# TYNE PORT HEALTH AUTHORITY

MILL DAM,  
SOUTH SHIELDS.  
FEBRUARY, 1964.

TO THE CHAIRMAN AND MEMBERS OF THE  
TYNE PORT HEALTH AUTHORITY.

Mr. Chairman, Ladies and Gentlemen,

I have great pleasure in presenting my first Annual Report as Medical Officer of Health to the Tyne Port Health Authority. On 16th June, 1963, I commenced the duties of my appointment which I have thus held for only the latter half of the period covered by this report.

It is with the deepest regret that I refer to the death, on 18th December 1963, of my predecessor, Dr. T. L. J. Coxon who had given twenty six years of distinguished and faithful service as Medical Officer of Health to the Authority. It was indeed tragic that he should have been denied, so soon, the enjoyment of retirement which he so richly deserved.

On October 1st, 1963 Mr. T. H. Ogle was appointed as Clerk to the Authority in succession to Mr. John English who retired after a great many years of devoted service including no less than forty three years as Clerk to the Authority. To Mr. English, on his retirement, I extend the good wishes of myself and my staff.

During the year 1963, 4,927 vessels entered the river Tyne, this being 9 less than in the previous year. However, the total tonnage of vessels entering the river increased by more than 100,000 to exceed 7,700,000 tons. This, to some extent, reflects the continuing trend towards larger merchant ships, especially tankers and bulk carriers.

There has been a substantial increase, compared with the year 1962, in the number of fishing vessels entering the river; of these, the number of Polish vessels was more than doubled, there being 284. Owing to the high incidence of sickness and accidents aboard these Polish vessels, heavy demands were made on medical services, especially the hospitals in North Shields.

Compared with the previous year, imports and exports of general merchandise and exports of coal and coke all showed increases to a grand

total of almost 10,000,000 tons ; the principal increase was in imports of iron ore and oil and petroleum.

On page 17 of this report, reference is made to changes in the legislation governing port health control. By far the most important of these was the authority given to enable port health officers to require the production of a valid International Vaccination Certificate against smallpox from travellers arriving from local infected areas, and from Africa, Asia and the Americas (excluding Canada and the United States of America). This requirement is now included in the appropriate international regulations published by the World Health Organisation.

There were no cases, nor suspected cases, of smallpox during the year. From mid-April to late July, Stockholm was declared as a port infected with smallpox ; during this period, one vessel arrived in the Tyne direct from Stockholm in addition to vessels from other Swedish ports. In each case, the necessary supervision was exercised and, without exception, vaccination certificates were all found to be in order.

During the year, 351 deratting exemption certificates were issued but only one deratting certificate following the necessary fumigation. This is a measure of the continued low incidence of rats on board ships, which can be attributed to good management and supervision and modern methods of construction including rat-proofing.

In conclusion, I wish to record my appreciation of the support and encouragement I have received from the Chairman and Members of the Authority. In addition, I gladly pay a well deserved tribute to Mr. R. O. Burn, Chief Port Health Inspector and all members of my staff for their assistance and co-operation.

T. C. FALCONER,

Medical Officer of Health.

## SECTION I—STAFF

TABLE A.

Name of Officer	Nature of Appointment.	Date of Appointment	Qualifications	Any other appointments held
<b>T. L. J. Coxon</b> Retired 15th June, Deceased, 18th Dec.	Medical Officer of Health .....	1st January, 1937	M.D., B.S., B.Hy., D.P.H. ....	Medical Inspector of Aliens and Common- wealth Immigrants.

	Re-visits .....	724	
		————	5,920

**SECTION III—CHARACTER OF SHIPPING AND TRADE  
DURING THE YEAR**

TABLE C.  
TABLE SHOWING PASSENGER TRAFFIC  
FROM 1954 TO 1963

Year.	Passengers.	
	Inwards.	Outwards.
1954 .....	53,854	55,275
1955 .....	59,048	60,478
1956 .....	64,066	64,554
1957 .....	65,052	66,079
1958 .....	62,333	64,059
1959 .....	64,424	66,416
1960 .....	66,460	69,662
1961 .....	70,128	73,229
1962 .....	70,842	74,258
1963 .....	65,016	67,393

During the year 1963 there was a substantial reduction in the amount of passenger traffic compared with the highest recorded figure during the previous year.

This decrease, the first since 1958, was to some extent due to the fact that the largest of the regular Norwegian passenger ships, s.s. "Leda," was out of commission for a few weeks during the early part of the summer season.

## CARGO TRAFFIC

Total tonnage entering the port during the past ten years has been as follows:—

1954	Foreign .....	2,874,561	
	Coastwise .....	5,279,988	
		<u>          </u>	8,154,549
1955	Foreign .....	3,001,123	
	Coastwise .....	5,044,559	
		<u>          </u>	8,045,682
1956	Foreign .....	3,002,844	
	Coastwise .....	4,981,238	
		<u>          </u>	7,984,082
1957	Foreign .....	2,931,713	
	Coastwise .....	4,998,400	
		<u>          </u>	7,930,113
1958	Foreign .....	2,570,021	
	Coastwise .....	4,489,741	
		<u>          </u>	7,059,762
1959	Foreign .....	2,545,285	
	Coastwise .....	4,323,063	
		<u>          </u>	6,868,348
1960	Foreign .....	2,753,439	
	Coastwise .....	4,278,136	
		<u>          </u>	7,031,575
1961	Foreign .....	2,876,817	
	Coastwise .....	4,593,261	
		<u>          </u>	7,470,078
1962	Foreign .....	2,901,251	
	Coastwise .....	4,745,422	
		<u>          </u>	7,646,673
1963	Foreign .....	2,939,943	
	Coastwise .....	4,764,628	
		<u>          </u>	7,704,571

Through the courtesy of the General Manager of the Tyne Improvement Commission, I am able to give the following report on the import and export trade of the Tyne Ports.

Imports of General Merchandise, principal articles:—

	Tons.
Ales, Wines and Spirits .....	4,171
Cement .....	106,556
Fish .....	19,833
Fruit and Vegetables (Fresh) .....	26,848
Grain .....	256,066
Hemp and Flax .....	17,530
Iron and Steel Manufacturers .....	19,107
Iron and Steel Scrap .....	5
Iron Ore .....	706,517
Antimony Ore .....	11,708
Zircon Sand .....	12,607
Other Metals and Minerals .....	65,016
Petroleum Coke .....	14,287
Petroleum Spirit .....	211,991
Oil Fuel and Other Oils .....	849,184
Provisions .....	105,459
Timber—Pit Props. ....	78,490
Timber—Deals, Battens and Boards ...	146,923
Timber—Other Sorts (incl. Plywood) ...	23,332
Woodpulp .....	15,850
Other Goods .....	94,210
	<hr/>
Total .....	2,785,690

Exports of General Merchandise, principal articles:—

Bituminous Manufactures .....	3,284
Electrodes and Electrical Equipment ...	2,059
Fireclay and Fireclay Goods .....	4,883
Grain and Feeding Stuffs .....	8,819
Iron and Steel Manufactures .....	37,709
Lime Waste .....	4,147
Machinery .....	26,125
Metals (Non-Ferrous) .....	5,154
Oil Fuel Cargo .....	138,738
Paints .....	5,466
Petroleum Spirit .....	8,038
Rope and Twine .....	1,655
Sulphate of Ammonia .....	147,984
Tar and Pitch .....	14,269
Textiles .....	5,831
Zircon-Processed Sand, etc. ....	4,466
Other Goods .....	49,138
	<hr/>
	467,679
	<hr/>
Oil Fuel shipped as Bunkers .....	177,157

**Exports of Coal and Coke**

	Tons.
Cargo Coal .....	6,027,424
Cargo Coke .....	512,925
	<hr/> 6,540,349 <hr/>
Coal Bunkers .....	32,737
	<hr/> 6,573,086 <hr/>

## Shipments to:—

	Coastwise Ports Tons	Foreign Ports Tons	TOTAL Tons
Coal Cargo .....	5,394,368	633,056	6,027,424
Coke Cargo .....	507	512,418	512,925
Coal Bunkers .....	30,859	1,878	32,737
	<hr/> 5,425,734 <hr/>	<hr/> 1,147,352 <hr/>	<hr/> 6,573,086 <hr/>

## Principal Ports from which ships arrive:—

Normal Tyne trading includes a large proportion of traders from Australian, Canadian, Norwegian, Swedish, Danish, Dutch and German Baltic Ports, also a few arrivals from Poland, Russia, Finland and Portugal.

Oil and Petrol from various Ports; iron ore from North and West African ports. Canada, Portugal, Sweden and Venezuela; general cargoes from America, make up the bulk of the rest of the total of general trade.

## SECTION IV—INLAND BARGE TRAFFIC.

There are no canals in the area and no barges operating in the port.

---

## SECTION V—WATER SUPPLY.

No change has occurred in Sections 1, 2, and 3.

### 4. NUMBER AND SANITARY CONDITION OF WATER BOATS, AND POWERS OF CONTROL BY THE AUTHORITY.

There are six water boats available for the supply of fresh water to vessels at Tyne Ports. The following is a list of vessels and Owners :

"Crystal Stream"	Messrs. R. G. Aitken & Co.
"Harcus"	Messrs. V. A. Curry.
"Shearwater"	Messrs. V. A. Curry.
"Britannia G"	Messrs. A. Gibson.
"Daphne H"	Messrs. A. Gibson.
"Limmell"	Messrs. S. Pascoe.

34 samples of water submitted for bacteriological examination and found satisfactory.

---

## SECTION VI—PUBLIC HEALTH (SHIPS) REGULATIONS 1952—1963.

The amendments to the above regulations contained in the Public Health (Ships) (Amendment) Regulations, 1963 enable port health officers to require the production of International Certificates of Vaccination against smallpox.

In the absence of a valid certificate, vaccination may be offered or the person concerned may be placed under surveillance or in isolation. As explained in the Ministry of Health Circular 13/63 of July, 1963, these amending regulations had been made as a result of recommendations of the Public Health Committee of the Council of Europe, and the regulations are in conformity with the International Sanitary Regulations. This Ministry Circular 13/63 states that a valid Certificate of Vaccination against smallpox should be required from travellers arriving from Africa, Asia, and the Americas (excluding Canada and the U.S.A.).

The circular also contains recommendations regarding the implementation of the new regulations.

The definition of "excepted port" is further extended by Circular 13/63 to include ports in Greece. Ships arriving from excepted ports need not comply with certain requirements of the Public Health (Ships) Regulations unless the Port Medical Officer considers compliance necessary on public health grounds.

### SECTION VII—SMALLPOX.

(1) Name of Isolation Hospital to which smallpox cases are sent from the district.

The Regional Hospitals Area Board have designated Langley Park Isolation Hospital, Co. Durham.

(2) Arrangements for transport of such cases to that hospital by ambulance, giving the name of the Authority responsible for the ambulance and the vaccinal state of the ambulance crews.

The Authority possesses no ambulance of its own, and is dependent on the co-operation of shore authorities for ambulance facilities of all types.

(3) Smallpox Consultants available :—

Name	Address	Hospital, Office or Surgery Telephone No.	Home Telephone No.
Dr. J. Grant	Greensfield House, Gateshead, Co. Durham	Gateshead 71187 and 76787	Gateshead 75035
Dr. J. R. Lauckner	46 St. Georges Terrace, Newcastle upon Tyne and Newcastle General Hospital, Westgate Road.	Newcastle 38811 or 36206	Newcastle 81-2132
Dr. W. Minns	County Hall, Newcastle upon Tyne.	Newcastle- on-Tyne 28927	Humshaugh 317

(4) Facilities for laboratory diagnosis of smallpox.

Specimens are sent to the  
Institute of Pathology,  
General Hospital,  
Westgate Road,  
Newcastle upon Tyne, 4.

Particular attention is paid to the vaccination state of all crews of ships arriving from smallpox endemic areas and, where necessary, arrangements are made to perform vaccinations or, on occasion, to inform the next port of call.

### SECTION VIII—VENEREAL DISEASES.

No change

**SECTION IX—CASES OF NOTIFIABLE AND OTHER  
INFECTIOUS DISEASES ON SHIPS.**

TABLE D.

Category.	Disease.	Numbr of cases during the year.		Number of ships concerned
		Passengers.	Crew.	
Cases landed from ships from foreign ports.	Jaundice	...	2	2
	Scabies	...	2	1
	Tuberculosis	...	1	1
Cases which have occurred on ships from foreign ports but have been disposed of before arrival	Typhiod	...	1	1
	Malaria	...	1	1
Cases landed from other ships	Measles	...	1	1
	Pneumonia	...	1	1

The following category is in addition to the cases shown above:—

Cases which have occurred on ships from foreign ports, diagnosed, and treated on board.	Pneumonia	...	1	1
	Varicella	...	1	1

## TYPHOID

Lagos .....	*	1	2
Madras .....	* †	...	2
Matadi .....	* †	1	3
Pointe-Noire .....	*	...	1
Rio de Janeiro .....	*	...	1
Sapele .....	*	...	1
Stockholm .....	*	...	4
†Cholera      *Small Pox	Total ...	2	31

During the year a considerable number of coloured crews (mostly Indians, Pakistani and Chinese) flew into the country for the purpose of manning new ships, or, crew changes. Their point of departure was generally an "infected" area, viz., Karachi, Bombay, Calcutta, or Hong Kong, and they arrive on board their vessels within 48 hours of leaving these areas. We are notified by the Medical Officer, London Airport, of their arrival and destination, and surveillance is maintained during their sojourn in the Port.

### PLAGUE, CHOLERA, YELLOW FEVER, SMALL POX, TYPHUS OR RELAPSING FEVER.

No cases, nor suspect cases of the above occurred in the Port during 1963.

### SECTION X—OBSERVATIONS ON THE OCCURRENCE OF MALARIA IN SHIPS.

No cases of Malaria occurred in the Port during the year.

### SECTION XI—MEASURES TAKEN AGAINST SHIPS INFECTED WITH OR SUSPECTED FOR PLAGUE

There were no cases, nor suspected cases of plague in ships arriving in the river Tyne during the year.

## SECTION XII—MEASURES AGAINST RODENTS IN SHIPS FROM FOREIGN PORTS.

1. Ship board rats are becoming increasingly scarce, and the old rat infested ship is becoming a rarity. Should there be any report of unusual numbers of rats or unusual behaviour among them, steps are taken to examine the vessel carrying them.

All runways, traces, tracks and possible harbourage are noted, and an estimate of the number of rats is formed.

The degree of rat proofing is noted and the ship's cubic capacity is measured compartment by compartment.

On the result of this examination, carried out by two experienced officers and seachers, appropriate treatment is decided, whether by poisoning, trapping or fumigation.

Similar procedure is adopted on examination for the purpose of deratisation or exemption certificate when however, it is insisted that the vessel be empty of all cargo.

2. All rats recovered are examined for type, presence of swollen glands and undue emaciation before destruction by incineration. Any abnormal rats are further examined, and if regarded as necessary, are subjected to bacterial examination.

3. The deratting of ships is carried out by private contract between the agents and fumigators on the approved list of the Port. This contains the names of three firms operating in the area.

Messrs. Rentokil Laboratories Ltd.

Messrs. Contra Pest Services Ltd.

Messrs. J. Cuthbertson & Co. Ltd.

Trapping, and a certain amount of pre-baiting, is practised in certain circumstances where fumigation is unsuitable, and this is performed by a professional ratcatcher.

4. Rat proofing is now a major consideration with Naval Architects in the construction of new tonnage, and in older vessels the substitution of expanded metal and sheathing for wooden conduits and casings is proceeding with successive surveys.

TABLE E.

Rodents destroyed during the year in ships from foreign ports.

Category	Numbers.

British .....	3,171	.....	15	111
Other Nations .....	2,025	.....	3	17

## SANITARY DEFECTS.

Inspection of crew's accommodation continues a most important part of the Port Health Inspector's duties.

Whilst revealing numerous instances of the continuance of defects which, with improved supervision by responsible officers and a responsive crew, should never occur, there are indications in the inspections that owners and superintendents are showing a happier spirit and a more earnest desire to give satisfactory accommodation to the personnel on board.

The elimination of out-of-date tramps and the substitution of faster and more economically run new tonnage with accommodation according to modern standards has proceeded satisfactorily. The extensive building of oil tankers has set a high standard of ship board comfort for their personnel.

**The total Number of Vessels Inspected During 1963 is as follows:—**

Steamers .....	1,324
Motor Vessels .....	3,355
Sailing Vessels .....	
Total .....	<u>4,679</u>

**The Number of Vessels on which Defects were found are as Under:—**

**SECTION XIV—PUBLIC HEALTH (SHELL-FISH)  
REGULATIONS 1934 AND 1948.**

There are no Shell Fish beds within the jurisdiction of the Tyne Port Health Authority.

---

**SECTION XV—MEDICAL INSPECTION OF ALIENS.**

The Medical Inspectors of Aliens holding warrants of appointment at 31st December, 1963 were as follows:—

Dr. T. C. Falconer. Medical Officer of Health.  
Dr. J. Eustace. Deputy M.O.H.  
Dr. J. O'Leary.  
Dr. T. Lyons.

**Other Staff.**

Miss N. Howard. Retired 31/5/63.  
Mrs. M. Thompson, S.R.N., S.C.M. Appointed 1/6/63.

**Organisation of Work.**

Medical inspections are carried out by the Medical Officer of Health; the other three medical inspectors, who are general practitioners in partnership, carry out relieving duties as required. During the year, more than 400 ships were dealt with; the majority of these were Scandinavian. In the case of the Norwegian mail boats arriving at Tyne Commission Quay, North Shields, disembarkation during week-days commences at 7.00 a.m; disembarkations at week-ends take place in late forenoon or early afternoon. During the summer season, the Danish passenger ship disembarked twice weekly at Newcastle Quay.

**Nature and amount of Aliens Traffic.****MEDICAL EXAMINATION OF ALIENS****Aliens Order, 1953.**

during the year ended 31st December, 1963.

1. Number of arriving ships carrying aliens ..... 448
2. Total number of arriving aliens (excluding crews) .....22,486
3. Total number of aliens medically examined ..... 834
4. Reports and certificates for aliens medically examined :—

Nature of report or certificate	Total number of reports and certificates issued	Aliens not permitted to land
A Unsound mind or mentally defective	...	...
B (1) Undesirable for medical reasons	...	...
(a) Inability to support	...	...
B (2) (b) Likely to require medical treatment	...	...
(c) Inability to support <b>and</b> likely to require medical treatment.	1	...
C Conditionally landed for further medical examination	...	...
Totals	1	0

**Accommodation for Medical Inspection and Examination.**

The Bergen Line has a well appointed terminal building at Tyne Commission Quay, North Shields; there is a medical inspection room and adjacent waiting room.

These facilities are available only in respect of passengers travelling by Bergen Line, otherwise, medical examination of aliens is carried out on board ship.

**COMMONWEALTH IMMIGRANTS ACT, 1962.****Medical Examination of Commonwealth Immigrants.**

The arrangements regarding the arrival of vessels carrying Commonwealth Immigrants are similar to those in operation in respect of aliens, and all the Medical Inspectors also hold warrants of appointment as Medical Inspectors of Commonwealth Immigrants.

**MEDICAL EXAMINATIONS.**

during the twelve months ending 31st December, 1963.

1. Total number of arriving Commonwealth citizens subject to control under the Act .....2,121
2. Total number of Commonwealth citizens medically examined ... 2
3. Reports and Certificates for Commonwealth citizens medically examined :—

Nature of report or certificate	Number of reports or certificates issued	Number of Commonwealth citizens refused entry
A Suffering from mental disorder	...	...
B (1) Undesirable for medical reasons	...	...
B (2) Likely to require major medical treatment	...	...

Rumania .....	Maize .....	722
U.S.A. ....	Maize .....	3,346

5 tons 6 cwts. of Argentine wheat unfit for human consumption but utilized for animal foodstuffs.

## CLEAN AIR ACT, 1956.

DARK SMOKE (PERMITTED PERIODS) (VESSELS)  
REGULATIONS, 1958.

Fifty-two verbal complaints were made to Masters and Engineers regarding the volume of smoke being emitted, as opposed to ten in 1962.

On first appraisal this appears to be a retrograde step, but actually, it reflects the fact that the staff have been able to take more observations and exercise more vigilance than in previous years, and by timely intervention, probably prevent contraventions.

We still have many problems before we can claim with any justification, that we have solved the difficulties so long associated with smoke from ships and river craft etc., and there are many who claim that the Permitted Periods (Vessels) Regulations are very difficult to apply. Even so, there is strong evidence to show an increased awareness exists among seafarers, owners and employees alike.

I know of cases where owners of river craft have paid considerably more than the cheapest rate for bunker coal, the Chairman and Secretary of a Union involved making a direct approach to this Authority. Seafarers, on returning from a voyage, hear from their wives of difficulties experienced ashore, and this makes them appreciate the importance of Clean Air afloat on the river.

---

**MEDICAL TREATMENT.**

The Medical Officer of Health is called upon to deal with all kinds of medical emergencies, including accidents and other illness in addition to infectious diseases which are his prime concern. On receipt of radio messages from inward bound ships with illness on board, the necessary arrangements are made which may include admission to hospital.

Medical treatment of illness arising on board ship after arrival in port is normally carried out by general practitioners engaged by the shipping agent, or by medical officers of the Shipping Federation who advise the Medical Officer of Health in cases of infectious disease.

Masters and responsible officers on board vessels, where cases of sickness have occurred, are advised of the appropriate measures to be taken. Advice, where necessary, is transmitted to other ports for their information.

## LAUNCHES,

Both launches underwent Annual Survey, and the necessary repairs were seen to have been carried out in a satisfactory manner.

**T.P.H.A. No. 1** was commissioned in 1933, and in 1961 was examined and repaired on the assumption of a five year expectation. The general condition of this vessel remains servicable and the engine in a reliable condition, but of course the question of spares grows increasingly difficult.

**T.P.H.A. No. 2** This launch too, is of pre-war vintage, gives good service, and the Annual Survey Report was very satisfactory.

---

BOUNDARIES OF THE TYNE PORT  
HEALTH AUTHORITY.

The boundaries of the Tyne Port Health Authority extend from Blaydon and Newburn on the west and take in all the riparian borders of the four County Boroughs, two Municipal Boroughs and six Urban Districts, to the river junction with the North Sea on the east.

This comprises the full extent of the navigable reaches of the river, and these boundaries generally coincide with those of the Tyne Improvement Commission.

Apart from the collection of bridges at Newcastle and Gateshead all other public cross traffic is served by passenger or vehicular ferries.

Owing to the length of the navigable portion of the Tyne, it is necessary to divide the area for working purposes into sub-areas or stations, and this practice is followed by H.M. Customs, H.M. Immigration Service, and the Tyne Port Health Authority.

Customs and Excise work from the major points of the County Boroughs and the Waterguard maintain stations on each commercial quay on the river.

The Tyne Improvement Commission, whose services include among their sub-divisions the harbour Master's Department, Ferry Superintendent and River Police, all have headquarters at the river entrance but with suitable sub-stations up and down the river.

The Tyne Port Health Authority find it most convenient to work, in the main, from the headquarters at South Shields, covering from the busy area of the mouth and middle districts of the river.

Newcastle, Gateshead, and the up river portion of the area are under the control of a senior inspector working from a base in Newcastle.

The staff of the Authority is by reason of numerical inadequacy, unable to maintain a twenty-four hour service, but owing to the close liaison existing between the Waterguard and ourselves, boarding during the night, except in special emergency is rarely necessary.

Most emergencies are purely medical in character and are the concern of the Medical Officer more than the inspectorial staff.

---

#### DANGEROUS DRUGS REGULATIONS, 1933.

In accordance with the above regulations the Medical Officer of Health granted authority to shipping chemists for the supply of scheduled drugs to thirty-five foreign registered vessels during the year.

---

#### ASSOCIATION OF SEA AND AIR PORT HEALTH AUTHORITIES.

The Annual Conference of the Association was held in Glasgow and was attended by the Chairman and the Medical Officer of Health.

At the Annual Meeting of the Association the Medical Officer of Health was appointed to the Medical and General Committees of the Association, and in September he attended meetings of these Committees in London.

---

#### CO-OPERATION WITH OUTSIDE AUTHORITIES.

I am bound to stress the dependence of the Authority upon H.M. Customs & Excise and H.M. Immigration Service—these being the two Government Departments most intimately connected with our work.

The extension by "Lloyds" to us of the facilities afforded by their Hailing Station in respect of a 24 hour service of all arrivals and sailings, continues to be of immense value.

We are grateful to "Lloyds" for this privilege and to their local staff at the Hailing Station for the help so freely given.

The assistance of the Surveyors and general staff of the Ministry of Transport is also freely sought, and on their part, freely given. This is always a powerful help in dealing with constructional defects.

I desire to render to the Principal Officers and Staffs of all the above departments, my grateful thanks.

To all others who have helped in the past year—the General Manager and Staff of the Tyne Improvement Commission, Pilotage Board, and in particular, the Members of my own staff, I extend my warmest thanks.

T. C. FALCONER, M.B., Ch.B., D.P.H.

Mill Dam,  
South Shields.  
February, 1964.
