## TO THE CHAIRMAN AND MEMBERS OF THE HEALTH AND HOUSING COMMITTEE AND

TO THE CHAIRMAN AND MEMBERS OF THE MATERNITY AND CHILD WELFARE COMMITTEE.

#### Ladies and Gentlemen:

I beg to submit my Report on the health of the Borough for 1946. As I commenced my duties here in the last few weeks of 1946 I can only make general comment on the statistical report for the year. The statistical review as a whole is satisfactory.

I would express my thanks to the members of the staff for their enthusiasm and keenness in their work. I would also like to thank the Chairman and Members of the Health and Housing Committee and of the Maternity and Child Welfare Committee for the help and suggestions given me.

I have the honour to be,

Ladies and Gentlemen,

Your obedient servant,

JAMES R. PRESTON.

Council House, Sutton Coldfield. February, 1948.

|             |       |       |       |       |       |       |       |       |       |       |

Population.

The population at the mid-year 1946 as estimated by the Registrar General is 44,460, as compared with 42,420 for 1945.

The corresponding local estimate, based on the number of inhabited dwellings is 45,437. This compares with the local estimate of 42,987 for 1945.

Births.

The number of live births assigned to the Borough is 73 more than those for 1945, and the rate is 17.0, as against a birth rate of 19.1 for England and Wales and 21.3 for the Smaller Towns.

The still-birth rate per 1,000 of the population is 0.43, as compared with .53 for England and Wales and .59 for the Smaller Towns, and the rate per 1,000 total births (live and still) is 24.5 compared with 27 in 1945.

Illegitimate births have decreased from 50 in 1945 to 40 in the year under review, and the rate per 1,000 total births (live and still) is 52 as compared with 71 in 1945, which, although an improvement is still higher than the average of 30 for the five pre-war years.

Deaths.

Deaths assigned to the Borough number 500 as compared with 412 in 1945, and for the year under review the crude rate per 1,000 population is 11.25, which compares with 11.7 for the Smaller Towns.

In infectious diseases, deaths recorded were from diphtheria, I; influenza, 6; poliomyelitis, I; and respiratory tuberculosis, 9. The incidence of respiratory tuberculosis was much the same as in 1945.

Deaths assigned to heart disease continue to outnumber those under any other listed cause, and the mortality rate is 3.2, which is a marked increase on the rate of 2.7 for 1945.

The number of deaths due to heart disease is considerably increased over 1945, this increase is almost entirely due to deaths in males over 50 years of age and especially in the age group 75 and upwards.

Amongst deaths from violence are drowning, 3; coal gas poisoning, 2; scalds, 1; and falls, 1.

### GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA. STAFF OF HEALTH DEPARTMENT OF THE AUTHORITY.

| Officers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |     |             | Offices held, etc.                                           |

†Meat and Food Inspectors' Certificate of the Royal Sanitary Institute. \*Health Visitors' Certificate of the Royal Sanitary Institute.

#### MATERNITY AND CHILD WELFARE.

#### Provision for Maternity.

By arrangement with the Public Assistance Officer, 42 women were admitted for confinement to the Solihull Public Assistance Maternity Unit, and 19 to the Emergency Hospital, Nuneaton. The Maternity Hospital, Loveday Street, admitted 45 cases from the Area, 10 of which were referred from the Maternity and Child Welfare Department and the remainder by private practitioners. 9 women were also admitted to the maternity block of a Birmingham voluntary hospital.

Private maternity homes in the Borough, registered for 8 beds, provided accommodation for 172 residents of the Borough, and the Maternity Unit, Anchorage Road, which opened in July and registered for 16 beds, accommodated 81. 37 residents were admitted to private nursing homes outside the Borough.

The total number of women residents in the Borough, therefore, whose confinements took place in institutions is 405 or 52·3 of the total births assignable to the Borough.

The private nursing homes in the Borough also provided accommodation for the confinements of 110 non-resident women, in addition to the residents mentioned above, a total for the year of 363.

There was an increase in the number of confinements in hospitals or maternity homes, approximately half of the total births taking place in these institutions.

#### Home Helps.

This service was continued successfully during the year and the Home Helps attended 84 cases, namely:—normal maternity cases, 64; ante-natal cases, 2; post-natal cases, 1; and other maternal emergencies, 17.

#### Child Life Protection.

At the end of the year 5 persons were on the register of foster parents and 67 children were boarded.

13 visits were paid by the Visitors for the purpose of supervision and the home conditions and health and well-being of the children were found to be satisfactory at all times.

#### Orthopaedic and other Treatment.

One child was referred for treatment at the Orthopaedic Hospital, Birmingham under the Local Authority's Scheme, for club foot.

14 children were referred to the Children's Hospital for naevus (6); strabismus (5); diseased tonsils (1); and phimosis (2).

2 children were placed in the care of the Assistant Tuberculosis Officer.

#### Infant Mortality.

Deaths in infants under one year number 24, and the rate of infant mortality is 32 per 1,000 total live births. This rate is slightly lower than that for 1945 (35) and compares with 43 for England and Wales and 37 for the Smaller Towns for the year under review.

Amongst the causes of death as certified are:—
prematurity, 5; congenital malformation, 9; digestive diseases, 3;
broncho pneumonia, 3; and other causes, 4.

#### Maternal Morbidity and Mortality.

No death is recorded from puerperal infection or from other maternal causes.

Two cases of puerperal infection were notified in the area.

#### Care of the Unmarried Mother and Illegitimate Child.

This work has been continued under the arrangements made with the Birmingham Diocesan Council for Moral Welfare and the Superintendent, Mrs. Hollyoak, reporting on her work in the Borough during the year gives the following statistics:—

| Total number of cases resident in the Borough |    |
|-----------------------------------------------|----|
| brought to notice and supervised              | 40 |
| Arrangements made for hospital confinements   | 8  |
| Arrangements made for care in Moral Welfare   |    |
| Homes                                         | II |
| Help re affiliation, putative fathers, etc    | 9  |
| Married mothers; help re adoption, etc        | 6  |
| Unmarried mothers                             | 4  |

The illegitimate rate per 1,000 live births has decreased from a rate of 73 for the year 1945 to 53 for the year under review.

#### Care of Premature Infants.

Twenty-six under-weight babies were notified by doctors and midwives during the year, 6 of whom were born in private houses and 20 in nursing homes.

Of the babies born in nursing homes, 9 died during the first 24 hours. Of the 6 babies born in private houses 2 died during the first 24 hours.

#### Infestation.

13 cases of scabies in 7 families were treated by the Health Visitors in the homes throughout the year, figures which indicate a very satisfactory reduction in the incidence of the disease.

18 children and I adult in Io families were treated for pediculosis.

#### Nursing Homes.

During the year under review one application for registration was received and granted, and one home was temporarily closed owing to lack of staff.

At the end of the year 4 persons remained on the register in respect of 3 nursing homes, and I maternity home, providing bed accommodation for 24 medical and surgical cases and 24 maternity cases.

In visits of inspection were made during the year, and having regard to difficulties arising out of shortage of nursing and domestic staff, management of the homes has been entirely satisfactory.

#### SANITARY CIRCUMSTANCES OF THE AREA.

#### Infectious Diseases.

| Cases removed to Hospital:—                             |     |

Number of animals known to have been slaughtered during the year.

462 Pigs.

I Calf.

Number of animals inspected during the year.

417 Pigs. 1 Calf.

Number of visits made for the purpose of inspection: 435 visits.

Statement of diseased or unfit conditions found.

#### TUBERCULOSIS.

10 Pigs' Heads...100 lbs.1 Pig's Pluck...8 lbs.1 Mesenteric Fat...2 lbs.2.37% found to be affected with tuberculosis.

#### OTHER CAUSES.

2 Pigs' Lungs (Pneumonia) 10 lbs. 1 Pig's Lungs (Cysts) ... 5 lbs.

0.72% found to be unfit due to causes other than tuberculosis.

#### FACTORIES.

#### Inspections for purposes of provisions as to health. Including inspections made by Sanitary Inspectors.

#### INFECTIOUS DISEASES.

In the year under review, apart from a sharp increase in scarlet fever, there is no marked change in the incidence of infectious disease.

The number of cases of scarlet fever notified is 87, compared with 37 notified in 1945. 64% of the infectious diseases are in the age group 5—10 years and 4% in the pre-school group.

The case rate is 2.0 per 1,000 civilian population as compared with 1.38 for England and Wales. The mortality is nil.

The incidence of diphtheria is much lower than the previous year, but of the two cases notified, one, a man of 27 years, unfortunately died. The Public Health Department has been informed that this last case was inoculated whilst in the Army.

Forty-three nose and throat swabs were examined, of these three were reported as positive.

Eight 8,000 units phials of anti-toxin were issued to practitioners, free of charge.

#### Diphtheria Immunization.

The number of children o—14 years in the Borough artificially immunized at 31st December, 1946, is 85% of the total child population at these ages. The percentages at ages o—4 years and 5—14 years are respectively 70% and 94%. The latter figures compare with 59% and 92% at the end of 1945.

During the year under review 473 children had complete courses of inoculations; 437 in the age group 0—4 years and 36 in the age group 5—14 years.

In pursuance of the policy of carrying out the inoculations in the 12—15 months age group, 328 out of the 437 inoculations were in the age group 12—24 months.

These immunization returns are satisfactory, but in the period of the report I death from diphtheria has been recorded in the Borough in an inoculated person.

Twenty-eight cases of measles were notified during the year, a great decrease from the previous year in which there was an epidemic showing 359 cases notified.

The case rate is .63 as compared with 3.92 for England and Wales and 3.70 for Smaller Towns.

A slight decline in the general incidence of whooping cough was recorded, but there was a sharp rise in the autumn, the majority of cases being in the age group 5—10 years.

The case rate is 2.00 as compared with 2.28 for England and Wales and 2.05 for the Smaller Towns.

No deaths were recorded from whooping cough.

#### Whooping Cough Immunization.

Although views are still at variance as regards the value of immunization against whooping cough, nevertheless this service was provided for those who desired it.

The number inoculated during the year 1946 was 160 as compared with 148 in 1945.

One case of typhoid fever was notified on 19th August, in a girl of 9 years of age. The patient was on a visit to her aunt here from Aberystwyth, where she had ice cream from several sources. No definite source was traced but it was considered likely that the infection originated in Aberystwyth.

The case rate is ·02 as compared with ·01 for England and Wales and the Smaller Towns.

One case of paratyphoid was notified on 24th April, in a woman of 36 years of age, but was not confirmed by bacteriological investigations.

Four cases of dysentery were notified. The cases were sporadic and no common source of infection was found. Bacteriological investigation of the cases proved one to be due to B. dysenteriae Sonne.

Twenty-four cases of pneumonia were notified during the year. This compared with 25 in 1945.

The case rate is 0.50, as compared with 0.89 for England and Wales and 0.74 for the Smaller Towns. 50% of the cases occurred in the age group 45—65 years.

One case of cerebro-spinal fever was notified, removed to hospital and recovered.

The case rate is 0.02 as compared with 0.05 in 1945.

Three cases of poliomyelitis were notified, two were removed to hospital and one, a boy of 15 years, died soon after admission.

Two cases of puerperal pyrexia were notified, one occurred in a maternity home and one at home. The latter was removed to hospital. No deaths were recorded.

The rate per 1,000 total births is 2.6, as compared with 8.5 for England and Wales and 7.63 for the Smaller Towns.

Four cases of ophthalmia neonatorum occurred. Three were notified by the Eye Hospital, Birmingham, and one by a local medical practitioner.

Notifications of new cases of respiratory tuberculosis number 19, as against 23 in 1945, the figures being higher in males.

The incidence was spread generally through the age groups, apart from a slight increase in the 20—35 years age group.

The case rate for the respiratory form is 0.4 as compared with .54 for 1945.

Notifications of the non-respiratory forms number 11, these being mainly in the age groups 3—15 years.

The case rate is 0.2.
