AT THE

General Stated Annual Court of Governors,

Held on the 25th day of February, 1909,

The Annual Reports of the Committee of Management, the Medical Superintendent, and the Chaplain, and the Audited Accounts for the year 1908, were laid before the Court.

And it was resolved-

That the above-named Reports and Accounts be approved and adopted; and that they, together with the usual Financial and Statistical Tables, be published. Also that the Reports of the Commissioners in Lunacy be printed therewith.

It was resolved unanimously-

1. That the Thanks of this Court be presented to the Chairman and Vice-Chairman of the Committee of Management, for the very valuable services they have rendered to the Institution during the past year.

2. That the Thanks of this Court be presented to the Noblemen and Gentlemen composing the Committee of Management, for their very valuable services during the year.

3. That the Thanks of this Court be given to the Officers of the Institution, for their care and attention in carrying on the work of the past year.

The following Annual Appointments were made :--

- I. A Committee of Management.
- 2. A Treasurer.
- 3. Auditors.

ROSE VILLA (IN THE HOSPITAL GROUNDS).

The Committee of Management,

FOR THE YEAR 1908.

The Committee are thankful to be able to report favourably of the state of the Institution during the year.

The Hospital, and the houses at Moulton Park, and at Bryn-y-Neuadd, North Wales, have been fully occupied during the year. One hundred and eighty-four patients visited the seaside house as compared with 174 in 1907.

The number of admissions (70) has been less by 14 than in 1907.

The average number resident (414) has been greater by 4 than in the previous year.

There has been a decrease of 11 in the number of recoveries, and an increase of 4 in the number of deaths.

The per-centage of recoveries on admissions (excluding transfers from other Asylums) has been 38.09 males, 50.00 females, total, 45.09.

The per-centage of deaths on the total number under treatment has been 5.88 males, 1.51 females, total 3.50.

During the past year the number of patients assisted in their payments has been 101, of whom 45 belonged to the County of Northampton, and 56 were out-county cases. The amount of assistance rendered to make up the payments to the lowest rates ordinarily charged was—county cases, $\pounds_{2,253}$ 14s. od.; out-county cases, $\pounds_{1,587}$ 19s. od., being a total of \pounds_{200} 9s. od. more than in the previous year. The result of the working of the Farm at Moulton Park during the past year has been very satisfactory. The balance in favour at the end of the year was $\pounds_{1,194}$ 15s. 2d., as compared with \pounds_{117} 17s. 9d. in 1907.

With regard to the financial state of the Hospital, the receipts from patients amounted to $\pounds 63,344$ 10s. od., being about $\pounds 2,000$ more than in any previous year.

The expenditure has been higher than usual, this being caused by the gratuity to the Medical Superintendent, and the taking over of the live and dead stock at Bryn-y-Neuadd.

There has been no change in the staff.

H. L. C. Brassey, Esq., has been appointed a Governor.

The Committee desire to record their sense of indebtedness to the Medical Superintendent and the other Officers of the Institution for their able and zealous services during the past year.

C. SMYTH,

Chairman.

" HAFOD FADOG," ONE OF THE VILLAS AT BRYN-Y-NEUADD.

BRYN-Y-NEUADD HALL & PARK (THE SEASIDE HOUSE OF ST. ANDREW'S HOSPITAL).

THE REPORTS OF The Commissioners in Lunacy.

FIRST VISIT.

3rd JUNE, 1908.

Since this Hospital was visited by two of our colleagues in July, 1907, the following changes have occurred among the patients:—68 have been admitted, 52 have been discharged or removed, of whom 29 had recovered; and 20 have died, There are today on the books the names of 187 gentlemen and 223 ladies, a total of 410.

The deaths with one exception (that of a lady who committed suicide while out on trial) have all been from natural causes. *Post mortem* examination was made in three instances, and two inquests have been held, one on the case of suicide, and the other on a male patient resulting in a verdict of death from heart disease. The only serious casualty, not resulting in death, was a fracture of the collar bone of a male patient who fell while playing football.

Three gentlemen and 41 ladies are at Bryn-y-Neuadd, and one lady is on leave with her friends. We saw in the course of our inspection yesterday and today the rest of the patients—365 in number, who are in residence at the Hospital and at Moulton Park with their respective dependencies, and in addition one gentleman and one lady who are here as voluntary boarders, the former of whom is unfit to remain on that footing. We found the patients well looked after and generally contented with their treatment. The health of the Institution is good, two being in bed on the male side and 6 on the female side, but for the most part not on account of physical illness. We give in the Patients' Book the names of four patients who show mental improvement. To two of each sex we granted at their request private interviews, and we paid special attention to all the newly admitted cases, satisfying ourselves in each instance of the propriety of their detention.

The Hospital and the buildings in connection therewith continue to be maintained in excellent order. In accordance with the recommendation made at the last visit of Commissioners, new padded rooms of the best construction have been provided—one on each side. The scheme of alterations and improvements of the Hospital commenced over 40 years ago has now been completed, and we congratulate the Committee and Mr. Bayley upon the high standard of efficiency to which the Institution has thus been raised. The heavy cost which has been incurred has been borne entirely by income, and in addition a considerable reserve fund has been accumulated. We are glad to learn that the proportion of the income devoted to reducing the charge for maintenance of the poorer patients will in future be largely increased.

Since the last visit 70 patients have been secluded on 977 occasions for a total duration of 5,907 hours; and three have been mechanically restrained on 167 occasions for 3,635 hours in all.

Ninety-four patients usually attend Divine Service on Sundays, and 104 the associated entertainments; 124 are usefully employed. Three of the gentlemen are allowed their parole beyond the grounds, and 87 patients go for walks attended; 90 have carriage exercise from four to eight times a month.

The staff of attendants consists of 59 men and 61 nurses for day, and 6 and 7 respectively for night duty. Forty-five have served in the Institution less than a year, and 40 upwards of 5 years. One male attendant has been dismissed since the last visit for misconduct not directly affecting any of the patients.

"MORANEDD," ONE OF THE VILLAS AT BRYN-Y-NEUADD.

The average weekly cost of maintenance last year was \pounds_2 10s. $4\frac{1}{2}$ d. The proportion of those received gratuitously was 0.73 per cent.; 5.62 per cent. paid 10/- or under; 5.13, above 10/- and not more than 21/-; 58.45, above 21/- and not above 42/-; and 30.07, 42/- and upwards.

L. L. SHADWELL, { Commissioners SIDNEY COUPLAND, { in Lunacy.

SECOND VISIT.

17th DECEMBER, 1908.

Since our visit in June to this Hospital, 40 patients have been admitted; 21 discharged, of whom 9 had recovered; and 5 have died. These changes leave on the books the names of 424 patients—193 being on the male, and 231 on the female side; and one lady is residing as a voluntary boarder, who is a suitable case to be on that footing.

The deaths were from natural causes with one exception, on which an inquest was held resulting in a verdict of "suicide by drowning." The facts of this case were duly reported at the time to our Board.

We have in the course of our visit yesterday and today seen all the patients—384 in number—who are in residence at the Hospital: and in addition 24 gentlemen and 6 ladies who are on leave at Moulton Park. Seven gentlemen are at Bryn-y-Neuadd, and one gentleman and two ladies are absent on trial.

The health of the Institution is good, and we found none of the male patients in bed; and of the 8 females who were in bed only two were seriously ill. The patients were generally tidy in their dress and persons, and we heard but few complaints. We gave private interviews to ten of them, and satisfied ourselves that each of these was insane and properly detained. In the Patient's Book we give the names of those who appeared to be mentally improved.

The Hospital and its dependencies continue to be maintained in excellent order.

Mechanical restraint has since the last visit been employed in the cases of two patients on each side on 242 occasions, for an aggregate of 2,644 hours; and 51 patients have been secluded on 1,433 occasions for 3,767 hours in all.

Two female patients have during the period been attacked by erysipelas; but there have been no other cases of zymotic disease.

The factory inspector has visited the Hospital and made certain recommendations, all of which have been carried out.

> L. L. SHADWELL, { Commissioners SIDNEY COUPLAND, { in Lunacy.

BRYN-Y-NEUADD,

LLANFAIRFECHAN,

NORTH WALES,

28th JULY, 1908.

I found 42 gentlemen residing in this house today; they arrived, most of them, last week; the ladies who have been here for the last few weeks having returned to St. Andrew's. I saw all the present inmates except one who was out for the day cycling. They were all in good health, and appear to be appreciating the change. They are very well looked after, and no pains are spared to make them happy and contented.

The bedrooms which were added last year are now in full occupation, and are proving very useful.

Four gentlemen are now residing at Hafod Fadog, which is proving thoroughly suitable for its purpose.

The whole place is maintained in capital order, and was looking very bright and attractive.

A. H. TREVOR,

Commissioner in Lunacy.

THE REPORT OF

The Medical Superintendent,

FOR THE YEAR 1908.

MY LORDS AND GENTLEMEN,

I beg leave to submit to you my Annual Report for the year 1908.

On January 1st, 1908, there were 415 patients in the Hospital: of these 189 were males and 226 females.

During the year, 70 patients have been admitted—32 males and 38 females.

Forty-five patients have been discharged—16 males and 29 females.

Seventeen deaths have occurred : 13 males and 4 females.

The total number under treatment during the year was 485 : of these, 221 were males and 264 females.

The average number resident has been 414—188 males and 226 females.

The numbers remaining on the books of the Hospital on December 31st, 1908, were 192 males and 231 females, total 423.

As the Statistical Tables (as altered by the Medico-Psychological Association) take up so much more space than formerly, they have been placed at the end of this report.

MOULTON PARK HOUSE (2 MILES FROM ST. ANDREW'S HOSPITAL).

Five males and 8 females admitted during the year had been previously under treatment in the Hospital.

The number discharged—45—includes 23 recovered : 8 males and 15 females.

The per-centage of recoveries on the total number of admissions during the year has been 25.00 males, 39.47 females, total 32.85.

The proportion per cent. of recoveries on admissions (excluding transfers from other Asylums) has been 38.09 males, 50.00 females, total 45.09.

The per-centage of deaths on the average number resident has been 6.91 males, 1.76 females, total 4.10.

The per-centage of deaths on the total number under treatment has been 5.88 males, 1.51 females, total 3.50.

In the past year, as compared with 1907, there is a decrease of 14 in the number of admissions.

There is a decrease of 11 in the number of recoveries.

The average number resident has been greater by 4 than in 1907.

The total number under treatment has been less by 11 than in the year 1907.

All the deaths have been from natural causes except one male who committed suicide by drowning.

This gentleman had been in the habit of walking in the grounds with his wife, and on this occasion when at the bottom of the park he refused to return to the Hospital with her. Instead of calling to her assistance two or three of the gardeners who were close at hand, she left her husband alone and came back to the Hospital to fetch the attendant. During her absence the patient escaped, and although every effort was made to find him nothing could be seen of him. He was found in the river on the following morning, having drowned himself. An inquest was held, and full reports were also sent to the Commissioners in Lunacy. The jury returned a verdict of "suicide whilst insane," not blaming anyone. No case of infectious disease has occurred in the Hospital, or in any of the houses belonging to it, at Moulton Park or at Llanfairfechan.

The number of patients who have visited Bryn-y-Neuadd, our seaside house at Llanfairfechan, has been 184, the largest on record; and the house and villas have been occupied during the whole of the year. Many patients now prefer to remain there all the year round. Dr. Archdall, the Resident Medical Officer, has been most zealous in his work: and the advantage of having a gentleman who can combine the position of Medical Officer and Manager at the head of the establishment has been very evident.

A very large number of patients continue to be usefully employed, as will be seen by the average number stated below :—

THE CRICKET GROUND, ST. ANDREW'S HOSPITAL.

STATISTICAL TABLES.

For the Year ending 31st December, 1908.

The following works have been carried out :--

At the Hospital :

A Cricket Pavilion has been built.

At Bryn-y-Neuadd, Llanfairfechan :

- Early in the year it was decided to build a house for the Resident Medical Officer. This work is still in hand.
- (2) A considerable addition has been made to the sea wall, which is now completed. This is a great improvement to the estate, and it makes a splendid promenade of about a mile in length along the sea front.

Land in Wales :

In accordance with the decision of the Governors, arrived at some time since, Mr. Hughes, the tenant, gave up the land at Bryn-y-Neuadd in November last, and it is now (like the land at Moulton Park) in our own hands. It is full early to say much about the result from a farming point of view, but there can be no doubt that it is a great advantage in securing the privacy of the park and grounds.

There has been no change in the staff of officers during the year.

The Hospital has been visited as usual during the year by the Commissioners in Lunacy and the Lord Chancellor's Visitors.

I must acknowledge the valuable assistance which I have received from the Assistant Medical Officers, who have performed their duties in a most punctual, methodical, and satisfactory manner.

In my last report I was glad to be able to state that the alterations which the Committee of Management had made in the different administrative departments worked very satisfactorily. I am very pleased to be able to repeat this report. All the members of the clerical staff have been most regular and punctual in their duties, and I have never known the work in these departments to run as smoothly as it does at the present time. The conduct of the attendants and nurses, and of the staff generally, has been very satisfactory during the year.

To the Committee of Management, and to the Governors generally, I beg to tender my sincere thanks for their great kindness, and for the support and valuable assistance they have at all times given me in the performance of my duties.

I have the honour to be,

My Lords and Gentlemen,

Your obedient Servant,

J. BAYLEY,

January, 1909.

Medical Superintendent.

THE BOWLING GREEN, ST. ANDREW'S HOSPITAL.

THE TENNIS COURT, ST. ANDREW'S HOSPITAL.

THE

Report of the Chaplain,

FOR THE YEAR 1908.

January 27th, 1909.

My Lords and Gentlemen,

I beg to submit to you my Annual Report for the year 1908.

The Chapel Services on Sundays and Week-days have been held with the usual regularity. The statistics give an average attendance on Sunday of 56 males and 71 females, and on week-days of 21 males and 18 females; which shows a slight increase in comparison with the previous year's attendance.

The reception accorded to my daily visits to the various wards and private apartments, as well as to my fortnightly visits to Moulton Park, is almost invariably of a friendly character.

The Library appears to be as much appreciated as ever, as shown by the number of books issued.

The supply of newspapers and periodicals is amply sufficient to meet the wants of our readers.

In my holiday absence of five days in the month of August, and twelve days in the month of October, my duties were fulfilled by the Revd. A. H. Birks.

The kindly co-operation of the Medical Superintendent and other officials, which contributes so materially to the proper discharge of the duties of my office, again merits my best thanks.

I remain,

Your obedient servant, JOHN CUNNINGHAM, Chaplain.

A RETURN showing the Weekly Payments of Patients who received Charitable Assistance in the year 1908.
