BOROUGH OF THORNABY-ON-TEES

Mayor:

ALDERMAN WILLIAM SHEPHERD, J.P.

Deputy Mayor:

ALDERMAN HAROLD DACRE, J.P.

Aldermen:

E. E. Brennan, J.P., C.C.	J. R. Hough
*W. Harris, J.P.	J. L. F. McGann, J.P., C.C.

Councillors:

C. Allen	J. McCabe
*J. T. Bashford	A. Nicholson
J. W. Bennett	*T. Padgett
A. Bosomworth	*A. Pounder
J. W. Collinson	*Mrs. S. J. Smith
*J. Corfield	J. N. Scott
*R. Dinsdale	J. W. Walton
*H. Drinkel	*L. S. Williamson
*Miss G. Holmes, J.P.	J. S. Worsley, J.P. C.A.

Chairmen:

Sanitary Committee ... Ald. E. E. Brennan, J.P., C.C.

Maternity and Child Welfare
Committee ... Coun. J. Corfield

*Members of the Maternity & Child Welfare Committee.

The Sanitary Committee consists of the whole of the
Members of the Council.

Staff:

Town Clerk	...	J. R. Carr
Borough Treasurer	...	H. M. Draycott, F.I.M.T.A., F.S.S.
Borough Engineer	...	Philip Brown, M.Inst.M. & Cy.E.
Medical Officer of Health	...	F. D. Ross-Keyt, M.B., Ch.B., D.P.H.
Sanitary Inspector	...	C. Knox, Cert. R. San.I., etc.
Additional Sanitary Inspector	...	K. Kendray, Cert. R.S.I. & S.I.J.B.
Health Visitor	...	Miss M.J.D. Ramsay, S.R.N., C.M.B.

GENERAL PROVISION OF HEALTH SERVICES IN THE BOROUGH.

1. PUBLIC HEALTH OFFICERS OF THE LOCAL AUTHORITY.

At the beginning of the Report a list is given showing the Officers connected with the Health Services in the Borough.

2. SERVICES PROVIDED IN THE AREA.

(a) Laboratory Facilities. During the year the Borough Council continued the arrangements offered by the Emergency Public Health Laboratory, County Hall, Northallerton, in respect of diagnosis of pathological specimens at a fixed annual charge based on the average expenditure of previous years for this service.

(b) Ambulance Facilities. There is no change in the previous arrangements and these have so far been satisfactory.

(c) Nursing in the Home. This is carried out by the Stockton and Thornaby District Nursing Association and has worked satisfactorily. A contribution is made by the Town Council towards the funds of the Association to provide for nursing of patients suffering from Measles, Whooping Cough, Ophthalmia Neonatorum and Puerperal Pyrexia. Through this arrangement 44 children and 190 adults were nursed during the year.

(d) Clinics and Treatment Centres.

Maternity and Child Welfare Department.

Infant Welfare Clinics—each Tuesday and Thursday, 2—4 p.m.

Ante-Natal Clinics—weekly on Friday, 2—4 p.m. (except first Friday in each month).

Post-Natal cases are seen on the first Friday in each month.

Dental Clinics—the last Thursday in each month at 1-30 p.m.

Clinics undertaken by the North Riding County Council.

Minor Ailments Clinic (for school children)—each Monday and Friday at 9-0 a.m. The Medical Officer of Health attends the Clinic on Fridays.

Tuberculosis Clinic—each Tuesday at 10-0 a.m.

Orthopaedic Clinic—fortnightly on Monday, at 10-30 a.m. The Orthopaedic Surgeon attends every four weeks. The intermediate clinics are conducted by a nurse from the Yorkshire Children's Orthopaedic Hospital, who carries out remedial exercises.

Visual Defects—a Clinic is arranged when there are eight cases on the waiting list and is held on Thursday mornings.

The Clinics are all held at the Health Centre, George Street.
(e) Hospitals.

The Hospital facilities remain unchanged.

3. MATERNITY AND CHILD WELFARE SERVICES.

Arrangements exist whereby difficult and dangerous maternity cases are admitted to the Maternity Hospital under the control of the Middlesbrough County Borough Council, and the services of Dr. G. F. Longbotham are available as a Consultant when necessary.

The number of difficult and dangerous maternity cases admitted to the Middlesbrough Municipal Maternity Hospital during the year under this scheme was 24.

The Midwives practising in the Borough are not subsidised by the Council and the County Council is the supervising authority.

Arrangements are made whereby children under the age of five attend the Orthopaedic Clinics and the Clinics for visual defects and defects of the Ear, Nose and Throat, held by the North Riding County Council.

As the Local Authority discharges the functions under Part I. of the Children Act, 1908, as amended by the Children and Young Persons Act, 1932, and Part VII. of the Public Health Act, 1936, the Health Visitor acts as Infant Protection Visitor. Particulars as to the work carried out at the Clinic and in Health Visiting will be found under the Section dealing with Maternity and Child Welfare.

SANITARY CIRCUMSTANCES OF THE AREA.

Water. The supply is obtained from the Tees Valley Water Board. There is adequate piped supply to all households and no complaints were received. Arrangements are now being made whereby samples of water will be taken quarterly for examination. Co-ordination will be established

with the Tees Valley Water Board by informing them of the times and places of the taking of the samples in order that the Water Board may take similar samples. Information will be exchanged between the Health Department and the Tees Valley Water Board regarding the result of the analyses.

Drainage and Sewerage.

There has been no alteration since the last Report.

Closet Accommodation.

With few exceptions the town has a complete water carriage system.

Public Cleansing.

This work is under the immediate control of the Sanitary Inspector and was carried out as in past years.

Sanitary Inspection of the Area.

A summary of the work done in the Sanitary Inspector's Department during the year is given further in this Report.

Camping Sites.

There are no camping sites in the Borough.

Swimming Baths.

The Municipal Swimming Bath was opened on the 21st March, 1938.

The bathing pool has a water surface area of 100 feet by 35 feet and the depth varies from 3 to 9 feet.

The "Continuous Filtration Method" is in operation, the water being pumped from the deep end of the Bath and passed through a strainer and after the addition of coagulants to precipitate the organic matter contained and ensure efficient filtration it is pumped to the top of the filter units, which consist of vertical cylinders containing sand; the water passes through the sand into the collecting pipes at the bottom of the units; it is then heated, aerated and chlorinated and returned to the bath through a number of inlets at the shallow

end. For this purpose there are installed—three vertical Air-scoured Pressure Filters, Chemical apparatus for treating the water, a steam-heated Calorifier capable of raising the temperature of the water 3 degrees Fahrenheit per circulation, an Aerator for the aeration of the water and the release of surplus air and foul gases, a Chlorinator, Pumps and an Air Compressor—all of which ensure that the whole of the bath water will pass through the plant at least once in every four hours at a filtration speed per hour of 206 gallons per sq. foot of sand. When the plant has been in operation for a certain period, the sand in the filters becomes clogged with matter removed from the water, and it is subjected to a cleansing process, which is carried out within the filters. This consists of an intensive agitation of the sand bed by means of compressed air, followed by a reverse flow of water in an upward direction. The scouring action of the air loosens all the accumulated dirt, which is carried away to waste by the reverse flow of water, leaving the sand in its original clean condition.

Chemical and bacteriological examinations have been made on samples of the bath water during the year, with highly satisfactory results.

Schools.

The sanitary conditions of the Schools were satisfactory.

INSPECTION AND SUPERVISION OF FOOD.

For information regarding the supervision of foods see the Sanitary Inspector's Report.

FOOD AND DRUGS ACT, 1938.

For the work done under this Act and for this information I am indebted to the Inspector of Weights and Measures.

I have to report that during the year ending 31st December, 1945, 49 samples of food were taken in the Borough of Thornaby-on-Tees, and submitted to the Public Analyst for analysis under the above act.

I have pleasure in reporting that the whole of these samples were returned as genuine.

DIPHTHERIA PREVENTION.

Diphtheria anti-toxin is supplied free to any Medical Practitioner in the Town who applies for it. Swabs from suspected cases are examined at the Emergency Public Health Laboratory, County Hall, Northallerton.

During the year 24 cases of diphtheria were notified and removed to the Isolation Hospital. Of these 14 are known to have completed the course of immunisation not less than 12 weeks before the onset of the disease. There was one death from diphtheria in a non-immunised child.

The number of cases of this disease shows an increase as compared with that for the previous year, when there were 14 notifications with one death in a non-immunised child.

As regards diphtheria prevention it is estimated that over 90% of Thornaby school children have been immunised against the disease since the inception of the Anti-Diphtheria Campaign in 1940.

Similarly, the figure for children under school age immunised against diphtheria was 60%.

A Diphtheria Prevention Clinic is held every Thursday afternoon at the Welfare Centre, at which children, whether above or below school age, are dealt with.

In the course of medical inspections at schools and at the Welfare Centre, all parents with children who have not been protected against diphtheria are urged to attend the special clinic without delay. This personal contact between parents and medical and nursing staff has been helpful in persuading previous objectors to have their children treated and seems to lead to more favourable results than poster and newspaper propaganda alone.

TUBERCULOSIS.

The following table shows the new cases and deaths for the Borough of Thornaby-on-Tees during 1945:—

AGE PERIODS	NEW CASES				TOTAL DEATHS

Osseous	...	...	...	1

GENERAL CLEANLINESS.

During the year scabies and impetigo both showed decreased prevalence, and on the whole the standard of cleanliness has been good. Fewer cases of head lice and nits have been noted on medical inspections. The cleanliness surveys carried out by the nursing staff are an important factor in maintaining the standard of cleanliness and the contacts of cases and the homes are also kept under close supervision.

Treatment of verminous heads by means of Lethane oil has given very satisfactory results.

REPORT OF THE SANITARY INSPECTOR FOR THE YEAR 1945.

SANITARY INSPECTION OF THE AREA.

Description of Works carried out.

Number of Inspections made	...	...	...	...	425
Number of Re-Inspections made	...	...	...	...	2251
Number of Informal Notices served	...	...	...	...	425
Number of Statutory Notices served	...	...	...	...	38

RESULT OF SERVICE OF NOTICES.

Drainage.

Single private drains reconstructed or repaired	...	...	...	...	79
Waste pipes of sinks trapped or renewed	...	...	...	...	29
Gullies renewed	...	...	...	...	—
Grate tops renewed	...	...	...	...	4

Water Closets.

Provided with sufficient supply of water	...	...	...	...	3
Cisterns repaired or renewed	...	...	...	...	25
Basins renewed	...	...	...	...	14

Houses.

Roofs repaired	...	...	...	...	80
Eaves gutters repaired or renewed	...	...	...	...	50
Fall pipes repaired or renewed	...	...	...	...	45
Yard Pavements repaired or relaid	...	...	...	...	24
Floors repaired or relaid	...	...	...	...	73
Defective walls	...	...	...	...	160
Defective plasterwork	...	...	...	...	159
Defective ceilings	...	...	...	...	27
Defective fireplaces	...	...	...	...	12
Defective fireranges	...	...	...	...	40
Defective ovens	...	...	...	...	4
Dilapidated set pots	...	...	...	...	4
Dilapidated set pot firebars	...	...	...	...	14
Handrails fixed or repaired	...	...	...	...	6
Defective sash cords and windows	...	...	...	...	92
Defective chimneys	...	...	...	...	9
Defective yard doors	...	...	...	...	29
Dilapidated coals doors	...	...	...	...	19
Dilapidated doors (front and internal)	...	...	...	...	62
Dilapidated dustbins	...	...	...	...	113
Dilapidated closet doors	...	...	...	...	24
Dilapidated closet seats	...	...	...	...	22
Defective closet roofs	...	...	...	...	18
Defective joint between flush pipe and W.C. basin	...	...	...	...	8

New windows provided to food stores ...	17
Defective flues ...	27
Miscellaneous minor defects ...	55
Patients removed to hospital ...	137
Rooms disinfected ...	134
Accumulations of refuse removed ...	1
Mattresses destroyed ...	8
Sets of bedding and beds destroyed ...	7
Washing accommodation provided ...	4
New food stores provided ...	1
Sinks provided or renewed ...	20
Houses provided with damp course ...	39

Number of Statutory Notices served	...	...	...	...	—
Number of Certificates of Exemption granted—					
Sanitary Conveniences	...	...	...	...	—

ERADICATION OF BED BUGS.

The method adopted to eradicate the bed bug is as follows: All paper is stripped from the walls, skirtings—door and window moulds removed—followed by the spraying of walls, woodwork and bedsteads with an insecticide (Solution “D” or Zaldecide). The rooms are inspected two days following the spraying and if found satisfactory the woodwork is refixed; in only a few instances has it been found necessary to spray a second time.

The houses of all prospective tenants for Council Houses are inspected and the house and furniture must be certified by the Sanitary Inspector as clear from vermin before removal takes place.

Disinfestation is generally carried out by the Local Authority. In other cases it is carried out by the occupiers on the advice of the Sanitary Department.

Number of Inspections	...	...	...	...	...	24

HOUSING STATISTICS.

1. Inspection of Dwelling Houses during the year:—

- (1) (a) Total number of dwelling-houses inspected for Housing defects (under Public Health or Housing Acts) ... 425
- (b) Number of inspections made for the purpose ... 2,251
- (2) (a) Number of dwellinghouses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1929 and 1932 ... —
- (b) Number of inspections made for the purpose ... 34
- (3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation ... —
- (4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation ... —

2. Remedy of Defects during the Year without Service of Formal Notices.

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their officers 387

3. Action under Statutory Powers during the Year:—

(a) Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936:—

(1) Number of dwelling-houses in respect of which notices were served requiring repairs 2

(2) Number of dwelling-houses which were rendered fit after service of formal notices:—

(a) By owners 7

(b) By Local Authority in default of owners —

(b) Proceedings under Public Health Acts:—

(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied 36

(2) Number of dwelling-houses in which defects were remedied after service of formal notices:—

(a) By owners 22

(b) By Local Authority in default of owners 3

(c) Proceedings under Sections 11 and 13 of the Housing Act, 1936:—

(1) Number of dwelling-houses in respect of which Demolition Orders were made —

(2) Number of dwelling-houses demolished in pursuance of Demolition Orders —

(d) Proceedings under Section 12 of the Housing Act, 1936:—

(1) Number of separate tenements or underground rooms in respect of which Closing Orders were made —

(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit —

MATERNITY AND CHILD WELFARE SERVICES.

For the figures in this section of the report I am indebted to the Health Visitor.

Population of the area served by the Council as Welfare Authority 20,780

Number of births notified in that area during the year under section 203 of the Public Health Act, 1936, or section 255 of the Public Health (London) Act, 1936, as adjusted by any transferred notifications:—

- (a) Live Births —417 (b) Still Births—11 Total—428
(d) By midwives—374 (e) By doctors and parents— 54

Health Visiting.

- (a) Number of Health Visitors employed at the end of the year:—

1. By the Council—One.
2. By Voluntary Associations—None.

- (b) Number of visits paid during the year by the Health Visitor:—

1. To expectant mothers:
First visits ... 68 Total visits ... 224
2. To children under one year of age:
First visits ... 233 Total visits ... 683
3. To children between the ages of 1 & 5 years:
Total visits ... 1689

Infant Welfare Centres.

- (a) Number of Centres provided and maintained by the Council 1
- (b) Number of Centres provided and maintained by Voluntary Associations 0
- (c) Total number of attendances during the year:—
1. By children under 1 year of age 4272
 2. By children between the ages of 1 & 5 yrs. 949
- (d) Total number of children who first attended at the Centres during the year and who, on the date of their first attendance were:—
1. Under 1 year of age 324
 2. Between the ages of 1 and 5 years ... 81

(e) Total number of children under 5 years of age who attended at the Centres during the year and who, at the end of the year, were:—	
1. Under 1 year of age	279
2. Over 1 year of age	255
(f) Percentage of notified live births represented by the number in (d) 1.	80.6%
Number of medical consultations during the year:—	
Children under 1 year	1209
Children over 1 year	884
Total	2093

Ante-Natal Clinics.

31 Sessions were held.

Number of expectant mothers who attended for first time	187
Total number of women who attended clinic during year	221
Number of re-visits	248
Total number of attendances at the Clinics during the year	435
Percentage of total notified births (live and still) represented by the number of women who attended at the Clinics during the year	52.5%

Post-Natal Clinics.

10 Sessions were held.

Number of new cases attending Clinics during year	49
Total number of attendances	54

Orthopaedic Clinics.

22 Sessions were held.

Number of new cases attending the Clinic during 1945	17
Number of re-attendances	67
Total attendances	84
Number of cases admitted to hospital during the year	1
Number of cases in hospital 1st January, 1945 ...	—

Infant Life Protection.

Number of children on books 1st January, 1945 ...	—
Number of new cases during the year	—
Number of children who attained the age of 9 years during the year	—
Number of children who left the district during the year	—
Number remaining on the books 31st December, 1945	—
