CORNWALL COUNTY LUNATIC ASYLUM.

ANNUAL REPORT OF VISITORS.

THE Visitors of the Asylum have to Report that the New Buildings, as ordered by the Court, to accommodate 128 additional Pauper Patients, are progressing most favourably. The larger portion is covered in, and no exertion will be spared to prepare the Buildings for occupation at the earliest period that they can be safely occupied with due regard to the health of the Patients.

It will be necessary however to obtain a special grant from the Court for furnishing the Wards. This may be done gradually, and probably the best way would be to lay an estimate before the Court at the Easter Sessions.

The addition to the Wash-house and Laundry Department has been completed, and will suffice for the wants of the Establishment, including the New Buildings. It has cost £548. and the re-arrangement of the old part will be covered by the balance of the £600. granted by the Court.

An agreement has been signed for the purchase of quarter an Acre of Land for the Reservoir, but it has not yet been conveyed. The quarrying required for the New Building being now finished, the Reservoir will be begun as soon as the conveyance is executed.

Improvements have been continued in the older parts of the Asylum by removing more of the Prison-like Windows, and the Kitchen has been entirely re-modelled.

The Visitors have again to Report their entire satisfaction with the Officers and Servants of the Establishment.

They have, after full consideration, increased the stipend of the Chaplain from £200. to £250. a year.

They have experienced no little difficulty in procuring and retaining the services of Female Attendants and Nurses. Facilities for locomotion and increased inter-communication with other parts of England have raised the rate of Wages, and the Visitors have therefore found it necessary to offer not only greater inducement to suitable persons to enter their service, but also to remain in it, when their experience renders them so much more valuable than strangers.

It will be in the recollection of the Court that a Committee was appointed at the Epiphany Sessions 1867, to enquire into the arrangements existing between the County and the Subscribers to the Asylum, with a view to advising the Court whether any change ought not in justice to be made in the proportionate shares born by each in the current repairs of the Asylum. The Committee met and decided that the expenses of the Private Patients should be kept separate in order to arrive at a satisfactory conclusion. It is now desired that the Committee should be again called together to report upon the result.

The average number of Patients in the past year has been 457.

The number now in the Asylum is 462.

The average weekly cost, per head, including the Private Patients, has been 10s. 4d., the average weekly cost, per head, of Paupers, has been 9s. 9 $\frac{3}{4}$ d., and the average charge for the year 9s. 6 $\frac{3}{4}$ d. per week.

The average cost of meat for the year 1870, was 55s. 9 $\frac{1}{2}$ d. per cwt. and in 1871, it was 60s. 7d.; a difference of 4s. 9 $\frac{1}{2}$ d. per cwt.

Signed,

W. H. POLE CAREW, *Chairman.*

FRANCIS RETALLACK.

Dated December 30, 1871.

REPORT OF THE MEDICAL SUPERINTENDENT.

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN :

	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
There remained in the Asylum, December 31, 1870, (inclusive of Two Males on Trial,)	202	245	447
Admitted during 1871,	43	56	99
	245	301	546
Discharged,	24	20	44
Died,	19	21	40
	202	260	462
Remaining,	202	260	462

Of whom 21 Males and 27 Females are Private Patients.

The total number of Patients under treatment during the year has been 546, the lowest number resident at one time 439, the highest 466, and the average 457.

Of those admitted, 40, or nearly one half were from the first deemed to be incurable either from long continuance of the disease, old age, or the existence of serious bodily ailments; in 49 instances some cause was assigned for the attack, and in 30 cases previous attacks were known to have occurred.

Nineteen men and 21 women have died, (less by 18 than during 1870.) The proportion of deaths to the total number of Patients under treatment has been at the rate of 7.32 per cent; of the deaths 22 were due to diseases of the Brain and Nervous system; 12 to Phthisis Pulmonalis and affections of the Lungs; 2 to Senile Decay; and one man committed suicide while out on Trial,

he had been for some months in the Asylum, was much improved and never having throughout his illness exhibited any dangerous symptoms whatever, was at the request of his friends discharged on trial; during the short time he was at home he appeared cheerful and seemed quite well, and his friends were unable to assign any reason for the act by which his life was terminated; in one other case, where death took place within two days of admission, an Inquest was held, but in neither instance was blame attributed to any one; among those who have died during the year are several old residents, one of whom had lived in the Asylum upwards of 40 years, and three others 28, 23, and 21 respectively.

Although Epidemic Fevers have been prevalent in our immediate neighbourhood, I am thankful to report there has been nothing like an Epidemic among the Patients; in the Autumn there was one case of Fever of a Typhoid Type which terminated fatally, and there have since been a few cases of Diarrhoea and slight feverish attacks.

Forty-four Patients have been discharged, of whom one man is on trial; of these discharged, 29 were recovered; the recoveries for the year have been at the rate of 29.29 per cent. on the admissions.

In the treatment of the Patients while Medical remedies have been freely employed wherever there seemed the slightest chance of their proving beneficial, occupation and amusements have not been neglected; of the men about 120 have been regularly employed either in the works in connection with the New Buildings, or in the shops, gardens, &c.; of the women, 167 are regularly employed in sewing, assisting in the domestic duties of the Wards, Laundry, or Kitchens. The additions and alterations made to the Laundry during the past year (although only in part completed) have been found most advantageous not only permitting of the employment of a larger number of Patients, but also enabling the work of the department, which in an Asylum of this size is a most important one, to be carried on more efficiently than for many years has been possible.

Occasional amusements have been provided for those capable of deriving benefit from them, and each year's experience more and more convinces me that these periodical meetings of the Patients for amusements are most useful; to the excitable and those weak in self-control the knowledge that their being present on such occasions will depend upon good behaviour is very beneficial, while to the depressed and melancholy whose days are occupied with morbid fancies and in magnifying imaginary troubles their being compelled to be present, (although sometimes regarded as a hardship,) is not less beneficial.

Restraint has not been had recourse to except for Surgical

purposes. Seclusion has been employed in 13 instances only, and the amount for the year has been less than 17 hours. The following table, arranged in quinquennial periods, shews the number of Patients treated and amount of Seclusion employed during the past 15 years.

Years.	No. of Patients treated.	Amount of Seclusion.
1857 — 61	1,868	4,157 hours.
1862 — 66	2,324	1,524 hours.
1867 — 71	2,715	179 hours.

The abolition of Restraint, and the reduction of Seclusion to a minimum may fairly be regarded as the result of the altered condition of the Establishment from the numerous improvements effected of late years. No amount of merely medical measures could have obtained such results with the Building in the state it was in some years ago. Structural improvements whereby increased light and ventilation have been obtained, increased comforts in the wards themselves, the removal of iron doors and window frames, and much else that was prison-like, (but thought necessary in former years,) together with an improved dietary, and a greater attention to the individual Patients themselves, have taken the place of the Strait-Waistcoat and Seclusion, and have, I am sure, contributed very much to the comfort and lessened excitement of those committed to our care.

In the summer, owing to the fact that so large a number of *those* admitted were incurable, and that the number of deaths were below the average, the wards occupied by the Females of the Pauper class became quite full; very urgent requests for the admission of Patients were received from all parts of the County, especially from the Redruth Union. Fortunately, the use of the Militia Hospital, in BODMIN, was obtained for the sleeping accommodation of a limited number of Male Patients, who are sent down every evening and return again in the morning. This arrangement has enabled me to devote to the use of the Women a Ward formerly occupied by Men; and by April, when the Hospital will have to be given up, it is expected that some part of the New Building will be so far completed as to be able to be occupied. Notwithstanding the large increase in the number of insane in the Asylum of late years, it is satisfactory to find from the published reports of the Commissioners in Lunacy, that the proportion of

Insane Paupers to the population in this County is considerably below the average. The proportion of Insane to the population throughout England and Wales is 2.49 to the 1000, the proportion in Cornwall to the 1000 is 1.58; the highest proportion in any County is 4.64, the lowest 1.20; in Cornwall the proportion is lower than in all but three Counties. To what such marked differences in the proportion of the Insane in various Counties can be attributed is a matter of uncertainty; generally speaking, however, it will be found in the Agricultural Counties the proportion of Insane is larger than in those Counties where the labour is not chiefly Agricultural.

I have the honour to remain,

Mr. Chairman, My Lords, and Gentlemen,

Your very obedient Servant,

RICHARD ADAMS,

Medical Superintendent.

CHAPLAIN'S NINTH ANNUAL REPORT.

CORNWALL COUNTY ASYLUM, BODMIN,

December 30, 1871.

MR. CHAIRMAN, MY LORD, AND GENTLEMEN :

Divine Service has been continued as usual in the Wards and Chapel of the Asylum during the past year. The conduct of those present has been very satisfactory, perfect order prevailing. It is evident from the manner in which great numbers of the Patients join the singing and responding, rising and kneeling at the appointed times, and from their general attention and quietness, that the majority, even of those most liable to excitement, exercise a considerable amount of control over themselves when circumstances require it. It is also apparent that many retain a sense of, and are influenced by, a realization of their religious duties. Fits have occasionally occurred, but those subject to them, when they have felt them coming on, seem to have done their best to avoid disturbing others, and have been carried out of church promptly and noiselessly by those in attendance near them, so that no interruption of the Service has been caused. The musical portions of the service have been led by the Choir. The Organ has been played by my Sister, and has also been blown without incurring expense.

The Deaths have been comparatively few. Of the 40 bodies, 10 have been removed by friends, and 30 have been left for me to bury. I baptized, as requested, one infant which was born soon after the mother's admission as a Patient, as it seemed doubtful whether the child would survive long enough to be sent to the Union.

The Sacrament of Holy Communion has been administered in the Chapel, and to the sick who desired it.

The Bibles, and other books, Magazines and Newspapers, are eagerly sought after, and have been issued from the Library in considerable numbers. Several presents have been received, amongst others the following:

1. "Sir John Maclean's Parochial and Family History of Trigg Minor, Cornwall." parts 1 and 2, from W. H. Pole Carew, Esq. Antony.

2. "Under the Crown," and other volumes, from Sir John Maclean, F. S. A. London.

3. Many volumes of "Illustrated London News," "Punch," "Judy," and "Fun," from Miss Hooper, Bodmin.

The increasing size of the Asylum renders it necessary for me to be constantly extending the Library arrangements, by providing additional supplies for the new Reading Rooms. Besides this, a Subscription agreement, (depending on the Private Patients' Fund,) has been entered into with the Managers of Mudie's Circulating Library, London, so that the Private Patients are now, by this means, afforded an additional monthly packet of recent books of interest.

When the new "Long Building" is completed, it will be necessary to re-organize the existing plan by which I conduct daily prayers in the Wards.

I have received much encouragement and assistance from the Committee and all connected with the Asylum.

I have the honour to remain,

Mr. Chairman, My Lord, and Gentlemen,

Yours very obediently,

WILLIAM IAGO, B. A.

Chaplain.

*To the Committee of Visitors of the
Cornwall Asylum, Bodmin.*

REPORT OF THE COMMISSIONERS IN LUNACY.

CORNWALL COUNTY ASYLUM,

February 28th, 1871.

UPON our visit, this day, we have inspected the Asylum in every Department, and with the exception of one of each sex of the Private class, absent on trial, have seen all the Patients.

The following tabular statement shews the changes in the Patients since the last visit of the Commissioners, 8th June, 1870, and their present number :

	M.	F.	TOTAL.
Admitted,	33	24	57
Discharged and removed,	21	21	42
" of whom recovered,	13	16	29
Died, (all from ordinary cause,) ..	24	15	39
<hr/>			
Present numbers, Private,	20	24	44
Pauper,	182	221	403
<hr/>			
TOTAL,	202	245	447

Inquests were held in the cases of two Males and one Female Patient, who were found dead.

The sanitary condition of the Asylum is at present satisfactory. The Patients registered as under medical treatment are 22 of the Males, and 23 of the Female sex. We found in bed 6 Males, and 10 Females.

According to the Medical Journal, since the last visit, two Male Patients have had their hands confined by gloves for surgical reasons.

During the same period, 3 Males and 6 Females have been secluded; the former altogether on three, and the latter on

eleven occasions : the aggregate duration of the seclusion being $17\frac{1}{2}$ hours.

The Patients of both sexes, and all classes, at the times of our visit were, with scarcely an exception, tranquil and orderly. None made any complaints of ill treatment, and they bore generally an aspect of contentment.

They were personally in a very satisfactory state. We were pleased by the dress of the Pauper Patients in reference to material, and variety, and pattern.

We saw the Pauper Patients in some Wards at dinner, which consisted of excellent meat pie, abundant in quantity, with vegetables and beer.

We have nothing special to report, on this occasion, as respects attendance at Divine Service, or occupations and amusements, which continue the same as at the time of the last visit.

The Asylum throughout is in very creditable order. We found all the Day-rooms and Corridors, Dormitories, Beds and Bedding, clean and in a proper state, and well ventilated.

Good progress has been made in further carrying out the alterations and improvements referred to at the last visit ; since which, we have to report the following :

1. New sash windows, 40 in number, in Wards 8, 9, and 10, in the men's three-storey Buildings.

2. An excellent Bath Room, and 2 very good Water Closets, for numbers 5 and 12 Male Pauper Wards.

3. Summer Houses for the ladies and gentlemen, and a Skittle Alley for the latter.

4. The commencement of the enlargement to double their size of the Laundry and Washhouse ; upon the completion of which the body linen of the Patients of both sexes will, as Mr. ADAMS informs us, be changed twice a week.

5. The entire renewal and arrangement of the Stoves and Steam Boilers in the Kitchen, which is now very complete in all respects.

6. The painting and renovation of several of the Walls of the Corridors of the old Wards on the Female side. In reference to Baths, it has not been found practicable to carry out the recommendation that fresh water should be used for every Patient, in consequence of the variable and deficient supply. This defect is about shortly to be remedied by the construction of a Reservoir, in the immediate neighbourhood, to contain 250,000 gallons. For this purpose the Committee of Visitors purpose to purchase a quarter of an acre of Land, near the boundary of the Asylum Estate, towards the East.

Since the last visit, Plans for a New Building, to accommodate

128 Male Pauper Patients, have been submitted to our Board, and duly approved by the Secretary of State ; and Tenders for the same are under the consideration of the Visitors. When it shall have been brought into occupation, 3 of the present Male Pauper Wards, containing 20 Beds each, will be assigned to Females.

In reference to the suggestion made at the last visit of the enlargement of the Table in the general Dining Room of the Private Division, so as to admit of the association of a certain number of Ladies with the Gentlemen, Mr. ADAMS has explained to us that in existing circumstances, and with the present staff of Attendants, it cannot be carried out.

In accordance with the instructions of our Board, we have made enquiry as to the number of Attendants, their remuneration, and the changes during the year 1870. We subjoin the results.

There are on the Male side, for 201 Patients, 18 ordinary Ward Attendants, and 7 Artisan Attendants who assist in the Wards and are always present during meals. The wages of the former commence at £25. a year, and rise by £2. 10s., once in two years, to £32. 10s.; those of the Artisan Attendants commence at £27. 10s. and rise similarly to £35. All the Male Attendants are allowed a suit of clothes yearly, and a second suit once in two years.

On the Female side, for 244 Patients, there are 23 Nurses, 3 Laundry Maids, 5 Kitchen Servants, and a Housemaid. The Nurses' Wages commence at £11. a year, and rise, by 10s. annually, to £16. They are not provided with clothes.

The changes in 1870 consisted of the resignation of one Male Attendant and two Nurses, and the dismissal of a Laundry Maid for disobedience of orders. Mr. DERRY, about six months ago, succeeded Mr. PATTINSON as Assistant Medical Officer.

The condition and management of the Asylum, and the treatment of the Patients, continue to be most creditable to Mr. ADAMS, as Superintendent.

R. W. S. LUTWIDGE, } Commissioners in
ROBERT NAIRNE, } Lunacy.
