WASHINGTON URBAN DISTRICT

Members of Council and Health Committee, 1964

CHAIRMAN OF COUNCIL:

Councillor J. GIBSON (Deceased). Councillor M. BLAND (from July).

CHAIRMAN OF HEALTH COMMITTEE:

Councillor G. F. HASKETT.

GREAT USWORTH WARD

Councillor R. Coates, 14, Garsdale Avenue.

Councillor C. McIlroy, c.c., 34, The Drive.

Councillor J. H. FAWCETT, "Sarronshield," Peareth Hall Road (from June).

Councillor J. WHITEMAN, 29, Oxford Avenue (from June).

SPRINGWELL WARD

Alderman J. R. Coxon, J.P., 5, Westfield Crescent. Councillor E. J. H. Grant, 2, Heugh Hill.

USWORTH COLLIERY WARD

Councillor S. ARMSTRONG, 31, Richardson Terrace.

Councillor F. C. PARKIN, 5, East View.

Councillor W. TROTTER, B.E.M., J.P., 25, Richardson Terrace.

Councillor J. Walker, 50, Douglas Terrace.

Councillor P. WALMSLEY, 20, Penshaw View.

Councillor Mrs. M. WHITFIELD, 17, Penshaw View.

WASHINGTON WARD

Councillor A. Boyd, 1, Coverdale Avenue.

Councillor L. Davison, 31, Station Terrace.

Councillor T. M. FINNIGAN, 42, Urban Gardens.

Councillor G. F. HASKETT, 40, Havannah Terrace.

WASHINGTON STATION WARD

Councillor M. ALLON, C.C., J.P., 101, Glebe Crescent.

Councillor M. BAMLING, 1, Heworth Grove.

Councillor M. Bland, 21, Gainsborough Avenue.

Councillor R. McGlen, 8, Queensway.

Councillor Mrs. E. WRIGHT, 1, Gainsborough Avenue.

Area in acres	5,758 acres
Registrar General's Estimate of Resident Population, mid-1964	19,610

CHAIRMAN OF HEALTH COMMITTEE:

Councillor G. F. HASKETT.

Officials:

MEDICAL OFFICER OF HEALTH:

P. A. Y. NARAYANAN, M.B., B.S., D.T.M. AND H., D.P.H.

CHIEF PUBLIC HEALTH INSPECTOR: J. MITCHELL, M.A.P.H.I.

ADDITIONAL PUBLIC HEALTH INSPECTOR:
E. Soady, M.A.P.H.I.

HEALTH DEPARTMENT,

COUNCIL CHAMBERS,

WASHINGTON.

To the Chairman and Members of the Washington Urban District Council.

Mr. Chairman and Members,

I herewith present my report along with that of your Chief Public Health Inspector for the year 1964.

The health and welfare of the population of the Urban District has continued to be satisfactory. There have been no epidemics of infectious diseases. As usual, all efforts were made to improve the protection of the public by immunisations and vaccinations and a new scheme was instituted for school entrants.

I take this opportunity to thank the local General Practitioners, the Hospital Consultants, and the Public Health Laboratory for their continued co-operation.

I express my thanks to the Chairman and members of the Council and members of the staff for their continued support.

P. A. Y. NARAYANAN,

Medical Officer of Health.

Council Chambers, December, 1965.

Health Services

Administered by the County Council and the Ministry of Agriculture, Fisheries and Food.

The following Health Services are administered by Durham County Council as the responsible Local Health Authority under the National Health Service Act:—

Ambulance.

Home Nursing.

Home Helps.

Preventive measures against Smallpox, Poliomyelitis, Diphtheria, and Tuberculosis.

Child Welfare and Maternity.

School Medical.

Welfare of the Aged.

Welfare of the Blind and Handicapped.

Health Visitors.

The County Council are also responsible for the administration of Part III of the National Assistance Act, 1948.

FOOD AND DRUG INSPECTORS are appointed by, and work under the direction of, the County Council.

VETERINARY INSPECTORS appointed by, and working under the direction of, the Ministry of Agriculture being responsible for conducting routine examinations of the cow population throughout the County in order to maintain and raise the standard of health of said cows.

Vital Statistics

Births and Birth Rate

The net number of live births (as corrected by the Registrar General for outward and inward transfers) during 1964 was 398, compared with 390 for 1963.

Sex and Legitimacy are shown thus:-

LIVE BIRTHS-

	Total	Male	Female	
Legitimate Otherwise		209		Giving a Birth Rate of 20.3 per 1,000 of the estimated population.

To exactly compare the Birth Rate in Washington Urban District with that for England and Wales, as a whole, it must be multiplied by a comparability factor of 0.95, giving a rate of 19.28 as compared with 18.4 for England and Wales.

The following table shows (i) the total number of births, (ii) the number of males born, (iii) the number of females born, (iv) the Birth Rate per 1,000 population, and (v) the total increase of population (i.e., the excess of births over deaths) for 1964, as compared with the years 1955–63:—

7	l'ear		Total Births	Males	Females	Rate per 1,000	Total
1955			327	173	154	18-37	123
1956		****	336	167	169	18.8	163
1957			342	179	163	19.04	161
1958			334	181	153	18.57	164
1959			370	211	159	21.01	185
1960			368	181	187	20.25	146
1961	****		368	187	181	19.49	170
1962			366	175	191	19.04	192
1963			390	194	196	20.00	209
1964			398	212	186	20.3	217

Still Births

During 1964 there were 10 still births in the district.

STILL BIRTHS-

	Total	Male	Female
Legitimate	10	7	Giving a Still Birth Rate of 24.5 per 1,000 total (live
Otherwise	1011 01	MINOW S	and still births).

The Still Birth Rate for 1964 for England and Wales is 16.3.

Deaths and Death Rate

The Registrar General reports that after correction for outward and inward transfers, 181 residents of the Washington area died during 1964, being 84 males and 97 females.

Locally-compiled figures show that there were 96 deaths registered as having occurred within the district, being 44 males and 52 females.

Eighty-five persons, being 40 males and 45 females, normally resident in the district, died outside the area. There were, therefore, 85 inward transfers.

Of the 85 residents who died outside the area, 79 died in hospital, 3 in private homes, 2 at mines, and 1 in the River Tyne.

The Death Rate for 1964, corrected for outward and inward transfers and including deaths from all causes and at all ages, was 9.23 for Washington Urban District, compared with 9.28 in 1963.

In order to compare the local figure with that for England and Wales, the former must be multiplied by a comparability factor of 1.36, giving a Death Rate for Washington of 12.55, whilst that for England and Wales is 11.3.

Total Deaths under Five Years (corrected locally)

During 1964, 8 children died before attaining the age of five years, as compared with 11 in 1963; 7 children, being 1 male and 6 females, were under one year of age.

Therefore, 4.4 per cent. of the total deaths were of children under five years of age, as compared with 6.07 per cent. in 1963.

Maternal Mortality

There were no deaths among women from puerperal sepsis, pregnancy, or abortion.

Comparisons between England and Wales and Washington

The maternal mortality per 1,000 total live and still births, based on deaths which are primarily classed as due to diseases of pregnancy, childbirth, and the puerperal state, is shown in the following table:—

hour wander &		ND AND ALES	Washington Urban District		
Const.	Nos.	Rate	Nos.	Rate	
Maternal Causes, excluding Abortion	176	0.20	0	0.000	
Due to Abortion	50	0.06	0	0.000	
Total Maternal Mortality	226	0.25	0	0.000	

Death Rate of Infants under One Year

During 1964 there were 7 children, being 1 legitimate male and 6 legitimate females, who died in the area before attaining the age of one year. This is equivalent to an infantile mortality rate of 17.6 per 1,000 live births, compared with 20.0 for England and Wales.

In 1963 there were 6 children who died under one year of age, yielding an infantile mortality rate of 15.38 (per 1,000 total births).

The following table shows the death rates for infants under one year of age, according to the total number of live births and legitimacy for the years 1955–64:—

Year		All Infants per 1,000 Live Births	Legitimate Infants per 1,000 Legitimate Live Births	Other Infants per 1,000 Other Live Births	
1955			36-69	35.5	0.00
1956			23.8	23.3	0.00
1957			26.31	25.56	0.00
1958			29.94	30.67	0.00
1959			27.02	27.47	0.00
1960			50.13	51.62	0.00
1961			21.73	22.10	0.00
1962			21.85	22.72	0.00
1963			15.38	15-62	0.00
1964		****	17.6	18-13	0.00

The following table shows in detail the number and causes of deaths in infants during the first year of life, and also the deaths at the various ages.

Infant Mortality during the year ended 31st December, 1964

Cause of Death		Aş	ges of Chil	dren		Total
Prematurity		1	day; 1	hour	 	2
Spontaneous Pneumothorax		1	day		 	1
Meningomyclocoele		1	week		 	1
Acute Bronchopneumonia		3	months		 	1
Large Bowel Obstruction		1	week		 	1
Pulmonary Hyaline Membra	ne					
Disease		1	day	J	 	1
						7

Since the total deaths in the district at all ages was 181, then 3.8 per cent. of the total were children under one year of age. Of these infants 42.8 per cent. were one week old or older.

Death Rate of Infants Under One Week

During 1964 there were 4 infants died before attaining the age of one week. This is equivalent to an early neo-natal Mortality Rate of 10.05 per 1,000 total live births.

There were 10 still births during 1964 in the district, which is equivalent to a perinatal Mortality Rate of 24.5 per 1,000 total live and still births.

Causes of Death

TUBERCULOSIS

There were 3 deaths from pulmonary tuberculosis during 1964.

Comparative Table

Year	No. of Deaths from Pulmonary Tuberculosis in Washington U.D.	Death Rate per 1,000 Population from Pulmonary Tuberculosis England and Wales	Death Rate per 1,000 Population from Pulmonary Tuberculosis in Washington U.D.	No. of Deaths from Non-Pulmonary Tuberculosis in Washington U.D. B.C.G. VACCINATION

The following table shows the number of B.C.G. Vaccinations carried out at the various schools throughout the district.

This is a form of preventative medicine which is most essential in Urban Districts, and it means that at least 80 per cent. of these children vaccinated are now, for a number of years, protected against tuberculosis.

School	No. Consenting	No. Skin-Tested	% Skin-Tested	No. Positive Readings	No. Negative Readings Vaccinated	% Positive Readings	% Negative Readings	No. Absent at Time of Reading
Alderman Smith Grammar	136	123	90	14	103	12	84	6
Glebe Secondary Modern	58	56	96	2	48	3	85	6
St. Joseph's R.C	79	71	90	4	63	5	89	4
Usworth Colliery Modern	91	85	94	1	81	1	95	3
High Usworth Secondary Modern	63	59	93	5	46	8	78	8

HEART DISEASE AND DISEASE OF THE CIRCULATORY SYSTEM

This includes:-

Consessary Dissess Angine	Males		Females
Coronary Disease—Angina	22		19
Hypertension with Heart Disease	_		6
Other Heart Disease	5		2
Other Circulatory Disease	5	***	5
Tots'	32		32
	-		00000

Therefore in 1964 there were 64 deaths due to the above-named causes—that is, 35·35 of the total deaths, or a death rate of 3·26 per 1,000 population. The percentage of total deaths in 1963 was 40·33 and the death rate 3·74.

COMPARATIVE TABLE

Year	V		Deaths due to	DEATH PER 1,000 P	100 TO B 100 May	Percentage Total Deaths	
1 ear	thi to	Deaths All Causes	Heart Disease	All Causes Heart Disease		due to Heart Disease

1964		181	64	9.23	3.26	35.35	

CANCER

This includes all malignant growths and diseases.

During 1964 there were 36 deaths certified as being due to malignant growths, being 18 males and 18 females. Of these, 9 were due to cancer of lungs and bronchi and 3 to cancer of stomach, 3 breast, 2 uterus, and 19 to other malignant growths.

	England and Wales	Washington Urban District
Death Rate (per 1,000 population)	0.525	0.450
cancer of lungs and bronchi Death Rate (per 1,000 population)	0.535	 0.458
other cancer	1.674	 1.325

The following table shows the number of deaths in the area due to cancer, and the mortality rate from this disease in 1964 compared with the preceding 10 years:—

Year		1	Mortality Rate			
5		Male	Female	TOTAL	per 1,000 Population	
1954		18	19	37	2.08	
1955	****	24	21	45	2.528

1959		21	14	35	1.93	
1960		23	21	44	2.42	
1961	9	26	15	41	2.17	
1962		11	16	27	1.404	
1963	****	15	17	32	1.666	
1964		18	18	36	1.835	

Mass Radiography

A survey carried out by the Unit at two locations in Washington during 27th July to 7th August, 1964, revealed the following:—

	Males	I	emales
Number X-Rayed	 592		477
Number referred to Chest Clinic	 17		8
Number of Abnormalities revealed	 36		21
Number Pneumoconiosis	 6		1

Diphtheria Immunisations

The number of children in the Urban District who are recorded as having the complete course and those who have received the subsequent reinforcing, or booster, dose are given as follows:—

		Fu	ll Cour	se	Boosters
0 to 5 years of age	 		949		56
6 to 15 years of age	 		2,067		684
Total	 edin's	PEL	3,016		740

Medical Examinations

During the year, 28 medical examinations were carried out under the Sickness Pay Scheme and for superannuation purposes.

Sanitary Circumstances of the Area

Water Supply

The water undertaking for the Urban Area has now been entirely taken over by the Sunderland and South Shields Water Co. from the Council. Water continues to be supplied as previously, that is, part from the company's own reservoirs and part from the Newcastle upon Tyne and Gateshead Water Co., from whom a bulk supply is received at the western boundary of the Urban District.

The supply of water is satisfactory as regards both quantity and quality.

The only treatment installed in the supply system within the Urban District consists of a small Calgon dosing plant to reduce hardness. The taking of samples for bacteriological and chemical analysis is carried out by the company.

The waters do not appear to have a plumbo solvent action.

Samples of main supply water taken during the year gave satisfactory results, there being no evidence of contamination.

All the dwelling-houses within the Urban District are supplied from public water mains by the method herewith tabulated:—

- (1) Direct to houses 6,334
- (2) By means of tap in yard or wash-house 8

6,342

Sewerage and Sewage Disposal

The sewage of the district is discharged into the River Wear at three points: one near Barmston Forge and two at Washington Staithes. The waste matter at Barmston only is treated in settlement tanks before being allowed to flow into the river. The settlement tanks were cleansed during February, 1965. Construction of new sewage disposal works commenced in December, 1964.

Rivers and Streams

Favourable reports as to the condition of the various watercourses in the district were received during the past year.

Closet Accommodation

At the end of the year the various types in use within the Urban District were as follows:—

	1960	1961	1962	1963	1964
Water Closets	6,767	6,965	7,068	7,196	7,322
Ash Closets	Nil	Nil	Nil	Nil	Nil
Elsan Closets	7	7	6	6	6

Refuse Collection and Disposal

The collection and disposal of household and trade refuse within the Urban District was carried out by direct labour in entirety.

The personnel included three foremen drivers and 12 loaders. Temporary labour was drawn from the Highways department when required.

A service varying from five to eight days was maintained during the year to the community. Three vehicles, each with driver and four loaders, maintain the service of specified parts of the district, and efforts at collections on certain days at defined places in each district has been fairly successful. The vehicles used are as follows:—

Dennis, 18 cubic yards, rear loading and diesel driven (1957)

Dennis, 10 cubic yards, side loading and diesel driven (1953)

Dennis, 18 cubic yards, rear loading and diesel driven (1962)

The number of dwelling houses, shops and other premises dealt with totalled 6,592.

Test weights of loaded vehicles were taken during the year and, together with information returned in the daily time sheets by the foremen, it was calculated that approximately 6,359 tons were collected for disposal, involving 2,683 loads and 344,152 calls. The tonnage collected was equal to 2.95 stones in weight per call and 19.29 cwt. per house, etc., per year.

Disposal of all refuse collected during the year was at Jubilee tipping site.

The tip was treated on four occasions for rat infestations.

While it is noted the actual weight of refuse collected by the cleansing personnel remains constant, the amount of refuse from builders, gardeners, and tradespeople deposited, often haphazardly on the site, continues to increase, causing additional expense and loss of tipping space. It is calculated that the maximum life of Jubilee tip is two years.

Expenditure

The cost of collection and disposal of refuse during the year under review was £13,377 16s. 10d.

Trade refuse increased in quantity during the period and £197 19s. 8d. was received for its disposal. The actual cost on the service was, therefore, £13,179 17s. 2d.

Shops Act

During the year 23 visits and inspections of shops were made.

Smoke Abatement

During the year 2 complaints were recorded in the department.

Washington Urban District being chiefly a mining area, the Council are keenly watching the developments in other areas under the Clean Air Act, 1956, and studying the possibilities of the future. All new properties are subject to a limited number of open fires and, where installed, must be fitted with approved appliances.

Swimming Baths

There are no swimming baths in the Urban area.

Rat Infestation

During the year maintenance treatments for rats within the area were carried out as recommended by the Ministry of Agriculture and Fisheries Infestation Control Division. A summary of the work entailed on surface infestations is given in the following table.

			TYPE	OF PROP	ERTY	
	(I) Number of gree		Non-Agr	ICULTURAL		
	believe the year	(1) Local Authority	(2) Dwelling Houses (including Council Houses)	(3) All other (including Business Premises)	(4) Total of Cols. (1) (2) (3)	(5) Agri- cultural

Housing

1.	Inspe	ction of Dwelling-houses during the year	
	(1) (a)	Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts)	787
	(b)	Number of inspections made for the purpose	2,078
	(2) (a)	Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Acts	469
	(b)	Number of inspections made for the purpose	1,354
	(3)	Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	67
	(4)	Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation	403
2.		dy of Defects during the year without ce of Formal Notices	
		Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their officers	60
3.	Action	under Statutory Powers during the year	
		OCEEDINGS UNDER SECTIONS 9, 10 AND 12 OF THE DUSING ACT, 1957:—	
	(1)	Number of dwelling-houses in respect of which notices were served requiring repairs	14
	(2)	Number of dwelling-houses which were rendered fit after service of formal notices:	
		(a) By owners	16
		(b) By Local Authority in default of owners	Nil

(B) PROCEEDINGS UNDER PUBLIC HEALTH ACTS:—	
(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied	Vil
(2) Number of dwelling-houses in which defects were remedied after service of formal notices:	
(a) By owners N	Vil
(b) By Local Authority in default of owners N	Vil
(C) Proceedings under Sections 16 and 17 (1) of the Housing Act, 1957:—	
(1) Number of dwelling-houses in respect of which Demolition Orders were made	67
(2) Number of dwelling-houses demolished in pursuance of Demolition Orders	67
(D) Proceedings under Section 18 of the Housing Act, 1957:—	
(1) Number of separate tenements or underground rooms in respect of which Closing Orders were made	5
(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been	
rendered fit 1	Nil
During the period under review 173 houses were erected as ccupied within the Urban District, viz.:—	nd
Permanent houses by Local Authority	22
Houses built by Private Enterprise 1	51

4. Overcrowding

In the Urban District overcrowding is much in evidence, more particularly with regard to houses overcrowded by reason of more than one family being in occupation.

The following is a Summary of the Permanent Dwelling-houses, including number of Apartments erected by the Local Authority up to 31st December, 1964.

Ward			Sizi	Size of House or Type					
			2BR	3BR	A.P.	S.P.	Total		
Washington			119	293	49	29	490		
Washington Station Springwell			42 26	239 128	40 16	12	333 170		
Usworth Colliery Great Usworth	****		287 337	156 981	94	48	443 1,460		
TOTAL	****		811	1,797	199	89	2,896		

The total number of dwelling-houses under the control of the Urban District Council is tabulated herewith:—

Permanent	 	 	 2,896
Temporary	 	 	 97
Others	 	 	 36
			3 020
			3,029

5. Improvement Grants: Housing Acts, 1958-59

		Discretionary	Standard
Applications submitted during 1964		30	3
Applications rejected during 1964		6	-
Applications cancelled by applicants		emb To	-
Total number of applications app since inception of scheme	roved 	344	22
Total number of applications re since inception of scheme	jected 	23	2
Total number of grants paid since ince of scheme	eption 	326	22

6. Rent Act, 1957

Number of Certificates of Disrepair applied	for dur	ing
1964		Nil
Undertakings given by landlord (Form K)		Nil
Number of Certificates issued (Form L)		Nil
Number of Certificates cancelled		Nil

Inspection and Supervision of Food

(a) Milk Supply

During the year regular samples of milk were taken and submitted to the Public Health Laboratory, Havelock Hospital, Sunderland, for examination. All samples taken satisfied the Methylene Blue and Phosphatase tests.

There are no pasteurisation plants within the area, the bulk of milk being supplied to retailers by the Craven Dairies Limited and North-West Durham Co-operative Dairies Limited.

(b) Inspection of Meat and Other Foods

No licences were issued during the year with regard to premises for the slaughtering of animals for human consumption.

Unsound foodstuffs, involving the issue of 247 certificates, were surrendered as unfit for human consumption during the year, and consisted of the following:—

Ox Liv	er			 	 10	lb.
" Kid	lneys			 	 20	>>
Tinned	Chick	en		 	 3	,,
,,	Meat			 	 508	,,
,,	Veget	ables		 	 154	,,
,,	Fruit			 	 248	,,
,,	Fish			 	 14	,,
,,	Soup			 	 38	,,
>>	Milk	Puddi	ng	 	 42	,,
,,	Milk			 	 38	tins
Other 1	Foods			 	 11	lb.

(c) Ice Cream

Number	of	Producers Registered	 	2
Number	of	Retailers Registered	 	52

Apart from the ice cream sold by the two registered producers, most of the ice cream is of the pre-packed type, which is delivered to the small retail shops where it is stored in refrigerators. Control of motor vans retailing in the district is satisfactorily maintained.

FACTORIES ACT, 1961 Part 1 of the Act

Occupation

The occupations of those who were notified during 1964 as suffering from tuberculosis were as follows:—

Pulmonary: 1 miner, 5 housewives, 1 postman, 2 labourers, 1 driver, 1 retired, 2 infants.

Non-Pulmonary: 1 miner, 1 labourer, 1 infant.

Sites of Lesions in Non-Pulmonary Cases

2 Genito urinary, 1 meninges.

Examination of Sputa

Specimens of sputa sent by the family doctor or other medical practitioner are examined free at the Public Health Laboratory, Newcastle upon Tyne.
