## MEDICAL OFFICER OF HEALTH'S DEPARTMENT.

Medical Officer of Health and Medical Superintendent of Sanatorium : WILLIAM BERRY, F.R.C.S.I., D.P.H., F.P. & S., Glasgow.

Fellow of the Incorporated Society of Medical Officers of Health, Past President of North-Western Branch, Fellow of the Royal Sanitary Institute, Fellow of the Royal Institute of Public Health, and Fellow of the Royal Academy of Medicine, Ireland.

Assistant Medical Officer of Health : J. FOREMAN BERRY, M.B., B.Ch., St.And., L.R.C.P., & S.Ed., &c.

Chief Sanitary Inspector : JOHN SUMNER, Certif. San. Inst., and Assoc. Royal San, Inst., Cert. City of London Guilds (Plumbing).

Assistant Sanitary Inspectors : CHARLES H. FRANCE, Certif. San. Inst. FRED MARTLEW, Certif. San. Inst. M. CLUNAN, Certif. San. Inst.

Smoke, Shop Hours Act, and Factory and Workshop Act: FRED G. BISHOP.

> Sub-Inspector : ERNEST KNOWLES, Certif. San. Inst.

> > Clerk : JOHN ASHTON.

Enquiry Office : ERNEST RICHARDSON.

Disinfectors : JAMES RISLEY. GEORGE CROSTON. HENRY PARKINSON.

Master of Sanatorium : MICHAEL MOORE. By order of the Local Government Board, dated March 23rd, 1891, Article 18, Section 14, it is prescribed that the Medical Officer of Health shall "prepare an Annual Report, to be "made to the end of December in each year, comprising a " summary of the action taken during the year for preventing " the spread of disease, and an account of the sanitary state " of his district generally at the end of the year. The " report shall also contain an account of the enquiries " which he has made as to conditions injurious to health " existing in his district, and of the proceedings in which " he has taken part, or advised under the Public Health Act, " 1875, so far as such proceedings relate to those conditions; " and also an account of the supervision exercised by him " or on his advice, for sanitary purposes over places and "houses that the Sanitary Authorities have power to " regulate, with the nature and results of any proceedings " which may have been so required and taken in respect of "the same during the year. It shall also record the action " taken by him or on his advice, during the year, in regard " to offensive trades, and to factories and workshops. The " report shall also contain tabular statements (on forms to " be supplied by the Local Government Board, or to the " like effect) of the sickness and mortality within the " district, classified according to diseases, ages, and localities."

### CORPORATION OF WIGAN.

# HEALTH DEPARTMENT,

### Максн, 1909.

### To the Chairman and Members of the Health Committee.

### GENTLEMEN,

. . in and

1 .... · · · · · · · · ·

I have pleasure in presenting you with my Thirteenth Annual Report on the Health of your County Borough for the year 1908.

The death-rate calculated on an estimated population of 92,114 is 16.97 per 1,000 of the population, against 18.03 for 1907, showing a decrease of 1.06.

The birth-rate is 31.85 against 30.05 for last year, being an increase of 1.80.

The total number of deaths from Zymotic diseases is 171, a rate of 1.85 against 2.60 in 1907.

The infantile deaths number 154 per 1,000 births, whilst that for England and Wales is 121.

Last year we had 163, whilst the rate for England and Wales was 118.

The number of deaths in persons over 60 years of age is 340, against 346 in 1907.

Measles was prevalent in May, and the following schools were closed :-

Warrington Lane Council School (Infants' Department), from May 15th, for 22 consecutive days.

Marsh Green Schools (all Departments), from May 16th, for 21 consecutive days.

St. Paul's School, Pemberton (all Departments), from May 16th, for 21 consecutive days.

St. John's Schools, Pemberton (all Departments), from May 25th, for 14 consecutive days.

The number of deaths from Measles was 5.

In the Small-pox Doecker we have treated 13 cases of Consumption sent in and paid for by the Board of Guardians. One left apparently cured, 7 improved, and 4 with no improvement, and 1 left Hospital on his own accord.

Scarlet fover has furnished us during the past year with 220 cases, against 175 in 1907. The death rate from Scarlet fever is '11 against '099.

Enteric fever was prevalent in the months of October, November, and December, and we treated 69 in the Sanatorium. The death rate for Enteric fever was '28.

I tender my thanks to my colleagues in the Medical Profession (in Wigan and adjoining districts) for their co-operation and help.

To the staff I am particularly indebted for help during the past year, especially to Mr. Summer and the Assistant Medical Officer of Health, both of whom have had extra work, owing to my enforced absence during a portion of the year.

In conclusion I must thank the Chairman, Vice-Chairman, and Members of the Committee for their forbearance and kind co-operation.

I am, Gentlemen,

Your obedient Servant,

WM. BERRY, Medical Officer of Health. PART I.

# VITAL STATISTICS.

# REPORT.

### STATISTICAL SUMMARY FOR 1908.

Population estimated July 1st, 1908 ..... 92,114 Marriages are not ascertained for the County Borough. Annual rate per 1,000 of population ditto.  $Births \left\{ \begin{array}{ll} Males \dots & 1484 \\ Females \dots & 1450 \end{array} \right\}$ Total..... 2,934 Annual rate of births per 1,000 of 31.85population ..... for England and Wales..... Ditto 26.5Illegitimate births 138, or 1.49 per 1,000 of population, a percentage 4.6 of ......  $Deaths \left\{ \begin{array}{ll} Males.... & 802\\ Females... & 762 \end{array} \right\}$ Total ..... 1,564 Annual rate of mortality ..... 16.97in England and Wales..... 14.7 Ditto Death rate in 76 great towns ..... 15.8 142 smaller ,, ..... Ditto 14.7 Rural England and Wales. 13.8Ditto Excess of registered births over deaths ..... 1,370 Total deaths from zymotic diseases ..... 171 1.85 Annual rate of mortality from zymotic diseases. in England and Wales..... 1.29Ditto Total deaths from diarrhœa..... 87 Annual rate of mortality from diarrhœa ...... .94 Infantile rate (deaths per 1,000 births), 1908 ... 154 for England and Wales ..... 121 Ditto Deaths of infants under one day old, number ... 61

Acreage.—With an acreage of 5,082, and a population estimated at 92,114, we have 18'12 persons per acre.

15

*Population.*—The population estimated at the middle of the year (June 30, 1908) is 92,114, and this may be taken as fairly correct, in accordance with the number of inhabited houses on July 1st.

*Births.*—The number of births registered during 1908 is 2,934 (males 1,484, females 1,450), the rate per 1,000 of the population being 31.85. The birth rate, compared with 1907 is 1.80 higher. The illegitimate births number 138, or 4.6 per cent.

The Mortality Rate.—The deaths for 1908 number 1,564 (males 802, females 762), being an excess of 40 males over females. The rate per 1,000 of the population per annum is 16.97; in 1907, 18.03; thus on a population of 92,114 we have a decrease in deaths of 73 over 1907. There is therefore a decrease in the death-rate of 1.06 per 1,000.

The death rate for each quarter is as follows :---

| 1908.       | All causes. | Zymotics. |
|-------------|-------------|-----------|
| lst Quarter | 18.52       | •87       |
| and Quarter | 14.71       | .82       |
| Brd Quarter | 17.79       | 3.57      |
| 4th Quarter | 17.34       | 2.17      |

The zymotic rate 1.85, shows a decrease for 1908. The previous year it was 2.60, showing a decrease of .75. This is due to a decrease in the number of deaths from measles and whooping cough.

### THE VITAL STATISTICS FOR ENGLAND AND WALES DURING 1908

ENGLAND AND WALES.

#### TABLE IV.

DEATH RATE FOR WIGAN DURING THE LAST TEN YEARS.

| 1899 | <br>21.91 | 1              |
|------|-----------|----------------|
| 1900 | <br>21.95 |                |
| 1901 | <br>22.30 |                |
| 1902 | <br>20.25 |                |
| 1903 | <br>21.69 | Average for 10 |
| 1904 | <br>21.49 | years, 20.02.  |
| 1905 | <br>18.07 |                |
| 1906 | <br>17.61 |                |
| 1907 | <br>18.03 |                |
| 1908 | <br>16.97 |                |

Infantile Mortality.—The number of deaths of children under one year is 453, or 154 per 1,000 births, and of children over one year and under five years 196 or 2.12per 1,000 of the population.

In regard to this infantile mortality there were 61 deaths in children who did not live more than 24 hours, and if we deduct these there would only be 392 deaths, or 133 per 1,000 births; with a large birth rate we necessarily have a larger proportion of premature births.

Senile Mortality.—The number of deaths of persons of 60 years of age and over is 340, or 3.69 per 1,000 of population.

#### DEATH RETURNS CHART, I.

1908.

All Causes (Red) Zymotics (Black)

# PART II.

# THE ZYMOTIC DISEASES.

# CONSTITUTIONAL DISEASES.

# LOCAL DISEASES.

# INQUESTS.

# CAUSES OF DEATH.

# THE ZYMOTIC DISEASES.

The Mortality from the principal Zymotic Diseases, namely, Small Pox, Scarlet Fever, Measles, Whooping Cough, Typhus, Enteric Fever, Puerperal Fever, Diphtheria, and Diarrhœa, gives us a rate of 1.85 per 1,000 of the population, against 2.60 in 1907.

The deaths numbered 171.

The Zymotic rate, 1.85, is made up as follows :---

|                | Deaths | PER 1,000. |
|----------------|--------|------------|
|                | 1908.  | 1907.      |
| Small Pox      |        |            |
| Scarlet Fever  | .11    | .099       |
| feasles        | .054   | .82        |
| Vhooping Cough | .26    | .55        |
| yphus          |        |            |
| Interic        | .28    | .24        |
| )iphtheria     | .10    | .15        |
| Diarrhœa       | .94    | .66        |
| uerperal       | .086   | .055       |
| Erysipelas     |        | .011       |

The Zymotic rate during each of the four quarters was :

|              |       |   | 1908.       | 1907.        |

# SMALL POX.

I am pleased to note that we have had no cases notified, but you will see by the list of towns that it is not absent from England.

I mention this to show that there is a necessity for our Doecker Hospital being ready and properly equipped.

### VACCINATION RETURNS, 1907-1908.

The following Vaccination Returns have been supplied to me by the Vaccination Officer, Mr. R. Halliwell, J.P.:-

|                                              | January to June,<br>1908. | The whole of<br>i 1907. |
|----------------------------------------------|---------------------------|-------------------------|

### SCARLET FEVER.

CHART :---Cases notified in red • Deaths in Black •

# SCARLET FEVER

| Number | of | Notifications | 220 |
|--------|----|---------------|-----|
| Number | of | Deaths        | 11  |
|        |    |               |     |

Death-rate per 1,000 of Population ..... '11

The number of notifications of this disease is for 1908, 220, against 175 in 1907; and 11 deaths, against 9 in 1907.

|           | Notifications. | Removed to<br>Sanatorium. | Deaths. |
|-----------|----------------|---------------------------|---------|
| anuary    | 11             | 6                         | 2       |
| February  | 7              | 7                         | 1       |
| March     | 15             | 11                        | 2       |
| April     | 13             | 5                         |         |
| May       | 8              | 5                         |         |
| June      | 16             | 13                        | 2       |
| July      | 14             | 10                        |         |
| August    | 8              | 7                         |         |
| September | 18             | 15                        | 2       |
| October   | 37             | 25                        | 1       |
| November  | 39             | 17                        |         |
| December  | 34             | 17                        | 1       |
| Total     | 220            | 138                       | 11      |

The percentage of removals to Sanatorium has been 62.72, against 53.14 in 1907, and 49.21 in 1906.

The number of return cases during the year was 3, and the causation has been difficult to define. In some cases it appeared that the discharged patient got a coryza or cold, and thus infected the other child. We have had 11 deaths amongst those notified, 7 occurred in hospital, and these were severe cases when sent in; this equals 7 in 62.72 per cent. of cases removed, and the remaining four cases were in the remaining 37.28 per cent. left at home, so we may take it that the fatality amongst those cases left to be nursed in better houses, with parental care and nursing, gives us a death-rate, per cent., of 4.87, against 5.07 in hospital.

#### 39

## SCARLET FEVER.-RETURN CASES, 1908.

1.—1, THIRD AVENUE.—First case notified Novem. ber 27th, 1907, and removed to Sanatorium on November 29th, 1907; returned home on December 27th, 1907.—Second case commenced on January 13th, 1908, was notified, and removed to Sanatorium on January 13th, 1908.

- 2.—14, PORTLAND STREET.—First case notified, and removed to Sanatorium on July 6th, 1908; returned home on August 14th, 1908.—Second case commenced on September 5th, 1908, was notified and removed to Sanatorium on September 8th, 1908.
- 3.-15, MOSS STREET.—First case notified, and removed to Sanatorium on September 21st, 1908; returned home on December 1st, 1908.—Second case commenced on December 16th, 1908, was notified, and removed to Sanatorium on December 22nd, 1908.

#### DEATH RETURNS CHART, 2.

1908.

Measles (Red)

# MEASLES.

The total number of cases notified for 1908 was 354, against 1,571 cases in 1907. These 354 were notified to the inspectors when inquiring into notifiable cases.

The deaths numbered 5, or a rate of '654 per 1,000 of the population, or a percentage mortality of 1.41 of known cases, against 4.77 in my last report, and 3.16 per cent. in 1906.

Voluntary notification of the first case of Measles having ceased we have no means of ascertaining the number of cases.

The reason we get voluntary notification by the parents, is generally so that some cleansing of the house may take place afterwards. The following is a list of voluntary notifications to the inspectors :—

| 1908.     | Notifications. | Deaths |
|-----------|----------------|--------|
| January   | ALC: NO.       |        |
| February  |                | -      |

#### DEATH RETURNS CHART, 3.

1908.

Whooping Cough (Black)

The deaths were less in 1908 by 26. It is a very dangerous disease owing to the lung affections which supervene, and is highly infectious, but it is difficult to persuade mothers of its seriousness.

# TYPHUS FEVER.

I am pleased to say we have had no notifications of this disease during the year.

# ENTERIC FEVER.

| Number of Notifications     |        | <br>103 |
|-----------------------------|--------|---------|
| Number of Deaths            |        | <br>26  |
| Mortality per 1,000 of popu | lation | <br>.28 |
| Removed to Sanatorium       |        | <br>65  |

We have for 1908, 103 notifications, against 107 in 1907, and 138 in 1906. A few of the cases removed to the Sanatorium turned out to be cases of other febrile diseases.

The number of deaths were 26, or 25.24 per cent. of the cases notified, against a rate of 20.56 per cent. in 1907, and 19.56 per cent. in 1906.

| F         | Removed to Sanatorium. |
|-----------|------------------------|
| January   |                        |
| February  |                        |
| March     |                        |
| April     |                        |
| May       |                        |
| June      |                        |

| December  | 10                     |
|           | -                      |
|           | 65                     |

#### 45

In the Thompson Yates Laboratory, Liverpool, we have had 4 specimens of blood examined, with the following results :---

| Faint  | Rea | ctio | n | <br>•••• | • • • • • | <br> | 1 |
|--------|-----|------|---|----------|-----------|------|---|
| Negati | ve  | ,,   |   | <br>     |           | <br> | 3 |

The mortality rate is also great, and this has been due to the severity of the disease. We have 26 deaths in 103 cases, a rate of 25.24 per cent., which is in excess of the usual percentage in Enteric cases.

I here give the weekly number of Notifications from January 4th to December 26th.

Total Cases, 103.

Pemberton district has again in proportion to population given us a greater number of cases ; this, I think, is accounted for by the large number of privy middens, defective drainage, and unpaved or badly paved yards.

Houses in which cases have occurred with :--

| Privy<br>Middens. | Pails.   | Waste<br>Water<br>Closets. | Wat<br>Close | er     | 'ater an<br>Waste<br>ær Closet | an | Vater<br>d Pail<br>loset. |

#### ENTERIC FEVER CASES, 1908.

Case 3 was probably source of cases 13, 34, 35, 40, 53, and 54, all occurring in the Princess Street District.

Cases 4, 9, 10, 14, 20, 36, 37, 44, 45, 47, 55, 57, 65, and 79, all occurred in the Goose Green District, where Enteric Fever is usually prevalent, and may have continued from outbreak which occurred during the latter part of 1907.

Cases 7, 27, 39, 66, 73, and 80, were all employees at Douglas Bank Colliery.

Case 12 was probably source of cases 25, 26, 31, 33, 46, 82, 86, 95, and 98, all of which occurred in the Newtown District.

Case 16 was probable source of case 17.

Case 19 was a labourer on the Pemberton Sewage Farm.

Cases 23, 32, and 92, all employees at Worsley Mesnes Colliery.

Cases 24, 63, and 77, all employees at Pearson and Knowles' Colliery.

Case 42 was source of case 49.

Cases 48, 56, 61, 62, and 72, all in the Darlington Street East District, and may have arisen from same source.

Case 58 was probable source of case 83.

Case 67 probably contracted the disease out of the district.

Cases 68, 69, 70, and 85, all occurred in the Worsley Mesnes District, and no doubt arose from one source.

Case 70 was source of case 92.

Case 75 was probable source of case 88.

The following is a list of houses where two or more cases of Enteric Fever have occurred :---

#### AGE INCIDENCE, 1908.

It will be seen that August and September give us the greatest number of deaths, and, as in previous years, these are chiefly in children under the age of one year.

| Number of Deaths            |        | <br>8    |
| Mortality per 1,000 of popu | lation | <br>·086 |

We have an increase in the number of cases notified, and an increase in the death-rate. None of the cases appear to have been communicated, and everything was done to prevent communication of the disease to others.

#### SANATORIUM.

The arrangements made in the nursing department have been satisfactory, and the accommodation ample.

The Doecker Hospital is sufficient for the Small Pox cases, and the improvements made, on its removal from the old site, have been of great advantage.

In the Pemberton Hospital, there were 8 cases of other diseases on January 1st. During the year there was 1 admitted and 9 discharged of other diseases.

The number of infectious cases notified compulsorily is as follows :--

|                      | Notifications. | Removed to<br>Sanatorium. | Died in<br>Sanatoriu n. |
|----------------------|----------------|---------------------------|-------------------------|
| Small P x            |                | 1                         |                         |

The number of deaths in the Sanatorium was 25; 7 died from Scarlet Fever, 16 from Enteric, and 2 from other diseases.

During the year there were 192 patients discharged, and 25 died, making a total of \_17.

The number of days they were in was 7,501, or 34.5 days for each patient, against 35.3 days average for 1907.

The total cost of Administration of the Sanatoria (Wigan and Pemberton), 226 patients, is as follows :---

#### CONSTITUTIONAL DISEASES.

#### TUBERCULAR DISEASES.

Under the heading of Tubercular Diseases we include deaths from Consumptive Diseases, such as Phthisis Pulmonalis, Tabes Mesenterica, Tubercular Meningitis, Wasting Diseases of Infants (Marasmus), and other Tubercular affections.

The number of deaths from Phthisis is 75, against 84 in 1907, and 108 in 1906. The number of deaths from other Tubercular affections is 77, against 38 in 1907, and 40 in 1906.

From Wasting Diseases of Infants we have 48 deaths, against 45 in 1907.

The rates are as follows :---

Phthisis Pulmonalis ....... '81 per 1,000 of population. Other Tubercular Diseases '83 ,, Wasting Diseases of Infants '52 ,,

If taken together as Tubercular affections we have 200 deaths, or a rate of 2.17 per 1,000 of population.

#### PHTHISIS AND TUBERCULAR DISEASES BUT NOT INCLUDING MARASMUS.

The deaths occurred in the following wards :--

| St. George Ward         |         |       |       | <br>7  |

## FACTORY AND WORKSHOP ACT, 1901.

The Workshops have been regularly and systematically visited by Inspector Bishop, also the Factories, on receipt of report from H.M. Inspectors. I subjoin Inspector Bishop's report on the same, also his report on the Shop Hours Acts of 1892-1899, and Closing Order, 1904.

#### 1.-INSPECTION.

| Premises.                                                                                           | No. of<br>Inspections. | No. of<br>Written<br>Notices. |
|-----------------------------------------------------------------------------------------------------|------------------------|-------------------------------|
| Factories (including Factory Laundries)<br>Workshops (including Workshop Laundries) .<br>Workplaces | 189<br>1,115<br>—      | $\frac{2}{46}$                |
| Total                                                                                               | 1,304                  | 48                            |

#### 2.—Defects Found.

| Particulars.                                           | No. of<br>Defects<br>Found. | No. of /<br>Defects<br>Remedied |
|--------------------------------------------------------|-----------------------------|---------------------------------|

# BAKEHOUSES.

The bakehouses have been regularly visited, and when any nuisance has been discovered, notice has been served. The regulations as to limewashing, cleanliness, &c., have been enforced. The underground bakehouses have been kept in a sanitary condition.

The following is a list of Bakehouses.

#### SHOP HOURS ACT, 1892-1904.

During the past year 154 visits were made to shops during the day. At 10 no young persons were employed, and 5 were domestic; at 7 shops, young persons were employed contrary to the Act, 1895, the abstract not being exhibited.

The abstracts were obtained after the proprietor's attention had been called to the offence.

One proprietor was cautioned for employing a young person for more hours than the Act allows.

Act, 1899.—Seats for Shop Assistants.—At shops visited the Act was being carried out.

Observations at night were frequently taken to ascertain if the hours were being exceeded. One proprietor was cautioned under Section (1) of the Act, 1892.

# SHOP HOURS ACT, 1904.-CLOSING ORDER. HAIRDRESSERS' AND BARBERS' SHOPS.

The above Closing Order has received much attention during the year, 407 visits were made during the day, and 458 at night.

Complaints have been received of several shops being kept open after closing time, and many hours were spent in taking observations of the shops complained of.

During the year 4 letters were sent out warning the proprietors for offences under this order.

Signed,

F. G. BISHOP,

Inspector.

## MEAT INSPECTION AND SLAUGHTER-HOUSES.

'The Slaughter-houses have been regularly visited by the Inspectors, and I have myself paid many visits and surprise visits.

The butchers send frequently to have tuberculosed beasts examined and when condemned readily surrender the meat.

The Magistrates here are not yet alive to the seriousness of selling tuberculosed meat, for in a case where the Inspector seized a fore-quarter of a cow, on the costal pleura of which, was, a piece of tubercle larger than a five-shilling-piece (this fore-quarter being exposed for sale in a shop), they inflicted no fine, but let him off on payment of costs.

The sanitary condition of the various Slaughter-houses is not good, in most cases bad, and are a long way off complying with the requirements of the Local Government Board. Nothing short of a Public Abattoir can give us a place fit for killing meat for human consumption.

No inspections of live cattle have been done during the year, but when possible in the future this shall be done.

# DAIRIES, COWSHEDS, AND MILKSHOPS ORDER, 1885 AND 1886

I subjoin Mr. Woods', Veterinary Inspector's, report for 1908.

#### Gentlemen,

I commence my Annual Report under the Dairies, Cowsheds, and Milkshops Order by giving a synopsis of the work.

There are 44 Cowsheds within the Borough containing about 460 Milch Cows, an average of just over 10 Cows per cowshed, the greatest number on one premises is 68, and the least 2, and to these in the course of the year 165 official visits have been paid, and the udders of the cattle carefully examined.

Several of the old buildings formerly used as Cowsheds, but condemned under the present law are either empty or used for other purposes, and one (Markland Mill Farm) has had extensive alterations with the view of cattle being again kept therein.

Four cases of Tuberculosis of the Udder were detected and satisfactorily dealt with. Of three other suspicious cases, but which I was unable to certify, only one proved on bacteriological examination to contain acid fast bacilli, which one inoculation proved to be tubercle, while the second though condemned as unfit for drinking purposes turned out to be not tuberculosis.

No visits have been paid on behalf of the Corporation to cattle outside the Borough, and indeed there is no power to make such visits except for discovered tuberculosis in milk sold within the area, and this can only be made by the somewhat expensive process of samples being taken and bacteriologically examined.

Generally speaking, the Milk produced within the Borough is dealt with in a cleanly fashion, before it is distributed, although it might be improved by substituting taps in the Milk kits (which is insisted upon by some Authorities) in place of removing the top every time the Milk is measured. I am aware that I am considered over-fastidious on this point, and I recognise that an over-fastidious person is often a misery to himself, and a nuisance to his friends, but there must be great opportunity on a wet day of the dirty water from a dripping coat sleeve dropping into the Milk during the measuring.

It is astonishing to notice how little care is taken to keep milk clean after its distribution. In numerous cases and not in cottages only it is left uncovered in open vessels even during dusting or cleaning operations in the room.

Great attention is now directed by the Medical Profession to the dangers of contamination by the Common House Fly; there is no filth on which the fly will not settle, and it does not require a powerful imagination to understand the ease with which some of this material can be carried on its feet into a bowl of milk and the material may be not only dirt but disease.

It is to be sincerely hoped that the new Orders said to be in preparation by the Local Government Board will make the Dairies and Cowsheds Order compulsory over the whole Country, for at present it works very unequally.

It is also to be hoped that the Clauses dealing with Udder tuberculosis will be strengthened. At present one is almost dependent upon the goodwill and straightforwardness of the cowkeeper, and there is no power to prevent him selling such a cow to another cow-keeper, and there is no power to compel him to state what has become of her so long as she disappears from his Cowshed or is isolated.

Yours obediently,

WILLIAM WOODS.

# WATER SUPPLY.

The water supply has been continuous and of good quality; there has been no necessity to have a curtailment or intermittent supply, which is always dangerous. The following are summaries of the reports on the analysis of the water made by the Public Analyst :--

January.—Hardness before boiling, 7.5 degrees; after, 5.0 degrees. This sample is up to the usual standard of purity. (Wigan).

*February.*—Hardness before boiling, 13.0 degrees; after, 2.0 degrees. Satisfactory in regard to organic purity, but a very hard water, most of the hardness being of a temporary character. (Pemberton).

March.—Hardness before boiling, 10.0 degrees; after, 6.5 degrees. The water this month is of a harder character than usual, and the degree of organic purity, though quite satisfactory, is not so high. (Wigan).

April.—Hardness before boiling, 9.5 degrees; after, 6.5 degrees. The albuminoid ammonia figure is rather higher than usual this month, and there are heavy traces of free ammonia. Still, the water is quite satisfactory all round. (Wigan).

May.—Hardness before boiling, 9.5 degrees; after, 6.5 degrees. There is a distinct improvement this month, and the water is of a very satisfactory degree of organic purity. (Wigan).

June.—Hardness before boiling,  $5 \cdot 5$  degrees; after,  $4 \cdot 0$  degrees. This is a satisfactory sample in regard to organic purity, and is "softer" than usual. (Wigan).

July.—Hardness before boiling, 4.7 degrees; after, 3.3 degrees. This sample is up to the usual standard of purity, and rather "softer" than usual. (Wigan).

August.—Hardness before boiling, 9.5 degrees; after, 6.0 degrees. This water is about equal to an average sample in regard to total and permanent hardness, and is altogether of excellent quality. (Wigan).

September.—Hardness before boiling, 9.0 degrees; after, 6.0 degrees. The albuminoid ammonia is rather higher than usual, but all other figures are consistent with purity of supply. Total hardness is about the average. (Wigan).

October.—Hardness before boiling, 9.0 degrees; after, 5.5 degrees. The supply is distinctly better this month, and very good all round. (Wigan).

November.—Hardness before boiling, 11.5 degrees; after 2.0 degrees. From an organic standpoint this water is satisfactory in every respect. It is rather harder than the water in the centre of the town, most of the hardness being of a "emporary" nature. (Pemberton).

December.—Hardness before boiling 18.50 degrees; after, 10.5 degrees. Organically, this is a satisfactory sample. The hardness, both before and after boiling is very much greater than obtains in the usual town's supply. (Pemberton).

# RAINFALL, 1908

Average consumption per head per day (estimated population, 24,304), was 11.13 gallons.

# BLACK SMOKE NUISANCE.

Many observations have been taken of the nuisance arising from Black Smoke, and many cautions have been given, but no prosecutions have been taken.

# PROPERTY UNFIT FOR HUMAN HABITATION.

The following houses were scheduled under the Housing of the Working Classes Act, 1890, and were dealt with by the Committee :--

1, 2, 3, 4, 5, 6, 7, Dawber's Court, Standishgate.

123, 125, Standishgate.

1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, Penson's Yard, Standishgate.

1, 2, 3, 4, 5, 6, 7, Jackson's Row, Wigan Lane.

7, 8, 9, 10, 11, 12, Ashton's Yard, Duke Street.

1, 2, 3, 4, 8, 9, 10, 11, Wood's Yard, Duke Street.

1, 2, 3, 4, 5, 6, 7, 8, Ashton's Yard, Princess Street.

72, 74, 76, 78, 80, 82, 84, 86, 88, Gidlow Lane.

3, 4, 5, 6, 7, Grundy's Yard, Hardybutts.

52, 54, 56, 58, 60, 62, 64, 66, 68, 70, Scholefield Lane.

1, 2, 3, 4, 5, 6, Heaton's Yard, Scholefield Lane.

1, 2, 3, 4, 5, Orrell's Yard, Arthur Street, Goose Green.

1, 2, Waddington's Yard, Great George Street.

1. Wood's Yard, Great George Street.

36, 37, 38, 39, 40, 41, 42, 43, Bottling Wood.

The following is a list of unpaved Yards and Passages that have been dealt with during 1908:—

1-31, Hopwood Street, Pemberton.

The following have also been dealt for Defective Surface of Yards, etc.

107 to 117, Scholefield Lane. Back 53, Miry Lane. 16, 18, 20, Peet Street. 26, 28, 30, Peet Street. 6, Kay Street.
 4, 6, 8, Every Street. 44, Stanley Street. 36, 38, 40, 42, 44, Platt Lane. 41, Princess Street 2, 4, 6, 8, 10, 12, Northumberland St. 2, 4, 12, 14, 16, Seed Street 6, 8, 10, Seed Street 1, 3, 5, 7, 9, 11, 13, 15, Seed Street. 18, Earl Street. 2, 4, 6, 8, 10, 12, Silver Street. 10, Caunce Street. 20-32, Oxford Street. Adjoining 79, Silver Street. 36 and 38, Boyswell Lane.

70, School Street. 37-41, York Street. 57?, Warrington Road (P.) 15, Park View. 108, Warrington Road (P.) 1, Thompson Street (P.) 156, 158, Darlington Street East. Sovereign Road.
 Silver Street. 2, Penson Street. 15, Rupert Street. 13, Field Street. 38, Ormskirk Road (P.) 686, Warrington Road (P.) 1, 3, 4, Henry Street. 417, 419, 421, Warrington Road (P). 3, 4, 5, Stanley Square, Platt Lane. 60, Enfield Street (P.) 14. Yates Street.

# BOROUGH SURVEYOR'S DEPARTMENT.

The Borough Surveyor has kindly supplied me with the following particulars:---

|                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | т.               | C.  | Q. |

## SCAVENGING.

This department is under the control of the Sanitary Works Committee, and the disposal of sewage is in charge of the Sewage Farm Committee, the Medical Officer of Health being requested to attend when required.

# MIDWIVES ACT, 1902.

We have now 54 women on the Midwives Register for the Borough. This year many have been visited at their own houses by Dr. J. Foreman Berry, M.B. and Ch,B., St. And., L.R.C.P. and S., Ed., &c. He has presented a report to me in each case, and, where necessary, letters have been written to those who have not conformed to the Regulations of the Midwives Board. During the year there were 12 cases of Puerperal Fever notified and 8 deaths, against 8 cases and 5 deaths in 1907. There were 9 cases in which a Midwife had been in attendance; in each case she was suspended from carrying out her midwifery duties.

Many midwives have been summoned before me for negligence in carrying out the rules of the Midwives Board. One midwife has been reported to the Central Midwives Board for breach of rules and admonished, also given 3 months' probation.

During the year I have had the following reports sent in :--

42 Records of sending for Medical Help.

4 Notification of Death of Child.

26 Notification of Still-Births.

against in 1907:

16 Records of sending for Medical Help.

2 Notification of Death of Child.

18 Notification of Still-Births.

against in 1906:

13 Records of sending for Medical Help.

4 Notification of Death of Child.

15 Notification of Still-Births.

and in 1905:

9 Records of sending for Medical Help.

5 Notification of Still-Births.

# COUNTY BOROUGH OF WIGAN.

Midwives on Register, year ending 31st December, 1908.

INFANTILE DEATH RATES, 1908.

Rate per 1,000 Births for 12 months, 154.

Average for the last 10 years (1898-1907), 176.

# EDUCATION ACT, 1902 & 1904.

The Education Committee during the past year have appointed a School Medical Officer, this officer being the Medical Officer of Health, an Assistant School Medical Officer, and a School Nurse.

The work to commence, so far as the school inspection of children was concerned, in January, 1909.

Schools have been closed for Measles as in previous years. No school closure taking place for any other infectious disease.

The Water Supply to the Elementary Schools has been ample and of good quality.

# National Conference

ON

# INFANTILE MORTALITY,

# 1908,

HELD IN THE

Carton Halls, Victoria Street, Westminster,

LONDON, S.W.,

ON THE

24TH AND 25TH MARCH, 1908.

DELEGATE'S REPORT.

Health Office,

Wigan,

16th April, 1908.

To the Chairman and Members of the Health Committee.

Gentlemen,

Herewith I submit you a Report on my attendance as your Representative at the National Conference on Infantile Mortality, held in London, on the 24th and 25th March last.

Thanking you for the privilege of being present,

I remain,

Your obedient Servant,

## WM. BERRY,

Medical Officer of Health.

#### DELEGATE'S REPORT.

The National Conference on Infantile Mortality was held in London, and was opened by the Right Hon. John Burns, M.P., on the 23rd of March, and continued on the 24th and 25th.

Mr. Alderman Broadbent was the Chairman on the 23rd, and the Hon. John Burns, M.P., President of the Local Government Board, gave a lengthy address. He congratulated the meeting on the results of the first Conference, held in December, 1906, results which had exceeded his most sanguine expectations.

He said it had stimulated authorities all over the country. Government Departments had responded, and Parliament itself had not turned a deaf ear.

The adoption of the Notification of Births Act by thirty-two County Boroughs, fourteen other Boroughs, fourteen Urban District Councils, and twelve metropolitan Borough Councils had already been approved by the Local Government Board, many other applications were awaiting its approval, and other authorities seeking advice.

He said there was much difference of opinion in regard to milk for the child, but in his judgment a mother should not sublet her maternity, she should not sub-contract, the source of the infants' life to any bottle or any artificial food.

In regard to Infantile Mortality the comparison between this and other countries is favourable, and gave no rise for discouragement, yet there was ample room for improvement.

He mentioned also that anti-natal conditions should receive careful attention, although they were less adverse than formerly supposed, and 80 to 90 per cent. of babies born were healthy; but as town life increased, no effort should be spared to make the lot of the mother well fitted for the children that were or were to be.

He had a strong opinion in regard to mothers working, and held that for a period before the birth of the child, and for six months after its birth, the mother should not be at work, and that her home work should be light and suitable for her strength, and she should, of course, suckle her child.

If, however, the child must be reared artificially, then cow's milk from cows suitably fed should be obtained; this was the best substitute; the cows being kept clean and free from disease.

The milk should be obtained from clean dairies, milked by clean hands, put into clean vessels, stored in clean places, and conveyed to the baby's mouth in vessels which should not be the microbe traps too often now used.

He sincerely trusted that the Milk Bill and the Housing Bill would be passed this session.

He said, in conclusion, that intelligence should be aroused in the husband as well as in the mothers, and temperance, if not total abstinence, should be inculcated.

#### On TUESDAY, 24TH MARCH.

The Chair was taken by His Worship the Mayor of Westminster.

The Subjects discussed were :--

#### (1) THE HUMAN MOTHER, introduced by C. W. SALEEBY, M.D.

He stated that "we are dealing as moral beings with a phenomenon of which Nature is horribly and almost incredibly prodigal. Its causes in our case, however, are wholly distinct from the sub-human early mortality. This is due to lack of nutriment or to destruction by other species for purposes of food."

He said that the unique helplessness of the human infant demands a correlatively unique development of motherhood in woman, and it involves the proposition that the post-natal aspect of human motherhood is of unique importance in our case.

Concluding, he quoted the lines from Coleridge :-

" A mother is a mother still. The holiest thing alive."

#### (2) THE EDUCATION OF GIRLS AND WOMEN IN THE FUNC-TION AND DUTIES OF WOMANHOOD. By Miss Alice Ravenhill.

She pointed out that no provision was made for the education of women in household duties, or of the rearing of babies. She also pointed out what might be done by way of education of older girls in secondary schools.

(3) EDUCATION FOR MOTHERHOOD AND INSTRUCTION FOR MOTHERS. By Alderman BENJAMIN BROADBENT, sometime Mayor of Huddersfield.

He stated that it is self-evident that the main functions of all women is to become mothers, and it is just as self-evident that for the proper fulfilment of this function there needs a vast amount of knowledge, and this should demand careful training and preparation.

He referred to the education of the actual mother of to-day. He said we have left those mothers ignorant when we might easily have taught them, and there is an enormous deficit to make up until we get the wiser methods of training girls.

As many of the mothers cannot leave their homes to be taught, he said we must go to them. We must carry instructions into her own home, and this should be our deliberate intention.

He detailed what is done in Huddersfield.

Take the town of Huddersfield, with its 100,000 inhabitants, and its 2,200 or 2,300 babies per annum. Every birth comes to the knowledge of the Medical Officer of Health; 95 per cent. are notified within forty-eight hours of occurrence. Within the next two or three days a visit to the home is paid by a fully qualified medical woman, if no medical man is in attendance. If her visit is acceptable, the lady doctor will give such advice

and instruction as may be possible. Where a relative or friend is in attendance the advice and instruction is generally accepted gladly, and where a midwife has had sole charge she is usually pleased to have the professional confirmation of her work. But it is one of the cardinal principles of this work that for the official Lady Assistant Medical Officers of Health there is no right of entry, and it is understood that no threshold must be passed without leave asked and given. By that visit begins the instructon of the mother, and there is left printed matter as simple and direct and forcible as we have known how to make it; and by this there is afforded the means of further instruction. If the case is ordinary, the lady doctor's visit is not repeated, but wherever it is thought suitable, further visits are paid by voluntary workers, who, to the best of their ability, follow up the instructoin already given, and in any case the visitor keeps in sympathetic touch with the mother, and helps her at least to believe in her motherhood. Thus we aim at, and to a very great extent we actually achieve our aim ; that is, we bring within the reach of every mother means of instruction as to the best way to preserve the life and health of her child.

He also said all this work should be done under the Health Authority of the town.

He concluded by a short account of the Huddersfield scheme of work against Infant Mortality.

He pointed out the result of the work in Huddersfield in 1907.

#### RESULT OF WORK, 1907.

During 1907, 21,189 births occurred in the Borough, and 212 infants less than 12 months old died, giving an infant mortality figure of 97.

The records of the Department extend back for 31 years, and how very successful the work has been will be perceived from a reference to the accompanying diagram, which shows that present figure is the lowest on record, for the first time it has fallen below 100. The mean for the ten preceding years, 1897 to 1906 inclusive, was 135, thus there has been effected a reduction of 28 %. The mean for the three years, 1905 to 1907, during which the work has been in progress, is 117, and the ten preceding this, 1895 to 1904 inclusive, was 142.

Huddersfield is an industrial centre with not less than 25 % of the female population at child-bearing ages working in textile factories. It is, therefore, the more surprising to find the infant mortality figure reduced to a rate comparable to that of the healthiest counties and rural districts.

Miss ZANETTI read a paper on "THE NEED FOR FURTHER EXTENSION OF THE POWERS OF BOARDS OF GUARDIANS IN RELATION TO INFANTS," and this paper was well discussed. She dealt largely with the boarding-out of children which takes place to a great extent in manufacturing towns where the mothers go to work. Such a custom used to prevail in Wigan some years ago, but, as far as I know, there is very little of it now.

Miss ZANETTI would have every child visited where it was taken in to be nursed for gain. At present, under the 1897 Infant Life Protection Act, a person must have the care of two or more children before they can be put on the register.

(5) Two papers were read on "THE BEST MEANS OF HELP-ING THE MOTHER BELOW THE POVERTY LINE ":--

1st, by Miss MARGUERITE LE F. BOILEAU, M.A., and

2nd, by Mon. HENRI GOULLET,

The pith of these papers was that the pregnant woman should be fed during her pregnancy by establishing restaurants for the purpose, as Miss Boileau said the three essential requirements of a pregnant or a nursing woman were :—

- (1) Adequate nourishment.
- (2) Freedom from overwork.
- (3) Skilled attention.

M. Henri Goullet's paper was on the same lines.

#### On the 25th MARCH.

The Right Hon. the Lord Mayor of Liverpool was in the Chair. Discussion took place on the three following papers :---

(1) "INFANTILE MORTALITY AS AFFECTED BY THE HABITS OF PARENTS." By E. W. HOPE, Esq., M.D., D.Sc., Medical Officer of Health for Liverpool.

(2) "HOW TO DEAL WITH THE CHILDREN OF PARENTS WHO NEGLECT THEM THROUGH DRINK." By Dr. STANLEY B. ATKINSON.

(3) "THE REGULATION AND CONTROL OF THE MANUFAC-TURE AND SALE OF FOOD AND DRUGS FOR INFANTS." By ERIC PRITCHARD.

Dr. Hope's paper was a very interesting one, and he stated at the commencement :—It is well known that Infant Mortality varies widely, not only in different towns, but in the various wards or districts of the same towns. Poverty or riches, sanitary or insanitary conditions, occupation or the want of it, high birth rate or low, all play their part in bringing these variations about. But every extended inquiry into the intricate subject of infant mortality brings to light the fact that parents living approximately under the same social and sanitary conditions, have such varying success in rearing their infants that the personal factor deserve a careful study He also gave illustrative cases of what the poor can do if they are intelligent, as, for example :--

As an illustrative case of an instinctively intelligent woman, I would quote that of Mrs. E\_\_\_\_\_, of No. 6, T\_\_\_\_\_ Street, who has given birth to seven living children, all of them being quite healthy, the youngest two being twins of four months old. The father is a dock labourer, and his wages are stated not to exceed on the average 12/- per week. The house is very clean and comfortable, and the children well cared for, those of the school age attending school regularly. The mother, when she is able, adds to the income by taking in washing, and, as a matter of fact, was working practically up to the day before the birth of the twins.

The mother, who is suckling the twins, is receiving milk for herself from the Corporation Milk Depot, and she is now receiving certain aid from other sources. Neither of the parents drink, and the condition of the home and the children present a striking example of what can be done even with very little money when none of it is wasted in drink.

The following resolutions were passed by the Conference :--

#### RESOLUTIONS.

- 1.—That this Conference expresses its appreciation of Parliament having passed the Notification of Births Act, 1907, and urges upon all Local Authorities the importance of adopting the Act, and appointing qualified women to carry out its provisions.
- 2.—That in order to combat the prevailing ignorance resulting in wastage of infant life and injury to the health of many survivors, the Conference urges upon the Board of Education, and upon Education Authorities generally, the importance of securing to all girls in every grade of school a satisfactory training in domestic and personal hygiene and the duties of womanhood.
- 3.—That the Conference welcomes most gladly the Children's Bill, introduced into the House of Commons by Mr. Herbert Samuel, M.P., for the amendment of the Infant Life Protection Act, 1897, and recommends the Executive Committee to ask that the Bill be specially amended to include the case in which one child only is put out to nurse for reward; and that the Bill be further amended to empower Local Authorities to charge upon the rates the cost of carrying out the existing statutory provisions for the prevention of cruelty to children.
- 4.—That the Conference being convinced of the injury done to Infant Life and Health through infants being taken into Public-Houses, urges upon Parliament the necessity of providing such legislation as will prevent this.
- 5.—That this Conference urges upon Boards of Guardians the advisability of making greater use of their existing powers to adopt, under the Poor Law Act, 1899, the children of incorrigible parents.
- 6.—That all preparations offered or sold as food or drugs for infants should be certified by a Government Analyst as non-injurious, and that each packet should contain its analysis.

- 7.—That, in view of the unsatisfactory conditions under which milk is produced and distributed, the Conference, being of opinion that immediate amendment of the Law is desirable, urges upon Parliament the necessity of at once taking such steps as are necessary to affect this.
- That the Conference re-affirm the resolution of the former Conference, that the Midwives Act, 1902, be extended to Scotland and Ireland.
- 9.—That the Conference continue as a Committee to give effect to the foregoing resolutions, with power to remit to an Executive Committee to carry out the same.

The Cliff,

Higher Broughton,

Manchester,

April, 1909.

To the Chairman and Members of the Health Committee. MR. CHAIRMAN AND GENTLEMEN,

I have the honour to submit a synopsis of the public analytical work of the Corporation during the year 1908.

I take this opportunity to thank you for your confidence in appointing me your District Agricultural Analyst (Fertilizers and Feeding Stuffs Acts). I beg also to acknowledge the considerate co-operation of Dr. Berry and the willing help of the staff of the Health Department, particularly that of Chief Inspector Sumner.

I remain,

Mr. Chairman and Gentlemen,

Your obedient Servant,

S. ERNEST MELLING.

# FOOD AND DRUGS.

During the year 1908, I analysed and reported upon 217 samples, which comprised 155 milks, 26 butters, 6 each of whisky and jam, 5 margarines, 3 each of ginger and ground almonds, 2 each of mustard and compound liquorice powder, milk of sulphurs, pepper, and miscelaneous drugs, and one each of Gregory Powder, brandy, and sausage. Fifteen samples were found to be " not of the nature and quality of the substance demanded," and the following table will show which articles were reported against, the percentage of adulteration. and a comparison between 1908 and 1907 :—

Last year I dealt fairly completely with each article, indicating its composition and defining its characteristics, and as very little fresh ground has been broken in the routine of sampling, I will give, in this report, merely the results of analysis of each article.

The percentage of adulteration in milk has increased four-fold, although a score more samples have been taken. Skimming, or, what comes to the same thing, the addition of separated milk to new milk, accounts for six cases, the samples being deficient in fat to the extent of 3%, 3%, 13%, 5%, 6%, and 13% respectively. A deficiency of 13% is a serious matter at any time, and such cases require thorough investigation. Extraneous water was found on three occasions to the extent of 13%, 5%, and 8% respectively. The remaining milk had suffered extensive adulteration, and was about the worst in my experience of many thousands of official samples. lt contained 30 per cent. of added water, was deficient in fat (the result of the copious "watering"), and was preserved with boric acid in amount equal to ten grains per gallon. It is well for the general public that such cases are few and far between! Apart from the above samples the general milk supply has been uniformly satisfactory. The Board of Agriculture limits of 3 per cent. milk-fat, and 8 5 per cent. of non-fatty solids-below which milk is presumed to be sophisticatedcan hardly be held as severe, when the Wigan average throughout the year is 3.8 per cent. of fat, and 8.8 per cent. of non-fatty solids. A considerable quantity of water could be added to a milk of this quality without depressing the fat figure below 3 per cent., hence the plea, often raised for the defence in cases of adulteration with water, that the fat of the sample is "above the normal quantity " signifies nothing.

The freedom of the milk supply from preservatives is a pleasing feature. With cleanliness in production, storing, etc., such compounds are absolutely unnecessary, even in the warm summer months.

One butter only was adulterated, this proving to be a high-grade margarine. "Process" butters, which formerly gave a great deal of trouble to the analyst on account of the skilful manner in which they were blended, are not so prevalent, this salutary effect being due, no doubt, in great measure to the working of the Act which came into operation last year. Only normal proportions of water were found in each case, and in no instance did the proportion of boron compounds when present rise above the recommended limit of 0.5 per cent. or 35 grains per pound, calculated as boric acid.

One sample of margarine contained over 10 per cent. of butter-fat, and so came within the section of the Act which forbids more than that quantity.

None of the samples of spirits submitted for analysis were below the minimum alcoholic strength as defined by Act of Parliament. One brandy was further examined for the presence of silent spirit, but with negative results. The question, "What is whisky?" has not yet been solved, and so far no definite analytical standards have been adopted in arriving at an answer.

Two samples of jam contained salicylic acid as a preservative, one showing an excessive quantity, viz., 3 grains per pound. Here, again, many reputable firms prove the non-necessity of the use of this agent by putting jams on the market innocent of this type of sophistication. On the other hand, some preserves are so badly prepared and loaded with water to such an extent that an antiseptic is essential to retard the rapid growth of mould.

Of the drugs the sample of Gregory powder was adulterated, and this not in a dangerous sense, According to the present issue of the British Pharmacopœia, Gregory powder must contain 66 per cent. of light magnesia (oxide), whereas only 27 per cent. was present in the sample, the deficiency being made up with hydrated carbonate of magnesia—a heavier compound in the ratio of three and a half to one.

All samples of ginger, ground almonds, mustard, and pepper were free from foreign starch, mineral, and vegetable debris, and the sample of sausage was free from boric acid or its compounds.

# WATER.

The Corporation water supply is subject to slight variations month by month, as the accompanying table will show. Relying upon the Albuminoid Ammonia figure as the index of organic contamination, the highest figure was in April, and it is significant that there was the greatest yield of free or saline ammonia in this sample. By a more extended examination it seemed that this contamination was of vegetable origin and only temporary. The next month, the albuminoid ammonia had dropped to '06, but there were still heavy traces of free ammonia. Thence onwards the latter disappears, and the albuminoid maintains a constant approximating .07 to .075 part per million. A satisfactory constant is the Nitrogen as Nitrites which gave no indication throughout the year of either a nitrifying or denitrifying process.

The salts in solution contributing to the hardness of the water vary very little in the general water supply, the carbonates of lime and magnesia (alkalinity) being practically 3 to 3.5 grains per gallon. The Pemberton supply is altogether heavier in both types of hardness, but, organically, is the same as in Wigan.

# Annual Report of the Chief Sanitary Inspector,

1908.

HEALTH DEPARTMENT,

KING STREET WEST,

MARCH, 1909.

To the Chairman and Members of the Health Committee.

SIR AND GENTLEMEN,

I have the honour to submit to you my Eighteenth Annual Report of the work done by the staff of this department.

The work has been carried on systematically and with as little friction to the townspeople as possible, whilst the tact displayed by your Inspectors has been the means of nuisances being abated in less time than is usual.

The following is a summary of the work done and a description of the nuisances dealt with :---

| Houses and Premises Inspected   | and V   | isited | (re  |       |
|---------------------------------|---------|--------|------|-------|
| Nuisances and Complaints)       |         |        |      | 6,442 |
| Nuisances Discovered            |         |        |      | 1,356 |
| " Abated                        |         |        |      | 1,186 |
| Notices Issued (Preliminary)    |         |        |      |       |
| ,, (Formal)                     |         |        |      | 334   |

# COMMON LODGING HOUSES AND HOUSES "LET-IN-LODGINGS."

The Common Lodging Houses of the Borough and also the Houses "Let-in-Lodgings" have been regularly visited by day, and also surprise visits paid by night. Night visits have not been so frequent during the past year, as the houses have been found in a better condition than usual. Mr. Bishop has, I must say, had better results than ever in the effort to keep these houses up to the standard we require.

#### SLAUGHTER HOUSES.

Appended is the work which has been carried out in connection with the above. The question of a Public Abattoir is still before the Committee, and until one is erected the work thrown on the staff in inspecting carcases by request of the butchers is bound to be heavy.

The occupiers of the slaughter houses try, I think, to the best of their ability to comply with the bye-laws, but have to be frequently cautioned about the removal of garbage as soon after killing as possible.

## CANAL BOATS ACTS, 1877 to 1884.

The boats inspected during the year have generally been found clean, and very few children of school age have been found on board, and then only at holiday time. H.M. Inspector (Mr. Llewellyn) visited the office and went over the books and expressed his satisfaction at the way in which the work had been carried out.

#### SMOKE NUISANCES.

The number of letters sent out with respect to the nuisances arising from dense smoke does not represent the whole of the work in connection with the observations taken as numerous cautions have been given to the firemen.

## INFECTIOUS DISEASES.

The services of an Inspector are almost fully employed in paying surprise visits to the houses where infectious diseases have been notified, and seeing that the instructions issued by the Medical Officer of Health are properly carried out. The disinfection of the rooms and bedding, etc., have kept the men who are entrusted with this work fully occupied.

## FERTILISERS AND FOOD STUFFS ACT.

Several samples which have been reported on by the Borough Analyst, and which appear in his report, have been taken by me. They were all satisfactory.

# FACTORY AND WORKSHOP ACTS.

The provisions of the above Acts which come under the supervision of this department have been fully carried out by Inspector Bishop with very satisfactory results. No prosecutions have been necessary. Numerous notices have been received from H.M. Inspectors (Male and Female), and the M.O.H. and myself have had interviews with Mr. Clarke (H.M. Inspector for this district) drawing attention to the want of uniformity of inspection.
