ANNUAL REPORT

OF

THE MEDICAL OFFICER OF HEALTH

**To the Mayor, Aldermen and Councillors
of the Borough of Tamworth**

Mr. Mayor and Gentlemen,

I beg to submit my report on the state of the Public Health in the Borough of Tamworth for the year 1955.

The Birth Rate was 14.4 and the Death Rate 13.2.

The Infant Mortality Rate was 15.6 whilst there were no deaths attributable to childbirth.

An epidemic of Measles affecting 302 children occurred during 1955 but in no instance was school closure necessary.

Two cases of Poliomyelitis were notified and in both instances prompt action was taken by the Health Department to limit the spread of infection in the Borough.

Prompt and proper measures were taken by the Health Department to safeguard the Public Health in March when the town experienced extensive floods of exceptional severity.

The Health Department's Survey of unfit houses required by the Housing Rent and Repairs Act, 1954, was submitted to the Health Committee at its April Meeting. Following approval of the Report of Survey by the Borough Council it was submitted to the Minister of Housing and Local Government by whom it was later approved.

461 dwelling-houses were considered to be unfit for human habitation within the meaning of the Act. The Borough Council advised the Minister of its intention to deal with 300 of these unfit houses in the first five years.

Six houses, included in a previous Clearance Order, were demolished in the course of the year.

Before proceeding to my Report I wish to thank the Health Department Staff for their unfailing help and the Health Committee for the consistent support and encouragement afforded me during this not uneventful year.

I will now proceed with my Report.

A. FARNILL MORGAN,

MEDICAL OFFICER OF HEALTH.

Housing Act, 1936.**Housing Repairs and Rents Act, 1954.**

Under the Housing Repairs and Rents Act, 1954, all local authorities were required to make a survey and estimate with proposals for dealing in one way or another, the houses in their area which appeared to be unfit for human habitation and liable to demolition.

This survey was completed in the Borough and submitted to the Health Committee in April and forwarded to the Minister of Housing and Local Government in July and subsequently endorsed.

The following table shows the extent of the slum clearance problem in the Borough and the proposals for dealing with the matter.

Part 1. The total problem.

- | | | | |
|------|---|--------|-----|
| (i) | Estimated number of houses unfit for human habitation within the meaning of section 9 of the Housing Repairs and Rents Act, 1954, and suitable for action under section 11 or section 25 of the Housing Act, 1936 | | 461 |
| (ii) | Period in years which the Council think necessary for securing the demolition of all the houses in (i) | 10 | |

Part 2. Orders already made, etc.

- | | | | |
|-------|---|--------|---|
| (iii) | Number of houses in (i) in clearance areas and already covered by operative clearance or compulsory purchase orders or owned by the local authority | | — |
| (iv) | Number of houses which are already in clearance areas and for which clearance or compulsory purchase orders have been submitted to the Minister but have not yet become operative | | — |

Part 3. Action in the first five years.

- | | | | |
|------|---|--------|-----|
| (v) | Number of houses which are already in clearance areas and for which clearance or compulsory purchase orders are to be made or which are to be purchased by agreement within five years | | — |
| (vi) | Number of houses which are to be included in clearance areas still to be declared and which within the five years will be owned by the local authority or will have been included in a clearance order or compulsory purchase order submitted to the Minister | | 300 |

- (vii) Number of houses under (iii), (iv), (v) and (vi) to be patched (if necessary) and retained within the five years under section 2 of the Housing Repairs and Rents Act, 1954, for temporary accommodation —
- (viii) Number of houses under (iii), (iv), (v) and (vi) to be demolished in the five years ... 300
- (ix) Number of houses (including those already comprised in operative demolition orders) to be demolished in the five years as a result of action under section 11 of the Housing Act, 1936 ... —

HOUSING

	<u>289</u>	<u>512</u>	<u>801</u>

HOSPITALS

All hospitals in the Borough are included in the Lichfield, Sutton Coldfield and Tamworth Group under the Birmingham Regional Hospital Board and are as follows :—

Tamworth General Hospital.
St. Editha's Hospital.
Tamworth Isolation Hospital.

MATERNITY ACCOMMODATION

No maternity accommodation is provided at the Hospitals in the Borough.

CLINIC AND TREATMENT CENTRES

These are under the County Council (except Tuberculosis and Orthopædic Clinics) since the 5th July, 1948.

Infant Welfare Clinics are held twice weekly.

A School Clinic is held weekly.

An Ante-Natal Clinic is held weekly.

Eye Clinics are held fortnightly.

Dental Clinics are held weekly for expectant and nursing mothers, toddlers and school children.

An Orthopædic Clinic is held weekly at the College Lane Schools.

A Chest Clinic is held weekly at the Lichfield centre.

AMBULANCE SERVICE

An ambulance is stationed at Tamworth and is available during the daytime. The Lichfield ambulance is available at all other times.

LABORATORY SERVICE

Bacteriological, pathological and chemical examinations are done at the Medical Research Laboratory, Stafford, since the 5th July, 1948, formerly the County Laboratory.

WATER SUPPLY

Source of Supply.—Well and bore hole at Hopwas Pumping Station. South Staffordshire Waterworks Company.

Gallons Pumped during 1955. — 213,230,000 Gallons. Received from South Staffordshire Waterworks Company, 55,969,000.

Well.—Highest, 6ft. 6in.; Lowest, 1ft. 1in.

Treatment Before Distribution.—The supply is chlorinated en route to the high level reservoir at Hopwas, and the bulk supply from the South Staffordshire Waterworks Company is chlorinated at source.

All dwelling houses in the Borough have a piped supply, either direct into the house or by means of standpipes.

Approximate number of houses supplied:—

				Population
(a) Direct to houses				
4,110	13,264
(b) By means of Standpipes				
24	96

Rainfall.—The Rainfall for the year 1955 was 21.9in.

With the assistance of the bulk supply from the South Staffordshire Waterworks Company, it was possible to give a continuous supply to all consumers throughout the year, at pressures ranging from 30lbs. to 80lbs.

During the year, 24 samples of water have been obtained by the Health Department from domestic supplies in various parts of the Borough and submitted for bacteriological and chemical examination.

The results were satisfactory. The water is not plumbo solvent. There is a fairly high degree of hardness.

OPEN-AIR SWIMMING BATHS

Routine samples were taken during the summer months when the baths were open. Bacteriological analyses were all satisfactory. "Break-point" chlorination was used.

These baths are a very valuable health asset to the Borough and are well patronised.

ANNUAL REPORT

OF

THE SENIOR SANITARY INSPECTOR

To the Chairman and Members of the Health
Committee.

Mr. Chairman and Gentlemen,

I herewith present my Annual Report for the year 1955.

The Survey, under the Housing Repairs and Rent Act, 1954, of houses in the Borough which appeared to be unfit and liable to demolition was completed.

Four hundred and sixty-one houses were estimated as being unfit for human habitation and the Council considered that three hundred could be dealt with in five years and the total number over a period of ten years.

To make the appointment of an Additional Sanitary Inspector it was necessary to advertise three times, Mr. Gladwin was appointed and commenced his duties in February. His services have been a great help in carrying out the duties of the Department.

The general work of sanitary administration is summarised in the various tables.

SANITARY ACCOMMODATION

The number of types of closet accommodation existing at the end of the year is as follows—

No. of	No. of	No. of	No. of	Per cent.	Per cent.
Houses	Privies	Pails	Water Closets	Dry	Water Closets
4,134	6	36	4,861	0.86	99.14

The privy and pail type of closet are in the rural parts of the Borough where no sewer is available.

There are approximately 20 premises served by a system of drainage discharging to cesspools.

INSPECTIONS.

The following statement shows the number of visits and inspections to various classes of premises.

Visits and Inspections					Number
Inspection of drains of old property	26
Other inspections of existing property	310
To work in progress	522
„ test drains and sanitary fittings	10
„ premises re infectious diseases	14
„ tuberculous cases	3
„ respecting disinfection	12
„ cowsheds, dairies and milkshops	42
„ bakehouses	64
„ slaughterhouses	594
„ manure steads	3
„ factories	56
„ outworkers' premises	8
„ shops re Shops Acts	74
„ „ re Meat Regulations	38
„ food inspection	232
„ offensive trades	4
Miscellaneous visits	72
Housing Acts	206
Caravans	12
					2,302

COMPLAINTS.

Nature of Complaint					Number Received
Choked passage drain	10
„ slopstone waste pipe	9
„ water closet	32
„ yard drain	18
Defective water closet basin	22
„ dust bin	146
„ wall and ceiling plaster	62
„ house roof	74
„ windows	46
„ kitchen sink	8
„ cooking range	24
„ floors	16
„ doors and frames	18
„ wash-houses and washing coppers	28

(c) Not separate for sexes ...	—	—	—	—	—
Total ...	4	4	—	4	—

Eight persons were returned as Outworkers under the Act, and these were engaged on wearing apparel. Visits were made and in each case the home conditions were considered suitable.

DAIRY FARMS, DAIRIES, RETAIL PURVEYORS OF MILK

Cowkeepers	10
Dairies	4
Retail Purveyors	12

The majority of the milk retailed within the Borough is pasteurised and sold as such. One producer/retailer is an "accredited" producer.

One dairy is licensed to pasteurise milk and the principle adopted is by the "holder" method. One dairy obtains the supply pasteurised and bottled from a large wholesaler.

Inspections of dairies, vehicles and vessels have been made and attention directed to any contravention of the Regulations.

THE MILK (SPECIAL DESIGNATIONS) (SPECIFIED AREAS) (No. 2) ORDER, 1955.

The above mentioned Order was made jointly by the Minister of Agriculture, Fisheries and Food and the Minister of Health and came into operation on the 6th December, 1955.

The Borough of Tamworth was included in a Specified Area and this meant that on and after the 6th December, 1955, all dairymen who retail milk in the Borough must sell the milk under special designation, irrespective of whether the premises from which the milk is retailed are inside or outside the area, and, any other milk which is retailed outside the specified area from those same premises must also be sold under Special Designation.

The special designations authorised to be sold are "Pasteurised," "Sterilised" and "Tuberculin Tested."

PREVENTION OF DAMAGE BY PESTS ACT, 1949

An employee of the Council is trained and engaged in part-time rodent control work.

One hundred and nineteen inspections were made and seventy-two premises were found to be infested. The facilities provided by the Council were made available to the owners or occupiers and the infestations were successfully treated by pre-baiting and poisoning.

Half-yearly treatment of the sewers and periodical treatment of the Council's refuse disposal tip has been carried out.

SANITARY SUPERVISION OF PLACES OF AMUSEMENT

The cinemas and other places of entertainment have been periodically inspected with regard to the sanitary accommodation.

The managements have been found anxious to maintain the conveniences in a satisfactory condition, and any defects found have at once been remedied.

PUBLIC HEALTH (MEAT) REGULATIONS, 1924-1935

Slaughter of Animals Act, 1933-1954

There are six licensed slaughterhouses in the Borough and the following animals have been killed:—

		Cattle.	Calves.	Sheep.	Pigs.
1954	...	982	141	4,661	3,734
1955	...	926	178	3,445	6,692

During routine inspection, two cases of localised *Cysticercus Bovis* were found. The organs were condemned and the carcasses subjected to refrigeration in accordance with the recommendations.

In April and May, daily visits were paid to the Tamworth Cold Store to supervise the trimming of meat.

The meat contained in one of the chambers was affected with white mould growth. The following meat was condemned:

Seven Pork sides	...	199 lbs.
Pork Trimmings	...	882 lbs.
Beef Trimmings	...	7 lbs.
Beef Kidneys	...	66 lbs.

The mechanical stunning of all animals is required and twenty-six persons are licensed to slaughter.

BUTCHERS' SHOPS, BAKEHOUSES AND FOOD PREPARING PREMISES

There are twenty-three butchers' shops, seven bakehouses and thirty-four food preparing premises in the Borough.

Visits of inspection have been carried out, attention being directed to the conditions and cleanliness of premises, utensils, machinery, etc., and the personal hygiene of the employees.

I am, gentlemen,

Your obedient servant,

H. BIRCHWOOD,

SENIOR SANITARY INSPECTOR.
