## MEDICAL OFFICERS' ANNUAL REPORT

For 1898.

WALKER-ON-TYNE,

February 27th, 1899.

TO THE CHAIRMAN AND MEMBERS OF THE WALKER URBAN DISTRICT COUNCIL.

GENTLEMEN,

The following is the Annual Report of your Medical Officers for the year ended December 31, 1898.

During the year almost daily visits have been made to some portions of the district, and monthly reports made to your Council.

Building Bye-Laws. Building still continues as during the previous year, and there is the prospect of even greater progress during the next twelve months. It should be an object of special concern to your Council to see that all your Bye-laws regarding building are carried out, as a little attention now may save a great deal of trouble in the future.

Infectious Diseases, From a study of Form A, your Council will be struck by the remarkable decrease in deaths from notifiable infectious diseases; while Phthisis, Measles, and Whooping Cough are the causes of death in no less than 22.6 per cent. of the whole total of deaths from natural causes. The percentage from Bronchitis and Pneumonia was 19.1, while from Phthisis and other Tubercular Diseases it was 24.6!

Whooping Cough and Measles were very prevalent during the year, and the latter was in many cases followed by Bronchitis or Broncho-pneumonia.

During the summer there were a great many mild cases of Scarlatina, and one case of Scarlatina Maligna, which proved fatal in a few hours.

Influenza was not very prevalent; but there were several cases of Rheumatic Fever, of which three proved fatal.

The total number of deaths from Zymotic diseases during the year, as compared with 1896 and 1897, was:—

notifiable			
		17	42

The following table shews the number of deaths from the seven principal Zymotic diseases, and the proportion per 1,000 of the population estimated to the middle of each year:—

NUMBER OF DEATHS FROM THE SEVEN PRINCIPAL ZYMOTIC DISEASES.

Seven principal Zymotic						NUMI							A	NNU.		BATH 1,000.		E		
Diseases.	1889	1890	1891	1892	1893	1894	1895	1896	1897	1898	1889	1890	1891	1892	1893	1894	1895	1896	1897	1898
Scarlatina Measles Whooping Cough Fevers Diarrhœa Diphtheria Small Pox	4 13 1 9 4 2 0	1 0 10 1 5 1	0 3 8 2 3 9	0 12 4 3 2 11	2 13 11 2 4 6	1 1 2 1 2 12	5 1 5 3 5 8 0	3 17 1 2 3 1	5 3 1 3 4 1 0	3 11 14 4 10 0	3 1·1 ·09 ·8 ·3 ·1	·09 ·9 ·09 ·4 ·09	·2 ·7 ·1 ·2	1.0 .3 .2 .1	11 1:1 :9 :1 :3 :5	-08 -08 -16 -08 -16 1-0	·08	·2 1·4 ·04 ·16 ·2 ·04		·23 ·84 1·07 ·30 ·76
TOTAL	33	18	25	32	38	20	27	27	17	42	3.0	1.6	2.2	2.7	3.2	1.6	2.2	2.16	1.3	3.22

Three persons were removed to the "City" Hospital for Infectious Diseases at Walker Gate. All recovered.

During the year 124 notifications of infectious disease Notifiable were received, as against 121 during the previous year. Infectious Diseases. These are tabulated in Form B of the Local Government Board. Of these cases, seven proved fatal.

	Notified.	Died.
Scarlatina	 79	 3
Diphtheria	 5	 0
Typhoid Fever	 17	 0
Puerperal Fever	 3	 4
Erysipelas	 20	 0
	_	
	124	7

In addition to these, however, there were 35 deaths from Non-Notifiabl Zymotic diseases not notifiable in this district:—

Non-Notifiabl Infectious Diseases.

Measles	 	11
Diarrhœa	 	10
Whooping Cough	 	14
		- 35

Schools.

The Schools have not been closed through sickness during the past year.

Accidents.

The Shipyards have been very busy during the year, and there has been an increase in accidents. There were 10 deaths from injuries, but these were not all from the Shipyards.

Births and Deaths. During the year there were registered 459 births and 308 deaths. Of the latter, 49 occurred in the "City" Hospital, and five among persons who did not belong to the district. Consequently, the natural increase is 459-254=205. In 1897 it was 266. Of the births registered 229 were males and 232 were females.

By referring to Table A it will be found that there were 10 deaths from injuries, so that 254-10=244 is the number of deaths due to natural causes. This gives a death rate of 18.76 per 1,000 for the year, and 19.5 per 1,000 as the rate from all causes; that of the Tynemouth Union from all causes was 19.7 per 1,000.

The relative mortality from all causes during the four quarters of the year, as compared with the corresponding periods of previous years, is shewn in the following table:—

1888	 1st Qr. 27.5	2nd Qr. 21.0	3rd Qr. 23.5	4th Qr. 28.0	Year. 20.0	
1889	 18.5	27.6	19.6	17.0	20.8	
1890	 23.6	18.2	22.5	21.4	20.9	
1891	 17.6	26.8	17.3	23.3	20.4	
1892	 23.8	16.3	18.4	15.6	18.3	
1893	 17.2	20.0	25.2	18.8	20.5	
1894	 17.3	16.7	11.0	18.7	15.9	
1895	 25.2	14.8	13.6	11.6	16.3	
1896	 13.1	15.4	20.2	14.7	15.8	
1897	 16.2	21.1	19.1	19.1	16.6	
1898	 20.0	17.8	19.7	19.7	19.5	

Infant Mortality. The infant mortality still advances steadily. It was in-

1895	 69	1897	 75
1896	 66	1898	 85

A total of 85 means 1 in 5.4 of the births registered during the year. The ratio to the number of deaths from natural causes was 41.37 per cent., and the death rate 6.5 per 1,000 of the population generally.

The principal causes of death were Premature Birth and Congenital debility, 17; and Tubercular and Marasmic Disease, 21.

No legal proceedings were instituted during the year in Nuisances. respect of any nuisance.

Appended will be found Forms A and B of the Local Government Board, and a list of notices served by your Inspector of Nuisances. The statistics are computed upon an estimated population of 13,000.

We are, Gentlemen,
Your obedient Servants,
H. FRAZER HURST,
Medical Officer of Health to 30th Sept., 1898.

F. N. GRINLING, Medical Officer of Health from 1st Oct., 1898, to 31st Dec., 1898
