No change

Section IX - Cases of notifiable and other infectious diseases as shown

Table 2

Number of cases reported	Number of cases notified	Number of cases notified	Number of cases notified	Number of cases notified
121	121	121	121	121
121	121	121	121	121
121	121	121	121	121
121	121	121	121	121

Section X - Observations on the occurrence of malaria in ships

No cases of malaria have occurred

Section XI - Measures taken against ships infected with
or suspected for plague

There were no ships infected with or suspected for plague.

Section XII - Measures against rodents in ships from foreign ports

(1) Procedure for inspection of ships for rats:

The Public Health Inspector, as a normal measure, makes an inspection of ships from foreign ports. Should the presence of rats be found or suspected, he would take any necessary action.

(2) Arrangements for the bacteriological or pathological examination of rodents, with special reference to rodent plague, including the number of rodents sent for examination during the year:

Any case coming under this heading would be sent to the Public Health Laboratory, Tennis Court Road, Cambridge. No rodents were sent for examination during the year.

(3) Arrangements in the district for deratting ships, the methods used and, if done by a commercial contractor, the name of the contractor:

The deratting of ships is the responsibility of the Public Health Inspector, who uses the fumigation method and/or poison bait method.

(4) Progress in the rat-proofing of ships:

Table E

Rodents destroyed during the year in ships from foreign ports

<u>Category</u>	<u>Number</u>
Black rats	Nil
Brown rats	Nil
Species not known	Nil
Sent for examination	Nil
Infected with plague	Nil

Table F

Deratting certificates and deratting exemption certificates
issued during the year for ships from foreign ports

This is not applicable as the port is not an "approved port" or a "designated approved port".

Section X - Observations on the occurrence of malaria in ships

No cases of malaria have occurred

Section XI - Measures taken against ships infested with
or suspected for plague

There were no ships infested with or suspected for plague.

Section XII - Measures against rodents in ships from foreign ports

(1) Procedures for inspection of ships for rats

The Public Health Inspector, as a normal measure, makes an inspection of ships from foreign ports. Should the presence of rats be found or suspected, he would take any necessary action.

(2) Arrangements for the bacteriological or pathological examination of rodents, with special reference to rodent plague, including the number of rodents sent for examination during the year

Any cases occurring and - this heading would be used
