natal attendances for 1947		5,002

Pemphigus Neonatorum.

No cases of Pemphigus Neonatorum were notified during the year.

Measles.

Measles was made compulsorily notifiable in the later months of 1939, and during 1947 there were 3,668 cases notified.

There were 13 deaths during 1947, compared with none in 1946 and 10 in 1945.

The death rate from Measles in 1947 was 0.045 per 1,000 compared with 0.02 for the 126 large towns and 0.01 for England and Wales.

Whooping Cough.

There were 9 deaths from Whooping Cough during the year, compared with 9 in 1946.

The deaths occurred at the following ages :-

Leaflets are distributed through the schools when necessary.

This disease was made compulsorily notifiable in the later months of 1939.

REFUSE COLLECTION AND DISPOSAL.

The total nett cost of refuse and salvage collection and disposal for 1947 was £46,823.

Comparative collection and disposal cost figures for the last five years are :—

Year	Total Nett Cost
	£
1943	25,325
1944	28,142
1945	33,453
1946	41,739
1947	46,823

STREET CLEANSING.

Street Cleansing expenditure during the last five years was as follows:—

					Total Nett Cost
					£

SALVAGE OF WASTE MATERIALS.

During the period January to December, 1947, 4,684 tons of Kitchen Waste were dealt with. After processing, this valuable Pig and Poultry food realised £15,163.

The total cash value of all the materials salved and sold since intensive salvage operations began after the outbreak of war up to 31st December, 1947, is £325,401.

SANITARY CIRCUMSTANCES OF THE CITY.

Chief Sanitary Inspector's Report on :

SANITATION HOUSING AND OVERCROWDING, CONTROL OF CIVIL BUILD-ING SMOKE ABATEMENT, FACTORIES, CANAL BOATS, DISINFECTION, DISINFESTATION AND RODENT CONTROL.

The year 1947 has been a very difficult one from the point of view of shortage of inspectorial staff. The Committee has viewed this matter with concern and whilst every effort has been made to obtain Inspectors, little or no headway has been made.

The fourteen sanitary districts of the City have been less than half staffed and for the most part by newly qualified and inexperienced Inspectors, who nevertheless, have given of their best under difficult and trying circumstances.

The Chairman, on behalf of the Sanitary and Cleansing Committee has expressed personally to the Inspectors the Committee's appreciation of their work.

Sanitary Inspection of the District.

During the year, 20,492 nuisances were dealt with as compared with 15,007 in 1946, and 32,590 inspections, revisits, etc., were made.

INSPECTIONS :-

Houses examined in account of :-

In respect of other causes	 	 5,624
In respect of overcrowding	 	 385
Appointments kept	 	 2,366

COMPLAINTS.

During the year 12,370 complaints were received, of which 756 were unfounded.

771 complaints relating to dangerous structures, street paving, gas and water leakages, and other matters were referred to the Departments concerned.

Table of Sanitary Defects.

Ashbins.

During the year 3,180 Statutory Notices were served on owners requiring them to provide Ashbins, and in addition to this many requests were received from owners for bins.

The total number of bins supplied by the Corporation and charged to the owners during the year, 6,122.

For some years it has been very difficult to buy any quantity of good galvanised dust-bins and it was estimated that about 7,000/8,000 bins in the City were defective. In view of this position, the Corporation accepted a special offer of 10,000 B.S.S. Heavy Round Galvanised Dust Bins at a competitive price in June, and during the six months ending December, 1947, approximately 5,000 bins had been delivered by the Corporation.

Statutory Notices and Legal Proceedings.

In addition to preliminary notices 6,672 Statutory Notices were served under the Public Health Act, 1936, and the Stoke-on-Trent Corporation Act, 1928.

Proceedings were instituted in five cases for non-compliance with Notices under the Public Health Act, and orders were made in all cases. In one instance work was given to the Public Works Department to carry out in default of the court order at an estimated cost of £105.

Common Lodging Houses.

There are two Common Lodging Houses in the City, the largest being the Salvation Army Hostel for men at Stoke, which has accommodation for 109 beds; the other one is a small type of lodging house in the Burslem area and is registered for 14 beds.

Both these premises are conducted in a satisfactory manner. Fiftyeight inspections were made during the year.

Marine Stores.

There are six licensed Marine Stores in the City. Twelve inspections were made, three contraventions found and two abated during the year.

CONVERSION OF PRIVIES AND PAILS TO WATER CLOSETS.

(Public Health Act, 1936, Section 47)

Further progress has been made during the year with the conversion of privy and pail closets into water flushed closets, particularly in the outlying areas. The districts mainly concerned are Fegg Hayes, Chell Green, Oxford, Cornhill, Ball Green, Norton and Milton.

The Fegg Hayes district has been practically completed and work is in progress in Ball Green and Cornhill.

Housing Inspections and Inspections under the Rent and Mortgage Interests (Restrictions) Act, 1920 to 1939.

During the year two blocks of property were reviewed with regard to demolition and in one instance 30 houses were dealt with as a Compulsory Purchase Scheme for the purpose of redeveloping. The other block consisting of 23 houses is still under consideration.

The position with regard to excessively insanitary houses unfit for habitation is constantly under observation. One Demolition and one Closing Order were made and seven informal undertakings accepted during the year. Appropriate action is taken to rehouse the tenants and carry out the demolition or closing of the houses concerned.

A number of families illegally took possession of vacant property in Confirmed Clearance Areas and after they had received due warning to obtain other accommodation court proceedings were instituted in 19 cases. Eviction Orders were made and finally the houses were cleared and the work of demolition proceeded with.

Overcrowding Provisions-Housing Act, 1936.

The housing position is exceptionally bad and continous enquiries are being made by the public as regards abatement of overcrowding. During the year there were 2,232 enquiries made and of these 1,003 were certified as overcrowded in accordance with the provisions of the Housing Act, 1936.

Control of Civil Building.

The revision of the Control of Civil Building under the Defence Regulations 56A placed a very considerable amount of additional work on the Staff, both Inspectoral and Clerical.

All applications for maintenance and repair work of dwelling-houses without limitation of costs and applications for maintenance and repair of factories and other business premises up to £100 are dealt with by this Department and the number of applications is on the increase.

	No.	Value £
Licences granted during the year for dwelling-		
houses	3,540	117,080
Licences granted during the year for business premises	T 000	44,620
5 1 1 1 1 1 1	9,027	323,141

Warnings in respect of unauthorised work were issued in eight instances and legal proceedings taken in one case. Fined £100, costs £25.

Smoke Abatement, etc.

During the year under review further observations, inspections, and demonstrations have been carried out in relation to smoke abatement. As stated in the previous annual report complaints of industrial nuisances (noise, dust and fumes), are still on the increase and these prove to be very difficult to deal with under existing legislation. It was found necessary in one case to resort to court proceedings with a nuisance arising from dust, noise and fumes, and the case was adjourned on an undertaking being given to reconstruct the offending plant.

As requested by the Ministry of Fuel and Power all cases where abatement notices for smoke nuisances are served are referred to their Regional Office for investigation.

Further progress has been made with the installation of electric and gas fired ovens and kilns to replace the intermittent coal-fired type and it is anticipated that considerable progress is likely to be made in the near future. At the present time there are 42 electrically fired, 120 town gas fired and 14 producer gas fired ovens in operation, in the City area.

Considerable attention has had to be given to the inspection of Colliery spoil banks with respect to burning tips and in two instances it has been necessary to serve Statutory Notices.

PART VIII OF THE ACT—OUTWORKERS.

Number of Out-Workers' on the August list was 134 (Wearing Apparel). No notices served. No prosecutions made.

Canal Boat Inspections.

During the year 129 Canal Boats have been inspected, the accommodation provided was for 409 persons, being an average of 3.17 persons per boat.

The number in occupation was 347 persons, being 132 males, 88 females, and 127 children, or an average of 2.69 per boat.

The percentages of males, females and children were: 38 males; 25.4 females; 36.6 children.

Of the 127 children found on the Boats 59 (36 boys and 23 girls) were over 5 years of age, and therefore of school age.

The Canal Boats were registered to carry the following number of persons:—

99 registered to carry 3 persons.

2 registered to carry 3½ persons.

26 registered to carry 4 persons

I registered to carry $4\frac{1}{2}$ persons.

In 17 instances a pair of Canal Boats were worked by one family (in some cases with assistance).

Infringements of Acts of Regulations.

41

Notices were served in 26 cases for infringements and no legal proceedings were taken under the Acts and Regulations during this period. There were no cases of Infectious Diseases notified.

There are at present on the register 232 Canal Boats known to be working. Two Canal Boats were registered by this Authority during the past year.

DISINFECTION AND DISINFESTATION SERVICES.

Disinfection.

Table shewing disinfection following infectious disease, etc. :-

No. of Houses disinfected		 928
No. of Rooms disinfected (included in above)		 1,975
No. of Hospital Wards disinfected		 46
No. of Schools disinfected		 5
No. of Day Nurseries disinfected		 2
Total number of Articles of Clothing, etc. disint	fected	 9,051

Disinfestation.

(ERADICATION OF BED BUGS, COCKROACHES, STEAM FLIES, ETC.).

Specially trained personnel are engaged in this service and treatments have been successfully carried out by the use of fumigants and D.D.T. compounds in liquid and powder form.

The houses and household effects of new tenants for Council Houses are inspected and where necessary disinfestation of the house, furniture, clothes, etc., is carried out. As an additional precautionary measure all new Corporation houses are treated with D.D.T. before occupation.

No. of Private houses treated	 	 132
No. of Council Houses treated	 	 192
No. of Factory premises treated	 	 18

In addition to the disinfestation of dwelling-houses all Corporation Buildings (Offices, Markets, Town Halls, etc.) and a number of factories, bakehouses food premises are under contract for periodic treatment and supervision by the Disinfestation Staff.

RATS AND MICE DESTRUCTION ACT, 1919.

This service is now under the general direction of the Rodent Section of the Ministry of Agriculture and Fisheries. The Staff now comprises five trained operatives under the supervision of a Sanitary Inspector. The following is a summary of the work carried out :-

No. of visits to premises	 14,180
No. of interviews	 335
No. of complaints received	 257
No. of complaints unfounded	 42
No. of premises where rat proofing recommended	 78
No. of premises where rat proofing carried out	 59
Total number of prebaits laid in ozs	 37,516
Total number of prebaits taken in ozs	 12,740
Total number of poison baits laid in ozs	 14,317
Total number of poison baits taken in ozs	 2,529
Estimated kill	 10,415
No. of bodies seen	 2,517
Defective Drains	 20
Drains repaired	 16
Drain tests made— 17 Positive, 45 Negative.	

Sewer Infestation.

The sewer maintenance treatment started in 1946, was completed early in the year and throughout 1947 sewer block control was operated along with surface infestation.

Treatment of the River Trent.

A survey was made during 1946 of rat infestation of the River Trent and it was decided to treat approximately five miles of the river, from Hanley Sewage Works to the boundary at Trentham.

Two treatments were done during the year and the cost was charged to the owners of the land adjoining the river.

FOOD AND DRUGS ACT, 1938.

During the year under review great difficulty has been experienced by proprietors of food premises in obtaining building materials for essential works necessary to make their premises satisfactory for the production of food under hygienic conditions. Many plans were passed by the Local Authority for improvements to properties, but the requisite permits for materials were not granted by the Ministry of Works, in many cases sanction was given to do the work, but no materials could be obtained to carry out the desired improvements.

One case in point is worthy of mentioning. Thirty-five yards of lead water service pipe was required to obtain the necessary water supply to a new bottle washing plant. This demand was turned down by the Ministry. The proprietor of the works then had to erect a sixteen-hundred gallon tank to collect sufficient water over night from a low pressure water main in order to get his machine in action each day. The labour and materials used on the erection of the tank far exceeded the original cost of the lead service pipe and there appeared to be no gain in labour or materials for this particular work.

While fully aware that the war lasted a number of years, little or no repairs were done to premises during that period and it is now more than ever necessary to have such premises put into order if the public health is not to be endangered by the dilapidated condition of the structures, thus making effective cleansing almost impossible.

During the past year, the charges for analysis of samples has been revised and the cost per sample increased from 13/6d. to £1.

The number of samples taken for analysis by the Public Analyst during the year was as follows:—

Formal Samples	 413	Informal Samples	501
Genuine	 856	Non-Genuine	58

The average standard of Fat in the milk samples passed as genuine were as follows:—

Quarter ending 31st March, 1947	 		3.57%
Quarter ending 30th June, 1947	 		3,57%
Quarter ending 30th September, 1947			3.64%
Quarter ending 31st December, 1947	 	1.	3.79%

The sale of Milk Regulations 1939, fixes a minimum fat standard of 3%.

Twenty-eight samples of milk were low in solids-not-fat due to natural causes.

Preservatives in Milk, Butter, Margarine, Jam, etc.

No preservatives were found in any of the milk samples nor in samples of arrowroot, brawn, butter, beef sausage, coffee and chicory essence, Danish Fry, Ginger Wine Essence, ground ginger, jams (five), meat paste, melusino, sponge mixture, sugar, strawberry jelly, salami, syrup, sausage (tinned) and tomato powder.

PRESERVATIVES WERE FOUND IN SAMPLES AS FOLLOWS :-

Bacon (4) 172, 50, 500 and 50 parts per million Sodium Nitrate. Gelatine Powder (2), 770 and 512 parts per million Sulphur Dioxide Margarine (5), 0.13%, 0.15%, 0.21%, 0.08%, 0.09% Boric Acid. Orange Flavour Crystals, 32 parts per million Sulphur Dioxide. POM Dried Potato, 120 parts per million Sulphur Dioxide.

Proceedings under the Acts were instituted as follows:-

466A	 Chlorophyll Tablets	6th Nov.,	 50% Deficient in saccharated iron phosphate. Informal sample.
395	 Chlorophyll - Tablets	1	 Formal of No. 466A. Found genuine.
487A	 Orange Flavour Spread	1947 22nd Nov., 1947	 Does not comply with Labelling of Food Order. Stocks withdrawn from sale.
501A	 No. 10 Cocktail	. 10th Dec., 1947	 Does not comply with Labelling of Food Order. Stocks withdrawn from sale.

Twenty-eight samples of milk although low in solids not fat were returned as genuine, the deficiency being due to natural causes as proved by the Freezing Point depression test.

Registration of Wholesale Margarine Dealers.

One new registration was granted for carrying out the business of a wholesale margarine dealer.

Merchandise Marks Act, 1926.

No inspections were made under the above Act and Orders and they are still in abeyance.

Rag Flock Act, 1911.

No samples of rag flock were submitted for analysis during the past twelve months. This commodity is in very short supply.

Fertilizer and Feeding Stuffs Act, 1926.

No samples of fertilizer and feeding stuffs were submitted for analysis during the period under review.

Stoke-on-Trent Corporation Act, 1935. Section 68 and Food and Drugs Act, 1938, Section 13.

1,156 visits were made to Ice-Cream premises during the year. Ninety-six contraventions were reported and 150 abated.

Ninety-four registrations were voluntarily surrendered and six registrations were revoked.

Eleven registrations were granted.

Fifty-four samples of Ice-Cream were submitted for bacteriological examination. Fifteen samples were found to comply with the Provisional Standard and thirty-nine failed to pass the test. Advice was given in each case to the Manufacturers on methods to improve the bacterial standard of their commodity.

Food and Drugs Act, 1938. (Milk Supplies).

Further changes have taken place during the year. The Staffordshire County Council Bacteriological Laboratory was taken over by the Public Health Laboratory Service (Medical Research Council or Ministry of Health) and all samples of milk are submitted for bacteriological examination to that laboratory.

294 Samples of ordinary raw milk were submitted for bacteriological tests as follows :—

City Farms—165.

- 88 Samples showed no coliform organisms in 1/10th c.c.
- 21 Samples showed coliform organisms in 1/10th c.c.
- 16 Samples showed coliform organisms in 1/100th c.c.
- 40 Samples showed coliform organisms in 1/1000th c.c.
- 107 samples passed the methylene blue test and
- 57 Samples failed to pass this test.
- I Sample not tested owing to sourness.

County Farms-129.

- 64 Samples showed no coliform organisms in 1/10th c.c.
- 17 Samples showed coliform organisms in 1/10th c.c.
- 11 Samples showed coliform organisms in 1/100th c.c.
- 37 Samples showed coliform organisms in 1/1000th c.c.
- 85 Samples passed the methylene blue test.
- 44 Samples failed to pass the test.

Seventy-four samples of Processed Milks were also examined :-

66 Samples passed the methylene blue test, 6 failed to pass and 2 samples were sour. 64 of these samples also passed the phosphatase test. 10 samples failed to pass this test.

232 of the samples were also examined for the presence of Tubercle Bacilli, with results as follows:—

Situation of Farms	s	Negative	Positive	Per Cent. Affected
City Area		138	3	21.2
County Area		85	6	6.6

- I Sample showed the presence of brucilla abortus in the milk.
- 6 Samples of sterilised milk were also submitted for bacteriological tests. All the samples passed the methylene blue and phosphatase test.

Milk (Special Designations) Orders, 1936-46.

154 samples of designated milks were submitted for bacteriological tests as follows:—

TUBERCULIN TESTED, 13.

- 7 Samples show no coliform organisms in 1/100th c.c. 3 tubes.
- 4 Samples showed coliform organisms in 1/100th c.c. I tube.
- I Sample showed coliform organisms in I/Iooth c.c. 2 tubes.
- I sample showed coliform organisms in I/Iooth c.c. 3 tubes.
- 10 Samples passed the methylene blue test and three samples failed to pass.

TUBERCULIN TESTED-PASTURISED, 11.

9 Samples passed the methylene blue test and 2 samples failed to pass.

All samples passed the phosphatase test.

HIGH TEMPERATURE SHORT TIME PASTEURISED, 41.

40 Samples passed the methylene blue test and I sample failed to pass.

38 Samples passed the phosphatase test and 3 samples failed to pass.

PASTEURISED, 13.

II Samples passed the methylene blue test and 2 samples failed to pass.

All the samples passed the phosphatase test.

84 of the designated milks were also examined for the presence of tubercle bacilli. All the samples were negative.

One sample of accredited milk was found to contain melentensis and 2 samples showed the presence of brucella abortus.

Summary—Total number of all milks submitted for bacteriological examination, 528.

Total number of samples submitted for biological tests, 316. Negative, 307; Positive, 9; Tubercle positive, 2.84%.

Milk and Dairies Order, 1926.

358 Cowsheds were visited and 640 dairies during the year under review.

9 Cowsheds were re-conditioned.

11 Dairies were repaired.

Public Swimming Baths.

- 53 Samples of Swimming bath water were submitted for bacteriological examination.
 - 34 samples were satisfactory.
 - 19 samples were unsatisfactory.

Water Samples.

I Sample of drinking water was examined. This was from a spring supply.

Chemically: Satisfactory. Bacteriologically: Unsatisfactory.

A town supply has now been provided at these premises.

Special Duties.

451 visits were made to premises in connection with enquiries and interviews.

FOOD INSPECTION.

Report on the inspection of meat and other foods, and the supervision of premises where food is prepared, stored or sold.

Meat Inspection.

Animals slaughtered and inspected in the City :-

1946		_	-	52	II	-	I	5	69

Livestock (Restrictions on Slaughtering) Order, 1940.

Under the Government Scheme for the control and distribution of meat all slaughtering of cattle continues to be carried out on behalf of the Ministry of Food at the Corporation Abattoir, Hanley, and at the Keele Street Slaughterhouse, Tunstall. In addition, two private licensed slaughterhouses are used for the slaughter of pigs for bacon production. This concentration of slaughtering makes it possible for adequate inspection to be carried out and all carcases and offals are inspected at the time of slaughter.

During the year 315 pigs were slaughtered under licence on private premises by producers for their own use.

Tuberculosis Order, 1938.

During the year, 17 cows were slaughtered under the provisions of the above Order. Eleven were found to be affected with advanced tuberculosis and the whole carcases and all organs were condemned. Six were found to be affected with non-advanced tuberculosis and in five of these cases the affected organs were condemned. In the remaining case the carcase was condemned for emaciation and dropsy.

Slaughter of Animals Act, 1933.

HUMANE SLAUGHTERING.

The stunning of all animals is carried out by means of electrically operated instruments or captive bolt pistols.

SLAUGHTERMEN'S LICENCES.

Section 3 of the Act requires the licensing of slaughtermen by the Local Authority and only fit and proper persons who have attained the age of 18 years are permitted to hold such a licence.

WATER SUPPLY.

The water supply of the City is provided by the Staffordshire Potteries Water Board, and is mainly obtained from the wells and boreholes sunk in the New Red Sandstone rocks. A small quantity is obtained from springs issuing from the Millstone Grit.

The supply is a constant one, and practically all the houses within the City have a piped supply for domestic purposes. Only a few persons draw water from standpipes. Water is supplied also for the trade purposes of the district.

The water is not plumbo solvent. Chloramine treatment is applied. to the whole of the water supplied.

During the year ended 31st December, 1947, the Board submitted 132 samples of water as supplied to the district to the Counties' Public Health Laboratories for bacteriological examination and were reported on as being "very satisfactory, clear and bright in appearance and of the highest standard of bacterial purity indicative of pure and wholesome water suitable for the purpose of public supply. Of the total number of samples taken 99.5 per cent. gave negative results when tested for Bacteria Coli and the Clostridia Welchi Reaction.

The total rainfall during the year 1947 was 26.92 inches, this being well below the average. Of the past seven years only two years (1944 and 1946) had a yearly rainfall above the average, consequently the yields from the wells and boreholes are still below normal. The use of water continues to increase, some of which no doubt is legitimate, but there is every reason to think that much of the increase is due to waste from pipes and fittings, repairs to which have been neglected during the war years. It is also partly due to the indifference on the part of many consumers. The margin between the total water available from the sources and the consumption is now too small for safety.

The Water Board has been given permission to proceed with the construction of the new sources of supply in Cheshire, work on which had to be stopped owing to the war conditions. Test pumping of the No. I Borehole at Peckforton has proved very satisfactory.

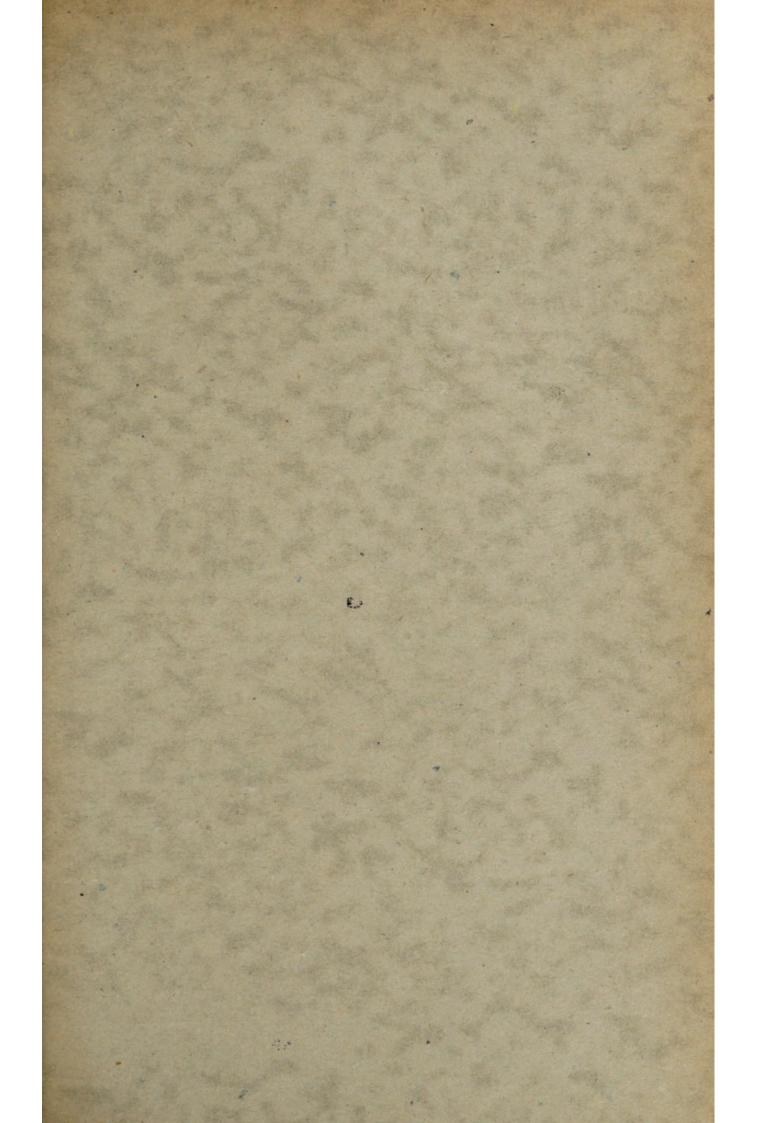

The first stage of these Works is now in course of construction, including the sinking of further Boreholes and laying of part of the Main, and the construction of Bignall Hill Reservoir.

Other substantial additions to the water resources of the Board are in course of construction.

REGISTER OF RAINFALL IN 1947 KEPT AT THE MEIR, LONGTON.
