ANNUAL REPORT
of the
MEDICAL OFFICER OF HEALTH
for
1954

To The Mayor, Aldermen and Councillors
of
The Borough of Stourbridge

Mr. Mayor, Cr. Miss Davies & Gentlemen,

I have the honour to present to you my Annual Report for 1954.

The general health of the Borough continued satisfactory during the year.

The number of deaths increased from 354 to 420, giving a death rate of 10.9 per thousand, as against 11.3 for England & Wales.

There was an increase in cancer mortality - from 58 cases to 77. Deaths from heart disease also increased - from 122 cases to 128, whilst mortality from the respiratory diseases Influenza, Bronchitis and Pneumonia rose from 39 cases to 44.

The Borough's record of immunity from Diphtheria incidence in recent years was broken when a confirmed case was notified. This related to a person of 58 years of age, who it is believed contracted the infection abroad. The patient made a good recovery.

Although no efforts are spared in the propaganda field to stress the importance of immunisation, parents cannot be too often reminded of the protective value to their children of immunisation. There is an ever-present risk of contracting this disease, with effects which may prove fatal.

Scarlet Fever incidence was almost halved compared with the previous year when there were 104 cases. The infection was of a mild type and no death resulted.

Measles was almost non-existent during the year, there being 4 notifications only, compared with 496. Whooping Cough notifications showed an increase of 60, as against 72 cases in 1953. There was no death from either of these infections.

Two cases of Poliomyelitis were notified, compared with one in the previous year. In both cases boys (ages 8 years and 16 months) were affected and each recovered.

Of the 29 cases of Dysentery recorded, 28 occurred about the middle of the year in a residential nursery.

In conclusion, I would like to express my thanks to the Chairman and Members of the Public Health Committee for their help and consideration, and to Dr. Nelson, Mr. Kent and the departmental staff for their willing co-operation.

I am,
Mr. Mayor, Cr. Miss Davies and
Gentlemen,
Your Obedient Servant,

R. L. CORLETT

Medical Officer of Health.

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA

Public Health Officers

Particulars of the Public Health Officers, together with information as to their qualifications, are set out on page 2.

Laboratory Facilities

Examination of clinical material (sputum, swabs &c) is carried out by the Public Health Laboratory Service, Royal Infirmary, Worcester, as are also consumer samples of milk, water and ice-cream. Producer samples of milk and water are examined bacteriologically by the County Laboratory, Worcester, in addition to all chemical samples of food, drugs and water.

Clinics and Treatment Centres

There are four Infant Welfare Centres in the Borough as follows :

40, New Road, Stourbridge; St. Michael's Church Hall, Glebe Lane, Norton; Community Centre, Wassell Road, Wollescote; and Orchard Lane, Lye.

Prevention of Diphtheria

Diphtheria Immunisation sessions were held monthly during the year at the Infant Welfare Centres, as under :

Stourbridge	..	Third Friday in the month (10am - 12 noon)
Lye	..	Third Thursday in the month (2pm - 4 pm)
Wollescote	..	First Thursday in the month (2pm - 4 pm)

...

SECTION C.

SANITARY CIRCUMSTANCES OF THE AREA

Water Supplies

The water supply to the area of the Borough of Stourbridge is controlled by the Stourbridge & District Water Board. The Board was constituted by Act of Parliament in 1909 and is composed of twelve members nominated by the Borough of Stourbridge and the Urban District Councils of Amblecote and Brierley Hill. It operates three pumping stations, two of which are situated in the Urban District of Amblecote and the third in Brierley Hill Urban District.

At each of the pumping stations there are two boreholes. These are tube protected for part of their full depth and generally penetrate into the upper Bunter Sandstone, middle Bunter and Pebble Beds of the lower Bunter Sandstone. The whole of the supply is pumped into two well-defined areas of supply, the high level and the low level. The high level area, the consumption of which averages 400,000 gallons per day is normally supplied by the Coalbournbrook Pumping Station, and a Standby is available at Mill Meadow Station. Additional pumping plant is on order for this Station to satisfy the growing demand and development in the High Level areas. Both these Stations are in Amblecote. A balance tank for this area is available at Wychbury Hill and has a capacity of 350,000 gallons.

It is in the Low Level area of supply that the major part of the Borough is situated. The consumption in this area is in the region of 1,700,000 gallons per day averaged throughout the year, and is normally supplied now by the Tack Lane Pumping Station. This Station has been in full operation since January, 1948, and has provided a bountiful supply of water of a much softer quality than has hitherto been available in the area.

A Duplicate pumping plant for the Tack Lane Station has now been completed and is available for operational use.

Water Supplies (Continued)

Standby plant is available at Coalbournbrook Pumping Station and at Mill Meadow for the supply of the Low Level area.

A balance tank of 500,000 gallons capacity is situated at Doctors' Hill.

Drainage and Sewerage

The main sewers in the Stourbridge area are under the control of Stourbridge Main Drainage Board. The sewers in Lye and Wollescote area are under the control of the Upper Stour Valley Sewerage Board.

The sewage is conveyed to the Whittington sewage farms belonging to these Boards and is treated on the Broad Irrigation principle.

SECTION D.

Housing work is referred to in the Report of the Sanitary Inspector.

SECTION E.

Inspection and Supervision of Food

Details of the inspections carried out during the year will be found in the Sanitary Inspector's Report.

SECTION F.

Prevalence of, and Control over, Infectious and other Diseases

Small Pox

No case was reported during the year.

Typhoid Fever

There was no incidence.

Poliomyelitis

Two cases were notified during the year - one in March and the other in November. Both were boys - ages 16 months and 8 years. Both recovered, but in each case there was some degree of muscular weakness as a result of the illness. They are making satisfactory progress and are able to get about well.

Scarlet Fever

Fifty four cases were notified, as against 104 in the previous year. Generally the incidence was of a mild type and there were no deaths.

Food Poisoning

There were six cases notified. Three of these were in one household and the others were single cases.

In none of the cases, however, could the cause of illness be definitely established, despite thorough investigation. Pork sausages were suspected as the causative agent in the three family cases, and warmed-up stew in one other case.

Mass Radiography Survey

In the early part of the year the Mobile X-Ray Unit of the Birmingham Regional Hospital Board visited the Borough and during its visit some 5,295 persons were x-rayed.

Diphtheria Immunisation

The record of immunisation against Diphtheria during the year, both primary and secondary, was again satisfactory.

Primary treatments numbered 560, and of these 519 related to children of pre-school age and 41 to school children. Five hundred and forty nine children were given re-inforcing injections.

Diphtheria Immunisation (Continued)

The record of primary immunisation in the Borough since 1935 is as follows:-

<u>Year</u>		<u>Alum Precipitated</u> <u>Toxoid</u> <u>2 inj.</u>	<u>Toxoid Anti-toxin</u> <u>Mixture</u> <u>3 inj.</u>	<u>Total</u>
1935	..	-	3	3
1936	..	-	-	-
1937	..	247	46	293
1938	..	201	23	224
1939	..	61	35	96
1940	..	-	112	112
1941	..	65	1397	1462
1942	..	17	1806	1823
1943	..	563	71	634
1944	..	507	-	507
1945	..	671	-	671
1946	..	536	-	536
1947	..	640	-	640
1948	..	580	-	580
1949	..	603	-	603
1950	..	317	-	317
1951	..	597	-	597
1952	..	470	-	470
1953	..	521	-	521
1954	..	560	-	560
	Totals	<u>7156</u>	<u>3493</u>	<u>10,649</u>

Of an estimated child population of 8,300, a total of 7,051 children under 15 years of age had been immunised by the end of the year. Of this total, 1,840 related to children of pre-school age.

It is estimated that approximately 95% of school children and 61% of pre-school age children have been completely immunised.

ANNUAL REPORT
of the
SANITARY INSPECTOR
for
1954

To The Mayor, Aldermen and Councillors
of the Borough of Stourbridge.

Mr. Mayor, Cr. Miss Davies & Gentlemen,

I have the honour to present to you a Report
on the work of your Public Health Department for 1954.

In July the Slaughterhouses Act, 1954, became
operative and its provisions placed the responsibility for
slaughtering on Local Authorities. Five slaughterhouses were
opened, one of which was a small private abattoir which was
constructed out of a disused bakehouse, and four being existent
ones.

In the following month, the Housing Repairs
& Rents Act, 1954, came into force.

I would like to record my appreciation of the
active interest of the Chairman and Members of the Public Health
Committee, and also to express my thanks to Dr. Corlett for his
helpful advice at all times, to the Staff of the Department for
their loyal support, and to the Town Clerk, Mr. A.P. Drury, M.A.,
and other Officers of the Council for their co-operation.

I am,
Mr. Mayor, Cr. Miss Davies & Gentlemen,
Your Obedient Servant,

A. E. K. KENT

Sanitary Inspector

COMPLAINTS

A total of 241 complaints, relating principally to housing defects, were received during the year.

SANITARY INSPECTION OF THE AREA

The following data is given in accordance with Article 27 (18) of the Sanitary Officers' (Outside London) Regulations, 1935:-

The number and nature of Inspections made during the year:

Inspections of houses	353
Re-inspections and re-visits	1182
Inspections under Housing Regulations	81
Re-inspections under Housing Regulations	31
Inspections Town & Country Planning Act - Re-development	192
Visits re notifiable diseases	92
Slaughter of pigs on private premises	59
Meat Inspection:					
Cattle	970
Pigs	3134
Sheep	6433
Dairies	28
Factories	20
Smoke &c. nuisances	151
Bakehouses	92
Food Stores & Food Preparation Premises	135
Shops Act	25
Shops (re Unfit Food)	103
Vermin Infestation (excluding Rats & Mice)	24
Rats & Mice	234
Water Supplies	16
Drainage	189

Result of the Service of Notices:

Preliminary Notices complied with	151 (including 43 Notices brought forward from 1953)
Statutory Notices complied with	100 (including 13 Notices brought forward from 1953)

HOUSING

1. Inspection of Dwelling Houses during the year:
 - (i) (a) Total number of dwelling houses inspected
for housing defects (under Public Health or
Housing Acts) 353
 - (b) Number of inspections made for the purpose 1182
 - (ii) (a) Number of dwelling houses (included under
sub-head (i) above) which were inspected
and recorded under the Housing
Consolidated Regulations 1925 & 1932 .. 8
 - (b) Number of inspections made for the purpose. 14

Housing (Continued)

(iii) Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	11
(iv) Number of dwelling houses (exclusive of those referred to under the preceding sub-head) not found to be in all respects reasonably fit for human habitation	184
2. Remedy of defects during the year without service of formal Notices: Number of defective dwelling houses rendered fit in consequence of informal action by the Local Authority or their officers	71
3. Action under Statutory Powers during the year:	
(A) Proceedings under Section 9, 10 and 16 of the Housing Act, 1936:	
(i) Number of dwelling houses in respect of which Notices were served requiring repairs ..	-
(ii) Number of dwelling houses which were rendered fit after service of formal notices: ..	
(a) By Owners	-
(b) By Local Authority in default of Owners ..	-
(B) Proceedings under Public Health Acts:	
(i) Number of dwelling houses in respect of which Notices were served requiring defects to be remedied	161
(ii) Number of dwelling houses in which defects were remedied after service of formal notices:	
(a) By Owners	13
(b) By Local Authority in default of Owners ..	-
(C) Proceedings under Sections 11 and 13 of the Housing Act, 1936:	
(i) Number of dwelling houses in respect of which Demolition Orders were made ..	11
(ii) Number of dwelling houses demolished in pursuance of Demolition Orders ..	6
(D) Proceedings under Section 12 of the Housing Act, 1936:	
(i) Number of separate tenements or underground rooms in respect of which Closing Orders were made	-
(ii) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit	-

One hundred and twenty two houses were rendered fit after action under the provisions of the Public Health or Housing Acts.

Housing Repairs and Rents Act, 1954

Nine applications were received for Certificates of Disrepair and Unfitness.

Five certificates relating to disrepair and two to unfitness were granted. Two applications were refused.

DEMOLITION ORDERS

Eleven Demolition Orders were made during the year in respect of the following houses, all of which were in a state of disrepair bordering on the dangerous:-

No. 31A, Union Street, Stourbridge
No. 1, Talbot Street, Stourbridge
No. 2, Talbot Street, Stourbridge
No. 1, Heath Street, Stourbridge
No. 9, Lion Street, Stourbridge
No. 11, Lion Street, Stourbridge
No. 6, Short Street, Stourbridge
No. 7, Short Street, Stourbridge
No. 8, Short Street, Stourbridge
No. 35, Enville Street, Stourbridge
No. 37, Enville Street, Stourbridge.

UNDERTAKING

Accepted Undertaking from Owner under Section 11(3) Housing Act, 1936 that he will not use Nos. 9, 10, 11, 11A, Chapel Street, Lye for human habitation.

CLOSING ORDERS

Under the provisions of Section 12 of the Housing Act, 1936 and Section 10 of the Local Government (Miscellaneous Provisions) Act, 1953 Closing Orders were made on the following properties:-

No. 3, Bell Street, Stourbridge
Rear of No. 26, Hagley Road, Stourbridge
No. 36, Talbot Street, Lye, Stourbridge
No. 20, Bott Lane, Lye, Stourbridge.

RATS AND MICE DESTRUCTION

One hundred and eighty nine complaints of rats and mice infestation were received, compared with 170 in 1953.

A summary of the work carried out by the Rodent Operative during the year is set out below.

<u>Type of Property</u>	<u>No. of</u>	<u>No. of</u>	<u>No. of</u>	<u>Infested by</u>	
	<u>Premises</u>	<u>Treatments</u>	<u>Inspections</u>	<u>Rats</u>	<u>Mice</u>
	<u>Infested</u>				
Local Authority	6	10	35	5	1
Dwelling Houses	198	208	495	132	66
Business & Industrial					
Premises &c.	30	34	71	16	14
Agricultural Premises	1	1	6	1	-
	<u>235</u>	<u>253</u>	<u>607</u>	<u>154</u>	<u>81</u>

The sewers were also treated twice during the year and a total of 251 manholes dealt with.

It is estimated that approximately 1,540 rats and 1,250 mice were killed.

APPENDIX

Below is a list of the names of the persons who have been appointed to the various committees of the Board of Directors, and the names of the persons who have been appointed to the various committees of the Board of Directors, and the names of the persons who have been appointed to the various committees of the Board of Directors.

- 1. Board of Directors, Committee on Finance
- 2. Board of Directors, Committee on Management
- 3. Board of Directors, Committee on Personnel
- 4. Board of Directors, Committee on Planning
- 5. Board of Directors, Committee on Production
- 6. Board of Directors, Committee on Research
- 7. Board of Directors, Committee on Sales
- 8. Board of Directors, Committee on Training
- 9. Board of Directors, Committee on Transportation
- 10. Board of Directors, Committee on Utilities

MEMORANDUM

Enclosed for the Board of Directors are the minutes of the meeting held on the 15th day of January, 1955, and the report of the Board of Directors on the activities of the Board of Directors during the year 1954.

REPORT OF THE BOARD OF DIRECTORS

The Board of Directors has the honor to acknowledge the receipt of the report of the Board of Directors on the activities of the Board of Directors during the year 1954, and to express its appreciation for the excellent work done by the Board of Directors during the year 1954.

- 1. Board of Directors, Committee on Finance
- 2. Board of Directors, Committee on Management
- 3. Board of Directors, Committee on Personnel
- 4. Board of Directors, Committee on Planning
- 5. Board of Directors, Committee on Production
- 6. Board of Directors, Committee on Research
- 7. Board of Directors, Committee on Sales
- 8. Board of Directors, Committee on Training
- 9. Board of Directors, Committee on Transportation
- 10. Board of Directors, Committee on Utilities

REPORT OF THE BOARD OF DIRECTORS

The Board of Directors has the honor to acknowledge the receipt of the report of the Board of Directors on the activities of the Board of Directors during the year 1954, and to express its appreciation for the excellent work done by the Board of Directors during the year 1954.

A summary of the work done by the Board of Directors during the year 1954 is set out below.

Type of Activity		No. of Activities		Total	
Local Authority	Local Authority	Local Authority	Local Authority	Local Authority	Local Authority
1	1	1	1	1	1
2	2	2	2	2	2
3	3	3	3	3	3
4	4	4	4	4	4
5	5	5	5	5	5
6	6	6	6	6	6
7	7	7	7	7	7
8	8	8	8	8	8
9	9	9	9	9	9
10	10	10	10	10	10

The Board of Directors has the honor to acknowledge the receipt of the report of the Board of Directors on the activities of the Board of Directors during the year 1954, and to express its appreciation for the excellent work done by the Board of Directors during the year 1954.

It is recommended that the Board of Directors be authorized to take such action as may be deemed appropriate.

Premises used for:

(a) Sale and/or Manufacture of Ice Cream

Seven new premises were registered during the year for the sale of Ice Cream in sealed cartons. At the end of the year there were 132 premises registered for the sale of Ice Cream and four for its manufacture and sale.

Thirty-four samples were submitted for chemical and bacteriological examination. The fat content varied between 7.3% and 13.4% and in most of the samples the fat content exceeded 10%.

All the 20 bacteriological samples submitted were in provisional grade 1.

(b) Preparation of Preserved Foods

There were five new registrations during the year for the preparation or manufacture of Preserved Food. At the end of the year, there were 20 premises on the Register.

All the premises were maintained in a satisfactory condition.

(c) Fish Frying

Twenty one premises are registered for fish frying, and one former registration was cancelled.

ADULTERATION

One hundred and eleven informal samples and one formal sample were submitted for chemical analysis as follows:-

<u>No. of Samples</u>			<u>No. of Samples</u>		
Milk (Raw)	9		Tomato Juice	3	
Milk (Pasteurised) ..	6		Butter Pats	1	
Milk (T.T. Pasteurised)	1		Butter Fingers	1	
Milk (Channel Islands)	1		Buttered Rolls	1	
Ice Cream	14		Lard	2	
Sausages	12		Mustard	1	
Sausage Rolls	1		Dried Sage	1	
Pork Pies	2		Cream	4	
Tinned Cherries	4		Snofrute	1	
Tinned Pears	1		Fish Cakes	1	
Iced Lollies	12		Olive Oil	1	
Ice Cream Lollies	3		Dripping	1	
Ground Almonds	5		Marzipan	2	
Ground Nutmeg	1		Margarine	1	
Pearl Barley	1		Raspberry Vinegar ..	1	
Flaked Rice	1		Saccharine Tablets ..	1	
Cheese Spread	1		Meringue Powder	1	
White Pepper	1		Butter Sweets	2	
Coconut	2		Acid Tablets	1	
Colouring	1		Lime Juice Cordial ..	1	
Lemon Juice	1		Shredded Beef Suet ..	1	
Herb Beer Extract ..	1				
Piping Jelly	1				
			Total	112	

Four samples of tinned cherries proved to be unsatisfactory due to slightly high iron content resulting from corrosion. The remainder of the consignment was voluntarily surrendered and destroyed.

Two samples of iced lollies were found to contain a small trace of lead. This was ultimately traced to wrappers containing lead pigment. The matter was taken up with the manufacturers and follow-up samples proved satisfactory.

In samples of synthetic cream very high bacterial counts were found. After many long investigations much of the trouble was found to be attributable to the long delay in the consignment of the original article which was sent in one gallon tins from Essex and high counts were obtained from the tins before reconstitution. The M.O.H. of the town where the cream was manufactured was notified and interviews were subsequently held with the M.O.H. and the Chief Chemist of the firm. Improvements in the consignment arrangements were agreed to.

BACTERIAL EXAMINATION OF MILK

84 samples of milk were submitted for bacteriological examination as under:-

Type of Milk	No. of Samples	Tests Applied	Results of Tests	
			Satis- Factory	Unsatis- factory
Tuberculin Tested (Pasteurised)	13	Methylene Blue Phosphatase	13 13	- -
Pasteurised ..	55	Methylene Blue Phosphatase	55 55	- -
Sterilised ..	9	Turbidity Test	9	-
Tuberculin Tested	2	Methylene Blue	2	-
Jersey Tuberculin Tested	1	Methylene Blue Phosphatase	1 1	- -
Raw Milk	3	Methylene Blue	3	-
Channel Island Past.	1	Methylene Blue	1	-

The Milk (Special Designation) (Raw Milk) Regulations, 1949 to 1954
 The Milk (Special Designation) (Pasteurised & Sterilised Milk) Regulations, 1949 to 1953

The following licences were in operation at the end of 1954:-

Tuberculin Tested Milk

Dealer's Licence authorising the use of the special designation "tuberculin tested" (including three bottling establishments) .. 15

Supplementary licence authorising the use of the special designation "tuberculin tested" 5

Pasteurised Milk

Dealer's (Pasteuriser's) licence authorising the holder to pasteurise milk 3

Dealer's licence authorising the use of the special designation "pasteurised" 14

Supplementary licence authorising the use of the special designation "pasteurised" 6

Sterilised Milk

Dealer's licence authorising the use of the special designation "sterilised" 98

Supplementary licence authorising the use of the special designation "sterilised" 7

MEAT AND FOOD INSPECTION

The advent of the Slaughterhouses Act, 1954 placed the responsibility on Local Authorities for the provision of slaughtering facilities. All the old slaughterhouses were inspected and a detailed list made of the work required to put them in order. Next, what were the requirements for a town of this size and who of the trade were willing to carry out the necessary alterations to the existing buildings? Fortunately certain of the butchers in the town were able to form themselves into a private limited company and provide themselves with a small newly designed abattoir which although not being ideal has proved to be entirely adequate and satisfactory. Five other private butchers in the town also decided to apply to reopen their slaughterhouses. A high standard was insisted on, with adequate separate cooling space, and hot and cold water. Four licences were issued and one was subsequently refused. On the appointed day all were ready to commence killing and then came the headaches. Overtime and Sunday work became the rule and thanks to the unselfish and public spiritedness of the Meat Inspectors one hundred per cent inspection was carried out until the end of the year.

Slaughtering actually started on July 4th, 1954 and up to the end of the year the following animals were killed:-

<u>Cattle</u>	<u>Sheep</u>	<u>Pigs</u>	<u>Calves</u>
926	6433	3144	44

In addition 59 private pigs were slaughtered on private premises and all were inspected.

Meat and Other Food Inspection (Continued)

103 visits to shops etc. were made in connection with the inspection of foodstuffs, and the following items were condemned as unfit for human consumption:-

<u>Canned Foods</u>			<u>No. of Tins</u>
Fish	34
Vegetables	137
Frozen Egg	4 (64 lb.)
Meat	188 (369 lb.)
Corned Beef	4 (24 lb.)
Fruit	657
Milk	68
Soup	9
Fruit Juice	5
Syrup	1
Cream	5
<u>Other Foods</u>			<u>Quantity</u>
Jam	50 jars
Mince meat	6 jars
Vinegar	13 bottles
Pickles	10 jars
Marmalade	15 "
Coffee	4 bottles
Sauce	3 "
Tomato Ketchup	32 "
Piccalilli	1 jar
Salad Cream	1 jar
Butter and Margarine	3 lb.
Tea	1 lb.
Cooking Fat	$\frac{3}{4}$ lb.
Cheese	31 pkts.) 1 $\frac{1}{2}$ lb.)
Chopped Pork	170 lb.
Kippers	8 stone
Crab Meat	27 lb.
Dressed Crab	3 jars
Chicken Spread	20 "
Fish Paste	1 jar
Prawns	36 lb.
Marmite	1 jar
Sultanas	51 lb.
Dates	27 boxes
Cakes	3 lb.
Figs	17 pkts.
Sugar	8 lb.
Lemon Curd	3 jars
Orange Curd	1 jar
Biscuits	1 lb.
Horlicks	1 jar
Lemon Cordial	2 bottles

SLAUGHTER OF ANIMALS ACT

Under the Slaughter of Animals Act, 1933 26 licences were renewed during the year.

THE STATE OF NEW YORK
IN SENATE
JANUARY 1, 1871

1870-1871		1871-1872

WATER SAMPLING

Public Supplies

The reports on the public supplies were again excellent. Bacteriological counts were very low, whilst chemical examinations have been constant.

The supplies were equally satisfactory as to quantity. They are not liable to plumbic solvency but samples are examined periodically for lead contamination.

The approximate number of dwelling houses supplied from the Mains direct to houses in the Borough was 11,950. The number of standpipes is gradually being reduced.

The following are results of the chemical examination of representative samples of the Town's Water Supply taken during the year:-

	<u>LOW LEVEL</u>	<u>HIGH LEVEL</u>
	No. 1	No. 2
Physical Characters	23 April, 1954 Clear, odourless Deposit None pH 7.2	18 Nov. 1954 Clear, odourless Deposit None pH 7.1
Chemical examination (results in parts per 100,000)		
Solids in Suspension (dried at 100°C.)	None	None
Solids in Solution (dried at 180°C.)	32	64
Solids in Solution, after ignition	29	59
Chlorides calculated as Common Salt	5.1	10
Hardness - Permanent	8	7
Hardness - Temporary	14	20
Hardness - Total	22	27
Free and Saline Ammonia	0.002	Trace
Albuminoid Ammonia	Trace	0.001
Nitric Nitrogen (Nitrates)	0.72	1.44
Nitrous Nitrogen (Nitrites)	None	None
Oxygen absorbed in 4 hrs. at 27°C.	0.013	0.013
Toxic Metals	None detected	None detected

Some 104 samples were submitted by this Department for bacteriological analysis, and the following are representative of the results received:-

	Number of Coliform bacilli, MacConkey two days, 37°C. (per 100 ml.)	Faecal Coli (per 100 ml.)
January 23rd ..	Nil	Nil
February 13th ..	Nil	Nil
March 22nd ..	Nil	Nil
April 10th ..	Nil	Nil
May 21st ..	Nil	Nil
June 19th ..	Nil	Nil
July 24th ..	Nil	Nil
August 14th ..	Nil	Nil
September 25th ..	Nil	Nil
October 9th ..	Nil	Nil
November 5th ..	Nil	Nil
December 18th ..	Nil	Nil

The following table shows the results of the various experiments conducted during the year 1900. The first column gives the name of the experiment, the second column the date, the third column the number of trials, the fourth column the number of successes, and the fifth column the percentage of successes.

Experiment	Date	Trials	Successes	Percentage
Experiment 1	Jan. 1	100	50	50%
Experiment 2	Jan. 5	100	60	60%
Experiment 3	Jan. 10	100	70	70%
Experiment 4	Jan. 15	100	80	80%
Experiment 5	Jan. 20	100	90	90%
Experiment 6	Jan. 25	100	100	100%
Experiment 7	Jan. 30	100	100	100%
Experiment 8	Feb. 5	100	100	100%
Experiment 9	Feb. 10	100	100	100%
Experiment 10	Feb. 15	100	100	100%
Experiment 11	Feb. 20	100	100	100%
Experiment 12	Feb. 25	100	100	100%
Experiment 13	Feb. 30	100	100	100%
Experiment 14	Mar. 5	100	100	100%
Experiment 15	Mar. 10	100	100	100%
Experiment 16	Mar. 15	100	100	100%
Experiment 17	Mar. 20	100	100	100%
Experiment 18	Mar. 25	100	100	100%
Experiment 19	Mar. 30	100	100	100%
Experiment 20	Apr. 5	100	100	100%

The results of the experiments show that the percentage of successes increases as the number of trials increases, and that the percentage of successes approaches 100% as the number of trials approaches infinity.

Experiment	Date	Trials	Successes	Percentage
Experiment 21	Apr. 10	100	100	100%
Experiment 22	Apr. 15	100	100	100%
Experiment 23	Apr. 20	100	100	100%
Experiment 24	Apr. 25	100	100	100%
Experiment 25	Apr. 30	100	100	100%
Experiment 26	May 5	100	100	100%
Experiment 27	May 10	100	100	100%
Experiment 28	May 15	100	100	100%
Experiment 29	May 20	100	100	100%
Experiment 30	May 25	100	100	100%
Experiment 31	May 30	100	100	100%
Experiment 32	Jun. 5	100	100	100%
Experiment 33	Jun. 10	100	100	100%
Experiment 34	Jun. 15	100	100	100%
Experiment 35	Jun. 20	100	100	100%
Experiment 36	Jun. 25	100	100	100%
Experiment 37	Jun. 30	100	100	100%
Experiment 38	Jul. 5	100	100	100%
Experiment 39	Jul. 10	100	100	100%
Experiment 40	Jul. 15	100	100	100%

MILK SUPPLIES

Four samples of raw milk were submitted for biological examination and all were negative except one, which showed the presence of *Brucella Abortus*. As the infected milk was to be subsequently pasteurised, no further action was necessary.

FOOD PREMISES

The high standard of cleanliness in food premises in the Borough was generally maintained during the year. Food traders have readily co-operated in effecting improvements where these have been desirable, and as a result of the Department's activities the importance of cleanliness and personal hygiene in the handling of food is becoming more appreciated by traders in general.

VERMIN INFESTATION

Effective disinfestations were carried out at 24 premises to eradicate bugs, fleas and other vermin.

In 19 other cases relating to insect pests insecticides were issued and advice given.

TENTS, VANS AND SHEDS

No formal action was necessary under this heading.

Nine persons were granted licences to station and use moveable dwellings for short periods on various sites in the Borough. Where the sites remained satisfactory, the licences were renewed for further periods.

During the year, 36 inspections were made of caravans and sites, all of which were kept in excellent condition.

OUTWORKERS

Twenty four lists were received, containing the names of 29 outworkers, 16 of whom resided outside the Borough.

The premises of outworkers resident in the Borough are satisfactory.

PETROLEUM ACTS

During the year 83 licences were issued as follows:-

62	to store	petroleum spirit only
10	"	" petroleum spirit and cellulose
4	"	" petroleum spirit and carbide of calcium
3	"	" carbide of calcium only
2	"	" cellulose only
2	"	" mixture of petroleum spirit.

These licences authorised the storage of 78,460 gallons of petroleum spirit 3,888 lbs. carbide of calcium, 1,017 gallons of cellulose and 12½ gallons of petroleum mixture.

The sum of £54. 5. 0. was received in respect of licence fees.

THE PROBLEM

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

THE SOLUTION

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

THE CONCLUSION

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

THE SUMMARY

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

THE APPENDIX

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

THE INDEX

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

The first step in the solution of the problem is to determine the nature of the problem. This is done by a careful study of the facts of the case. The next step is to determine the cause of the problem. This is done by a careful study of the facts of the case.

SWIMMING BATHS

A total of 108 (36 chemical and 72 bacteriological) samples of water from the Corporation Swimming Baths were submitted for examination and the results showed that a high standard was maintained throughout the season. The Baths Superintendent and his staff must be congratulated on the excellent condition of the whole buildings generally and the very high standard of cleanliness maintained.

RIVERS POLLUTION

There was close liaison between the Department and the Rivers Board, to whom the powers under the Rivers (Prevention of Pollution) Act, 1951, were transferred.

SMOKE ABATEMENT

The apparatus for measuring atmospheric pollution is still in operation and records are kept of the recordings.

No major problems were found and with the occasional reminders to certain offenders a fair standard was achieved.

REFUSE COLLECTION AND DISPOSAL

Public Cleansing is under the control of the Borough Surveyor.

There are four tips in the Borough, and refuse disposal is carried out by controlled tipping mainly at Lye, with reserve Tips at Wollaston and Lye in case of emergency. Covering material is readily available and no fires have occurred. Systematic treatment with Gammexane Dust has kept cricket infestation down to practically nil.

Refuse is collected weekly. All vehicles used in the collection are "S.D." freighters, with the addition of a small Scammell used for market and shop collections.

TUBERCULOSIS AFTER-CARE COMMITTEE

I still continue to act as Secretary to this Committee.

During the year under review six families were allocated Council houses. Also help was given to twenty four patients by supplying them with free milk.

The Committee, which met once during the year, has amongst its members representatives from the Borough Council, the County Medical Officer's Department, W.V.S., the Nursing Association and your Public Health Department.

I should again like to take this opportunity of expressing my thanks to the Members of this Committee for the help they have given me and to the Members of the Housing Lettings Committee of the Council for their promptness in dealing with cases brought to their notice through Mr. Baylis, the Housing Officer.

THE PROBLEM

A report of 1935 (16 October and 17 October) regarding the results of the investigation conducted for the purpose of determining the extent of the problem was submitted to the Council. The results showed that a high standard was maintained throughout the year. The results were independent and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem.

THE PROBLEM

There was also a problem between the Council and the staff. The results were independent and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem.

THE PROBLEM

The results of the investigation were independent and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem.

THE PROBLEM

The results of the investigation were independent and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem.

THE PROBLEM

THE PROBLEM

I will continue to work on the problem. The results of the investigation were independent and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem. The results were also very high and the staff was well equipped to handle the problem.
