TUTBURY RURAL DISTRICT COUNCIL

Public Health Department,
 "Kingsley,"
 44 Rolleston Road,
 Burton-on-Trent.

To the Chairman and Members of
 the Tutbury Rural District Council.
 Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report for 1954.

In considering the Vital Statistics, it must be borne in mind that in a district of this size, small changes in certain totals make a considerable difference in the various Rates. The Death Rate is considerably below the national Rate and the Birth Rate continues to increase slightly.

Infectious Diseases have been slightly less prevalent than in 1953 except for Measles which showed a typical biennial fall.

There has again been a considerable number of children immunised, and no cases of Diphtheria were notified. Further improvements are still desirable, as there is by now little opportunity for children to acquire natural immunity, and approximately 57% of children under 15 years are unimmunised. A continued drop in the numbers of children immunised will increase the possibility of a recurrence of epidemics of diphtheria.

While it is too soon to ascribe the marked fall in the incidence of Whooping Cough in the District to the County Council's Immunisation Scheme, it is to be hoped that this scheme will produce results comparable to those achieved by Diphtheria Immunisation.

114 Council houses and 39 private houses were completed and occupied during the year.

While this number compares favourably with similar districts, I feel that some two or three apartment dwellings should be included in future programmes to provide for elderly or childless couples, to avoid using the standard five apartment houses uneconomically, and facilitate the programme of demolition.

I have to thank the Members of the Council, the Council Officers and the Health Department Staff for their help and co-operation.

I am,

Your obedient Servant,

CHARLES FLEMING,

Medical Officer of Health.

VITAL STATISTICS

	1954			1953

Deaths from Whooping Cough (all ages)	Nil	Nil
Deaths from Diarrhoea (under 2 years of age)	Nil	Nil

SECTION C

SANITARY CIRCUMSTANCES OF THE AREA

WATER

The supply of water to the greater part of the Rural District is by the South Staffordshire Waterworks Company, and the quality and quantity have been satisfactory.

The under-mentioned properties were connected to the new mains during the year:—

Dunstall—4 dwelling houses

Tatenhill—12 dwelling houses

Yoxall—4 dwelling houses

Tutbury Parish is supplied from a well and reservoir by the Rural District Council. The quality of the water is satisfactory.

Bacteriological examination and chemical analysis have been made of this water, and it was found that the Coli Aerogenes Content (presumptive Coli) varied between nil and 25 per 100 ml. after 48 hours incubation at 37° C. This increase over the past years is probably due to the breakdown of the chlorinating apparatus, which has not yet been repaired owing to difficulty in obtaining replacements. The Chemical analysis showed the water to be organically of satisfactory quality, but very hard.

The hardness before boiling was 45.5°

The hardness after boiling was 34.5°

Temporary hardness 11.0°

The number of houses in the Rural District which are supplied with water from public mains is as follows:—

Anslow	83
Barton-under-Needwood	587
Branston	633
Dunstall	66
Hanbury	119
Outwoods	655
Rolleston	522
Stretton	650
Tatenhill	90
Tutbury	714
Wychnor	7
Yoxall	247
	<hr/>
	4,373
	<hr/>

This figure represents 89% of the total number of houses in the district.

DRAINAGE AND SEWERAGE

A Scheme for sewerage in part of Dunstall Parish has been completed.

It is regretted that the scheme for the new sewage disposal plant at Yoxall which has been approved in principle by the Ministry of Local Government and Planning cannot yet be proceeded with due to the restrictions on capital expenditure. Serious nuisance arises in the parish owing to the complete absence of a plant.

PUBLIC CLEANSING

The work has been of a satisfactory standard throughout the year.

CLOSET ACCOMODATION

16 privies or pan closets have been abolished and water closets substituted by owners during the year.

SMOKE ABATEMENT

There were no complaints regarding smoke nuisances during the year.

CAMPING SITES

A privately owned caravan site to site 24 caravans has been approved at Rolleston.

SWIMMING BATHS

The only swimming bath in the district is a privately owned one in the village of Rolleston. This appears to be well managed and supervised.

DISINFECTION AND DISINFESTATION

10 houses were disinfected after the occurrence of infectious diseases, deaths, etc.

8 infestations by fleas and other insects were overcome by treatment with a 10% D.D.T. solution and Gammexane smoke generators.

SECTION D

HOUSING

1. INSPECTION OF DWELLING-HOUSES DURING THE YEAR:—

- | | | |
|---------|---|-------|
| (1) (a) | Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts) | 360 |
| (b) | Number of inspections made for the purpose | 1,092 |
| (2) (a) | Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925 and 1932 | 80 |
| (b) | Number of inspections made for the purpose | 80 |
| (3) | Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation | 9 |
| (4) | Number of dwelling-houses (exclusive of those referred to in the preceding sub-head) found not to be in all respects reasonably fit for human habitation | 351 |

2. REMEDY OF DEFECTS DURING THE YEAR WITHOUT SERVICE OF FORMAL NOTICES:—

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers	101
---	-----

3. NEW HOUSING ACCOMMODATION

During the year 39 private enterprise houses were completed and occupied. 114 Council houses were completed and occupied.

SECTION E

INSPECTION AND SUPERVISION OF FOOD

MILK SUPPLY

The dairies of the district have been regularly inspected and have been maintained in a clean condition.

FOOD SHOPS

Inspections of food shops in the district have been made by the Sanitary Inspector's Staff. 21 condemnation certificates were issued in respect of quantities of food found to be unfit for human consumption.

CLEAN FOOD CAMPAIGN

(i) *Number of Food Premises*

Cafes	7
Factory Canteens	6
Ice Cream Vendors	43
Butchers' Shops	9
Bakeries	2
Fish and Chip Shops	5
Other Food Premises	26

(ii) *Registration of Food Premises*

Under Section 14 Food and Drugs Act, 1938	43
Under Milk and Dairies Regulations	4

(iii) *Inspection of Food Premises*

Number of Inspections	129
-----------------------	-------	-------	-------	-------	-------	-------	-----

(iv) *Education Activity*

Lectures on food hygiene were given to Cafe and Factory Canteen Staffs and Women's Institutes.

(v) *Disposal of Condemned Food*

The condemned food consisted only of tinned commodities which were buried on refuse tips.

(vi) *Special Examination of Food Consignments*

No special examinations were necessary.

SECTION F

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES

INFECTIOUS DISEASES

Measles showed a typical biennial fall and the figures for scarlet fever and whooping cough showed a slight increase.

IMMUNISATION AGAINST DIPHTHERIA

Immunisation against Diphtheria has been carried out as usual at the five Infant Welfare Centres in the District. The response is fairly satisfactory. Tribute must be paid to the two Health Visitors in the District for their excellent work in this connection.

There have again been no cases of Diphtheria, the last reported case being in 1945.

PRIMARY IMMUNISATIONS

	1954	1953
Children under five years of age treated	138	106
Children of school age treated	72	28

REINFORCING INJECTIONS

School children treated	163	155
-------------------------------	-----	-----

The following figures show the remarkable progress made against Diphtheria since the introduction of the National Campaign for immunisation.

Year	Deaths	Corrected Notifications
1940	—	46,281*
1944	934	23,199
1945	722	18,596

ANNUAL REPORT

of the

SANITARY INSPECTOR 1954

To the Chairman and Members of the
Tutbury Rural District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present my Annual Report for
1954.

The year was notable for the Council's decision to commence a weekly collection of nightsoil from the whole area apart from that served by the public sewers, as from the 1st April, 1955. As far as the centre of Yoxall parish is concerned, this is purely a temporary measure pending the approval by the Ministry of Housing and Local Government to the new sewerage scheme, which will serve the centre of Yoxall parish. It is hoped that the long awaited approval to the scheme will be received in the near future as the need for the scheme in this built up area of the parish is now urgent.

Thanks are due to the staff of the public health department, and I am grateful for the excellent support received from the Chairman and Members of the Public Health Committee.

I have the honour to be,

Your obedient Servant,

A. LAVELLE,

Sanitary Inspector.

WATER SUPPLY

16 samples of water from private sources were submitted for chemical and bacteriological reports and 11 samples found to be unfit for drinking purposes. The occupiers of premises involved in adverse reports were advised to boil their water before use. Of the 11 unfit wells sampled, 7 serve properties where no mains are available. The owners of 5 were requested to carry out certain works, and the other 2 lie on the line of a proposed new water main.

The owners of the 4 unfit wells where mains water is available were requested to connect to the mains, and this work is in hand.

A total of 20 existing properties has been connected to the new mains during the year.

HOUSING

REPAIRS

The revision of the Rent Restriction Acts will enable owners to maintain their property in a sound condition. The increased cost of repairs has for a long time prevented much needed major works of repair, and the Rent Revision will help to prevent the deterioration of property into demolition category.

IMPROVEMENTS

17 applications for improvement grants were approved during the year.

The Ministry revised their standard for improved dwellings in order to encourage owners to improve their property, and to prolong the life of sub-standard property, as a result, there was an increase in the number of applications.

SLUM CLEARANCE

9 premises were the subject of either demolition or closing orders during the year. Such a step is only taken where the owner fails to make an offer to put the premises into a habitable condition. The premises were all in a delapidated condition.

SANITARY ACCOMMODATION

The pails or privies at 16 premises were converted to water closets.

PUBLIC CLEANSING

COLLECTION

Three Shelvoke & Drewry 11 cub. yard side-loading refuse collection vehicles are used for the collection of dry household refuse in the District, and a fortnightly collection of refuse is made from all premises. Few complaints have been received, and satisfactory service has been maintained.

A comprehensive scheme for night soil collection from the whole area has been commenced during 1954. A detailed survey of those parts of the area not served by the public sewer was carried out in preparation for the scheme. Approximately 600 premises were visited.

DISPOSAL

Every endeavour is made to cover the household refuse at the tips with suitable covering material, and the tips are sprayed with insecticide at regular intervals during the warmer weather.

SALVAGE

WASTE PAPER

The collection of waste paper was resumed at the end of the year. The merchants offered an increased price for the waste paper and the accumulation at the depot was sold.

SCRAP METAL AND TEXTILES

These materials are collected with the household refuse. The following are the salvage returns for the year:—

	Weight				Value		
	t.	c.	q.	lb.	£	s.	d.
Waste Paper	8	5	0	0	61	5	0
Scrap Metal	10	2	3	16	116	18	7
Textiles	1	4	1	20	24	1	7
Bones		3	0	0		15	0
	19	15	1	8	£203	0	2

RODENT CONTROL

The use of warfarin as an additional poison was continued with success during the year and the occupiers of premises where treatments were carried out were satisfied with the results obtained.

A summary of the work done in the year is as follows:—

	Local Authority Premises	Dwelling Houses	Agricultural	Business	Total
Total number of properties	26	4555	252	198	5124
Number of properties inspected as a result of:					
(a) Notification	—	65	3	4	72
(b) Routine Survey	26	794	56	42	918
Number of Properties found to be infested	Major 7 Minor 31	5 205	6 5	9 10	27 251
Number of properties treated	38	210	11	19	278

In addition the sewers received their annual tests and treatments as follows:—

Parish	Manholes Tested	Manholes requiring Treatment
Burton-under-Needwood	14	—
Branston	11	—
Outwoods	15	2
Rolleston	11	3
Stretton	14	—
Tutbury	12	8

INSPECTION OF FOOD PREMISES

Several new food premises have been opened during the year and the premises were brought up to the standard required before the sale of food was commenced. Further improvements were also made to existing premises.

Talks have been given to canteen staffs on food hygiene and regular visits are paid to canteens in order to ensure that new staff are aware of the need for it.

The Headmasters of the Tutbury and Barton-under-Needwood Secondary Modern Schools again kindly arranged for talks on food hygiene to those pupils about to leave school, in order that any who might be going into the catering trade would be conversant with the principles of food hygiene.

ICE CREAM PREMISES

There are now 43 premises on the register, an increase of 1 as compared with 1953. The vendors deal mainly with pre-packed products, which is a safeguard in Public Health.

42 samples of ice cream were submitted to the Public Health Laboratory for bacteriological reports. All reports were satisfactory.

SHOPS ACT, 1950

The above Act affects all shops where there are employees. 85 inspections and 17 re-inspections were carried out, and informal notices served upon the owners of 4 shops. The defects have been remedied in 3 cases and are in hand in the other.

FOOD INSPECTION

MEAT

CARCASSES INSPECTED AND CONDEMNED

	Cattle	Calves	Sheep and Lambs	Pigs
Number killed	230	21	788	151
Number inspected	230	21	788	151
All diseases except Tuberculosis				
Whole carcasses condemned	—	—	—	—
Carcasses of which some part or organ was condemned	53	—	33	3
Percentage of the number inspected affected with disease other than tuberculosis	23	—	4.2	2
Tuberculosis only				
Whole carcasses condemned	2	—	—	—
Carcasses of which some part or organ was condemned	27	—	—	1
Percentage of the number inspected affected with tuberculosis	12.6	—	—	.4

FOOD

The under-mentioned weights of tinned foods were condemned as unfit for human consumption:—

	Cwts.	Qrs.	lbs.	oz.
English tinned vegetables		1	9	4
Foreign tinned vegetables		1	5	15
English tinned fruit		1	16	1
Foreign tinned fruit		1	15	1
English tinned beef				10
Foreign tinned beef			12	12
English tinned milk		9	21	—
Foreign tinned milk			10	10
Foreign tinned fish				14
Total	4	2	8	3

DAIRIES

There are four dairies in the district and the standard of cleanliness is good.

DISINFECTION

10 houses were disinfected after the occurrence of infectious disease or deaths, etc. Investigations were made as to the possible source of infection of each case of infectious disease.

DISINFESTATION

8 premises were disinfested following complaints of insect infestation.

MOVEABLE DWELLINGS

LICENSED BY LOCAL AUTHORITY

There are 14 moveable dwellings licensed by the Tutbury Rural District Council to be sited in the area. These are inspected regularly to ensure that the sanitary arrangements are satisfactory.

CARAVANS

UNLICENSED

Inspections have been made of sites in the area on which vagrant families encamped during the year. The police successfully prosecuted caravan dwellers and complaints were less frequent.

**Prescribed particulars on the administration of the
Factories Acts, 1937 & 1948. Part I of the Act.**
