REPORT

On the Health and Sanitary Condition of the

WARMINSTER AND WESTBURY RURAL DISTRICT

for the year

1960

WARMINSTER AND WESTBURY RURAL DISTRICT COUNCIL

J. REYNOLDS,

Medical Officer of Health of
The Warminster and Westbury
Rural District Council.

1919

THE UNITED STATES OF AMERICA

DEPARTMENT OF THE INTERIOR

LAND OFFICE

WASHINGTON

OFFICE OF THE ASSISTANT SECRETARY

WASHINGTON

UNITED STATES OF AMERICA
DEPARTMENT OF THE INTERIOR
LAND OFFICE

Health Department,
Craven House,
Warminster, Wilts.

R. F. Stratton, Esq., J.P.,
Chairman, Warminster and Westbury Rural District Council.

Sir,

As directed by the Council in accordance with the Ministry of Health circular 1/61, I have the honour to present my Annual Report for the year 1960. This report is followed by that of your Public Health Inspector.

All persons concerned with the Public Health of the Rural District continued to co-operate whole-heartedly with me, and I am grateful to your Public Health Committee, the Clerk of the Council, the Family Doctors and visiting Consultants, and the Director of the Public Health Laboratory. The Public Health Inspectors have worked conscientiously and I am personally indebted to them and to my efficient office staff.

I would have liked to have produced this Report earlier but pressure of work has not committed this. I am of the opinion that your Medical Officer should have a larger allocation of time, since it is not possible with an allotment of less than $1\frac{1}{2}$ days per week to perform all the duties imposed by statute.

The vital statistics show the largest birth rate of any year in the past decade, and the death rate compares favourably with that for England and Wales and with that for the County of Wiltshire.

Only minor cases of infectious disease occurred in the District during the year, and I am happy that such a large percentage of children are immunized against diphtheria. I am not so pleased that only roughly 50% of children are vaccinated in infancy. I strongly advise all parents to have their children vaccinated in the first year of life.

In general, the health of the community of the Rural District gives cause for satisfaction. I hope this state of affairs continues.

I have the honour to be, Sir,

Your obedient servant,

JOSEPH REYNOLDS.

WARMINSTER AND WESTBURY RURAL DISTRICT COUNCIL

To 23rd May, 1960.

From 23rd May, 1960.

<u>Chairman of the Council:</u>	C. R. Algar, J.P.	C. R. Algar, J.P.
<u>Vice-Chairman:</u>	R. F. Stratton, J.P.	R. F. Stratton, J.P.
<u>Chairman of the Public Health Committee:</u>	A. J. Wheeler.	A. J. Wheeler.
<u>Members of the Public Health Committee:</u>	Chairman of the Council Vice-Chairman of the Council	} ex officio
<u>Councillors:</u>	Miss W. M. Barker.	Miss W. M. Barker.
	Mrs. M. Pottow.	Mrs. M. Pottow.
	Mrs. F. Sykes, J.P.	Mrs. F. Sykes, J.P.
	Mrs. P. Sykes.	Mrs. P. Sykes.

Members Elected to The West Wilts Water Board, 1st December, 1960:

<u>Councillors:</u>	C. R. Algar, J.P.
	R. F. Stratton, J.P.

MEETING: Friday before the second Monday in each month at 2.15 p.m.

Staff of the Public Health Department:

Medical Officer of Health:

Joseph Reynolds, M.C., L.R.C.P. Edin., L.R.C.S. Edin.,
L.R.F.P. & S. Glas., D.P.H. (Eng.).

Chief Public Health Inspector:

W. F. C. Merrett, M.R.S.H., M.A.P.H.I.

Additional Public Health Inspector:

P. M. Ennis, M.R.S.H., M.A.P.H.I.

Clerks:

Miss K. V. Jones.
Miss M. A. Brown.

Office:

Craven House,
Warminster,
Wilts.

Telephone:
Warminster
3428/9.

The Medical Officer of Health also holds the appointments of Medical Officer of Health for the Urban Districts of Warminster and Westbury. He is also Assistant Medical Officer and School Medical Officer for the Wiltshire County Council. Three-elevenths of his salary as Medical Officer of Health is paid by the Rural District Council.

The Chief Public Health Inspector is also Surveyor to the Council. Before the formation of the West Wilts Water Board he was also Water Engineer. The Additional Public Health Inspector also spends much time on Surveyor's work.

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

a) Laboratory facilities.

All samples requiring laboratory examination are sent to the Public Health Laboratory in Bath. Not only are reports on these samples available from the Medical Director but he is always willing to visit the District, and the Medical Practitioners and myself find this personal contact most satisfactory.

b) Ambulance Service.

The Ambulance service is provided and controlled by the Wiltshire County Council. The service in this district is controlled from Bradford-on-Avon where the station is manned continuously. A sub-station in Warminster also serves the district. Non-emergency calls must originate from a doctor, dentist or midwife.

To obtain an ambulance in an emergency:-

where there is a dialling system in operation, dial 999

where there is no dialling system, lift the receiver and ask for an ambulance.

c) Midwifery, Home Nursing, Health Visitors and Home Helps.

These services are provided and controlled by the Wiltshire County Council, County Hall, Trowbridge, telephone Trowbridge 3641.

d) Clinics and Treatment Centres.

The following Clinics serve the districts:-

1. Ante Natal:

At the Maternity Hospitals concerned.

Consultant Clinics are at Trowbridge and Bradford-on-Avon for patients referred by their own doctor or midwife.

Baptist Chapel, West End, Westbury, Wilts. - Wednesday mornings 10.00 - 12.30 p.m.

2. Infant Welfare:

Methodist Chapel, George Street, Warminster at 2 - 4 p.m. on the first and third Fridays of each month.

Methodist Schoolroom, Station Road, Westbury at 2 - 4 p.m. every Thursday

Progressive Hall, North Bradley at 2.30 - 4 p.m. on the second and fourth Wednesdays of each month.

Trowbridge C.C. Clinic, The Halve, at 2 - 4 p.m. on every Tuesday and Thursday.

The Codford Club, Codford. 2.30 - 4 p.m. on second and fourth Mondays of each month

Dilton Services Social Club, Dilton Marsh. At 2.30 p.m. on second and fourth Fridays of each month.

3. Diphtheria, Whooping Cough, Tetanus and Poliomyelitis Immunization.

Immunization is undertaken by the County Council and Medical Officers visit the schools in outlying villages at specified dates for this purpose. All family doctors will also carry out immunization.

The Warminster Clinic is held on the fourth Friday of every month at 2 p.m. at the Methodist Schoolroom, George Street, Warminster.

The Westbury Clinic is held on the fourth Thursday of every month at 2.30 p.m. at the Methodist Schoolroom, Station Road, Westbury.

4. Paediatrics.

Warminster Hospital on second Friday in each month.

Trowbridge and District Hospital third Friday in each month.

5. Ear, Nose and Throat.
By invitation from the County Council or through the family doctor.
Trowbridge and District Hospital first, third and fifth Mondays, and second and fourth Thursdays in each month.
Westbury Hospital on fourth Tuesday in each month.
Warminster Hospital first Tuesday in each month.
6. Eye.
By invitation from the County Council.
Second, fourth and fifth Fridays in month at Methodist Schoolroom, Warminster.
10.30 to 1 p.m. every Monday at Trowbridge and District Hospital.
7. Orthopaedic.
At Trowbridge, by invitation from the County Council or through the family doctor.
At Warminster - first Monday, first Friday, and second and fourth Thursdays in each month.
At Westbury, first Tuesday in each month.
8. Gynaecology.
At Warminster Hospital on fourth Wednesday in each month, and at Westbury Hospital on first and third Mondays in each month.
9. Chest Clinic.
Trowbridge - Wednesday mornings and every Saturday from 10 a.m. to 1 p.m.
Cases referred by own Doctor, or by invitation from County Council.
10. Rheumatism.
Alternate Wednesdays at Trowbridge and District Hospital.
11. Radiotherapy Follow Up (Cancer).
At Bristol and Bath by arrangement with the County Council.
At Trowbridge and District Hospital second Thursday in each month.
12. Mental Illness.
Trowbridge and District Hospital every Tuesday afternoon.
13. Chiropody.
By arrangement with the County Council.
14. Venereal Diseases.

	<u>Men.</u>	<u>Women.</u>
General Infirmary, Salisbury.	Tuesday - 11.30 a.m. - 1 p.m.	Wednesday - 6 - 7.30 p.m.
	Friday - 6 - 7.30 p.m.	Saturday - 11.30 a.m. - 1 p.m.
Royal United Hospital Bath.	Friday - 5 - 6.30 p.m. Saturday - 5 - 6.30 p.m.	Tuesday - 5 - 6.30 p.m. Friday - 2.30 - 4.00 p.m.
St. Martin's Hospital, Bath.	Tuesday - 2 p.m.	Tuesday - 2 p.m.

Welfare Foods are distributed at the W.V.S. Centre, Portway House, Warminster, on: Monday 10.00 a.m. - 12. p.m., Tuesday 2.00 - 4.00 p.m., Thursday 10.00 a.m. - 12.00 p.m., Friday 2.00 - 4.00 p.m.

Nursing equipment and appliances can be loaned from the Medical Loan Dept in charge of Mrs. George Nicholls, St. Andrew's, Croham Road, Warminster.

e) Hospitals.

The four hospitals noted below serve the district and are controlled by the West Wiltshire Hospital Management Committee:

	<u>Beds.</u>	<u>Classification.</u>	<u>Type of case dealt with.</u>
Warminster Hospital	30	Wholly general.	Acute medical and surgical cases. Gynaecological cases. Chronic sick patients for short periods only.
Westbury and District Hospital.	20	do.	
Scarbourne Hospital.	121	Mainly chronic sick.	Aged chronic sick. Accommodation reserved to the County Council for 26 Welfare residents.
Beckford Orthopaedic Hospital, Warminster.	26	Pre-convalescent and recovery unit, plus orthopaedic cases.	

Many residents also attend and receive treatment at several Hospitals in Bath and Salisbury.

Maternity cases are admitted to hospitals at Bradford-on-Avon, Trowbridge and Salisbury.

Cases of infectious diseases are admitted to the Isolation Hospital at Bath. The majority of cases of Tuberculosis are admitted to Winsley Chest Hospital, the Manor Hospital, Bath and Odstock Hospital, Salisbury.

f) Mortuary.

An annual payment is made to the West Wiltshire Hospital Management Committee for mortuary facilities at the Scarbourn Hospital, Warminster. The visiting pathologist has expressed his satisfaction with the facilities provided.

SECTION C

PREVENTION AND CONTROL OF INFECTIOUS AND OTHER DISEASES.

The nearest centre which keeps emergency supplies of sera for the treatment of anthrax, botulism and snake-bite is:-

Ham Green Hospital, Bristol.

Telephone No. Pill 2165.

The Dispensary, Royal South Hants and Southampton Hospital carries snake-bite antivenin not only against native snakes but against tropical snakes which may be imported with cargoes arriving at the docks.

Special arrangements for the treatment of anthrax have been provided by the South Western Regional Hospital Board at Claverton Down Hospital, Bath. This hospital also holds anti-anthrax serum for prophylactic use and for the treatment of patients sensitive to penicillin.

Organophosphorus Poisoning.

Certain insecticides contain organophosphorus poisons, e.g. parathion. Treatment is by pyridine-2-aldoxime methiodide (PAM). A small supply of PAM is available in the Royal Infirmary Pharmacy (Telephone No. Bristol 22041).

An emergency service for the treatment of cases of organophosphorus insecticide poisoning is also provided by the Medical Division, C.D.E.E. (Ministry of Supply), Porton, Wilts. (Telephone No. Idmiston 211).

INSPECTION AND SUPERVISION OF FOOD.

Milk.

Dealers' Licences to use the special designation Tuberculin Tested	10
Dealers' Licences to use the special designation Pasteurized	6
Supplementary Licences to use the special designation Tuberculin Tested	12
Supplementary Licences to use the special designation pasteurized	9

One producer/retailer abandoned dairy farming as a result of a notice being served on him requiring the milk to have heat treatment before sale for human consumption. Positive ring tests from a second producer/retailer were ascribed to late inoculation with S.19 vaccine and brucella were not being recovered from the milk retailed by this producer. Notices are still in operation requiring two producers to send milk for pasteurization.

MEAT AND FOOD INSPECTION.

It will be seen from the accompanying table that all meat slaughtered in the district was subject to inspection, and I am hoping it will be possible for more ante-mortem inspection to be carried out. The slaughterhouses themselves are the subject of the Chief Inspector's report. Other food premises within the district have been regularly inspected to ensure compliance with the Food Hygiene Regulations.

MEAT AND FOOD INSPECTION (Continued).

Carcases and offal inspected and condemned in whole or part:

	Cattle excluding Cows	Cows	Calves	Sheep and Lambs	Pigs	Goats	Horse
Number killed (if known)	171	11	30	565	157	3	-

SECTION B

SANITARY CIRCUMSTANCES OF THE AREA.

WATER SUPPLIES.

The West Wilts Water Board came into existence on the 1st December, 1959, and took over the works and functions of this Authority on the 1st April, 1960. From that date most of the samples have been taken by officers of the Board, particularly those from the main supplies.

It is now pertinent to report the remarks of the Chief Medical Officer in his report to the Minister of Health for the year 1957:

"In accordance with modern policy, water undertakings, both private and public, are being subjected to regional grouping, where necessary, with consequent changes in staffing and management. It may, therefore, be of advantage to remind medical officers of health and public health inspectors that the Memorandum on safeguards to be adopted in day-to-day administration of Water Undertakings (Memo 221), issued by the Ministry of Health in 1939, and revised in 1948, has not in any way been affected by these events.

"While the Memorandum provides a useful and practical code of hygiene for water engineers and managers, it also indicates clearly that there is an overall medical responsibility for the health aspects of water collection, treatment and distribution, a responsibility which does not begin "at the tap", but extends from the actual source, whether above or below ground, to the consumer. All water undertakings, therefore, should ensure that they have access to competent medical advice, at all times; and in the case of a local authority undertaking, the appropriate committee should, in the interests both of the community and of itself, see that the medical officer of health has an unrestricted interest in the health aspects of water production.

"Copies of bacteriological and chemical reports on the raw and treated water should regularly be sent to the health department; the health of workmen employed on gathering-grounds, in wells or at boreholes and at pumping stations and treatment plants should be subjected to constant medical supervision, as indicated in paragraph 5 of Memo. 221, if accidental bacterial infections are to be avoided. Finally, in those rural areas where shallow wells are still in use, steps should be taken to ascertain whether consumers, particularly babies, are being exposed to the hazards of an excessive nitrate content.

"Although the occurrence of water-borne disease has been strikingly reduced within past decades, this has only been effected by the combined and unremitting efforts of the engineer, the chemist, the bacteriologist and the health officer. Any relaxation in present procedures is fraught with danger, particularly as the country becomes more and more urbanised and industrialised. A heavy obligation, which he cannot delegate to others, still rests on the medical officer of health. It is his duty to insist on his undoubted place in the production and maintenance of pure and wholesome water supplies, in town and country alike."

The bacteriological reports which are summarized below show that the quality of the water used within the area demands constant supervision, and that many of the smaller supplies will have to be closed as soon as a piped supply of wholesome water can be made available. A considerable number of properties still lack a piped supply within the house, and the sufficiency of water from the piped supplies has only been maintained with difficulty. The Water Board have submitted long term proposals to the Ministry, which will alleviate the present shortage of water, but the public must understand that with the passage of time water becomes an increasingly valuable commodity, and waste cannot be tolerated.

Continued . . .

Bratton Source.

The following results show that this source is subject to intermittent pollution. Two of the samples of chlorinated water contained coliforms. Ideally the waters intended for drinking should show no coliform bacteria in 100 m.l., and it should be the aim of every water undertaking to provide water of this quality. Many natural waters reach this standard and, since it is readily attainable by effective treatment, no chlorinated supply should fail to give this result. I trust chlorination will be effective in future years.

15. 3.60.	36 Keevil, Land Spring, R.D.C.	do.	Not tested
15. 3.60.	42 Bulkington, Land Spring, R.D.C.	do.	do.

It will be seen that the last two samples of treated water noted above were taken at Keevil and Bulkington on the perimeter of this supply. The Water Board have sampled the treated water at the village nearest to the reservoir, and I think it advisable that samples should be taken at points further afield, to ensure that the distribution system is intact.

CODFORD SOURCE.

The samples have been regularly taken from this source and the results follow. It will be seen that coliforms have only been appearing during the year in small numbers in the untreated water, but this must not be allowed to induce a false sense of security. This water in the past has shown the heaviest degree of pollution possible to measure, and treatment therefore must be thorough and supervision most regular.

SWANCOMBE SOURCE.

This source was the main supply of the village of Sutton Veny, part of the village of Tytherington, and a few properties near the source. I am very pleased that the Water Board found it possible to take a supply from the Warminster reservoir and close the Swancombe source. The water fed into the Warminster reservoir was no better in the raw state than the water from Swancombe, but it is possible to sterilise this water by efficient treatment.

CROCKERTON SOURCE.

This source is to be abandoned as soon as arrangements can be made to provide an alternative supply. The samples taken by the Water Board confirm my experience in the past that all the three sources are wide open to pollution and that this pollution is at times extremely heavy.

WHITBOURNE SOURCE.

This supply, as the chemical analysis below shows, is an acid water, and as such would be expected to be plumbo solvent. On no occasion has lead been demonstrated in any sample taken from a house tap, and the family doctors have never had any patients with any signs of lead poisoning. Nevertheless, the supply is to be abandoned as soon as possible.

UPTON SCUDAMORE SOURCE.

This source was the property of the Trowbridge and Melksham Water Board. Since the formation of the West Wilts Water Board I have had reports of the bacteriological examinations. The bulk of the water is supplied to the Urban Districts of Trowbridge and Melksham, and the supply will undoubtedly merit careful examination when the West Wilts Water Board appoint a Medical Officer.

9. 3.60.	12 The Breach, Dilton Marsh, Bore, Westbury and Dilton Marsh Supply.	do.	do.

THE DEVERILLS.

The villages of Kingston Deverill, Monkton Deverill and Hill Deverill are supplied from shallow wells in the chalk. I am informed that the ownership of the wells, previously vested in the Rural District Council, passed to the Water Board, which explains the terminology in the reports which follow. It has been apparent for some years that all these wells are open to pollution. Users have been advised to boil water, when appropriate, and the villages will be given a supply by the West Wilts Water Board from the Maiden Bradley source as soon as possible.

WATER SUPPLIES (CONTINUED).

STOCKTON.

This village has two supplies, one from Mr. Stratton's private supply and the second from the Yeatman-Diggs and Stockton Estate supply. The results below, added to the results from previous years, confirm my previous opinion that it is essential for a public supply from the Water Board to this village to replace the present sources of supply.

<u>Date.</u>	<u>Source.</u>	Probable numbers per 100 n.l.

WATER SUPPLIES (CONTINUED).

SUPPLIES ON THE LONGLEAT ESTATE.

It will be seen that these supplies are polluted. The Knapps Gate Supply is of importance because it was proposed to use this water for the Girl Guides' International Gathering. Before and during this period, the Water Board made special arrangements to sterilize the waters in use. Eventually the Board will provide supplies of wholesome water in this area.

Continued . . .

WATER SUPPLIES (CONTINUED).

As requested by the Minister, a table follows, showing the number of dwellinghouses and the number of population supplied from public water mains (a) direct to the house and (b) by means of standpipes. It was also requested that this information should be given in respect of each Parish in a Rural District. It is impossible to guarantee the complete accuracy of the figures in the table, but a great deal of work has been done to provide as accurate a picture as possible.

SEWAGE DISPOSAL.

The Senior Public Health Inspector discusses this in his section of the Report. I am pleased that the Council appreciated the necessity for efficient sewage disposal works to be used in the Rural District. The need for such works becomes an urgent necessity where supplies of wholesome water are in danger of pollution. Now that a start has been made, I trust this work will continue as quickly as possible.

ATMOSPHERIC POLLUTION.

Measurements have continued of the atmospheric pollution near to the village of Heywood and the proposed Cement Works.

It is worthwhile to indicate how the degree of pollution is measured and in respect of the rain gauges, we have the D.S.I.R. approved apparatus which consists essentially of a glass collecting bowl of known area, which feeds the rainwater into a bottle of some 10 litres capacity. Very approximately a full bottle of 10 litre would represent some 5 inches of rainfall. Each apparatus is left for one month, and on or about the first of each month the rainfall is collected and a fresh 10-litre bottle placed in position. In all cases the bottle is contained in a lagged box to protect it during frost conditions. At periods of heavy rain it may be necessary to inspect each site at mid-month, or as dictated by weather conditions. Upon receipt at the laboratory, the collected rainfall is measured and examined for soluble, insoluble and tarry matters with estimations of calcium, chloride, sulphate and pH value. The Local Authority is a co-operating body of the D.S.I.R. in pollution surveys, and all results are submitted for correlation and assessment to the Director of the Warren Spring Laboratory at Stevenage, Herts.

ATMOSPHERIC POLLUTION (CONTINUED).

During the past year a deposit of 75 tons was measured and this is the lowest deposit gauge figure from all the samples dealt with by the Laboratory in Bristol. Even so, this is a worsening from the 54.5 tons in 1959. In 1960, the rainfall was 36 inches compared with 25.9 inches for the 11 months in 1959.

SECTION 47, NATIONAL ASSISTANCE ACT, 1948.

Some visits were made in this connection but it was not necessary during the year to invoke the provisions of the Act.

The property work including the taking of levels of houses to ascertain the comparative value for Rating Purposes was completed. The value was estimated under one method, but to the large number of houses to be assessed. It was also noted that health, housing and Rating matters should be considered in so far as the Rating House, subject to the agreement of the Rating Urban District Council.

The rate of Private Dwellings - Rating - was generally increased and gave rise to difficulties in supervision by the Department. Twenty-five houses were completed during the year and were under construction at the end of December, 1960.

One again the number of improvement grants increased. This is very satisfactory, as every house improved is a house saved for occupation by a family and might otherwise be applicants for houses erected by the Council.

As anticipated in my last report, the number of Standard Grants increased. This type of grant enables us to consider houses that were previously excluded from the higher standards of the Discretionary Grants, but in practice the Standard Grant involves in itself a disproportionately large amount of administrative work.

Applications in respect of Discretionary Grants for improvement properties were received and grants totaling £18,147 were approved. The number of applications in respect of Standard Grants totaled forty-nine. The total amount paid during the year, after completion of the work, was £3,775 17s. 3d.

No application for certificates of disrepair was received during 1960.

Six Internal Notices were served but all were complied with by the end of the year.

Mr. W. F. C. Merrett, Senior Public Health Inspector, reports as follows:

SEWAGE DISPOSAL.

Each year the problem of sewage disposal becomes more serious and more urgent, due mainly to the improvement of the older type cottages and the increase in number of new dwellings, resulting in a much greater volume of sewerage to be dealt with.

During the year a number of improvements were carried out in many of the villages, this included, the piping in of previously open sewers, improvements to existing sewage plants and increased maintenance on the plants previously installed. This work was all carried out by direct labour as it was found extremely difficult to persuade contractors to tender for this type of work.

A new van was purchased during the year and the manual establishment was increased by one labourer, but to obtain and retain men for this type of work is extremely difficult.

The preparatory work including the taking of levels to commence the comprehensive scheme for Dilton Marsh were completed. This village was considered number one priority, due to the large number of discharges to sewer ditches. It was also agreed that North Bradley and Southwick sewers should be connected in to the Trowbridge sewers, subject to the agreement of the Trowbridge Urban District Council.

HOUSING.

(a) Future Housing Programme.

During the year four old people's bungalows were completed at Southwick, and two at North Bradley. This type of Council Housing is greatly needed and may in some cases free existing Council Houses for occupation by younger couples with children.

(b) Private Enterprise Housing.

The rate of Private Enterprise building greatly increased and gave rise to difficulties in supervision by my Department.

Twenty-five houses were completed during the year and twelve were under construction at the end of December, 1960.

(c) Improvement Grants.

Once again the number of improvement grants increased. This is very satisfactory, as every house improved is a house saved for occupation by a family who might otherwise be applicants for houses erected by this Council.

As I anticipated in my last report, the number of Standard Grants increased, this type of grant enables us to consider houses that were previously excluded by the higher standards of the Discretionary Grants, but in practice the Standard Grant involves my staff in a disproportionately large amount of administrative work.

Applications in respect of Discretionary Grants for fifty-nine properties were received and grants totalling £18,247 were approved. The number of applications in respect of Standard Grants totalled forty-nine. The total amount paid during the year, after completion of the work, was £3,373 17s. 3d.

(d) Housing Repairs and Rents Act.

No application for certificates of disrepair were received during 1960.

(e) Housing Act, 1936, and Public Health Act, 1936.

Six Informal Notices were served and all were complied with by the end of the year.

TENTS, VANS AND SHEDS.

During the year the Caravan Sites and Control of Development Act, 1960, came into operation. The Council decided that any site containing more than three vans would have to comply with the proposed Model Conditions. Slightly less stringent conditions were agreed in respect of the smaller sites and individual caravans.

One small camping rally took place in the district during the year; a pure water supply was provided by the West Wilts Water Board. A very large camping and caravan rally was also held at Rood Ashton Park. All sanitary services were provided by my Department, and the cost recovered from the organizers.

REFUSE COLLECTION AND DISPOSAL.

The refuse collection service of a fortnightly collection was continued with difficulty, only by working regular overtime was it possible to maintain the service and exercise a reasonable standard of controlled tipping. The Council agreed to purchase a vehicle for use on the tips.

I am pleased to report that at last we have managed to secure a new site for controlled tipping, at Bremeridge Farn, Penleigh, Dilton Marsh. The Council offered to share this facility with Westbury Urban District Council subject to satisfactory financial arrangements, but the problem of a site for controlled tipping in the southern area of the district is still with us.

The existing vehicle is rapidly deteriorating and a replacement is inevitable. I feel that with constant growth in the number of houses, a further vehicle will be required.

An income of £49 11s. 3d. was obtained from the sale of waste paper. I am sure that this could be increased if storage facilities were available at both tips. Every extra piece of paper salvaged reduces the fire risk in the tips.

FACTORIES ACTS.

One informal notice was served and complied with during the year.

As from the 1st December, 1960, the "Means of Escape" provision of the Factories Act, 1937, was transferred to the Fire Brigade. This had not involved much work by my Department. I will naturally inform the Fire Brigade of any plans submitted under Building Byelaws involving this matter.

ATMOSPHERIC POLLUTION.

The gauge was retained in the same position as described in my last report, and the results obtained are reported upon monthly.

WATER SUPPLY.

On the 1st April, the water undertaking of this Council was transferred to the West Wilts Water Board. This involved the transfer of all the Council's staff who were wholly or mainly engaged on water. I would like to take this opportunity of thanking both the inside and outside staff for their unstinted co-operation and help to me as Water Engineer to this Authority.

I am sure that this "regionalisation" of water supply and distribution is bound to ensure a better service to everybody, but every help and assistance must be offered to the Engineer and his staff of the new Board in their tremendous task.

RODENT CONTROL.

No. of dwellinghouse and business premises re-inspections	95
No. of Agricultural inspections and re-inspections	265
No. of dwellinghouses and business premises found infested	579
No. of Agricultural properties found infested	220
No. of dwellinghouses and business premises treated by Local Authority	450
No. of Agricultural properties treated by Local Authority	32
Total of Treatments carried out including re-treatments	295
No. of Block Control Schemes	32

CONTROL OF VERMIN AND VERMINOUS PREMISES.

During the year nine properties were treated to destroy "cluster flies", twelve wasps' nests were made harmless and three premises infested with fleas were treated.

The Rodent Operator also regularly treated the three refuse tips for the destruction of rats and mice, and regular spraying was carried out to control any fly nuisance.

RURAL HOUSING STATISTICS FOR YEAR ENDING 31ST DECEMBER, 1960.

1.	Number of permanent dwellings in district at end of year approx.	4,330
2.	Number of permanent dwellings in district owned by Local Authority ..	561
3.	Inspection of dwellings during year:	
(i)	Inspected for housing defects under Public Health Acts	43
(ii)	Inspected for housing defects under Housing Acts	78
(iii)	Number of dwellings so dangerous or injurious to health as to be unfit for habitation	7
(iv)	Number of dwellings found not to be in all respects reasonably fit for habitation	Nil
4.	Number of dwellings rendered fit in consequence of informal action	109
5.	Action under Statutory Powers:	
A.	Proceedings under sections 9, 10, 12 Housing Act, 1957	Nil
B.	Proceedings under Public Health Acts	Nil
C.	Proceedings under Section 16, Housing Act, 1957:	
(i)	Number of Demolition Orders made	10
(ii)	Number of houses demolished as result of Demolition Orders	Nil
(iii)	Number of undertakings accepted	2
(iv)	Number of undertakings completed	Nil

MISCELLANEOUS GOODS CONFISCATED DURING 1960.

No lbs. of cooked meats were voluntarily surrendered during the year. (For meat, see table on page 16).

MEAT INSPECTION.

Both the licensed slaughterhouses continued to operate throughout the year, and were well conducted. The one at Heytesbury, Messrs. Sharpes, will have to carry out extensive improvements to comply with the new Regulations. The volume of "throughput" at both of these slaughterhouses is not high, but almost all slaughtering is carried on outside normal office hours. To ensure that 100% meat inspection is carried out, it was necessary for my Additional Public Health Inspector to do 180 hours outside normal hours. I would again stress the necessity of another qualified Public Health Inspector.

FOOD PREMISES.

As far as it has been possible to do so, all the food premises in the district were inspected. The general standard is high, when this was not the case, immediate on-the-spot advice and instructions achieved a rapid improvement. Special attention was devoted to the production of watercress; this produced satisfactory results.

In the latter part of the year, a new Poultry Packing Station opened, and this involved extra work for my Department.

PETROLEUM REGULATIONS.

Eighty-three Petroleum Storage installations were visited, inspected and reports completed showing requirements needed to comply with new conditions. Five of these were found to be unlicensed. A total of fourteen visits were made, many in the company of an officer of the County Fire Brigade, to whom I express my thanks.

LAY-BYS AND VERGES.

The Council have undertaken to assist the County Council by emptying the litter baskets and bins on various lay-bys, etc. throughout the districts. This policy has resulted in a noticeable improvement, but has involved this Council in a considerable amount of expense and labour.

LAY-BYS AND VERGES (Continued).

I am not suggesting that our problem approaches that of the coastal districts, but it increases year by year. I refer, of course, to the use of the above mentioned sites by "one-night" campers, who sleep in their cars on their way to and from the coast, using the lay-bys as rubbish dumps and public lavatories, with a total disregard of any normal standards of decent behaviour.

149	Number of vehicles reported in contravention of interval orders	(xlviii)
150	Number of vehicles reported in contravention of interval orders	(xlvix)

Number of vehicles reported in contravention of interval orders during the year.

Both the licensed nightclubs continued to operate throughout the year, and were well controlled. The one at Hysteria, Hysteria, Hysteria, will have to carry out extensive improvements to comply with the new regulations. The volume of "through" at both of these nightclubs is not high, but almost all nightclubs in the area are closed on certain nights. To ensure that the 1000 cars are carried out, it was necessary for the additional Public Health Inspector to be 150 hours outside normal hours. I would again stress the necessity of another qualified Public Health Inspector.

It has been possible to do so, all the food premises in the district were inspected. The general standard is high, when this was not the case, special on-the-spot advice and instructions achieved a rapid improvement. Special attention was devoted to the production of water, this produced satisfactory results.

In the latter part of the year, a new Twenty Tacking Station opened, and this involved extra work for the department.

Eighty-three Tackling Station installations were visited, inspected and reports completed showing requirements needed to comply with new conditions. Five of these were found to be unlicensed. A total of fourteen visits were made, any in the company of an officer of the County Fire Brigade, to whom I express my thanks.

The Council have undertaken to assist the County Council by carrying the litter packs and bins on various days, etc. throughout the district. This policy has resulted in a noticeable improvement, but has involved this Council in a considerable amount of expense.

INSPECTIONS OF THE DISTRICT.

The following is a summary of inspections and visits made during 1960:-

P.H. Act Inspections	43
do. Revisits	34
Housing Act Inspections	
do. Visits	114
Infectious Disease	10
