County Council of West Sussex.

ANNUAL REPORT

OF THE

County Medical Officer of Health

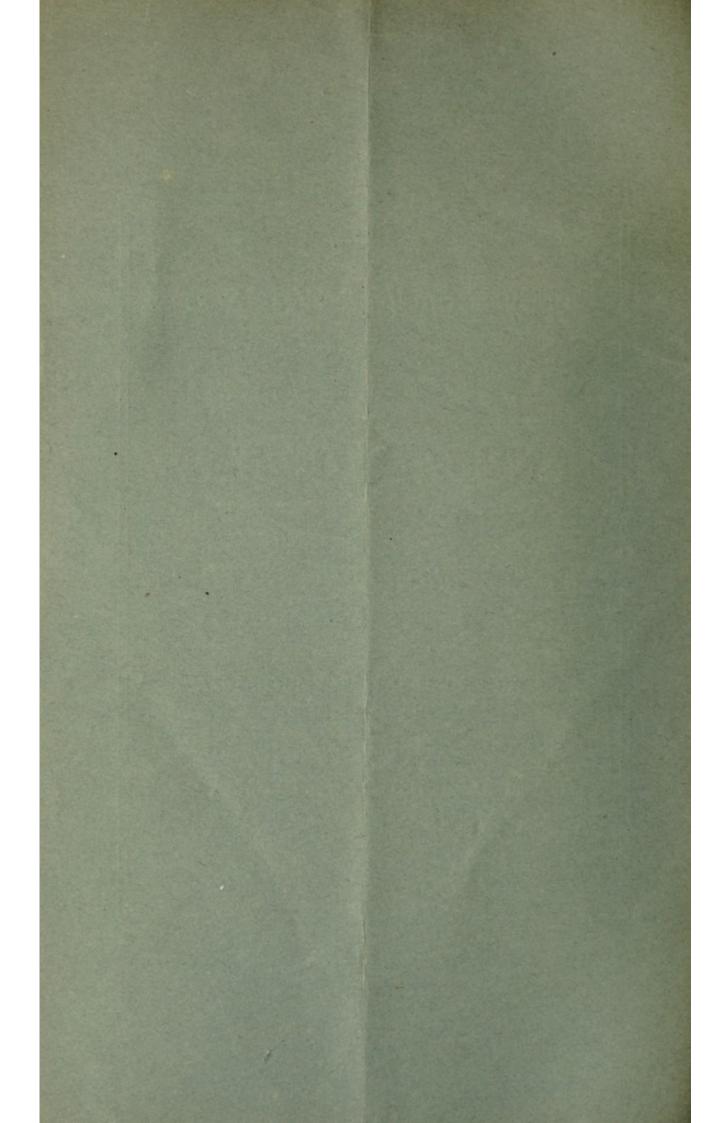

FOR THE

YEAR ENDED 31st DECEMBER, 1927,

BY

RALPH D. SMEDLEY, M.A., M.D., D.P.H.

County Medical Officer and School Medical Officer.

WEST SUSSEX COUNTY COUNCIL.

THE PUBLIC HEALTH AND HOUSING COMMITTEE (1927-28).

Chairman—The Rev. E. D. L. Harvey, O.B.E., Mr. W. A. Aylwin, *Mr. A. M. Barford, M.D. D.P.H., *Miss E. A. Barnett, Mr. L. A. Elliott, *Mr. W. S. Graves, *The Rev. J. Hall-Yarr, Col. C. G. H. A. Hankey, *Mr. G. W. F. Hare, *Lt.-Col. R. M. Helme, Major H. Jellicorse, O.B.E. Mr. A. Linfield, *Mrs. H. Lintott, *Dr. S. P. Matthews, *Miss A. E. Payne, Mr. H. W. Rydon, Mr. W. Sams, Mr. H. L. Staffurth, *Dr. M. H. H. Vernon, Mr. J. F. Whyte, Mr. L. E. H. Yates. * Also Members of the Midwives, Maternity and Child Welfare Committee (see below).

Ex-Officio—The Chairman of the County Council, The Lord Leconfield; the Vice-Chairman of the County Council, The Rev. E. D. L. Harvey, O.B.E.

THE MIDWIVES, MATERNITY AND CHILD WELFARE COMMITTEE (1927-28).

Chairman—The Rev. E. D. L. Harvey, O.B.E., Mr. A. M. Barford, M.D., D.P.H., Miss Barnett, Mr. W. S. Graves, The Rev. J. Hall-Yarr, Mr. G. W. F. Hare, Lt.-Col. R. M. Helme, Mrs. H. Lintott, Dr. S. P. Matthews, Miss A. E. Payne, Dr. M. H. H. Vernon.

Co-opted Members—Mrs. G. C. Barker, Mrs. E. D. L. Harvey, O.B.E., Miss Kennard, Mrs. M. L. Newcombe, The Countess of March, C.B.E.

STAFF-COUNTY HEALTH DEPARTMENT.

County Medical Officer and School Medical Officer—Ralph D. Smedley, M.A., M.D., D.P.H., M.R.C.S., L.R.C.P.; Tuberculosis Officer, Deputy County Medical Officer and Deputy School Medical Officer—William Templeton, M.B., B.S., D.P.H.; Clerical Staff—Chief Assistant—E. Rann; Assistant Clerks—C. R. L. Boxer, V. H. Kirchen, A. S. C. Smith, C. Floyd; Part-Time Officers—Inspector of Midwives and Assistant Medical Officer for Maternity and Child Welfare—F. Erin Smedley, M.B., B.S.; Medical Officer (Worthing Venereal Diseases Clinic), F. H. Lawson, M.R.C.S., L.R.C.P.; Visiting Physician (Aldingbourne House), G. C. Garratt, O.B.E., B.A., M.D., M.B., B.Ch.

MEDICAL OFFICERS OF LOCAL SANITARY AUTHORITIES.

- Chichester City—A. M. Barford, M.D., F.R.F.S., D.P.H., The Willows, West Street, Chichester.
- Bognor Urban—T. P. Cole, M.B., B.S., D.P.H., Southleigh, Annandale Avenue, Bognor, (also Assistant School Medical Officer—see School Medical Officer's Annual Report), to 31st October, 1927. Dr. Eric Donaldson, St. Kilda, Shelley Road, Bognor, from 1st December, 1927.
- Worthing Borough-R. H. Wilshaw, M.D., M.R.C.P., D.P.H., Fairlawn, Chapel Road, Worthing.
- Shoreham Urban, East Preston Rural: Southern Combine (Comprising Arundel Borough, Littlehampton Urban, Southwick Urban, Steyning West Rural, Westbourne Rural, Westhampnett Rural)—W. J. Butcher, M.R.C.S., L.R.C.P., D.P.H., "Southover," Lansdowne Road, Worthing (also School Medical Inspector—see School Medical Officer's Annual Report). Northern Combine (comprising Horsham Urban, Midhurst Rural, Horsham Rural, Petworth Rural, Thakeham Rural)—S. Child, M.A., M.B., D.P.H., M.R.C.S., L.R.C.P., Caterways, Billingshurst (also School Medical Inspector—see School Medical Officer's Annual Report).
- Port Sanitary Authorities—Shoreham-by-Sea: W. J. Butcher, M.R.C.S., L.R.C.P., D.P.H., "Southover," Lansdowne Road, Worthing; Littlehampton: J. H. Porter, M.R.C.S., L.R.C.P., "Beachcroft," Littlehampton.

WEST SUSSEX COUNTY COUNCIL.

ANNUAL REPORT for the year 1927, by the COUNTY MEDICAL OFFICER.

The Area in acres, including inland water, is as follows:-

AREA.

URBAN DISTRICTS		***		13411
RURAL DISTRICTS				388505
ADMINISTRATIVE CO	UNTY		***	401916

POPULATION.

The population of the Administrative County for the year 1927 was estimated by the Registrar-General to be as follows:—

	For Birth Rate.	For Death Rate.
URBAN DISTRICTS	102780	102630
RURAL DISTRICTS	104770	104470
ADMINISTRATIVE COUNTY	207550	207100

In Table I. (page 3) is shewn the Estimated Population for each Sanitary District. These figures have been used for the calculation of the various Rates in this Report. There is reason to believe that the population is slightly greater than is estimated by the Registrar-General.

CENSUS POPULATIONS, 1901, 1911 and 1921.

	1901	1911	1921*
URBAN DISTRICTS	70223	83590	90044
RURAL DISTRICTS	81053	92718	94830
ADMINISTRATIVE COUNTY	151276	176308	184874

^{*} As amended by Registrar-General.

INHABITED HOUSES (CENSUS, 1921).

	Urban Districts.	Rural Districts.	Administrative County.
Number of Inhabited Houses	19022	22266	41288
Number of families or separate occupiers	21396	23036	44432
Rateable Value of County		£1,059,897	
Sum represented by penny rate	***	£4,416	

VITAL STATISTICS.

Table I. below, gives the chief vital statistics of each Sanitary District and the total Urban Districts, Rural Districts and Administrative County—

TABLE I.-VITAL STATISTICS, 1927.

INFECTIOUS DISEASES.

ZYMOTIC MORTALITY, 1927.

In Table VII. below is given the number of deaths from Zymotic diseases in each Sanitary District. The aggregate number of deaths in the administrative county was 30, and the death rate 0.14 per thousand of the population. The aggregate number of deaths in the Urban Districts was 15, and in the Rural Districts 15, the rates being 0.14 per thousand of the population.

In addition 12 cases of Chicken Pox were notified in the Shoreham-by-Sea Urban District.

During the previous five years an average of 1076 Infectious cases were notified in the County of which an average of 348 cases were removed to Isolation Hospitals.

ISOLATION HOSPITAL AND SMALL POX HOSPITAL ACCOMMODATION.

The Isolation Hospital and Small Pox Hospital accommodation is as set out in detail in my Annual Report for 1925; no accommodation exists in any of the Sanitary Districts in the Northern Combined Sanitary District, arrangements being made with neighbouring authorities to admit cases into their Isolation Hospitals at agreed charges for maintenance.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

HOSPITALS PROVIDED OR SUBSIDIZED BY THE COUNTY COUNCIL.

Tuberculosis-

Name of Institution.	Address.	Supported wholly by County Council.	Number of beds.
Aldingbourne House	Nr. Chichester	Yes	59

Westhampnett	Ditto.		Ditto.

MATERNITY AND CHILD WELFARE.

INFANT MORTALITY.

There were 149 deaths of Infants under one year, which is equivalent to an Infant Mortality Rate of 51 per 1,000 births, as compared with the rate of 45 for the previous year.

For the first time for eight years the rate has risen above 49, and this is due almost entirely to an increased infant mortality in the Rural Districts. The number of deaths in the year is too small to attach importance to small fluctuations but it is noteworthy that for the past three years the Rural Districts have compared unfavourably with the Urban Districts whereas formerly it was just the reverse.

TABLE X.—Showing Infant Mortality Rates for Urban Districts, Rural Districts, Administrative County and England and Wales for the years 1913-1927.

	1913	1914	1915	1916	1917	1918	1919	1920	1921	1922	1923	1924	1925	1926	1927

England and Wales	108	105	110	91	97	97	85	80	83	77	69	75	75	70	69

ILLEGITIMATE BIRTHS.

There were 142 illegitimate births (4.8 per cent. of the total births), and the infant mortality rate amongst illegitimate children was 77 per thousand births, as compared with a rate of 50 for legitimate children.

NOTIFICATION OF BIRTHS (EXTENSION) ACT, 1915.

The following figures do not include the Borough of Worthing, which is a separate Maternity and Child Welfare Authority:—

BIRTHS NOTIFIED (I) Live Births, 2,286; (2) Still Births, 48. Total 2,334. BIRTHS NOTIFIED BY: (1) Midwives, 1,597; (2) By Doctors and Parents, 737.

In the Borough of Worthing 357 births were notified by Midwives and 83 by Doctors and Parents.

ANTE-NATAL WORK AND HEALTH VISITING.

Ante-Natal Work.—As will be seen from Table XII. (p. 12) the attendance of Expectant Mothers remains low at the Maternity and Child Welfare Centres, but as shewn in Table XI. below, the ante-natal work of the Midwives continues to increase. The new rules of the Central Midwives Board which came into force on the 1st January, 1927, required Midwives to offer ante-natal services in all cases.

TABLE XI.—Showing Number of Visits to Expectant Mothers, 1921-27.

^{*} Includes Maternity Cases.

Health Visiting.—It is the routine practice of the Health Visitor to visit children four times during the first year of life, twice a year during the second and third years of life, and once a year during the fourth and fifth years of life, but actually many more visits are paid especially to children shewing any departure from normal health or progress. A large proportion of the children are attended at birth by the Health Visitor in her capacity as Midwife or Maternity Nurse, but for the purpose of Health Visiting her first visit is recorded on the 14th day or thereabouts. During the year 1927, 24,101 health visits were recorded as follows:—

Number of Visits to Infants under one year-

(1) First visits, 2,106.
 (2) Total visits, 12,026.

Total Number of Visits to Children aged 1 to 5 years-12,075.

The following table gives the number of Centres working in the County at the end of the year, the days and hours of attendance, the numbers who attended for the first time, and the average attendance per session:—

SUPPLY OF MILK FOR EXPECTANT AND NURSING MOTHERS AND FOR INFANTS.

During the financial year 70 families were supplied with 262 orders for 7,461 pints of fresh milk, and, in addition, 645 lbs. of dried milk were distributed free, whilst 3,129 lbs. were sold, the approximate receipts being $\pounds 222$. The cost of the free milk, fresh and dried, was approximately $\pounds 142$.

HOSPITAL TREATMENT.

The following statement summarises treatment provided during the year :-

No. of Factors	Receiving Treatment	N	Number o	Still	Average number of	
Name of Institution.	beginning of Year.	Admis- sions.	Dis- charges	Deaths.	end of Year.	days treat- ment. Com- pleted Cases.
(a) Sussex Maternity and Women's Hospital, Brighton	1	16	16	_	1	25
(b) Steyning Lying-in Ward, Shore- ham-by-Sea	1	11	11	_	1	48
(c) General Hospitals (Nose and Throat cases)	-	9	9	-		2

During the past 7 years an average of 13 cases have received treatment at the Sussex Maternity and Women's Hospital, Brighton, and during the past 4 years an average of 12 cases have been admitted to the Steyning Lying-in Ward.

In the City of Chichester and neighbourhood emergency cases are generally referred by Medical Practitioners to the Royal West Sussex Hospital and in the Borough of Worthing, the Maternity and Child Welfare Authority of that area refer cases to the Worthing Hospital to which a Maternity wing was added in 1923.

MIDWIVES ACTS, 1902, 1918 and 1926.

Midwives Practising in the County.—During the year 153 certified midwives notified their intention to practise. Twelve of these midwives left the county during the year, eleven notified for holiday duty, and one ceased to practise. Excluding thirteen midwives who resided without the county and were inspected by other Authorities, there remained at the end of the year 116 midwives requiring inspection, of whom 113 were trained and three were bona-fide Midwives.

Inspections.—Quarterly visits were paid by the County Inspector of Midwives, and 166 routine visits of inspection and 13 special visits were made during the year. In addition, 11 visits were made in connection with cases of alleged unqualified practice, and two visits to patients in connection with the work of a Midwife.

Notifications by Midwives .- During the year 643 notifications were received as follows :-

ations by minimites. During	e com	year o	TO HOTH	CHEROTES	M.CT.C.	TOCCTA	THE REAL PROPERTY.

							-
							643

The 381 Notifications of sending for medical help for mother received during the year, were as follows:—

Torn perineum (126), Prolonged labour (73), Abortion and Threatened labour (19), Rise of temperature (18), Adherent and retained placenta (18), Malpresentation (17), Ante-partum haemorrhage (17), Post-partum haemorrhage (5), Illness of Mother (13), Breech presentation (11), Uterine inertia (10), Varicose veins (9), Albuminuria (8), Persistent occipito posterior (5), Extended breech (3), Placenta praevia (3), Vaginal discharge (3), Premature birth (2), Swelling of vulva or vagina (2), Severe vomiting and bad pulse (2), Sores of genitals (1), Rigid cervix (1), Hydramnios (1), Phlebitis (1), Inflamed breast (1), Collapse of Mother (1), Foetal distress (1), Accidental haemorrhage (1), Premature labour (1), Other causes (8).

The 71 Notifications of sending for medical help for child received during the year, were as follows:—

Discharging eyes (27) (twelve being cases of Ophthalmia Neonatorum), Dangerous feebleness (23), Difficult breathing (4), Phimosis (4), Deformity of leg and foot (1), Bronchitis (1), Cleft palate (1), Malformation of eyelids (congenital blindness) (1), Cephalhaematoma (1), Haemorrhage from vagina (1), Rash (1), Other causes (6).

FEES TO DOCTORS CALLED IN BY MIDWIVES.

During the financial year ended 31st March, 1928, fees amounting to approximately £546 were paid to Medical Practitioners in 372 instances. Contributions amounting to approximately £388 were received in respect of 259 cases. In 68 instances, fees amounting to approximately £71 were paid direct by patients to Doctors.

COMPENSATION TO MIDWIVES.

During the year compensation amounting to £3 9s. was paid to two Midwives who had been suspended from practice whilst in attendance upon septic cases.

OPHTHALMIA NEONATORUM REGULATIONS, 1926

During the year 1927, twenty notifications of Ophthalmia Neonatorum were received and the following Statement summarises the cases which have occurred during the past six years:—

STATEMENT SHEWING NUMBER OF CASES OF OPHTHALMIA NEONATORUM. 1922-27.

		Cases.	1022				
			ated.	Vision	Vision	Total	
Year.	Notified.	At Home.	In Hospital.	unimpaired.	impaired.	Blindness.	Deaths
1922	18	17	1	18	-	-	-
1923 1924	12 13	12 13	_	12 13	_	_	_
1925 1926	11 13	9 13	2	11 13	_	_	-
1927	20	18	2	19	1		_

About 2 per cent. of cases of blindness are due to loss of sight during the first year of life and in a high proportion of these cases the blindness is caused by Ophthalmia Neonatorum. Every case of Ophthalmia Neonatorum must therefore be regarded as serious, though, fortunately, in actual practice, the cases notified in recent years have been relatively mild in character.

MATERNAL MORTALITY.

During the year 1927, fourteen deaths of mothers occurred as follows:-

Puerperal Sepsis (6), Other Accidents and Diseases of Pregnancy (8).

The mortality rate was equal to 4.8 per thousand births as compared with rates of 2.4 in 1926, 3.1 in 1925, 2.1 in 1924, 3.1 in 1923, 3.3 in 1922, 4.9 in 1921 and 3.1 in 1920. The rates in the Urban and Rural Districts were 4.4 and 5.13 respectively, as compared with rates of 1.51 and 3.09 the previous year.

The following table summarises the maternal deaths and rates during the past eight years.

TABLE XIII.-MATERNAL MORTALITY AND RATES PER 1,000 BIRTHS-1920-27.

PUERPERAL FEVER AND PUERPERAL PYREXIA REGULATIONS, 1926.

These Regulatons came into force on 1st October, 1926, and made notifiable any febrile con-

dition occurring in a woman within 21 days after childbirth or miscarriage.

Any febrile disturbance causing a temperature of 100.4 F., or more, sustained during a period of 24 hours or recurring during that period, must be notified forthwith, although the Doctor may be uncertain as to the cause of the febrile symptoms. By notifying the case as suffering from "Puerperal —the form used in the regulations for the notifiable febrile disturbance (see above)—the Medical Practitioner at once introduces certain safeguards against the spread of infection and he makes available to his patient any special services that may be provided by the Maternity and Child Welfare Authority of the area in which the patient is residing.

With the approval of the Ministry of Health, the following special arrangements have been made

by the County Council :-

Consultations.—Any Medical Practitioner may obtain a second opinion on his case. The County Council, after consultation with the British Medical Association (Sussex Branch) have appointed the following Consultants:-

> Dr. A. H. Bostock, Southfields, Chichester. Tel. No. Chichester 340. Mr. W. A. Bowring, Furze Hill, Hove. Tel. No. Brighton 302.

DR. E. C. Bradford, Laneside, Horsham. Tel. No. Horsham 196. Dr. P. C. Cole, Lynton, Cissbury Road, Broadwater. Tel. No. Wo Tel. No. Worthing 309.

Dr. G. Hamilton, 27 West Street, Chichester. Tel. No. Chichester 133.

Dr. Lilian Jeffries, 10 Adelaide Crescent, Hove. Tel. No. Hove 3414.

Dr. F. A. Juckes, Old Compton, Horsham. Tel. No. Horsham 55. Mr. H. J. McCurrich, 9a Palmeira Avenue, Hove. Tel. No. Hove 6688.

Mr. H. Seymour, 17 First Avenue, Hove. Tel. No. Hove 2767.

- Bacteriological Examinations.—Dr. H. M. Galt, Pathologist, Stephen Ralli Memorial, Royal Sussex County Hospital, Brighton, has been appointed to undertake this work.
- 3. Hospital Treatment.—An Agreement has been entered into with the Brighton Corporation for the treatment of cases at the Brighton Sanatorium.
- 4. Special Nurses.—Arrangements are made with the County Nursing Association for the supply of Special Nurses as in former years.

PUERPERAL FEVER.

In Circular 722 issued by the Ministry of Health, dated 9th August, 1926, the opinion is expressed that it will ultimately be desirable to replace the term "Puerperal Fever" by the term "Puerperal Pyrexia." Puerperal Fever is not a definite disease such as Scarlet Fever, and often the condition cannot be accurately diagnosed in the early stages when a slight rise of temperature may be the chief symptom.

Under the Infectious Diseases (Notification) Act, 1889, Puerperal Fever has been for a number of years a notifiable disease, but in practice only the severe, generally fatal, cases have been notified

owing to difficulties arising in the diagnosis of this condition

The following statement gives the number of cases of Puerperal Fever and Puerperal Pyrexia notified during the year. The figures for the Borough of Worthing, which is an independent Authority for Maternity and Child Welfare, are shewn separately :-

Statement shewing number of cases of Puerperal Fever and Puerperal Pyrexia notified during the year.

Number of cases notified.

	Puerpe	eral Fever.	Puerper	al Pyrexia.	Т	otal.
County (Child Welfare Population) Worthing (M.B.)		(2) (1)	23 5	(4) (1)	28 8	(6) (2)
Total Administrative County	. 8	(3)	28	(5)	36	(8)

The Figures in brackets record Fatal Cases dying on or before 31st December, 1927.

The following Statement indicates the distribution of the notified cases of Puerperal Fever and Puerperal Pyrexia, distinguishing between cases treated at home and those treated at Hospitals, Maternity Homes, etc.

Number of Cases. Patients confined at their own Homes and Patients Removed to Removed to confined at Patients Nursed at Hospital Hospital confined at Home. before after Maternity Homes. Hospital. notification. notification. County (Child Welfare Population) 10 (2) 2 7 (4) Worthing (M.B.) .. 3 (1) 1 (1) 3 Total Administrative 13 (2) 10 (1) 3 (1) County 8 (4)

It is to be noted that one Fatal Case of Puerperal Pyrexia was due to Influenzal Broncho Pneumonia. Also in neither of the two Fatal Cases in the Borough of Worthing was Puerperal Sepsis the primary cause of death.

MIDWIVES AND MATERNITY HOMES ACT, 1926.

This Act came into force on 1st January, 1927. At the end of the year there were 23 Maternity Homes registered or recommended for registration containing accommodation of 58 beds approved for Maternity cases. With two exceptions the accommodation is provided in Medical and Surgical Nursing Homes.

The following Statement shews where the Registered Homes are situated :-

		Dist	2.				Nu	mber of
		Distr	rict.				Homes.	Maternity Beds

							_	_

Note.—Does not include one Registered Home containing accommodation for two Maternity cases, which was closed in September, 1927.

COUNTY NURSING SERVICE.

At the end of the year, the West Sussex County Nursing Association, employed a Staff consisting of County Superintendent, Assistant County Superintendent, and two whole-time Health Visitors engaged in Public Health work in areas unprovided with District Nurses, and for emergency work which includes the Nursing of cases of Ophthalmia Neonatorum, Septic Lying-in cases, or for relief of Nurse-Midwives in illness or exceptional stress of work. There were also 68 affiliated District Nursing Associations employing 84 Nurses, grant being paid in respect of 81 Nurses.

Nursing Associations employing 84 Nurses, grant being paid in respect of 81 Nurses.

During the year the following additional District Nursing Associations were established by the West Sussex County Nursing Association, in accordance with the scheme (as since slightly modified) which was approved by the County Council in 1919:—

Name and Number Number of Annual Parishes Date of Nursing District Nurses. Grant. Served. Appointed. Stevning, etc. 9 £100 Steyning 8/2/17. C/3 Bramber 17/2/27. Beeding Buttolphs Edburton Loxwood E/16a £25 19/3/27. Loxwood Harting, etc. £50 Harting 14/11/27 B/4 Elsted

ORTHOPAEDIC SCHEME.

During the course of the year a Special Committee representative of the Education Committee, the Public Health and Housing Committee, and the Maternity and Child Welfare Committee, approved a Scheme for the treatment of crippling defects which received the sanction of the Ministry of Health and Board of Education. The Scheme provides for the holding of Special Clinics at Chichester and Horsham, under the charge of Mr. Barnett, the Visiting Surgeon, who is a member of the Staff of the Royal National Orthopaedic Hospital, London. Mr. Rocyn Jones, Orthopaedic Surgeon of the Royal National Orthopaedic Hospital, is also acting in an advisory capacity. Under a temporary agreement with the Brighton Corporation, Miss Blincow, Orthopaedic Nurse, assisted Mr. Barnett at the Clinics in the matter of remedial exercises and following-up of cases fitted with appliances. As it was impossible to start the Clinics before the end of July, and as there were a great many new cases to be examined for the first time, the Scheme could not be put into full operation. A very satisfactory commencement has, however, been made, and as regards Hospital treatment of cases requiring operations or extensive manipulative treatment, the majority of the urgent cases of this type have been dealt with, so that during the next twelve months it is confidently anticipated that the arrears of work will be overtaken.

The arrangements made by the Public Health and Housing Committee, which have been in force for many years for the treatment of cases suffering from tuberculous disease of the bones and joints are unaffected. All cases of this nature are still being dealt with at the Lord Mayor Treloar Cripples Hospital and College, Alton, and the Royal Sea Bathing Hospital, Margate, and the Royal West Sussex Hospital, Chichester.

The following Statement is a summary of the cases seen by the Orthopaedic Surgeon :-

Orthopaedic Clinic.	No. of Sessions.		No. of children examined	
Orthopaedic Clinic.	Sessions.	New cases.	Re-examinations.	Totals
Chichester Horsham	5 2	80 (8) 28 (3)	31 (4) 10 (—)	111 (12) 38 (3)

^{*} Includes all primary notifications and NEW cases coming to the knowledge of the Medical Officer of Health during the year.

TUBERCULOSIS MORTALITY.

Tuberculosis in its various forms accounted for 132 deaths, the death-rate being 0.63 per 1.000 population, as compared with 0.68 per 1.000 population in 1926. 5.4 per cent. of the total mortality from all causes was due to tuberculosis, as compared with 4.6% last year.

TABLE XV.—Shewing number of deaths at different periods of life in the Administrative County, Urban Districts and Rural Districts:—

A .- Tuberculosis of respiratory system.

			0	1	2	5	15	25	45	65	75
		All ages.	1	2	5	15	25	45	65	75	ů up

^{*} It should be borne in mind that the definition of "patient" does not include persons in whom a definite diagnosis of tuberculosis has not been made.

VENEREAL DISEASES.

FACILITIES FOR TREATMENT.

Clinics-Treatment, provided free of cost at the Clinics, is available to any resident in the County suffering from, or suspected to be suffering from, Venereal Disease in its earlier and at all communicable stages. Patients may attend the Clinics on the advice of their Medical Attendant or on their own initiative.

The following Statement gives the days and hours of the various Clinics serving this County:-

Royal Portsmouth Hospital, Landport, Portsmouth. (This Clinic is intended to serve persons resident in the Western part of the County)-

Men-Tuesdays, 5 p.m. to 7 p.m. Wednesdays, 4 p.m. to 6 p.m.

Women—Wednesdays, 2 p.m. to 4 p.m. Fridays, 10 a.m. to 12 noon.

Thursdays, 5 p.m. to 7 p.m.
Worthing Hospital, Lyndhurst Road, Worthing. (This Clinic is intended to serve persons resident

in the Eastern part of the County)-Men and Women—Wednesdays, Women, 3 p.m. to 4 p.m.; Men, 4 p.m. to 5 p.m. Fridays, Women, 5 p.m. to 6 p.m.; Men, 6 p.m. to 7 p.m.

Saturdays, 2.30 p.m. to 4.30 p.m.

Royal Sussex County Hospital, Eastern Road, Kemp Town, Brighton—
Men—Mondays, 5 p.m. to 7 p.m.

Thursdays, 5.30 p.m. to 7.30 p.m.

Thursdays, 5.30 p.m. to 5.30 p.m. Saturdays, 11.30 a.m. to 1.30 p.m.

A limited number of beds is reserved at the Hospitals for patients requiring In-patient Treat-

ment on the recommendation of the Medical Officer, i/c., of the Clinic. Complete secrecy as to the names and addresses of all patients is observed. This information is only required by the Medical Officer in charge of the Clinic for the purpose of communicating with the patients as to subsequent treatment, and in order to allocate the cost between the various Authorities having arrangements at the same Hospital.

TRAVELLING EXPENSES OF PATIENTS.

The County Council have authority, under certain circumstances, to defray the reasonable travelling expenses of patients attending the Clinics who are unable to bear the cost themselves.

PATHOLOGICAL EXAMINATION OF SPECIMENS.

Specimens may be sent for pathological examination by any medical practitioner in the County. The examination and report are made without cost to either the doctor or the patient. Stamped Outfits, with full direction for the collection of specimens are supplied free of charge, on application being made to the County Health Office.

SUPPLY OF DRUGS.

Arrangements are made for the supply to Medical Practitioners, but very few requests for drugs have been received.

TREATMENT OF CASES.

HOUSING (RURAL WORKERS) ACT, 1926.

This Act received Royal Assent on 15th December, 1926.

A Scheme prepared by the County Council embracing the whole County has been approved by

the Ministry of Health.

The co-operation of the Local Sanitary Authorities has been obtained so that the provisions of the Act may be made known to the owners of property. All plans and specifications of alterations and extensions to existing property are also submitted to the Local Sanitary Authorities for their approval before grants are made.

The County Council in their scheme are prepared to make grants limited to £100 for any one

house, but no grant will be made where the estimated cost of repairs is less than £50.

The word "repairs" includes:—
"Structural alterations and repairs, additions to premises, water supplies and drainage, sanitary conveniences and other like works, but not ordinary repair and upkeep.

When the landlord accepts a financial grant, the following conditions will apply, viz.:-

- (1) The estimated value of the dwelling on completion must not exceed £400.
- (2) The dwelling when completed must be fit for habitation.
- For 20 years, the tenants must be agricultural workers or persons receiving similar wages.
- (4) For 20 years, the maximum rent will be the 'normal agricultural rent,' as determined by the County Council, increased by 3 % on the owners share in the estimated expenditure on the works."

MENTAL DEFICIENCY ACT, 1913.

At the end of the year there were under observation the following cases of Mental Deficiency: Committee for the Care of the Mentally Defective-

Receiving Institutional Car- Under Care of Brighton Gu Under supervision of the V	ardia			 ation fo	or the	 Care o	 f the	86 23	Cases.
Mentally Defective								128	237

(ii) Statements incorrect Nil
(b) Determination made of Milk Fat in Cream sold as preserved cream.
(i) Above 35 % Nil
(ii) Below 35 % Nil

3. THICKENING SUBSTANCES Nil

MILK AND DAIRIES (CONSOLIDATION) ACT, 1915.

MILK AND DAIRIES ORDER, 1926.

During the year the Public Health and Housing Committee continued to use the Veterinary Surgeons engaged by the Diseases of Animals Committee to carry out the provisions of the Tuberculosis Order made by the Board of Agriculture and adopted the same fees as fixed by the Diseases of Animals Committee. A Sub-Committee of representatives of the Public Health and Housing Committee and Diseases of Animals Committee considered the question of the appointment of a wholetime Veterinary Surgeon and the Committee at their meeting in December recommended that the matter should be deferred for a further twelve months.

Arrangements for biological, etc., examination of specimens of milk were continued with the

Lister Institute for Preventive Medicine.

During the year 24 notifications were received from Local Authorities under this Act and in every instance action was taken under the Tuberculosis Order, 1925. Cattle suffering from Tuberculosis were slaughtered in eleven instances and in the remaining instances the cattle were found free from evidence of tuberculosis.

In two instances between the time of taking the original samples of milk found to be tuberculous and the date on which the investigation under the Tuberculosis Order was carried out, changes had occurred in the herds, cattle having been sold.

PORT OF NEW SHOREHAM.

The Number of Vessels Entering the Port during the year was 812. Of these, 487 with a tonnage of 96,703 were from British ports, and 325 with a tonnage of 62,760 were from foreign ports, showing a decrease of 210 coast wise, and an increase of 5 foreign vessels, over the previous year.

Inspection.—Four hundred and eighty-two British vessels and two hundred and one foreign vessels were inspected during the year. Two vessels were found with structural defects and eleven with dirt, vermin or other conditions prejudicial to health. Two vessels (one British and one foreign) with damp quarters, were not seen since notices were given. The other nuisances were abated in each instance.

Infectious Diseases.—One case of sickness (food poisoning) was reported on one foreign vessel arriving at the port. Leaflets on the prevention and care of influenza and containing information as to the dangers of Venereal Disease and the facilities provided for treatment were distributed to the Master of every ship. Agreement with Brighton Corporation for removal of any cases to Isolation Hospital.

Public Health (Regulations as to Food) Act, 1907.—All cargoes of food have been inspected. Twenty-six vessels, tonnage 783, brought food to the port, and were found in good condition.

Public Health (Shell Fish) Regulations.—No instance of selling shell fish gathered from the prohibited area came under notice during the year.

RATS AND MICE DESTRUCTION ACT, 1919.—Printed cards, indicating the responsibilities of Masters of Ships under this Act, have been distributed. Two brown rats were found and killed on one coal vessel entering the port.

Complaints.—Complaints were received as to illicit dumping of refuse on the banks of the basin for levelling purposes, but subsequent action has resulted in great improvement being effected.

PORT OF LITTLEHAMPTON.

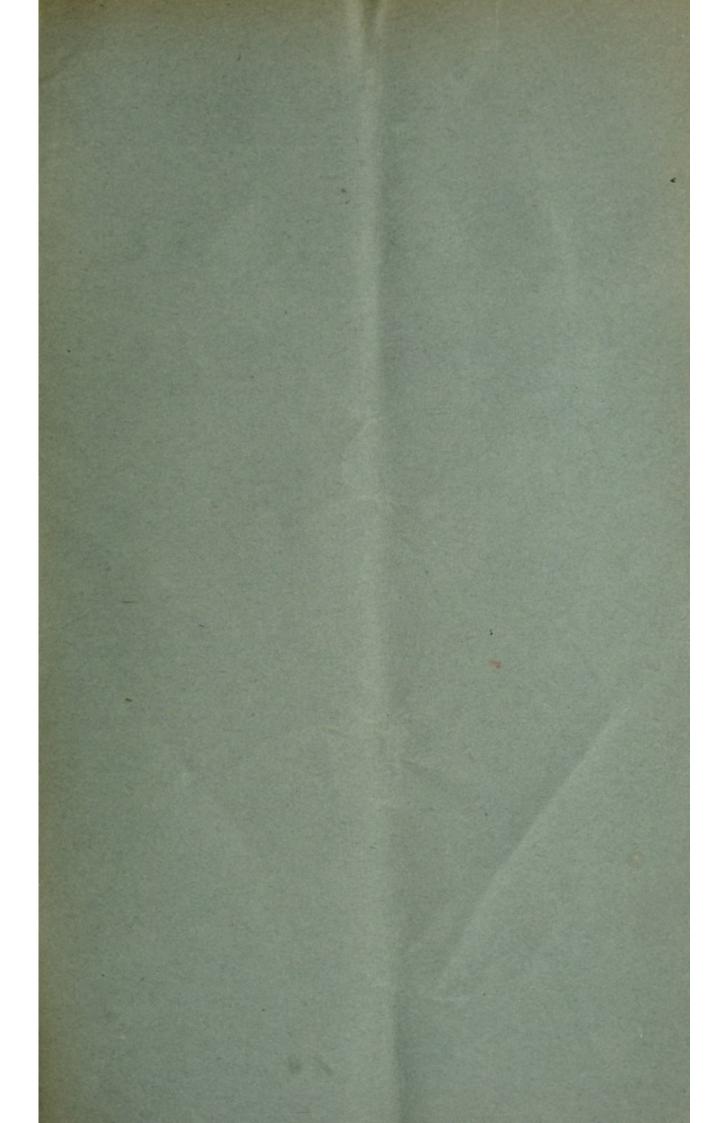

The Number of Vessels Entering the Port during the year was 162, with a tonnage of 28,469. Of these 125 were from British Ports, and 37 from foreign Ports, showing a decrease of 7 vessels from British Ports, compared with last year, and an increase of 13 from Foreign Ports.

Inspection.—The majority of the vessels were visited and inspected by the Port Sanitary Inspector. 14 vessels were found with defects and were all remedied. The defects were want of cleanliness, dampness and want of sanitary accommodation.

INFECTIOUS DISEASES.—No cases occurred during the year. Arrangements have been made for isolation of cases at the Infectious Diseases Hospital belonging to the Littlehampton Urban District Council.

Public Health (Shell Fish) Regulations, 1915.-No action has been taken during the year.

RATS AND MICE DESTRUCTION ACT, 1919.—No rat infested ships entered the Port, but 110 rats were killed by trapping or poisoning on the wharves during the year.
