4, The Square,
Winchester.
8th July, 1943.

To the Mayor, Aldermen and Councillors of the City of Winchester.

Mr. Mayor, Ladies and Gentlemen,

I have pleasure in submitting the Annual Report on the Health of the City for the year 1942. The work was shared by my two predecessors. I have merely collected and presented their results.

In accordance with the request of the Ministry of Health the report has been condensed as much as possible consistant with the presentation of necessary statistics and information to give a true position of local affairs with certain interesting comparisons. It deals with Public Health, Maternity and Child Welfare and School Medical work.

The report makes pleasant reading. The Birth Rate has risen to 16.74 per 1,000, while the Infant Mortality Rate again shows a slight decline. It is regrettable that we have to record two cases of Maternal Mortality.

The Death Rate is slightly decreased, causes of death remain fairly constant. The most important change is a decrease in heart disease and increase in cancer. Both these causes relate almost entirely to the groups over 45 years, the majority die in the over 65 age group.

Clinics functioned as usual during the year. There were no Typhoid Inoculation Clinics, but the Scabies Clinic at Holy Trinity was attended weekly by City and Rural District cases as need arose. Diphtheria Immunisation Clinics increased in number towards the end of the year, but there are still a great many children to be treated before we can feel the real benefit of immunisation.

There were no epidemics of the major infectious diseases—the 45 cases of Scarlet Fever were distributed over the year. It is noteworthy that none of the three cases of Diphtheria had been immunised.

The Victoria Isolation Hospital continues its good work, the number of patients again showing an increase of over 100. Comparatively few of the admissions came from the City.

The Dental Department is proving its worth each year; its results will be reaped in future years in the healthier adult population.

The Report of your Chief Sanitary Inspector, Mr. Rees, comprises the greater part of Part I, Section D, and is compiled by him.

Lastly, I should like to convey my thanks to all members of the three Committees and especially to their Chairmen, for their unfailing help and unflagging interest. Many changes of staff have not prevented work from proceeding with its normal routine, this being due to the loyalty of the staff and the continuous assistance from officials of other Corporation Departments.

## EVELYN CHURCHES,

# HEALTH COMMITTEE, 1942-1948.

The Mayor: COUNCILLOR GRIFFITHS.
Chairman: COUNCILLOR DRING.

Alderman Newton.

Alderman Sankey.

Councillor Bones.

Councillor Dutton.

Councillor Walter.

## STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area of the Borough-3,888 acres.

Population—Census, 1931—22,969.

Registrar-General's estimate of Resident Population mid 1942—26,090.

Number of Inhabited Houses (end of 1942 according to the Rate Books)-6,649.

Rateable Value at 1st April, 1942—£258,779.

Sum represented by a Penny Rate—£1,502 0s. 11d.

Social Conditions.—There are no special industries in the City in the ordinary acceptance of the term.

There are 214 small factories and workshops which are concerned almost entirely with work for the day to day requirements of a residential neighbourhood, such as Laundries, Bakeries, Clothing Workshops, etc.

Unemployment and Public Assistance.—I am indebted to Mr. A. C. Dean, Manager of the Ministry of Labour Employment Exchange for Winchester, for information relating to unemployment, and to Mr. O. J. A. Carter, the County Public Assistance Officer, for the details of Public Assistance cases.

Unemployed registered in the first week in January:

Year 1936	Men 541	Women 94	Total 635
1937	478	70	548

# GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

## Public Health Officers of the Authority.

Medical Officer of Health. School Medical Officer.

Medical Officer of Maternity and Child Welfare.

Medical Superintendent of the Isolation Hospital. Police Surgeon.

Robert A. Good, M.B., B.Ch., B.A.O.(N.U.Irl.), D.P.H. (to 31/8/42). S. B. Jackson Smith, M.D., D.P.H. (from 24/8/42 to 24/11/42). Evelyn Churches, M.B., Ch.B., L.M. (from 24/11/42).

Medical Officer of Ante-Natal Clinic:

C. J. Penny, O.B.E., M.D.

Surgeon, Isolation Hospital:

B. H. Pideock, M.B., F.R.C.S.

Dental Surgeon:

B. T. Wyatt, L.D.S.

Veterinary Surgeon:

J. B. Tutt, F.R.C.V.S.

Sanitary Inspectors:

P. Rees, F.S.I.A., Cert.R.S.I., S.I. (Meat and Foods).

C. Bennett, Cert. R.S.I.

Health Visitor and School Nurses:

E. Slater, S.R.N., S.C.M., H.V.

D. Day, S.R.N., S.C.M., H.V. (to 14/10/42).

G. Gillies, S.R.N., S.C.M., H.V. (from 1/12/42).

School Nurse:

E. Reynolds, S.R.N., S.R.F.N., S.C.M. (to 4/12/42).

Dental Attendant and Nurse:

N. Winkworth.

Municipal Midwives:

H. Oliver, S.C.M.

E. Jacobs, S.R.N., S.C.M.

E. Burns, S.C.M.

Matron, Isolation Hospital:

A. E. Stacey, S.R.N.

Chief Clerk:

D. Pearce.

Clerical Staff:

J. Coombes. J. Wright (to 14/8/42). E. Carpenter.

## Laboratory Facilities.

Bacteriological examinations were carried out at the Hants County Laboratory and at the Emergency Laboratory. Most of the bacteriological work of the Victoria Hospital is now done at the Emergency Laboratory under the supervision of Dr. Duncan.

#### Ambulance Facilities.

There are three ambulances in the City, viz:-

- 1. St. John Ambulance (Winchester Division), vehicle run by the Joint Ambulance Committee.
- 2. Corporation Ambulance for use in connection with the Isolation Hospital.
- 3. American Ambulance.

## Home Nursing.

The arrangements outlined in the Report for 1938 remain unchanged.

## Clinic and Treatment Centres.

- (a) SCHOOL CLINIC. Daily, 9-10.30 (during School Sessions).
- (b) ANTE-NATAL CLINIC. The second and fourth Tuesday in each month, 2 p.m., at the Health Department.
- (c) INFANT WELFARE CENTRE. Wednesday and Friday in each week, 2 p.m., at the Health Department.
- (d) ORTHOPAEDIC CLINIC. The second Tuesday alternate months, The Castle, Winchester. Remedial Clinic, 9.30 a.m., each Saturday morning.

This Clinic is administered by the County Council.

## Diphtheria Inoculation.

Clinics for the inoculation of school and pre-school children against Diphtheria were held on the first Friday in each month for the first part of the year, at 10.15 a.m., at the Health Department, 4, The Square. Later they were more frequent as necessity required.

## Scabies Clinic.

A Clinic for the treatment of Scabies is held each Tuesday, Wednesday and Thursday morning at the Holy Trinity First Aid Post.

## Hospitals.

- (a) PUBLIC:-
  - (I) Public Assistance Institution Wards, 286 beds (including emergency).
  - (II) County Council Maternity Ward—
    - (a) 1, St. Paul's Hill, 4 beds.
    - (b) Tregony, Bereweeke Road, 10 beds.
  - (III) City Isolation Hospital, 52 beds.
- (b) VOLUNTARY:-
  - (I) Royal Hants County Hospital— Medical, Surgical and Children, 197 beds. Maternity, 10 beds.

#### SANITARY CIRCUMSTANCES OF THE AREA.

## Water and Water Supply.

- (a) RIVER WATER.—Frequent observations and analysis are made of the river water (River Itchen). Both indicate a water that can be considered normal having regard to the area through which the river passes.
- (b) PUBLIC WATER SUPPLY.—Frequent chemical and bacteriological examinations are made by the Health and Water Departments of the Corporation. All analysis during the year 1942 proved satisfactory.

## Collection and Disposal of House Refuse and Salvage.

The collection and disposal of waste paper, books and magazines, scrap metal and kitchen waste, bones and paper, for war purposes was continued in 1942. Owing to the growing demand for economy in the use of petrol and shortage of labour it was necessary to reduce the number of collections of refuse and salvage.

## Swimming Baths and Pools.

There are two Swimming Baths available to the Public, viz.:—Lido; Bull Drove. The North Walls Recreation Bath has been taken over by the Education Authorities for the exclusive use of School Children.

The Lido is an open-air bath, the water being filtered and chlorinated.

North Walls Bath and Bull Drove are supplied with water from the River Itchen, which water is not treated in any way.

## SANITARY INSPECTION OF AREA.

## Complaints.

112 complaints of nuisances were received during the year, most of them relating to structural defects in houses. On inspection five were found not to be nuisances under the Public Health Acts, and the remaining 107 were dealt with and remedied by notices to the owners.

## Overcrowding.

Accurate information of the extent of the overcrowding in the City is very difficult to obtain, but enquiries from house agents and information derived from other sources indicates there has been a substantial reduction, both in the number of overcrowded houses, and the degree of overcrowding. It would be true to say that the gross overcrowding found in 1940—1941 no longer exists, and that present-day overcrowding is, to a large extent, the product of the marriage of adult members of the family, and the sharing by them of the house of one or other of the parents. Shortage of houses is undoubtedly a factor in this arrangement, but the economic side is of considerable importance.

#### Verminous Conditions.

There was a marked decline in the number of houses reported as verminous, whilst it cannot be claimed that this is due to the reduced overcrowding, it is nevertheless true that overcrowding does favour the introduction into, and the spread of vermin in houses. With crowded rooms it is impossible to maintain that standard of cleanliness which is essential if these pests are to be excluded, and to promptly eradicate them should they gain access. Another factor is the possible lessened demand for second-hand bedding, though with these goods in short supply, and securing high prices this reduced demand is not likely to continue. Whilst there is no reliable evidence as to how far second-hand clothing, and bedding, can be held responsible for spreading vermin it does seem desirable as a precautionary measure that all such things should be steam-disinfected on a change of ownership.

#### Hostels.

There was a progressive reduction in the number of evacuees using the two hostels provided by the Council, and their temporary closure is probable. Frequent visits were paid to both and, on the whole, conditions were satisfactory.

Routine Inspections.

Food Shops, etc.—Regular inspection of all premises was maintained and, on the whole, despite shortage of skilled staff, the standard of cleanliness was well maintained. Visits in connection with this work totalled 4231.

Housing.

The withdrawal of builders' workmen from local work for more essential war work has resulted in a considerable slowing down of house repairs, and even urgent repairs to roofs, and choked drains were only carried out after long delay. When to this is added the shortage of materials it will be apparent that no adequate repair of property is possible. The continued suspension of repair work must result in an increase of the number of houses which will not be worth repairing after the war. Urgent repairs were secured to 55 houses, and under present circumstances it is impossible to ask for more.

## Premises Governed by Byelaws.

Thirty visits were paid to 8 Cowsheds in the area and, on the whole, the standard of cleanliness was well maintained.

Dairies and Milk Shops.

The number of Dairies and Milk Shops are now 10, of which 5 are owned by one firm. Regular visits are paid to them, and their condition is generally very satisfactory.

#### Bakehouses.

Cowsheds.

Regular inspection of the 8 bakehouses is carried out, and the only grounds for complaint was the delay in carrying out the prescribed lime-washing. This was explainable on the score of shortage of labour, hich has since been remedied

Slaughter-houses.

Inspection of carcasses in the Government Slaughter-house necessitates almost daily visits by one or other of your inspectors, and the following table gives particulars of the animals slaughtered during the period January 1st to December 31st, 1942:—

Beasts	 *****		1343
Claves	 	*****	1029
Sheep	 *****		8859
Pigs	 		486
			11717

During the same period meat condemned at the Government Slaughter-house amounted to:—

Tons	Cwts.	Qtrs.	Lbs.
14	10	1	9

The whole of this meat was treated with a green dye, and removed for salvage by a Government contractor.

Foodstuffs condemned, and surrendered by shop-keepers, most of which was sent for pig feeding, comprised:—

Tinned Meat	 	594 lbs.
Other Tinned Foods	 	1178 tins.
Evaporated Milk	 	901 tins.
Bacon	 	340 lbs.
Eggs	 	1075
Fish	 	709 lbs.
Fish Cakes	 	388
Cheese	 	177 lbs.
Potatoes	 	3 cwt. 3 qrts.
Margarine	 	9 lbs.
Prunes	 ******	12 lbs.

Common Lodging Houses.

Frequent inspections were carried out, and two gave no cause for complaint. Following the refusal of the Council to renew the registration of the keeper of the Common Lodging House at 4, Upper Brook Street, an application by his wife to act as keeper was refused by the Council. This decision was appealed against, and at the Court hearing on May 5th the Council's refusal was upheld. A further application, by the son-in-law of the keeper was refused by the Council, and on appeal, the Court decided to grant registration. There has been considerable improvement in the general condition of the premises since the arrival of the new keeper.

Tents, Vans, Sheds.

There was a further reduction in the number of this class of dwelling, and, with the exception of a few in the Weeke and St. Cross Districts, the remainder were on the Fair-field at Bar End. Some complaints arising from the general neglect of the site at Bar End, and the question of licensing the owner was considered with the object of securing closer supervision and an improved standard.

At the end of 1942 some progress had been made, but no

decision had then been reached.

Houses Let in Lodgings.

The number of houses coming within this classification declined by the end of 1942 to the pre-war figure of about a dozen, and effective control of them was secured without registration.

#### Offensive Trades.

No offensive trades are carried on in the City.

#### Disinfection.

Private disinfection of rooms and bedding—realised £55 5s.

Food and Drugs Act, 1938.

The following table gives particulars of the samples taken under the Act, and submitted for analysis by the Public Analyst:—

Milk		29	Camphorated Oil	1
Milk, Dried		4	Baking Powder	1
Sausage		9	Zine Ointment	1
Lard		5	Glauber Salts	1
Butter		5	Gregory Powder	1
Margarine	******	5	Tincture of Iodine	1
Egg Substitute		2	Carbonate of Magnesia	1
Ammoniated Tineture	e of		Salad Powder	1
Quinine		3	Dessert Powder	1
Peanut Butter		1	Milk Pudding Powder	1
Cocoa		2	Sponge Pudding	1
Orangeast	******	1	Soya Nut Meat	1
Drisance		1	Aspirin	1

Of the Milk samples one only was adversely reported on—containing 6.1 per cent. of added water. A warning letter was sent to the vendor and further samples taken. Two samples of Ammoniated Tincture of Quinine were reported as being deficient in Ammonia to the extent of 17.7 per cent. and 6.6 per cent. In the Analyst's opinion the deficiency was due to prolonged storage, and the vendors were requested to stock in smaller quantities.

In addition to the above the following samples were sent to the Hants County Analyst:—

Pasteurised Milk for count and Phosphatase test
Accredited Milk for Methelyne blue test
12

Of the Pasteurised Milk samples three failed on count and five on the Phosphatase test.

No thickening substances or preservatives were found in any of the Milk samples.

Elementary Schools.

Thirty visits were paid to the Elementary Schools in connection with the yearly cleansing and the general standard was satisfactory.

Rag Flock Act.

No rag flock is manufactured in the City, and no samples were taken, as the users of this material purchase it under a guarantee of conformity with the Act. Factory Act.

A number of additional factories have been started in the City, but the increase in this direction has been offset by the closing of many of the smaller premises, or their continuance with the owner as the only person working. One hundred and twenty-three visits were paid to factories and 11 were found to need cleansing of rooms, and, or sanitary conveniences. Labour difficulties, and material shortage were the chief causes of these lapses, but persuasion sufficed to effect improvements.

Shops' Act.

The provision of, and improvement of existing heating, washing and sanitary facilities in shops has had to be suspended for the time being, and, of the few shops (mainly of the lock-up type) without adequate facilities the position has somewhat improved by the reduction in the number of employees, and changes from mixed staffs to females only.

# PREVALENCE OF AND CONTROL OVER INFECTIOUS AND OTHER DISEASES.

The following tables indicate the number of cases of infectious diseases notified during the year, and also details of the work carried out at the Victoria Hospital.

Notification of Infectious Disease during 1942.

There were 2 maternal deaths during 1942.

## Institutional Provisions for Mothers and Children.

Normal cases during the year have been admitted to the Nursing Home at "Tregony," Bereweeke Road; one ward at the Public Assistance Institution being reserved for cases of Puerperal Sepsis. Both of these Institutions are administered by the County Council.

Evacuees are admitted to Shawford Park Maternity Home, and these arrangements are also the province of the County Council. Prospective patients evacuated "privately" are admitted to Institutions under the arrangements made by the City Council, but the cost of their maintenance and treatment is recoverable from the Local Authority of the area from which they evacuated themselves.

Abnormal "City" cases are still admitted to the Royal Hampshire County Hospital as before.

There are two Nursery Schools in the City.

#### Health Visitors.

There has been some change in the personnel of the Health Visitors. Nurse Day left on October 14th, she was replaced by Nurse Gillies, who arrived on December 1st. Nurse Reynolds, the School Nurse, left on December 4th. New arrangements were made about the position of School Nurse and Health Visitor. It was decided that greater ease in work and better continuity of treatment would be obtained if the Health Nurses combined the duties of School Nurse and Health Visitor. Therefore the two Health Visitors who remained at the end of the year combined both positions.

#### Child Life Protection.

On January 1st, 1943, there were 6 children on the Local Authority's Register. All cases were visited regularly during the year by the Health Visitors.

## EDUCATION COMMITTEE, 1941-42.

# Table III. RETURN OF ALL EXCEPTIONAL CHILDREN IN THE AREA.

#### BLIND CHILDREN.

A blind child is one who is too blind to be able to read the ordinary school books used by children. This definition covers some children who are totally or almost totally blind and can only be appropriately taught in a school for blind children, and others who have partial sight and can be appropriately taught in a school for partially sighted children. Only the first class are included in this section.

#### PARTIALLY SIGHTED CHILDREN.

Children who, though they cannot read ordinary school books or cannot read them without injury to their eyesight, have such power of vision that they can appropriately be taught in a school for the partially sighted.

Children who are able by means of suitable glasses to read the ordinary school books used by children without fatigue or injury are not included in this Table.

#### DEAF CHILDREN.

A deaf child is defined by Section 69 of the Education Act, 1921, as one who is too deaf to be taught in a class of hearing children in an Elementary School. This definition covers some children who are totally, or almost totally, deaf and can only be appropriately taught in a school for deaf children, and others who have partial hearing and can be appropriately taught in a school for partially deaf children.

#### MENTALLY DEFECTIVE CHILDREN.

#### Feeble-minded Children.

Mentally Defective children are children who, not being imbecile and not being merely dull or backward, are incapable by reason of mental defect of receiving proper benefit from the instruction in the ordinary Public Elementary Schools, but are not incapable by reason of that defect of receiving benefit from instruction in Special Schools for mentally defective children.
