ANNUAL REPORT
of the
MEDICAL OFFICER OF HEALTH
for
1959

To The Mayor, Aldermen and Councillors
of The Borough of Stourbridge.

Mr. Mayor, Cr. Mrs. Davies and Gentlemen,

I have the honour to present my Annual Report for the year
1959.

The incidence of infection during the year showed no untoward feature. The higher prevalence of Measles - which was expected - caused no death, and although Pneumonia notifications increased, there were fewer deaths. Scarlet Fever cases increased by 21, but as with Whooping Cough there was no mortality from either infection. No case of Poliomyelitis or of food poisoning was reported, and it is gratifying again to record the Borough's complete immunity from Diphtheria.

In general, the health of the Borough was satisfactorily maintained.

The crude death rate of 10.3 per thousand population favourably compared with 11.6 for the country as a whole, whilst the birth rate increased from 14.42 to 15.27 per thousand as against the national rate of 16.5.

Heart disease and cancer accounted for nearly half the deaths which occurred. From cancer of the lung, there were 17 deaths (14 males and 3 females) compared with a total of 21 in the previous year.

The signs are hopeful that vaccination against Poliomyelitis may be proving an effective weapon in our armoury against this disease. Whereas there were in England and Wales in 1957 4,841 cases and 1,997 in 1958, in 1959 the incidence had reduced to 1,022 cases - a year in which the Summer was unusually hot and providing conditions in which this particular disease tends to flourish. This decline coincided with the country-wide vaccination campaign and encourages the hope that in vaccination we have the means of protection to a high degree.

Towards the end of the year, Dr. Terrell resigned to take up an appointment as Deputy County Medical Officer for Cumberland, and to fill the vacancy Dr. C.W.J. Hingston was appointed, to begin his duties on the first of January, 1960.

Once again I would like to express my gratitude to the Chairman and Members of the Public Health Committee for the help and co-operation extended to me, and, for their unfailing assistance at all times, my thanks are also due to Dr. Terrell, Mr. Kent, Mr. Powell and other members of the staff.

Public Health Dept.,
Council House,
STOURBRIDGE.
Tel.St.5271.

I am,
Mr. Mayor, Cr. Mrs. Davies and Gentlemen,
Your Obedient Servant,
R.L. CORLETT
Medical Officer of Health.

ANNUAL REPORT
OF THE
MEDICAL OFFICER OF HEALTH
FOR
1922

To The Mayor, Aldermen and Commissioners
of The Borough of Stockbridge.

MR. MAYOR, OR MR. DEPUTY, AND GENTLEMEN,

I have the honor to present my annual report for the year

1922.

The incidence of infectious diseases during the year shows no noteworthy features. The higher prevalence of measles - which was expected - caused no doubt, but although pneumonia and influenza were common, there were fewer deaths than in previous years. The mortality rate from all causes was 10.5 per 1,000, which is a slight improvement on the 11.5 per 1,000 recorded in 1921. The mortality rate from all causes was 10.5 per 1,000, which is a slight improvement on the 11.5 per 1,000 recorded in 1921.

In general, the health of the Borough was satisfactorily

The birth rate of 10.5 per 1,000 is a slight improvement on the 11.5 per 1,000 recorded in 1921. The mortality rate from all causes was 10.5 per 1,000, which is a slight improvement on the 11.5 per 1,000 recorded in 1921.

The birth rate of 10.5 per 1,000 is a slight improvement on the 11.5 per 1,000 recorded in 1921. The mortality rate from all causes was 10.5 per 1,000, which is a slight improvement on the 11.5 per 1,000 recorded in 1921.

SECTION B
GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA

Public Health Officers

Particulars of the Public Health Officers, together with information as to their qualifications, are set out on page 2.

Laboratory Facilities

Examination of clinical material (sputum, swabs &c.) is carried out by the Public Health Laboratory Service, Royal Infirmary, Worcester. This applies also to consumer samples of milk, water and ice-cream. Producer samples of milk and water are examined bacteriologically by the County Laboratory, Worcester, in addition to all chemical samples of food, drugs and water.

Clinics and Treatment Centres

There are five Infant Welfare Centres in the Borough as follows:-
40, New Road, Stourbridge; St. Michael's Church Hall, Glebe Lane, Norton; Assembly Rooms, Meriden Avenue, Wollaston; Community Centre, Wassell Road, Wollescote; and Orchard Lane, Lye.

Prevention of Diphtheria and Whooping Cough

Diphtheria/Whooping Cough sessions were held monthly during the year at the Infant Welfare Centres, as under:-

Stourbridge (New Road)	..	Third Friday in the month (10 a.m.- 12 noon)
Lye (Orchard Lane)	..	Third Thursday in the month (2 p.m.- 4 p.m.)
Wollescote (Wassell Rd.)	..	First Thursday in the month (2 p.m.- 4 p.m.)

Welfare Foods

The Department undertakes, on behalf of the County Council, the distribution of Welfare Foods, and during the year the total issues were:-

<u>Dried Milk</u>	<u>Cod Liver Oil</u>	<u>A & D. Tablets</u>	<u>Orange Juice</u>
<u>Tins</u>	<u>Bottles</u>	<u>Packets</u>	<u>Bottles</u>
13,491(15,702)	3,737(3,711)	3,313 (3,248)	29,263(28,864)

(Figures in parentheses denote previous year's issues)

SECTION C
SANITARY CIRCUMSTANCES OF THE AREA

Water Supplies

The water supply to the area of Stourbridge is controlled by the Stourbridge and District Water Board. The Board was constituted by Act of Parliament in 1909, and is now composed of 14 members nominated by the Borough of Stourbridge, the Urban Districts of Amblecote and Brierley Hill, and the Rural District of Bromsgrove. It may be of interest to note that on the 1st April, 1957 a piped water supply had been in operation for 100 years in the Stourbridge District. Previously to the Act of 1909, the functions of the Water Undertaking were administered by the Stourbridge Waterworks Company which was incorporated by an Act of Parliament in 1854.

There are three pumping stations, two of which are situated in the Urban District of Amblecote, and the third in Brierley Hill. At each of the pumping stations there are two boreholes. These are tube-protected for part of their full depth and generally penetrate into the upper Bunter Sandstone. The whole of the supply is pumped into two well-defined areas of supply, the high level and the low level.

The high level area which includes the recent housing development of the Pedmore Fields Estate has a consumption of more than half-a-million gallons per day, and is supplied normally from the Coalbournbrook Station. Standby plant is available at the Mill Meadow Station. Both of these stations are situated in Amblecote and pump water to a balance tank covering the area sited at Wychbury Hill in the Rural District of Bromsgrove.

It is in the low level area of supply that the major part of the Borough of Stourbridge is situated, and the consumption of this area is more than two million gallons per day. The whole of this supply is provided from the Tack Lane Pumping Station in Wordsley, Brierley Hill, and the station is equipped with duplicate pumping plant capable of meeting the normal demand of the low level area. Further standby capable of augmenting this plant is sited at the Coalbournbrook and Mill Meadow Stations.

Drainage and Sewerage

The main sewers in the Stourbridge area are under the control of Stourbridge Main Drainage Board. The sewers in Lye and Wollescote area are under the control of the Upper Stour Valley Main Sewerage Board.

The sewage is conveyed to the Whittington sewage farms belonging to these Boards and is treated on the Broad Irrigation principle.

SECTION D

Housing work is referred to in the Report of the Public Health Inspector.

SECTION E

Inspection and Supervision of Food

Details of the inspections carried out during the year will be found in the Public Health Inspector's Report.

SECTION F

Prevalence of, and Control over, Infectious and Other Diseases

Poliomyelitis

No case in the Borough was reported.

Scarlet Fever

Notified cases increased from 57 to 78. Of these 50 were in the 5 - 9 age group, and again the incidence was of a mild type, no death resulting. For domestic reasons or because of complications, 22 cases were admitted to hospital.

Measles

Cases of Measles notified increased from 110 to 659. The course of the outbreak began in November, 1958, and ended in the August following. Measles infection is usually characterised by a low incidence in one year, followed by a high one in the next.

No death occurred. Due to complications there were nine admissions to hospital, but all made a good recovery.

Whooping Cough

Notifications increased from 24 to 33, most of the infection occurring in ages 3 - 9 yrs. There was no death. One case was admitted to hospital.

Dysentery

There was a reduced incidence from 33 cases to 17. In four cases admission to hospital was arranged, and all responded well to treatment.

Diphtheria Immunisation

Primary and secondary treatments were again well maintained, the year's record being as follows:-

	<u>Age at date of final injection</u>			
	<u>Under one year</u>	<u>1 - 4 years</u>	<u>5 - 14 years</u>	<u>Total</u>
No. of Primary Treatments	465	100	34	599 (645)
No. of Secondary (Re-inforcing) Injections	-	141	329	470 (326)

(The figures in parentheses denote 1958 totals)

Of an estimated child population of 8,500, a total of 7,808 under 15 years of age (of which number 2,188 related to children of pre-school age) had been immunised by the end of the year.

It is estimated that approximately 95% of school children and 70% of those of pre-school age have been completely immunised.

Whooping Cough Immunisation

The record of immunisation against Whooping Cough (injections given either singly or in combination) was as under for the year:-

	<u>Age at date of final injection</u>		
	<u>0 - 4 years</u>	<u>5 - 14 years</u>	<u>Total</u>
No. of Primary Treatments	561	11	572

(This compares with a total of 547 in 1958)

Vaccination against Smallpox

The record of Vaccination in the Borough during 1959 was as under:

<u>Ages</u>	<u>Under 1</u>	<u>1 year</u>	<u>2 - 4</u>	<u>5 - 14</u>	<u>15 & over</u>	<u>Total</u>
<u>Number Vaccinated</u>	487	21	19	11	11	549
<u>Number Re-vaccinated</u>	-	-	-	2	17	19

The total comparative figures for 1958 were:-

Number vaccinated 523.
Number re-vaccinated 18.

Statistical Summary

Summary and analysis of the results of the various studies conducted during the year are given as follows:

Age at date of final infection

Age at date of final infection	No. of primary infections	No. of secondary (re-infecting) infections	Total
0 - 1 years	100	0	100
2 - 4 years	2	0	2
Total	102	0	102

(The figures in parentheses above 1952 totals)

Of an estimated daily population of 5,500, a total of 7,500 under 15 years of age (of which under 2,700 related to children of pre-school age) had been vaccinated by the end of the year.

It is estimated that approximately 25% of school children and 25% of those of pre-school age have been vaccinated.

Secondary Infection

The record of transmission against working dogs (infections given other dogs) is as follows:

Age at date of final infection

Age at date of final infection	No. of primary infections	No. of secondary (re-infecting) infections	Total
0 - 1 years	20	0	20
2 - 4 years	0	0	0
Total	20	0	20

(This compares with a total of 247 in 1952)

Vaccination against infection

The record of vaccination in the borough during 1953 was as follows:

Age at date of final infection	No. of primary infections	No. of secondary (re-infecting) infections	Total
0 - 1 years	100	0	100
2 - 4 years	2	0	2
Total	102	0	102

The total cumulative figures for 1953 were:

Number vaccinated 25,
Number re-vaccinated 18.

'CORRECTED' NOTIFICATIONS OF INFECTIOUS DISEASE (OTHER THAN TUBERCULOSIS) FOR THE YEAR, 1959

DISEASE	A G E S										Total No. of Cases	Cases admitted to Hospital	DEATHS

ANNUAL REPORT

of the

CHIEF PUBLIC HEALTH INSPECTOR

for

1959

To The Mayor, Aldermen and Councillors
of the Borough of Stourbridge.

Mr. Mayor, Councillor Mrs. Davies and Gentlemen,

An account of your Department's activities during the course of the year is given in the pages following.

Survey work in connection with the provisions of the Clean Air Act began early in the year, and in October the Borough Council decided to proceed with Phase 1 of the programme for establishing Smoke Control Areas and to ask the Minister of Housing and Local Government to agree to the making of Official Orders. The Minister was also informed of the Council's intention to proceed with Phase 11 (Norton Area) at an early date.

There was one staff change in the resignation of Mr. R. Forrest, who qualified as a Public Health Inspector in mid-year and who left to take up an appointment with Brierley Hill Urban District Council.

I am grateful to the Chairman and Members of the Public Health Committee for their active interest and support, and to Dr. Corlett and Mr. Drury for their helpful guidance. I also desire to express my appreciation of the conscientious service rendered by the Departmental Staff and to other Council Officers for their co-operation throughout the year.

I am,

Mr. Mayor, Councillor Mrs. Davies and
Gentlemen,

Your Obedient Servant,

A.E.K. KENT

Chief Public Health Inspector.

ANNUAL REPORT

of the

NEW YORK STATE DEPARTMENT OF HEALTH

for

1923

To the Mayor, Lieutenant Governor and Comptroller
of the Borough of Manhattan

ALBANY, COMPTROLLER FOR TAXES AND DEPARTMENT,

An account of your department's activities during the
course of the year is given in the pages following.

Every year in connection with the provisions of the
State Sanitary Code, and in order to bring
the State Department of Health into closer touch with the
various health departments of the State, the State
Department of Health sends out a number of Special
Inspectors to visit the various health departments
and to report on their activities. The
Special Inspectors also report on the health
conditions in their respective health departments.

There are one hundred and thirty-two health
departments in the State, and the State
Department of Health is in touch with all of them
through its Special Inspectors. The
Special Inspectors report on the health
conditions in their respective health departments.

I am grateful to the various health departments
for their cooperation and assistance in the
work of the State Department of Health. I also
thank the various health departments for their
cooperation and assistance in the work of the
State Department of Health.

I am,
Very truly yours,
J. J. H. H.

Chief, Bureau of Health Inspection

COMPLAINTS

347 complaints, relating principally to housing defects, were received during the year.

SANITARY INSPECTION OF THE AREA

The following data is given in accordance with Article 27(18) of the Sanitary Officers' (Outside London) Regulations, 1953:-

The number and nature of Inspections made during the year:

Inspections of houses	366
Re-inspection and re-visits	883
Inspections under Housing Regulations	41
Re-inspections under Housing Regulations	23
Inspections Town & Country Planning Act - Re-development	174
Inspections under Clean Air Act	251

Totals	<u>115</u>	<u>134</u>

STATUTORY NOTICES, 1959

The following Statutory Notices were served during the year:-

<u>Public Health Act, 1936</u>	<u>No. of Notices</u>	<u>No. of Premises Affected</u>
Abatement of Nuisances (S.93) ..	20	20
Requisition for Information (S.277) ..	1	3
Defective Closets - Reconstruction of (S.44)	1	1
Drainage (S.39)	7	8
Power of Entry (S.287)	1	1
 <u>Housing Acts, 1957</u>		
Notices to Appear before Council (S.16 & 18)	14	32
Demolition Orders (S.17)	19	14
Requisition for Information (S.170) ..	6	19
Closing Orders (S.17 & 18)	5	4
Notice before Entry (S.159)	1	1
Totals	<u>75</u>	<u>103</u>

PROSECUTIONS

Two prosecutions were instituted under the Public Health Act, 1936 for non-compliance with Statutory Notices. In the one case, under Section 93, the defendant was ordered to carry out the work within fourteen days and to pay Court costs. In the other, under Section 39, the case was adjourned for one month on the defendant's undertaking to proceed with the work, which was eventually completed.

RENT ACT, 1957

The following particulars are given for the year relating to the operation of the Rent Act, 1957.

Part 1 - Applications for Certificates of Disrepair

(1) No. of applications for certificates ..	16
(2) No. of decisions not to issue certificates	NIL
(3) No. of decisions to issue certificates ..	15
(a) in respect of some but not all defects	7
(b) in respect of all defects ..	8
(4) No. of undertakings given by landlord under paragraph 5 of First Schedule ..	10
(5) No. of undertakings refused by Local Authority under proviso to paragraph 5 of First Schedule	NIL
(6) No. of certificates issued ..	6

Part 11 - Applications for Cancellation of Certificates

(7) Applications by landlords to Local Authority for cancellation of certificates ..	7
(8) Objections by tenants to cancellation of certificates ..	NIL
(9) Decisions by Local Authority to cancel in spite of tenants' objection ..	NIL
(10) Certificates cancelled by Local Authority	8

Housing Act - Improvement Grants

14 applications were received for Improvement grants, 6 for Standard grants and 26 for Discretionary grants. All 46 applications were approved.

DEMOLITION ORDERS

Fourteen Demolition Orders were made during the year in respect of the following houses, all of which were in a state of disrepair bordering on the dangerous:-

Nos. 82, 84 & 86, Enville Street, Stourbridge.
Nos. 1 & 3, Bell Street, Stourbridge.
No. 3, Cross walks Road, Lye.
Nos. 1, 5 & 6, Swan Fold, Lye.
No. 64, High Street, Lye.
Nos. 35 & 37, Bagley Street, Stambermill.
Nos. 39 & 41, Yardley Street, Stambermill.

CLOSING ORDERS

Under the provisions of the Housing Act Closing Orders were made on the following properties:-

No. 34, New Street, Stourbridge.
No. 8, New Street (part), Stourbridge.
Rear of No. 21, Hagley Road, Stourbridge.
No. 29, Talbot Street, Lye.

CLEARANCE AREAS

Although some progress was made in the clearance of properties comprised in the Summer Street, Stourbridge, Clearance Area, the sites had not been completely cleared at the end of the year.

Neither had the two dwellings which formed part of the South Road, Stourbridge, Clearance Area, but arrangements for their clearance early in 1960 were in hand.

RATS AND MICE DESTRUCTION

One hundred and seventy nine complaints of rats and mice infestation were received, compared with 185 in 1958.

A summary of the work carried out by the Rodent Operative during the year is set out below.

<u>Type of Property</u>	<u>No. of Premises Infested</u>	<u>No. of Treatments</u>	<u>No. of Inspections</u>	<u>Infested by</u>	
				<u>Rats</u>	<u>Mice</u>
Local Authority	8	12	39	7	1
Dwelling Houses	176	181	452	147	29
Business & Industrial Premises &c.	14	14	61	12	2
Agricultural Premises	-	-	2	-	-
	<u>198</u>	<u>207</u>	<u>554</u>	<u>166</u>	<u>32</u>

Treatment of the sewers was also carried out twice during the year. In June, 203 manholes were test-baited, of which 66 were found to require treatment. These 66 manholes were treated with Warfarin in June and followed up with zinc phosphide in November. On the second treatment, only three manholes showed 'takes', thus proving the success of the methods used.

A total of 1920 Rats and 500 Mice was the estimated number destroyed in the Borough throughout the year.

Premises used for:

Sale and/or Manufacture of Ice Cream

There were ten new registrations during the year for the sale of Ice Cream in sealed cartons, making a total of 173 premises registered at the end of the year for the sale of Ice Cream, and 4 for its manufacture and sale.

Preparation of Preserved Foods

A satisfactory state of cleanliness was maintained in the 26 premises registered for the preparation or manufacture of Preserved Food.

Fish Frying

There was no change in the number of premises registered (18), all of which were kept in a satisfactory condition.

ADULTERATION

Forty two informal samples were submitted for chemical analysis as follows:-

	<u>No. of Samples</u>		<u>No. of Samples</u>
Milk, T.T. Pasteurised	6	EGGS ...	1
" T.T. " (C.I.)	1	Bread ...	1
" Pasteurised ...	6	Grape Fruit	1
" Sterilised ...	1	Lemon Crush	1
Ice Cream ...	5	Pork Pie	1
Dairy Ice Cream ...	2	Pork Sausage	9
Pasteurised Cream ...	1	Beef Sausage	2
Ice Lollies ...	2	Steak & Kidney Pie	1
		Jellied Veal	1

All the samples were genuine.

The portion of Bread submitted arose out of a complaint of contamination. The Analyst reported that the sample contained no mineral oil and that the discolourisation consisted of wheat starch and tissue.

An examination of the eggs, which were alleged to taste of fuel oil, revealed no evidence of treatment with oil. The taint was probably due to feeding rather than to outside contamination.

As a result of a complaint of bitterness in taste, an opened can of grape fruit was sent for analysis. Examination failed to reveal the presence of Naringin, which frequently causes bitterness in grape fruit. The contents of the opened can contained 100 p.p.m. of tin which was satisfactory.

One carton containing Ice Cream, sent for analysis in May, was found to have printed on it the words "Cream Ice". The label did not conform with the requirements of the Labelling of Food (Amendment) Regulations, 1959 (which came into force on 27th April, 1959) in that the Ice Cream contained fat other than milk fat. The manufacturers' explanation involved the question of delay in printing and delivery of new cartons. Moreover, the Ice Cream had been sold as such and at Ice Cream prices. Immediate steps were taken to block out the word "cream" from the remaining labels.

BACTERIOLOGICAL EXAMINATION

Some 303 samples were submitted for bacteriological examination.

These consisted mostly of Cream (64 samples), Pasteurised Cream (63), Frozen Cream (21), Ice Cream (61), Cream Sponge Sandwich (34) and Milk (23).

Of the 61 Ice Cream samples, 46 were in grade 1, but the remaining 15 were in varying degrees unsatisfactory.

A number of unsatisfactory results relating to samples of Cream Sponge Sandwich, Pasteurised Cream, Frozen Cream and Ice Cream lollies pointed to faulty production methods and standards of hygiene open to criticism. The firm of manufacturers involved were informed of the Borough Council's concern and the importance of strict supervision and control was impressed upon them.

In the samples submitted towards the end of the year, there was a noticeable improvement.

The Milk (Special Designation) (Raw Milk) Regulations, 1949 to 1954
The Milk (Special Designation) (Pasteurised & Sterilised Milk) Regulations, 1949
to 1953

The following licences were in operation at the end of 1959:-

Tuberculin Tested Milk

Dealer's Licence authorising the use of the special designation "tuberculin tested" (including three bottling establishments) ..	12
Supplementary Licence authorising the use of the special designation "tuberculin tested"	4

Pasteurised Milk

Dealer's (Pastouriser's) Licence authorising the holder to pasteurise milk	2
Dealer's Licence authorising the use of the special designation "pasteurised"	14
Supplementary Licence authorising the use of the special designation "pasteurised"	6

Sterilised Milk

Dealer's Licence authorising the use of the special designation "sterilised"	89
Supplementary Licence authorising the use of the special designation "sterilised"	6

MEAT INSPECTION

Meat inspection continued to take up a very considerable proportion of the Inspectors' time and every animal slaughtered was inspected as to its fitness for human consumption.

The number of animals slaughtered has again increased, and during the year the figure rose to 22,480, which is now more than double the number killed in 1954.

It is pleasing to note the exceptional drop in the number of animals affected with tuberculosis and also cysticercus bovis, but there does appear to be a steady increase in infections of a parasitical nature, much of which I am sure could be avoided by more rigorous treatment of farms.

Below are the number of animals slaughtered and inspected during the year:

<u>Cattle</u> (<u>Excluding Cows</u>)	<u>Cows</u>	<u>Calves</u>	<u>Sheep</u>	<u>Pigs</u>
1,571	210	39	14,742	5,918

The table appended shows the percentage of animals affected with disease.

TABLE 1

Rice	1

Other Foods

Icelandic Cod Roe	25 stone
Dover Soles	3 stone
Halibut	7 stone 3 lb.
Mackerel	2 stone
Cod Fillets	2 stone
Haddock Fillets	2 stone
Dressed Crab	24 lb.
Peeled Scampi	27 boxes (27 lb.)
Fish Cakes	5
Braised Beef	10 pkts. (2 $\frac{3}{4}$ oz. each)
Hindquarter Frozen Beef	130 lb.
Polish Bacon	11 lb.
Steak Pies	16
Chicken	18 pkts. (4 oz. each)
Chicken Pies	12
Chicken Puffs	14
Chicken vol-au-vent	10 pkts.
Potatoes	23 bags
Potato Puffles	9 pkts. (4 oz. each)
Waffles	5
Seedless Raisins	6 $\frac{1}{2}$ lb.
Shortcrust Pastry	9 pkts. (7 $\frac{1}{2}$ oz. each)
Puff Pastry	1 pkt.
Cream Sponge Sandwiches	8
Strawberries in Melba Sauce	9 pkts.
Lemon Mousse	38 pkts.
Strawberry Mousse	39 pkts.
Chocolate Mousse	24 pkts.
Mango Chutney	1 jar
Orange Marmalade	1 jar
Strawberry Jam	1 jar
Mixed Pickles	1 jar

Method of Disposal

Meat: Collected daily by recognised processing firms and used for the manufacture of by-products.

Other Food: Collected, as required, by Council vehicles and disposed of by controlled tipping under supervision.

Slaughter of Animals Act, 1958

Under the Slaughter of Animals Act, 1958, 27 licences were renewed during the year.

WATER SAMPLING

Public Supplies

Ninety eight samples of Town water were submitted for bacteriological examination and the results proved, without exception, to be excellent, with complete absence of coliform bacilli and faecal coli.

Four chemical samples were also submitted with satisfactory results.

The supplies were satisfactory as to quantity. They are not liable to plumbo solvency, but periodically samples are examined for lead contamination.

The approximate number of dwelling houses supplied from the Main direct to houses in the Borough was 13,540.

Swimming Baths

The Corporation swimming baths comprise one covered pool and one outdoor pool. They are interconnected, so giving the users a choice of either.

The pools measurements are:-

Indoor Pool 25 yds. x 10 yds, with a depth of 6 ft. to 3 ft. 6 in.

Outdoor Pool 33 $\frac{1}{3}$ yds. x 10 yds, with a depth of 10 ft. to 3 ft. 6 in.

both baths being heated by Calorifiers.

The source of supply is from a private well, the water being chlorinated in the rising main to a storage tank, from which the baths are filled. The water is filtered and again chlorinated during use, thus ensuring double treatment. There is a complete change-over of water in the indoor pool every four hours, and every six hours in the outdoor pool.

The chlorination plants are of Wallace and Tierman manufacture, and the filtration plant is by Paterson.

During the year under review one hundred and fifty four (101 bacteriological and 53 chemical) samples of water from the swimming baths were submitted for examination.

All proved to be satisfactory, with the exception of one bacteriological sample taken from a freshly-filled outdoor bath before being brought into use. Follow-up samples taken from this bath were all found to be excellent.

The high standard of cleanliness maintained at the Baths throughout the year was again a commendable feature.

FOOD PREMISES

With the ready co-operation of traders in general in complying with suggestions made to improve standards of hygiene, no action by way of prosecution under the Food Hygiene Regulations was found to be necessary during the year.

VERMIN INFESTATION

Nineteen premises infested with cockroaches, fleas, bugs, woodlice etc. were effectively treated. In addition, insecticides were issued in eleven instances and advice given.

Wasps were very prevalent due to the abnormally warm Summer and twenty three nests were destroyed.

RESULTS

General Observations

Twenty eight samples of food were analyzed for bacterial contamination and the results showed a total count of 1,000,000 bacteria per gram of food. The results also showed that the bacteria were of various species and types.

Four chemical analyses were also conducted with satisfactory results.

The samples were analyzed as to moisture. The results showed that the moisture content was 10%. The results also showed that the moisture content was 10%.

The approximate number of bacteria present in the food was 1,000,000 per gram. The results also showed that the bacteria were of various species and types.

Chemical Analyses

The chemical analyses were conducted with satisfactory results. The results showed that the food was 10% moisture and 10% protein.

The food is approximately 10% moisture and 10% protein.

Moisture 10% with a depth of 2 ft. to 3 ft. 6 in.

Protein 10% with a depth of 10 ft. to 12 ft. 6 in.

The results were satisfactory in all respects.

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

The high degree of bacterial contamination of the food throughout the year was again a remarkable feature.

CONCLUSIONS

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

RECOMMENDATIONS

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

The results of the analyses show that the food is 10% moisture and 10% protein. The results also show that the food is 10% moisture and 10% protein.

TENTS, VANS AND SHEDS

Five licences were renewed, and two new applications granted, to station and use moveable dwellings for short periods on various sites in the Borough.

Twenty nine inspections of caravans and sites were made during the year. Conditions were found to be satisfactory and no formal action was necessary.

OUTWORKERS

The names of twelve outworkers were notified, seven of whom resided outside the Borough.

ATMOSPHERIC POLLUTION

The apparatus for measuring atmospheric pollution is still in operation and recordings are kept.

It is gratifying to record that with the exception of one vertical boiler plant in the Borough, there was no cause for complaint during the whole of the year. The complaint concerned was on investigation found to be due to a temporary breakdown, which was put right almost immediately.

SMOKELESS AREAS

During the year the initial survey of the "Norton Area" was completed and particulars submitted to the Borough Council. At the same time particulars were also submitted in respect of twelve smaller areas of new development which it was hoped could be made smokeless from the outset.

All the relevant particulars and details of costs etc. were submitted to the Minister for his approval to the making of Orders, but at the end of the year permission had not been forthcoming.

In accordance with instructions from the Minister, the Council submitted their proposals as regards Smokeless Areas for the next five years, as follows:-

1. Target for completion of the Programme .. 1975.
2. Orders to come into force 1960: these will include the twelve new Development Areas, particulars of which have already been submitted for the approval of the Minister.

<u>Premises</u>	..	1,290
<u>Dwellings</u>	..	1,290
<u>Acres</u>	..	266.2

3. Orders proposed to come into force 1961 :

Norton Area

<u>Premises</u>	..	1,952
<u>Dwellings</u>	..	1,920
<u>Acres</u>	..	418

4. Orders proposed to come into force 1962 :

Wollaston Area

<u>Premises</u>	..	2,062
<u>Dwellings</u>	..	2,008
<u>Acres</u>	..	406

GENERAL PRINCIPLES

The Commission has been established to study and report on the various aspects of the problem.

The Commission has been established to study and report on the various aspects of the problem.

SCOPE

The scope of the Commission's work is defined as follows:

TERMINATION

The Commission's work is to be completed by the end of the year.

It is expected that the Commission will report to the President by the end of the year.

MEMBERS

The Commission is composed of the following members:

All the members of the Commission are appointed by the President.

The Commission will report to the President by the end of the year.

1. To study the problem of the Commission.

2. To report to the President by the end of the year.

1950	1951
1950	1951
1950	1951

3. To report to the President by the end of the year.

APPENDIX

1950	1951
1950	1951
1950	1951

4. To report to the President by the end of the year.

APPENDIX

1950	1951
1950	1951
1950	1951

REFUSE COLLECTION AND DISPOSAL

Public Cleansing is under the control of the Borough Engineer and Surveyor.

The means of disposal of all refuse in the Borough is by controlled tipping, which is carried out under the general supervision of this Department.

PETROLEUM ACTS

87 licences were issued as follows:-

72	to store Petroleum Spirit only.
7	" " " " and cellulose.
3	" " " " and carbide of calcium.
1	" " Carbide of Calcium only
2	" " Cellulose only.
2	" " mixture of Petroleum Spirit.

These licences authorised the storage of 122,360 gallons of Petroleum, 1,560 lb. Carbide of Calcium, 1,185 gallons Cellulose, and 12 gallons Petroleum mixture.

Licence fees amounted to £75 - 10 - 6.

TUBERCULOSIS AFTER-CARE

The Members of this Committee comprise representatives from the Borough Council, the County Medical Officer's Department, the Regional Hospital Board (represented by Chest Physician), the W.V.S., the Nursing Association, and your Health Department.

Grants of free milk were made to 32 patients, and one family was re-housed during the year.

The Committee's Welfare Fund is contributed to by various donors, and as Hon. Secretary I would like to express the Committee's grateful appreciation of this support which helps considerably in the provision of Christmas food parcels to patients in particular need.

The Commission is under the control of the Treasury and the Board of Admiralty.

The amount of the proceeds of all sales in the year 1914-15 was £1,000,000, which is carried out under the general supervision of the Treasury.

REVENUE

The following table shows the amount of the proceeds of the various sources of revenue:-

Proceeds of the sale of land	£ 1,000,000
Proceeds of the sale of minerals	£ 1,000,000
Proceeds of the sale of timber	£ 1,000,000
Proceeds of the sale of fish	£ 1,000,000
Proceeds of the sale of other property	£ 1,000,000
Total	£ 5,000,000

The total amount of the proceeds of the various sources of revenue is £5,000,000, which is carried out under the general supervision of the Treasury.

The following table shows the amount of the proceeds of the various sources of revenue:-

REVENUE

The Commission is under the control of the Treasury and the Board of Admiralty. The amount of the proceeds of all sales in the year 1914-15 was £1,000,000, which is carried out under the general supervision of the Treasury.

The amount of the proceeds of all sales in the year 1914-15 was £1,000,000, which is carried out under the general supervision of the Treasury.

The Commission is under the control of the Treasury and the Board of Admiralty. The amount of the proceeds of all sales in the year 1914-15 was £1,000,000, which is carried out under the general supervision of the Treasury.
