ANNUAL REPORT

OF THE
MEDICAL OFFICER
OF HEALTH

J. B. Bramwell, M.A., M.B., D.P.H.

for the

Warwickshire
Borough of (Stratford-upon-Avon etc.) C D
Rural District of Stratford-upon-Avon
Rural District of Alcester
Rural District of Shipston-on-Stour

FOR THE YEAR 1965

ANNUAL REPORT

OF THE MEDICAL OFFICER OF HEALTH

1965

TO:

The Mayor, Aldermen and Councillors, Borough of Stratford-upon-Avon

The Chairman and Councillors, Rural District of Stratford-on-Avon

The Chairman and Councillors, Rural District of Alcester

The Chairman and Councillors, Rural District of Shipston-on-Stour

Public Health work in all districts has proceeded smoothly and quietly during 1965 and there have been no matters of particular interest. Such comment as I make in this preamble concerns relatively small points which have occurred to me during the course of the year when I have attended committee meetings of various kinds.

HOUSING

To a greater or lesser extent all four councils are faced with similar difficulties where council house building is concerned.

Since it is usual to build houses in fairly large numbers the smooth and speedy progression from one scheme to another is difficult to achieve. There is a danger also, particularly in rural districts, if large areas of land are available in larger villages, that small villages are left out of the picture. This results in hastening the migration of younger people to larger towns leaving the villages occupied by the elderly or owner occupiers. There will be a tendency for this to happen even more when the Education Authority gives up the small village schools and arranges for children to travel from small village schools

to larger schools. Where Councils have difficulty in the smooth progression of council house building it makes it difficult to plan an orderly scheme of slum clearance where certain villages are concerned.

In all villages in rural districts there are a certain number of council houses. These houses are generally speaking large ones very often occupied by an elderly couple. The building of more bungalows liberates these under-occupied houses and makes them available for families. It always has been difficult to persuade people who have lived in a house for many years to move to a new one. I think that Councils could do more to demonstrate the greater convenience and comfort of new and suitable houses to the elderly people they wish to move from over-large houses. Once the move has been made the tenants of the bungalows are as happy as the day is long.

Two Rural Districts are planning to build groups of flatlets which will be occupied by elderly people who will, in addition to their own flatlet, have communal facilities to make life more interesting. There will also be a warden to give help in times of difficulty. This scheme will be assisted financially by the County Council Welfare Department.

Housing application lists never seem to grow any smaller however many new council houses are built. Long distances entailed in travelling to work do not seem to be a deterrent to applicants who only seem too anxious to move from inadequate conditions in towns to live in the country.

Very many of the applicants on Rural District lists, strictly speaking, have no claim or call on the Rural District they have applied to. If Councils do not make more stringent conditions before people are taken on to their list I can see no end to council housing building.

WATER SUPPLY

Water in the four districts is supplied from three water authorities, all of whom have extended their mains during the year to more outlying places which have been missed out in the past. These extensions have in the past been thought to be uneconomic, which from a hard, practical point of view, perhaps they are. Nevertheless, adequate and pure supply of water is a vital necessity for everybody. There are still a few places in this area where domestic supplies are still shallow wells and some problems have been experienced during the year with these wells drying out.

SEWAGE AND SEWERAGE DISPOSAL

Remarkable progress has been made in the last few years in providing modern sewers and sewage treatment in the four districts. Many rural areas have been excluded from this point of view for far too long. The expense of providing modern sewage and sewerage treatment is enormous and again could be considered to be uneconomic. Adequate sewerage often results in the wish to enlarge isolated villages in order to make better use of the sewers provided.

INFECTIOUS DISEASE

1965 was a measles year. Formerly we expected an outbreak of measles every other year. This alternation is not as clear cut as it used to be. Consideration has been given by the local health authority to adopting measles vaccination for children. It is important, as far as possible, to protect very small children from an attack of measles. This is often difficult when they are at risk of being infected by their older brothers and sisters. The Medical Officers of Health in the County gave very great thought to measles vaccination but decided at the present time to postpone a decision until a vaccine was produced which would be less likely to cause reactions and until we knew more certainly how long the immunity provided by the vaccine would last. It would be inconvenient to postpone the attack of measles until a child was in its later school years when examinations are becoming more and more important.

SMALLPOX

This preamble is written well into 1966 when the country is being bothered by sporadic outbreaks of minor smallpox. It appears possible that some cases diagnosed as chicken pox in the past have, in fact, been minor smallpox. The differential diagnosis between the two is extremely difficult but now that we have improved methods of recognising the type of virus producing both chicken pox and smallpox, the diagnosis is very much more clear cut. Little notice would need to be taken of this disease if people were more regularly vaccinated against smallpox. This undoubtedly would reduce the number of cases and the spread of the disease and would also avoid the necessity for last minute vaccination for travellers and holiday-makers leaving the country.

Whenever smallpox occurs in this country there is great consternation amongst people who wish to travel abroad and who have to have an international vaccination certificate. Very often annoyance is expressed that these certificates have to be stamped by the Health Department to confirm that the signature of the vaccinator is authen-

tic. Since a successful smallpox vaccination or re-vaccination is a full protection against the contraction of smallpox, International Control would be non-existent if certificates could not be relied upon. It has not been unknown for certificates to be filled up by the applicants themselves. This perhaps does not happen so much in this country but does happen abroad.

In the middle of writing this preamble I have been away on holiday abroad. On arrival at the airport in Yugoslavia I was greatly impressed to see that washing up of glasses was done by immersing the glass in a bowl of hot detergent water and then swilling the glass out in further hot, clear water. I wish this practice would universally be adopted in public houses in this country.

I was unable to find a restaurant kitchen where the staff were not wearing clean white overalls and where all the staff, both male and female, were wearing clean head coverings. I wish this was a universal practice in this country.

I was surprised to find that even in small villages there was at least a weekly system of refuse collection and this refuse collection was of the dustless loading type.

I wonder whether we have our priorities right in this country which is enormously richer than Yugoslavia.

J. B. BRAMWELL,

31st August, 1966.

MEDICAL OFFICER OF HEALTH

The Borough of Stratford-upon-Avon

Chief Public Health Inspector

J. T. BRUEN, M.R.S.H., M.A.P.H.I.

Certificate of Meat and Foods

Additional Public Health Inspector

D. FOTHERGILL, M.A.P.H.I.

Public Health Act	61
Re-inspections	95
Consolidated Regulations	2
Housing Act, 1957—Section 16	5
Re-inspections	16
Housing Acts Improvement Grants	40
Housing Act, 1957—Overcrowding	3

222

FOOD AND DRUGS ACT, 1955

Proceedings were taken against the food manufacturer/retailer in respect of the following:-

(1) SECTION 8—FOOD UNFIT FOR CONSUMPTION

Sale of mouldy chocolate cake—Fined £5

(2) REGULATION 27—MILK AND DAIRIES (GENERAL) REGULATIONS, 1959

Sale of milk in a bottle not in a state of thorough cleanliness—Fined £20

UN SOUND FOOD

Seventy-six visits have been made to premises for the purpose of inspection and dealing with unsound food. All condemned food is disposed of by burying at the Corporation controlled tip and suitably treated when necessary.

The condemned food disposed of was as follows:-

981 tins	Fruit	51 lbs.	Cured hams
673 tins	Vegetables	164 lbs.	Home killed beef
102 tins	Fish	11	Melons
150 tins	Meat	89	Chickens
68 tins	Milk	93	Turkeys
118 tins	Soups	16	Game birds
38 tins	Puddings	4 lbs.	Puff pastry
29 tins/jars	Baby foods	14 lbs.	Lard
16 jars	Jam	84 lbs.	Butter
64 bottles/tins	Squash/fruit juice	120 lbs.	Pork
3 tins	Ovaltine	34 lbs.	Lamb
1 tin	Custard powder	68 lbs.	Ox liver
5 lbs.	Pigs' liver	9 lbs.	Sausages
54 lbs.	Pigs' kidney	4 lbs.	Jellied veal
20 lbs.	Rabbit		

ICECREAM

No icecream is manufactured in the Borough and all the retail premises are supplied by the large manufacturing firms. Seventy-six premises are registered for the purpose.

FOOD HYGIENE (GENERAL) REGULATIONS, 1960

During the year it was necessary to take proceedings against a restaurant proprietor for contraventions of the above arising out of a severe infestation of mice being allowed to develop and no steps whatsoever taken to counteract the infestation. The defendant pleaded guilty to summonses for failing to keep articles of equipment and preparation surfaces clean and exposing food to a risk of contamination. A total fine of £50 was imposed. The premises subsequently closed down.

It was found from routine inspections that the generally good overall standard in the many types of food premises in the Borough was being maintained, and only in a few instances was it required to request certain improvements to be done by informal notice.

DISINFESTATION AND DISINFECTION

Eighteen premises were disinfested for various insect pests. Additionally, the Department was called upon to deal with the eradication of eighty-four wasps' nests.

REFUSE COLLECTION AND DISPOSAL

Household refuse is collected weekly and generally hotels and restaurants are given a twice weekly collection service. During the season, particularly where storage space is limited, the refuse is removed more frequently from some hotels and restaurants. In instances where difficulties are encountered with regard to storage pending collection and refuse bins are in use a changeover to the paper sack system of storage is encouraged and has been adopted in some cases.

The disposal of the refuse is by controlled tipping with the use of a mechanical shovel for efficiency on the Unicorn Meadows. Daily, fly and other insect pests control measures with approved insecticides are carried out during warm weather periods, and the tip is subjected to frequent rodent control measures.

AVON PARK CAMP, WARWICK ROAD

In March the Ministry of Housing and Local Government upheld an appeal by the site operator against the refusal to permit the stationing of 249 static caravans for holiday purposes and a residential caravan for a warden on the above site in lieu of 112 caravans originally licensed. This was mainly on the grounds that adequate provision for such form of holiday accommodation should be met by an increase in the number of caravans on existing suitable and low density sites rather than to establish new ones. The conditions did provide for sites for 80 caravans to be reserved solely for the use of caravans on tour.

The Health Committee approved amended site licence conditions to provide for increased toilets and washing facilities to cater for a more intensive use of the site and the existing foul water drainage to a cesspool to be converted to discharge to the main sewer by pumping.

RODENT CONTROL

One hundred and seventy complaints were received and during the year regular survey work has been maintained and treatments carried out where necessary. This is reflected in the fact that no reservoir or major infestations of rats were required to be dealt with. The refuse tip and sewage disposal works received regular attention.

SUMMARY OF VISITS BY RODENT OPERATIVE

Number of inspections for survey and treatments:

1. Dwellings	3528
2. Business premises	465
3. Agricultural premises	38
4. Local authorities	125

Number of infestations treated:

1. Dwellings	91
2. Business premises	66
3. Agricultural premises	28
4. Local authorities	41

Total	5	4	0	0	0

FACTORIES ACT

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

The total number of premises that had registered by the end of the year by completion of the appropriate form O.S.R. I was 361. A further 122 premises had received a general detailed initial inspection with regard to the welfare provisions of the Act and these were confined to office premises and retail shops other than food premises, as such latter category of premise had been subject to detailed supervision hitherto under other legislation. The total number of visits to premises under the Act was 171.

The following is an analysis of items found and held to be contraventions of the Act:—

	Contraventions in respect of	Found
Section 5	Overcrowding	4
Section 6	Temperature	14
Section 7	Ventilation	4
Section 8	Lighting	21
Section 9	Sanitary Conveniences	24
Section 10	Washing facilities	29
Section 12	Clothing accommodation	5
Section 13	Sitting facilities	1
Section 16	Floors, passages and staircases	7
Section 24	General provisions—first aid boxes	29

PET ANIMALS ACT, 1957

Renewal licences were issued for the keeping of three premises as pet shops.

NOISE ABATEMENT ACT, 1960

During the year the requirements of a statutory notice that had been served by the Council in respect of the abatement of a continuous noise nuisance arising from the operation of an engineering factory close to residential property were met with when the firm moved into new factory premises on the industrial estate. Such a satisfactory solution was achieved by the concern of management at the disquiet being caused to their neighbours and a readiness to tackle the problem with the assistance and co-operation of the Council.

The willingness of factory managements to carry out works and endeavour to remedy a nuisance from noise that may be caused to residents of nearby houses was also manifested when investigating other complaints. A complaint was made that a continuous high throbbing noise that had been introduced above the low background noise always associated with the factory operation was causing distress. The point source was found to be three roof exhaust ducts from a new internal mechanical ventilating system which passed metal dust-laden air under high pressure through "wet scrubbers" before exhausting to atmosphere. Purpose made silencers were fitted to each of the exhaust ducts with a resultant reduction of the high noise level making conditions more tolerable.

Another complaint was in connection with a high pitched whining noise found to be emanating from the operation of a 600 h.p. diesel generator intended to provide electric power other than as a standby for emergency purposes. It was agreed that it was absolutely essential to build a more efficient silencing arrangement if it was to continue to operate. With the fitting of an approved double silencing unit to the exhaust and a reversion to standby use the noise complained about was satisfactorily dealt with by the firm.

The investigation of a noise complaint often requires numerous visits at varying times to assess the situation and establish if a statutory nuisance exists, and especially when normal background noise has to be taken into consideration. During the year 59 visits were made for the purpose.

SEWERAGE AND SEWAGE DISPOSAL

The new sewage disposal and treatment works at Milcote have been in full action during the year. Certain difficulties have arisen with sludge disposal, chiefly due to lack of labour. These difficulties have been solved by the purchase of a trailer type spray wagon which is used to spray the sludge in a liquid form on land on adjoining farms. This method of sludge disposal is an alternative to using sludge drying beds which is a long winded process.

TRADE EFFLUENT

With the new sewerage scheme it has been possible to employ a Sewerage Works Chemist who has been examining sewage samples not only for the Borough Council but for Stratford-on-Avon Rural District Council as well. It has also been possible to take the problem of trade wastes seriously. There are nine major discharges from industry in the Borough. The effluent has been examined by the chemist and a formula worked out upon which charges can be made for trade effluent in consultation with the companies concerned. No difficulties have arisen during 1965 with this process.

EXTENSIONS TO THE SEWERS

The main extension to the sewerage by the Borough was that in Bishopton Lane which was started in August. In addition to this, sewage from the village of Wilmcote in the Alcester Rural District began to flow down the new sewer to join with the Borough's sewage to be treated at the Milcote works.

WATER SUPPLIES

Water supplies in the Borough area are under the control of the South Warwickshire Water Board. Certain difficulties have arisen during the year where mains terminate at blind ends when there have been complaints of sediment in the water. These complaints have quite easily been solved by flushing out the mains. The water is not plumbo-solvent.

WINDAGE AND WINDAGE DISCOUNT

SEWERAGE AND SEWAGE DISPOSAL

As has been the case in the past few years, considerable progress has been made in providing up-to-date sewerage for villages in the Rural District. The situation at the beginning of 1965 was as follows:—

1. SCHEMES COMPLETED

(a) Old Stratford and Drayton	completed	1960	£7,902
(b) Snitterfield*	completed	1961	£19,957
(c) Preston-on-Stour*	completed	1962	£13,065
(d) Wellesbourne	completed	1963	£18,449
(e) Ettington*	completed	1963	£21,354
(f) Moreton Morrell*	completed	1964	£28,378
(g) Combroom*	completed	1964	£12,540

*No final account	Total	£121,645
-------------------	-------	----	----	----	----	----	----------

2. SCHEMES UNDER CONSTRUCTION

(a) Claverdon	£101,687
(b) Ashorne	£20,585
(c) Ullenhall	£51,441
(d) Tanworth-in-Arden	£260,350

	Total	£434,063
--	-------	----	----	----	----	----	----------

3. SCHEMES APPROVED-WAITING TENDERS

(a) Admington	Estimated	..	£22,300
(b) Kington	Estimated	..	£79,586

	Total	£101,886
--	-------	----	----	----	----	----	----------

4. SCHEMES SUBMITTED TO OR PREPARED AND ABOUT TO BE SUBMITTED TO MINISTRY OF HOUSING AND LOCAL GOVERNMENT

(a) Wootton Wawen	Estimated	..	£202,842
(b) Dorsington	Estimated	..	£21,000
(c) Clifford Chambers	Estimated	..	£46,256
(d) Welford-on-Avon, Weston Binton and Luddington	}	Estimated	..	£250,700

	Total	£520,798
--	-------	----	----	----	----	----	----------

Total of 1, 2, 3 and 4: £1,178,392

5. PARISHES WHERE SCHEMES HAVE BEEN CONSIDERED IN OUTLINE—NO DETAILS PREPARED

- (a) Long Marston
- (b) Hampton Lucy and Charlecote
- (c) Langley
- (d) Preston Bagot
- (e) Atherstone

- (f) Whitchurch
- (g) Alderminster
- (h) Loxley

6. PARISHES WHERE SCHEMES ARE BEING PREPARED IN CONJUNCTION WITH ADJOINING AUTHORITY

- (a) Wolverton
- (b) Grafton

7 PARISHES WHERE DRAINAGE SCHEMES ARE ADEQUATE

- (a) Bearley
- (b) Hockley Heath (village only)
- (c) Quinton

By the end of the year the schemes for the villages of Ashorne, Claverdon and Ullenhall were approaching completion.

The schemes at Admington and Tanworth-in-Arden were making good progress.

The scheme for Clifford Chambers had received Ministry blessing following the Council's representation to the Ministry when it was suggested that some delay should take place in view of the restriction on new capital works.

The scheme for Welford-on-Avon, Weston, Binton and Luddington was waiting the Ministry enquiry. The Wolverton scheme which is in conjunction with the Warwick Rural District was at the same stage.

The scheme for Wootton Wawen which had been revised at the suggestion of the Ministry was ready for submitting to the Ministry once again. Further house building in Wootton Wawen, Henley-in-Arden and Beaudesert parishes depends entirely on the provision of adequate sewage treatment which will be provided in the new works at Wootton Wawen.

Preliminary planning work was in various stages of completion for the new Kinton works and full schemes for Dorsington and Alderminster.

It will be seen that an enormous amount of work has been undertaken by the Council's Surveyor's Department during the year. The only scheme in progress at the moment, which has been designed by the Council's Consulting Engineers, is that for the parish of Tanworth-in-Arden. The Consulting Engineers have also designed the Welford-on-Avon scheme but at the moment there can be no progress until the Ministry has held its enquiry.

At times the Severn River Authority have made representations to the Council about poor quality of effluent from the works in the Rural District. This applies particularly to the village of Hampton Lucy where the present works are grossly overloaded and were never designed to take the flow the sewerage now attempts to treat. In the near future it is hoped that a new scheme for the villages of Hampton Lucy, Charlecote and Loxley will be undertaken, the sewage being pumped to enlarged works in the village of Wellesbourne.

WATER SUPPLIES

Although the Rural District Council is no longer responsible for providing mains water in the Rural District, there are a few points of note on this subject which have occurred during 1965.

Strange as it may seem, water had to be carried to certain houses in the parish of Tanworth-in-Arden during December 1964 and January 1965. These houses are isolated and depend upon well water. The water in the wells has continuously declined during the last two years when rainfall has been less than normal. Negotiations have been going on with the Birmingham Water Department which is responsible for the provision of mains water in this part of the Rural District but the cost of providing long lengths of main to the few properties that need water, is great. The Council have thought, where some of the extensions were concerned, that the guarantee required to extend the main was an unreasonable cost to the rate fund.

None of the water treated in the Rural District is plumbo solvent.

As happens periodically the Council has once again been asked to reconsider their approval to the South Warwickshire Water Board adding fluorine to the water supplies in the area. It is with great pleasure that I report that they continue to approve of this scheme, the holdup being due largely to the somewhat complicated engineering works necessary to add it to all the sources of supply in the area.

ICE-CREAM PREMISES

No ice-cream is manufactured in the District. Ninety premises are registered for storage and sale of ice-cream supplied by large manufacturing firms.

No samples were taken during the year.

FOOD HYGIENE REGULATIONS

One hundred and twenty four inspections have been made under the provisions of the Regulations and the following improvements recorded:

Ventilation.. .. .	13
Wash-hand basins.. .. .	9
Hot and cold water	9
Rooms requiring cleaning and decorating	13
First aid materials.. .. .	7
Clothes lockers	5
Soap, towel and nail brush	9
Dirty floors	13
Defective dustbins.. .. .	7

UNSOOUND FOOD

The following has been voluntarily surrendered to prevent it being used for human consumption. A large proportion of this has been brought to the headquarters of a multiple shop which is situated in this district.

210 tinned tomatoes	101 tinned vegetables
527 tinned fruit	6 tinned cream
70 tinned fish	41 tinned evaporated milk
90 tinned meat	36 tinned milk puddings
4 tinned fruit juice	4 tinned soup
38 lbs. meat

RODENT CONTROL

The Council employ one full-time Rodent Operative.
Number of inspections as a result of notification:

1. Dwellings	356
2. Business premises	3
3. Farms	780
4. Council property	150

Number of infestations discovered:

1. Dwellings	356
2. Business premises	3
3. Farms	68
4. Council property	9

Number of re-visits for treatment purposes .. 848

The value of contracts in operation on the 31st December, 1965, was £634, involving 68 premises. The Council at their meeting in April, 1965, decided not to increase the price of contracts for farms, that at the present time averages at less than £10 per premise. At least twelve visits per year are made.

WARWICKSHIRE CLEAN AIR COUNCIL

A smoke filter with volumetric sulphur dioxide apparatus, together with a lead peroxide apparatus are in operation in the district.

Ten children from the district attended the one-day conference for schools at Coventry.

ANIMAL BOARDING ESTABLISHMENTS ACT, 1963

Two premises in the District are licensed to keep an animal boarding establishment. Inspections to these premises during the year have found them to be satisfactory.

OFFICE, SHOPS AND RAILWAY PREMISES ACT, 1963

The majority of the premises in the district are now registered.

Four accidents have been investigated.

A photometer has been obtained for observing lighting standards. The results observed in the nine premises during the last three months of the year are satisfactory.

The annual report under the Act is as follows:

TABLE A—REGISTRATIONS AND GENERAL INSPECTIONS

SEWERAGE AND SEWAGE DISPOSAL

MAIN SCHEMES

Three main schemes for new sewerage and sewage disposal works were still in progress at the beginning of the year. Progress has most unfortunately been very slow and a certain amount of trouble has arisen due to faulty alignment of some of the sewers. The remedying of this wrong alignment has delayed the bringing of sewerage and sewage disposal works into use. By the end of the year the central area scheme with the new sewage works at Oversley near Alcester, was brought into use. The new scheme in the northern area dealing largely with the sewage from Studley was held up owing to discussions concerning sewage disposal for the Redditch New Town. By the end of the year, the southern scheme had nearly been completed.

SMALL VILLAGE SCHEMES

The Council's Consulting Engineers were instructed earlier in the year to produce outline schemes for the drainage and treatment of sewage from the small villages in the Rural District. Their plans envisaged draining small villages to the new treatment works of the major schemes which are nearing completion. The Council gave deep consideration to the matter particularly since the cost of the whole scheme would be very great. It was finally decided to proceed as follows:—

Where the northern areas were concerned, the villages of Sambourne, Spernal and Mappleborough Green and several smaller hamlets were not proceeded with since they would probably link up with the arrangements for sewage treatment for Redditch New Town.

The villages in the central area to be proceeded with were Coughton, Great Alne, Haselor and Aston Cantlow. These villages would be drained to the new works at Alcester.

In the southern area the hamlets and villages of Dunnington and Ardens Grafton were put back from the first stage. The villages of Wixford and Exhall were, however, to be proceeded with and drainage would be to Bidford-on-Avon.

During the year several complaints have been received from the Severn River Authority about poor effluent from village drains in the small villages. These complaints apply particularly to the village of Haselor where farm drainage has for a long time been going into the small village tank. The effluent from this tank has been producing extreme pollution of the small brook. A temporary solution to this difficulty was decided upon in the beginning of the year when sewerage effluent was to be sprayed on farm land. The Council agreed to this and as a temporary measure had the approval of the Severn River Authority.

WILMCOTE

The laying of the new sewer in the village of Wilmcote proceeded during the whole of the year, work being rather slow. By the end of the year, however, all that was left to be undertaken were house connections and certain remedial works to defective sewers. The sewage from this village proceeds by gravity to the Borough of Stratford-upon-Avon where it is eventually treated at the Council's Treatment Works at Milcote.

SEWERAGE WORKS SUPERINTENDENT

With the completion of the new works at Alcester and the imminent completion of northern and southern area sewage schemes, a Sewerage Works Superintendent was appointed during the year. In addition to supervising the maintenance of the

main works he has undertaken with his staff a considerable amount of maintenance on small works in the villages. This work has resulted in a very great improvement of the effluent from these works.

WATER SUPPLIES

The whole of the Rural District, apart from a small area in the south, receives its water by arrangements made by the East Worcestershire Water Works. There has been no difficulty during the year and the Company has been engaged in improving the water supply to Dunnington and Bidford-on-Avon by replacing the supply from the Coventry Aqueduct by supplies from Worcestershire. Plans are being made to augment the supply to Studley and Alcester where greater supplies are required because of new housing development.

Some of the southern villages in the Rural District receive their supplies from the South Warwickshire Water Board and again there have been no difficulties since the source of supply at Snitterfield in the Stratford-on-Avon Rural District has been aerated to overcome the sulphur bacillus infection. None of the water for domestic supply is plumbo-solvent.

PUBLIC HEALTH ACT, 1936

1. DRAINS AND SANITARY ACCOMMODATION

The Council decided several years ago that as and when the mains sewerage works in any villages were being constructed, the conversion and modernisation of house drains should be undertaken at the same time and in conjunction with the general contract. Thus as the schemes for sewerage the villages have been completed all house drains have been brought up to standard and connected to the new sewers and the surface water drains disconnected and drained to appropriate culverts or ditches. Where properties had no modern facilities lateral drains have been laid ready for use in the future.

In those villages where schemes are not yet in progress of construction it is the policy of the council to encourage owners to improve property and to install modern drains which can readily be connected to the new sewers as and when they are installed.

Most of the villages in the district have now been surveyed and sketch plan details of existing drains for each house have been prepared and filed. This is found most useful when the work of connecting to the new sewers is in progress and helps in determining what work has to be carried out to bring the existing drains up to the required modern standard.

2. REFUSE COLLECTION AND DISPOSAL

The council having decided to retain the smaller of the refuse collecting vehicles another year, it is disappointing to find that the weekly collection of refuse in villages outside Shipston-on-Stour cannot be undertaken for at least twelve months. Few complaints have been received in connection with refuse collection but the full weekly collection should be made at the earliest opportunity, and consideration be given to the question of collection from the premises instead of the kerbside collection as at present.

Refuse disposal is being carried out in the disused railway cuttings outside the town and is found to be very convenient. A man is kept at the tip and has the use of a bulldozer, a scraper and when required an excavator to assist in maintaining controlled tipping. Refuse is being levelled off and covered as it is received and the surfaces are being dressed off as each section is completed. A supply of tip dressing and pesticide is kept at the tip and is used as required. A small amount of fly nuisance occurred during the year when the usual man was absent through sickness and the tip did not receive its normal attention.

The council are keeping the question of the disposal of old car bodies under constant review. Some are accepted at the tip and filled with refuse in the bottom of the tipping area, but this is becoming increasingly difficult and absorbs too much labour. A quarry at Stretton-on-Fosse is being used by a car breaker but there are three illegal dumps in the area which need to be cleared. The scheme for the use of a crusher has not materialised.

3. NIGHTSOIL COLLECTION

There is no nightsoil collection in the area as the general practice is to install septic tank systems of drainage where no sewers are available. Some of the cottages have pail closets and the contents of these are buried in the gardens and create no problem.

4. CAMPING AND CARAVAN SITES

There is one site in the area for use by the Camping Club for five caravans, and there are 14 single sites occupied by single caravans used in connection with agriculture or domestic need. All the sites have hard standings, water supply and sanitary accommodation and comply with the regulations. The council have refused applications to set up caravan sites for general use in order to preserve the rural amenities of the area.

FOOD AND DRUGS ACT, 1955

ICE-CREAM PREMISES

Almost all the registered premises in the area for the sale of ice-cream sell only the pre-packed variety. Regular inspections are made and the premises are maintained in a hygienic condition. There has been no cause for complaint.

Registered premises for the manufacture by heat treatment	0
Registered premises for the manufacture of cold mix	0
Registered premises for the sale of ice-cream	41

BAKEHOUSES

There are two bakehouses in the area and both are maintained in a satisfactory and hygienic manner.

FISH FRIERS

Fish frying is carried out at two premises in the area as an ancillary to the wet fish trade. Hygienic methods are practised and the premises are regularly inspected. No complaints in connection with the use of the premises have been received.

SAUSAGE MANUFACTURE

The manufacture of sausages is carried out at seven butchers in the area as an ancillary to the general trade. No wholesale business is carried on and conditions are satisfactory.

INNS, PUBLIC HOUSES AND HOTELS

Satisfactory conditions are maintained at the 28 licensed premises in the area. Regular inspections are made and improvements called for as necessary.

HYGIENE REGULATIONS

The undermentioned list sets out the premises in the area subject to the Hygiene Regulations. These are in addition to the inns and hotels.

Trade	No. of Premises
General stores	31
Grocers	4
Butchers	8
Fishmongers	2
Confectioners	8
Greengrocers	2
Restaurants	7
Slaughterhouses	2

Twenty-five contraventions of regulations have been reported in the year, all of which have been remedied informally.

FOOD AND DRUGS ACT, 1955—SECTION 31

RESTAURANT KITCHENS

Inspections are made at premises where food is prepared for sale to ensure that the Food Hygiene Regulations are carried out. Efforts are being made to improve conditions at one premises where the trade is outgrowing the accommodation. No official action has been necessary.

MILK AND DAIRIES

All licences under the Milk (Special Designations) Regulations are issued by the Warwickshire County Council. Full co-operation is maintained between the County Council and this Council and records are kept of licences issued or cancelled.

The following table shows the results of samples taken in this area during the year. Thirty samples were submitted for biological examination all of which were reported as a negative result for tubercle bacilli.

DESIGNATION			TESTS FAILED		
Untreated formerly T.T.	Pasteurised	Sterilised	Methylene Blue	Phosphatase	Turbidity

RODENT CONTROL

A full time operator is employed to carry out the requirements of the Prevention of Damage by Pests Act, 1949. The work is supervised by the Public Health Inspector. The operator carries out survey work in addition to treatments.

Farm and business premises are catered for under a contract system which has proved very satisfactory. The Council's operator treats the Council's sewers and sewage disposal works and gives special attention to the refuse tips. A free service is operated for the minor infestations found in domestic premises.

SUMMARY OF RODENT CONTROL ACTION

Number of contracts obtained Annual	65
Hourly charge	5
Value of annual contracts	£515-3-0
Value of hourly charge contracts	£7-10-0

WATER SUPPLIES

Except for a few outlying farms on the higher parts of the district the whole of the area is now served by a full comprehensive water supply system fully sufficient for all domestic and trade purposes. The system is under the control of the South Warwickshire Water Board who took over from the district Council in 1963.

Supplies are obtained from the North Cotswold Water Board, wells in the Stratford-on-Avon rural district and local springs in Ebrington. Distribution is carried out from six service reservoirs and there are five electrically operated automatic pumping stations in the district.

The South Warwickshire Water Board, by virtue of ring mains, have been able to ease the demand on the district and although dry conditions have been experienced there has been no shortage of water and, therefore, no need to restrict supplies.

QUALITY OF WATER

The supplying authorities chlorinate the water at the various sources and samples are regularly taken and submitted for analysis. No complaint has been received.

Where private supplies are still in use the water supply is checked at intervals to ascertain that the systems are satisfactory.

ANALYSIS OF WATER SUPPLIES

Samples of water are taken at intervals as deemed to be necessary. During the year five samples have been taken and the results are set out hereunder.

Private	0
Public	5 Satisfactory

ACTION IN RESPECT OF CONTAMINATION

The Council have a portable Wallace and Tiernan chlorinator which can be used if the need of emergency arises and a small stock of liquid chlorine is kept available.

PLUMBO SOLVENCY

There is little risk of plumbo solvent action as all the water supplied in the area is fairly hard. Most of the pipework used in domestic systems is either of copper, iron or thermo-plastic.

SEWERAGE

Steady progress is being maintained with the sewerage of villages in the area and the Council are slowly fulfilling their resolve to sewer the whole of the area. Fourteen villages have now been sewered, the three villages of Butlers Marston, Pillerton Priors and Pillerton Hersey have a scheme which is now almost complete. The scheme serving Armscote, Blackwell, Darlingscote, Halford, Honington, Newbold-on-Stour, Tredington and part of Shipston-on-Stour has been approved by the Minister and it is hoped to start work early in 1966. This large scheme will also provide a complete new disposal works for the town of Shipston-on-Stour where the original disposal works is obsolete.

The proposed scheme for the sewerage of the villages of Oxhill and Whatcote has been approved in principle and is awaiting the Ministry inquiry. Unfortunately there has been delay in obtaining land for the sewage disposal works.

Details are being prepared for a joint scheme to serve the villages of Burmington, Barcheston, Tidmington and Willington, where the sewage will be pumped to the new disposal works at Shipston-on-Stour.

In addition to the above, the scheme for the sewerage of Whichford has been prepared in outline.

The Council have followed a policy of amending existing house drainage systems and having them connected up to the new sewage schemes as the work of each scheme is in progress. This has resulted in house drains and village sewers all being completed and put to work 100 per cent as each contract reaches its final stage. This method obviates the necessity for the service of notices for the enforcement of house drainage systems and the general considerable delay where this type of work is not undertaken in conjunction with the main sewage contracts.

Where main sewers are not yet provided in full, there are a number of small disposal works which receive careful attention, and in other cases, properties are drained to septic tanks or soakaway systems. Whilst every effort is made to reduce nuisance to a minimum nothing less than full sewage disposal systems will prevent the contamination of streams, ditches and the River Stour. It is, therefore, essential that the Council's policy of sewerage all the villages in the area should progress as rapidly as is possible.
