TOTNES RURAL DISTRICT COUNCIL

"Rushbrook",
TOTNES,
Devon.

February, 1959

Madam Chairman, Ladies and Gentlemen,

I have the honour to submit my annual report for the year 1958.

GENERAL HEALTH

The Rural District has continued its record of good health with very few notifications of infectious disease and no major outbreaks.

WATER

The South Devon Water Board has completed the main extension to Harberton and Dartington and are proceeding with further extension across The Dart to Berry Pomeroy, Littlehempston and Stoke Gabriel.

The Avon reservoir is being filled and should shortly make available much larger supplies.

The Village of Holne still urgently needs a pure water supply and negotiations towards obtaining this appear to be extremely slow and protracted. After several years of effort and frequent representation and in spite of the fact that the main from a reservoir to another local authority lies adjacent to the village no final arrangement has yet been made.

SEWAGE

Some progress has been made with village schemes. Progress is very slow owing to pressure of work on existing staff in the Engineer and Surveyor's department. The Stoke Gabriel plant is nearly complete; the Halwell scheme is ready to go to tender; Morleigh and Diptford Schemes are in course of preparation. The Hamlets of Week and Brooking in Dartington urgently require sewage schemes.

RIVER POLLUTION

Work has continued in tracing sources of pollution. The major source within the District would appear to be in the Bidwell Brook (Dartington) - The River Dart as a whole, however, shows a considerable amount of pollution throughout its lower reaches.

UNITED STATES DEPARTMENT OF AGRICULTURE

Division of Plant Industry
Washington, D.C.

February 1933

Mr. J. H. ...

I have the honor to acknowledge the receipt of your letter of the 12th inst.

REPLY

The material submitted is being examined by the Bureau of Plant Industry.

NOTE

The Bureau is unable to identify the material at this time.

The Bureau is unable to identify the material at this time.

The Bureau is unable to identify the material at this time.

NOTE

The Bureau is unable to identify the material at this time.

NOTE

The Bureau is unable to identify the material at this time.

PREVENTATIVE MEDICINE

Protection against Smallpox, Diphtheria, Tetanus, Whooping Cough and Poliomyelitis continues. The Mass Radiography Unit has made several valuable visits to the district which have met with good response from the public.

HOUSING SURVEY

The Housing Survey is now complete and credit should be given to those who have carried it out under great difficulty at odd times between other duties.

There is still a great need for Old People's houses and bungalows and progress towards the provision of these is much too slow.

HEALTH AND WELFARE SERVICES

For the second year in succession I consider it desirable to comment on the shortage of Hospital and Welfare accommodation and in particular to draw attention to the inadequate provision for the aged who are frail and/or sick.

REFUSE

The need for a weekly collection throughout the area becomes increasingly obvious as a most necessary measure. A really hot summer might well precipitate an outbreak of a preventable fly born illness.

Owing to the increasing difficulty of finding and obtaining the use of land to continue the disposal of refuse by uncontrolled tipping, I feel it may be expedient for Authorities, at least in the Torbay and immediate adjacent area to meet and discuss the possibilities of one large depot for handling refuse.

STATISTICS

Returns are not, as yet available. They will be published later as an addendum to this report which I consider should be presented before the termination of my appointment on the 31st March.

I wish to thank Mr, Waine, The Chief Public Health Inspector and his staff for their help and advice which have always been so readily given at all times.

I wish to place on record my thanks to Dr. Jellard and his staff at the Plymouth Public Health Laboratory for their help in examining and reporting on water samples.

I have the honour to be,

Your obedient servant,

F. J. Jellard
Medical Officer of Health.

PREVENTIVE MEDICINE

Protection against diphtheria, tetanus, whooping cough and poliomyelitis continues. The health department has made several valuable visits to the district which have not with good response from the public.

HOUSING SURVEY

The housing survey is now complete and credit should be given to those who have carried it out under great difficulty at odd times between other duties.

There is still a great need for Old People's houses and hospitals and programs towards the provision of these is much to be desired.

WATER AND WELFARE STUDIES

For the second year in succession I consider it desirable to present on the reports of Hospital and Welfare Commission and its attention to the inadequate provision for the aged who are frail and/or sick.

REPORT

The need for a weekly collection throughout the year becomes increasingly obvious as a most necessary resource. A really hot summer might precipitate an outbreak of a preventable fly born illness.

Owing to the increasing difficulty of finding and obtaining the use of land to contain the disposal of refuse by uncontrolled dumping, I feel it may be expedient for authorities, at least in the survey and immediate adjacent areas to meet and discuss the possibilities of an large depot for burning refuse.

STATISTICS

Reports are not yet available. They will be published later as an addendum to this report which I consider should be presented before the termination of my appointment on the 31st March.

I wish to thank Mr. Keane, the Chief Public Health Inspector and his staff for their help and advice which have always been readily given at all times.

I wish to place on record my thanks to Dr. Johnson and his staff at the Hygiene Public Health Laboratory for their help in examining and reporting on water samples.

I have the honor to be,

Your obedient servant,

Medical Officer of Health.

1. Statistics

Details to follow later.

2. Vital Statistics

Details to follow later.

3. Infectious Diseases

<u>Disease</u>	<u>Total Number of cases notified</u>	<u>Deaths</u>
Scarlet Fever	9	-
Measles	45	-
Whooping Cough	1	-
Food Poisoning	2	-
<u>Food Poisoning</u>		

One suspected outbreak was investigated at Cornworthy. The illnesses were considered to be partly due to an unsatisfactory water supply and partly due to very poor kitchen hygiene.

4. Tuberculosis

5 new cases were notified, all of which were respiratory.

5. Health Services

The district is well served by General Practitioners, Hospitals, the Ambulance and Car Service, District Nurses, Health Visitors etc. A mobile X Ray Unit visits the District from time to time. There are Public Health Laboratories at Plymouth and Exeter and a pathological laboratory at the Torbay Hospital.

6. Water Supplies

The South Devon Water Board has rapidly continued to extend its mains to villages, notably Harberton and Dartington and to extend towards the Eastern Parishes.

The village of Holne still relies on a local supply which varies in quality in direct relation to weather conditions, the supply coming by open leat across part of Dartmoor. Negotiations are in progress by the Council to obtain a supply of piped water from Paignton Urban District's mains which pass through the village.

Two extra pipes have been laid across the Dart to Kingswear.

7. Sewerage

Field work on river pollution continues with special attention to the catchment area of the Bidwell Brook and a detailed survey is being prepared of this area.

The following amendments are to be made to my survey of the means of disposal of sewage in my 1957 report:-

1. Statistics

Details to follow later.

2. Vital Statistics

Details to follow later.

3. Infectious Diseases

<u>Disease</u>	<u>Total number of cases notified</u>
Bacterial Dysentery	9
Malaria	45
Whooping Cough	1
Food Poisoning	2
Food Poisoning	

One suspected outbreak was investigated at Comberby. The illness was considered to be partly due to an unsatisfactory water supply and partly due to very poor kitchen hygiene.

4. Infectious Diseases

5 new cases were notified, all of which were respiratory.

5. Health Services

The district is well served by General Practitioners, hospitals, the Ambulance and Air Services, District Nurses, Health Visitors etc. A mobile X-ray unit visits the district from time to time. There are Public Health Laboratories at Hingham and Haver and a pathological laboratory at the Humber Hospital.

6. Water Supplies

The South Down Water Board has recently continued to extend its mains to villages, notably Haverham and Haverham and to extend towards the Humber Estuary.

The village of Haine still relies on a local supply which varies in quality in direct relation to weather conditions, the supply coming by one half across part of Haverham. Investigations are in progress by the Council to obtain a supply of piped water from Haine from Haine's mains which pass through the village.

Two extra pipes have been laid across the foot to Haine.

7. Sewerage

Field work on river pollution continues with special attention to the estuary area of the Humber brook and a detailed survey is being prepared of this area.

The following comments are to be made to my survey of the sewage disposal of sewage in my 1957 report:-

CHURSTON FERRERS -

Galampton The rapid increase in the amount of sewage which now has to be disposed of makes it necessary to very carefully consider what further works are required in this disposal plant. It is evident that, at the moment, work is required in the storm water overflow and the sludge beds.

CORNWORTHY

A disposal scheme for this village is extremely urgently required.

DARTINGTON

Schemes for Week and Brooking are, in my opinion, of first priority and should be proceeded with at once. I do not think that the existing Dartington disposal plant is adequate to deal with further extensions of the sewer. In my opinion either the plant will have to be enlarged or serious consideration should be given to the desirability and possibility of linking up with Totnes Borough Sewers.

DIPFORD

A disposal scheme is urgently required. Plans are with the Ministry of Housing and Local Government.

HALWELL

A disposal plant has been planned and approved and is now ready to go to tender.

KINGSWEAR

Disposal is by outfalls into the tidal estuary of the river Dart. The outflow is continuous irrespective of tides. A more sanitary and aesthetically acceptable solution to the problem is required.

MORLEIGH

A disposal works is required and a scheme is being prepared.

STAVERTON

The new sewage works have been a great improvement.

STOKE GABRIEL

The new sewage disposal works are now completed.

UGBOROUGH

Bittaford
The/disposal plant needs modernising to a considerable degree. Sewage disposal at Wrangaton Cross Roads is still urgently required.

GENERAL

The disposal of sewage works sludge is a constant problem - no satisfactory solution has been found so far. Spreading on the land would appear to increase the risk of tape worm infestation. Burial by bulldozer may be the only practical solution for small plants unless some method of composting can be utilised.

In particular there is need to deal with the problem at Bittaford in the Parish of Ugborough

...the rapid increase in the amount of sewage
which now has to be disposed of makes it necessary to
very carefully consider what further works are required
in this disposal plant. It is evident that, at the
moment, work is required in the storm water overflow
and the sludge beds.

CEMENTWORKS

A disposal scheme for this village is extremely
urgently required.

CEMENTWORKS

CEMENTWORKS

...for the first priority and should be proceeded with as
soon as possible. I do not intend that the existing disposal
plant should be extended to deal with further
extension of the sewer. In my opinion either the
plant will have to be enlarged or another extension
should be given to the existing plant and possibly
of taking up with storm water sewers.

A disposal scheme is urgently required. Plans are with
the Ministry of Housing and Local Government.

Digitized by the Internet Archive
in 2018 with funding from
Wellcome Library

CEMENTWORKS

CEMENTWORKS

CEMENTWORKS

...the disposal of the
river water. The disposal is extremely
urgent. A new sewerage and water supply
solution to the problem is required.

CEMENTWORKS

A disposal works is required and a scheme is being prepared.

The new sewage works have been a great improvement.

The new sewage disposal works are now complete.

CEMENTWORKS

CEMENTWORKS

CEMENTWORKS

...The disposal plant needs maintaining to a considerable
degree. Sewage disposal at Wanganui Green works is
still urgently required.

CEMENTWORKS

The disposal of sewage works should be a constant
problem - no satisfactory solution has been found so far.
Growing on the land we do appear to increase the
risk of some industrial. Such by pollution
may be the only practical solution for small plants
unless some method of composting can be utilized.

<https://archive.org/details/b30193011>

8. National Assistance Acts, 1948 - 1951 Section 47

During the year no action was necessary under the above Acts.

9. Rodent and Pest Control

This still continues under an operator who is part time employed as stated in the 1957 report. I consider this to be unsatisfactory and am of the opinion that the rodent control can only be carried out efficiently if, after the new combined Medical Officer of Health appointment on 1st April 1959 the rodent control can be similarly amalgamated under his direction.

10. Camping and Caravan Sites

Four licensed sites continue to operate viz:-

Bittaford Wood, (Ugborough) 15 Caravans.
 Webland Farm, (South Brent) 20 Caravans.
 Cheston Farm, (Ugborough) 15 Caravans.
 Snokey House, (Marldon) 6 Caravans.

11. Food.

(a) Meat During the year the following animals have been slaughtered and inspected:-

	STEERS	HEIFERS	COWS	CALVES	SHEEP & LAMBS	PIGS	TOTAL
January	5	15	1	5	63	29	118
February	8	9	-	2	57	31	107
March	10	9	1	7	59	34	120
April	8	7	-	5	56	12	88
May	8	10	-	1	73	24	116
June	4	12	-	3	81	22	122
July	8	13	-	-	96	23	140
August	10	9	1	1	68	27	116
September	4	7	-	3	51	18	83
October	7	9	1	5	85	26	133
November	8	7	-	-	68	21	104
December	5	9	-	-	48	28	90
GRAND TOTAL	85	116	4	32	805	295	1337

10 cwt. 2 qtrs. meat condemned owing principally to parasitic infections.

11½ lb. tinned meat condemned - blown tins.

3 cwt. 2 qtrs. 2 lbs. of tinned fruit and vegetables condemned owing to blown or leaking tins.

During the year no action was necessary under the above Act.

9. Robot and Post Control

This still continues under an operator who is part time employed as stated in the 1950 report. I consider this to be unsatisfactory and as of the opinion that the robot control can only be carried out efficiently if, after the new combined Medical Officer of Health appointment on 1st April 1952 the robot control can be similarly assigned under his direction.

10. Control and Caravan Sites

Four licensed sites continue to operate viz:-

- Blackley Wood (Upton) 15 Caravans.
- Woburn Farm (South Farm) 20 Caravans.
- Chaston Farm (Upton) 15 Caravans.
- Blackley House, (Marlow) 5 Caravans.

11. Food

(a) Meat During the year the following animals have been slaughtered and inspected:-

	STEEPS	HEIFERS	COWS	CALVES	SHEEP & LAMBS	PIGS	TOTAL	
January	2	12	1	2	63	29	118	
February	8	2	-	2	27	31	107	
March	10	2	1	7	39	34	120	
April	8	7	-	2	26	12	55	
May	8	10	-	1	73	24	116	
June	4	12	-	2	81	22	121	
July	8	13	-	-	36	23	140	
August	10	2	1	1	62	27	146	
September	4	7	-	2	24	18	55	
October	7	2	1	2	82	26	117	
November	8	7	-	-	68	21	104	
December	2	2	-	-	42	22	70	
GRAND TOTAL	82	116	4	32	602	292	1737	

to cut 2 pigs, meat condemned owing principally to
 present the infections.
 11½ lbs. tinned meat condemned - blown tin.
 3 cwt. 2 pigs, 2 lbs. of tinned fruit and vegetables
 condemned owing to blown or leaking tins.

Knackers Yards and Slaughter Houses.

There are five slaughter houses and one knackers yard licensed, but in practice only four of the slaughter houses and the knackers yard operate.

(b) Milk

There are now only nine dairies retailing pre-bottled T.T., T.T.(Pasteurised) or pasteurised milk.

(c) Ice Cream

There are 30 registered premises in the district retailing pre-packed heat treated ice cream.

(d) Food Hygiene Regulations

Individual approach to food handlers and to owners of food premises has brought forth continued improvement.

(e) Unsound Food

Unsound meat is stained green and is collected by fellmongers operating in the district. Unsound tinned food is disposed of in the Council's tips after first mutilating the tins.

12. Housing

The Housing Survey has been completed (priority being given to this so far as other circumstances would allow) but an up to date summary has yet to be compiled.

Total number of dwellings in the district	4592
No. of dwellings surveyed in 1958	161
No. of houses fit in all respects	49
No. of houses with minor defects	32
No. of houses with major defects or lack of amenities	50
No. of houses fit for reconditioning	18
No. of houses unfit for occupation	12

During the year two Clearance Orders at Dittisham were confirmed. Number 1 Clearance Order contained 6 dwellings and 6 persons whilst Number 2 Clearance Order contained 7 dwellings and 8 persons.

The following premises were dealt with as indicated.

Houses in Clearance areas demolished:-

12 (2 Marlton; 5 South Brent and 5 Harbertonford).

House not in Clearance Area demolished:-

1 (55, Church Street, South Brent).

Two bungalows to re-house displaced persons from houses in a Clearance Area at Harbertonford were completed and occupied early in the year.

There are five slaughter houses and one knacker yard licensed, but in practice only four of the slaughter houses and the knacker yard operate.

(b) Milk

There are now only nine dairies retaining pre-bottled T.E., T.E. (Pasteurized) or pasteurized milk.

(c) Ice Cream

There are 30 registered producers in the district retaining pre-packed best treated ice cream.

(d) Food Hygiene Regulations

Individual approach to food handlers and to owners of food premises has brought forth continued improvement.

(e) Unsound Food

Unsound meat is retained green and is collected by Fellowship operating in the district. Unsound tinned food is disposed of in the Council's tip after first notifying the firm.

12. Housing

The housing survey has been completed (nearly being given to this as far as other circumstances would allow) but an up to date summary has yet to be compiled.

4992	Total number of dwellings in the district
161	No. of dwellings surveyed in 1958
49	No. of houses fit in all respects
32	No. of houses with minor defects
50	No. of houses with major defects or lack of amenities
18	No. of houses fit for reconditioning
12	No. of houses unfit for occupation

During the year two Clearance Orders at Dittisham were confirmed, Number 1 Clearance Order contained 6 dwellings and 6 persons whilst Number 2 Clearance Order contained 7 dwellings and 6 persons.

The following premises were dealt with as indicated.

Houses in Clearance areas demolished:-

12 (5 demolished; 5 South Street and 5 Haverhill Street).

Houses not in Clearance Area demolished:-

1 (22, Church Street, South Street).

Two proposals to re-house displaced persons from houses in a Clearance Area at Haverhill were completed and completed early in the year.

Numbers 1 - 4 inclusive, Church Row, Ugborough :-
bought by Council, three families re-housed, pair of
houses to be erected on site.

Church House Cottage, North Huish - Closing order made.

26, Galampton, Churston Ferrers - Closing order made.

Moline Cottage, Ugborough - Closing order made.

Box Cottage, Dittisham - Closing order made.

Parsonage Cottage, Ugborough (Eastleigh) - Undertaking
not to re-let accepted.

Venn Cottage, Ugborough - Undertaking not to re-let accepted.

TOTNES RURAL DISTRICT COUNCIL

ADDENDUM TO THE MEDICAL OFFICER

OF HEALTH'S REPORT FOR THE YEAR 1958.

1. Statistics

General

Area	80,978 acres
River frontage of tidal waters	17 miles
Population (1951 Census)	13,923
Population (est. Mid year 1958)	14,130
Number of dwelling houses	4,569
Rateable Value (1st April, 1959)	£157,785
Estimated product of a penny rate	£644

The district is essentially agricultural. Some parishes are becoming predominately residential in character. There are a few small industrial establishments.

2. Vital Statistics

(a) Births

	<u>M</u>	<u>F</u>	<u>TOTAL</u>
<u>Live Births</u>	90	95	185
Live Birth Rate per 1,000 Population			13.09
<u>Still Births</u>	2	2	4
Still Birth Rate per 1,000 live and still births			21.16
Total Live and Still Births			189
Area Comparability Factor for Births			1.20
Corrected Live Birth Rate per 1,000 Population			15.7

(b) Deaths

Infant Deaths	4	3	7
Infant Mortality Rate per 1,000 Live Births			37.8
Infant Mortality Rate per 1,000 Live Births and Legitimate			39.7
Infant Mortality Rate per 1,000 Live Births and Illegitimate			Nil
Mortality Rate per 1,000 Live Births			21.6
Illegitimate Live Births % of Total Live Births			4.8%
Maternal Deaths (Including Abortion)			Nil
Maternal Mortality Rate per 1,000 Live and Still Births			Nil
Deaths	108	121	229
Death Rate per 1,000 Population			16.2
Area Comparability Factor for Deaths			0.56
Corrected Death Rate per 1,000 Population			9.07

STATISTICAL DISTRICT COMMISSION
REPORT TO THE BOARD OF HEALTH
ON HEALTH'S REPORT FOR THE YEAR 1922

Station	General
Area	80,378 acres
River frontage of tidal waters	17 miles
Population (1921 Census)	13,953
Population (est. 1922)	14,130
Number of dwelling houses	4,369
Maritime Value (1st half, 1922)	2,271,785
Estimated product of a penny rate	224

The district is essentially agricultural. Some factories are becoming progressively residential in character. There are a few small industrial establishments.

Vital Statistics	
(a) Births	(b) Deaths
