AT THE

Beneral Stated Annual Court of Governors,

Held on the 23rd day of February, 1940.

The Annual Reports of the Committee of Management, the Medical Superintendent, and the Chaplains, and Audited Accounts for the year 1939 were laid before the Court.

And it was resolved-

That the above-named Reports and Accounts be approved and adopted; and that they, together with the usual Financial and Statistical Tables, be published. Also that the Reports of the Commissioners of the Board of Control be printed therewith.

It was resolved-

- That the Thanks of this Court be presented to the Chairman and Vice-Chairman of the Committee of Management, for the very valuable services they have rendered to the Institution during the past year.
- 2. That the Thanks of this Court be presented to the Noblemen, Ladies and Gentlemen composing the Committee of Management, for their very valuable services during the year.
- 3. That the Thanks of this Court be given to the Officers of the Institution, for their care and attention in carrying on the work of the past year.

The following Annual Appointments were made :-

- 1. A Committee of Management.
- 2. An Expenditure Sub-Committee.
- 3. A Farm and Grounds Sub-Committee.
- 4. Furnishing and Decoration Sub-Committee.
- 5. Locomotion Sub-Committee.
- 6. A Treasurer.
- 7. Auditors.

THE REPORT OF

The Committee of Management, FOR THE YEAR 1939.

The Committee of Management submit to the Governors their Annual Report for the year ending December 31st, 1939.

Eleven meetings of the Committee of Management have been held during the year, with an average attendance of fourteen members. The Expenditure Sub-Committee and the Farm and Grounds Sub-Committee met on twelve occasions.

During the year 166 patients were admitted. This is thirty-three more than the number of admissions during 1938. As many as 115 of this number were admitted as Voluntary patients, and five were admitted as Temporary patients.

The average daily number of Certified, Voluntary and Temporary patients was 500—a decrease of four as compared with the year 1938.

Fifty patients died during the year 1939—the average age at death was 72·10. The percentage of deaths to the total number of patients under treatment was 7·34.

The total number of patients discharged recovered during the year was forty-nine—seventeen males and thirty-two females. This is an increase of nine as compared with the year 1938.

Between March and September, 140 patients visited the Seaside Home, Bryn-y-Neuadd, Llanfairfechan, North Wales. The duration of their holiday was from one to four months each. When the outbreak of War appeared to be imminent, however, it was decided to evacuate seventy-seven lady patients to Bryn-y-Neuadd and, consequently, the arrangements for the remainder of the holiday parties were cancelled.

The Hospital contributed a very considerable sum during the year 1939 to enable many of the patients to remain at the Hospital, whose relatives were unable to pay the actual cost of maintenance.

Various alterations and redecorations have been carried out at the Laundry during the year, and a large room there has been converted into a Linen Room.

The male patients' workshop has been enlarged, redecorated, re-wired for electric light and central heating installed.

A new cold storage room for milk has been provided in close proximity to the Kitchen, and arrangements have been made for all milk supplied to the Hospital to be pasteurized. The Kitchen has been completely redecorated.

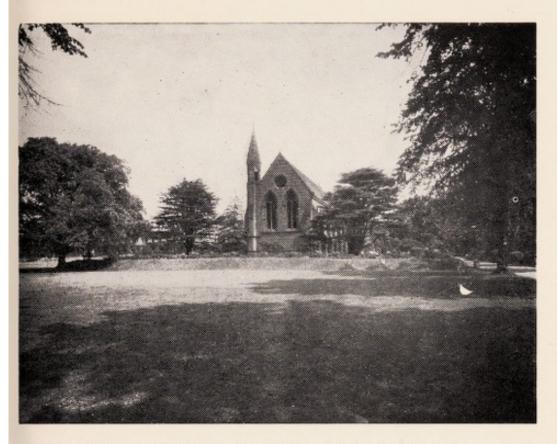

Several of the Wards and Villas have been redecorated throughout, and central heating has been installed in the Cedars, Fernside and Ivy Cottage.

The Red House Villa at Moulton Park has been redecorated and refurnished, and is now used for convalescent gentlemen patients.

At Bryn-y-Neuadd, redecorations have been effected in the Hall, and the Kitchen at the Annexe has been enlarged an improvement much appreciated by the staff.

Since the last report considerable progress has been made at the Hospital regarding the occupation of patients—both ladies and gentlemen. As stated previously, the male patients' workshop has been remodelled, and there is no doubt that the facilities provided there will prove of inestimable value. The number of lady patients who attend the classes of instruction, given by the Occupational Therapist, has increased enormously during the year, and the quality of their work is, in the majority of cases, of a very high standard. No provision has been made as yet for a Ladies' Occupational Room, but the Committee hope that it may be possible to put this work in hand as soon as conditions are more settled.

Many patients—both ladies and gentlemen—continue to take an active interest in gardening, and much keenness and enthusiasm are shown by those who cultivate plots of ground allotted to them in the Hospital gardens. The open

AN AVENUE IN THE HOSPITAL GROUNDS.

SHOWING ON THE RIGHT A PORTION OF THE GOLF COURSE.

air life and occupation on the farm at Moulton Park are appreciated by many of the patients who reside in Villas on the Estate, and the beneficial effects of this form of therapy are readily apparent.

The Farm at Moulton Park and the Gardens at the Hospital are still managed very satisfactorily.

Dr. Phillips resigned last May after an operation; during the thirty-two years in which he had been a member of the Medical Staff he had rendered valuable service to the Hospital.

The Committee are grateful to the Medical Superintendent, Dr. Thomas Tennent, to Dr. D. J. O'Connell, to the other Medical Officers, and to the Officers in charge of the various departments for the devoted care which they continue to give to the patients, and for their zeal in all that concerns the welfare of the Hospital.

KENNETH MURCHISON,

February, 1940.

Chairman.

THE REPORTS OF

The Commissioners of the Board of Control.

FIRST VISIT.

St. Andrew's Hospital,
Northampton,
March 23rd, 1939.

Since the last visit on behalf of our Board in October of last year the structural alterations and improvements have included a new Chapel adjoining the mortuary and a new post mortem room. Moulton Park House has had three new bathrooms added and a wing for nursing and domestic staff. Redecoration is being carried out in various parts of the Hospital; at the moment The Red House is empty of patients so that it may be completely renovated.

During the period under review the direct admissions have numbered fifty-three, of these 66% were received on a voluntary and 7.5% on a temporary basis. Forty-five patients have been discharged of whom sixteen are recorded as having recovered.

There appear on the statutory books the names of 293 ladies and 220 gentlemen; twenty-eight are away either on leave or on trial. Two ladies and four gentlemen were not seen by us as they were out for the day.

The health of the patients has been generally satisfactory; there has been no outbreak of infectious illness. The deaths have numbered seventeen; all were due to natural causes.

Progress as in other departments has been made with occupation therapy; two occupation officers have recently been appointed so as to further this form of treatment which is so helpful in providing a stimulus acknowledged as being beneficial to a patient's health.

At our visit to this Hospital, which included the outlying villas and the Farm, we were particularly pleased with the high standard of comfort provided for the patients. All the rooms are well kept and attractively decorated with various kinds of flowers especially for the time of the year.

The patients, as far as their mental conditions would allow, appeared to us to be contented and appreciative in most cases of all that is being done for them. Many patients spoke highly of the medical treatment and care of which they were in receipt.

Treatments by insulin and by cardiazol, which were mentioned at the last visit, are being continued. Comprehensive laboratory tests are being carried out on many lines. We would particularly mention blood bromide investigations which have given a key to treatment in a number of cases of whom we heard.

Dr. Tennent gave us every assistance during our visit.

JOHN C. RAWLINSON Commissioners of the Board of Control.

SECOND VISIT.

St. Andrew's Hospital,
Northampton.
October 24th, 1939.

At the second visit of the year to this Registered Hospital the names of 500 patients (221 male, 279 female) appear on the statutory books. Owing to the outbreak of hostilities last month a number of patients (twenty-five males, seventy-eight females) who might prove more difficult to handle from the point of view of taking precaution against air raids, have been sent on leave to Bryn-y-Neuadd in Wales. There were in residence at the time of our visit 387 patients (192 males, 195 females), ten patients being away elsewhere on leave or trial.

The total number of nurses available for duty today is 241 (121 males, 120 females) of whom fifteen and sixteen respectively do night duty; at a date in July there were 262 (132 males, 130 females) which shows a decrease of eleven and ten. We discussed the nursing staffs with the Medical Superintendent and we are satisfied that, unless some unforeseen or further emergency arises, the deficiency is of no great consequence.

Since the last visit on behalf of our Board, redecoration has been carried out in many parts of the Hospital; two villas, one for each sex, are being redecorated and central heating is being installed. In the male villa new accommodation for the nursing staff is being provided. These additions and alterations should prove of great value. The male occupation centre, in the course of construction, will be completed as soon as practicable. In addition to the above and other work that has been carried out extensive air raid precautions have been taken including sandbagging of ground floor wards and the equipment of several underground shelters.

We believe we have seen all the patients in residence, except two who were out for the day. We found them particularly quiet and contented and in a number of instances we noted the appreciation of the individual care and kindness that they receive. Three private interviews were given.

Our visit has clearly demonstrated that much active treatment is being continued. It is obvious that every advantage is taken of the facilities offered by this well equipped Hospital.

Convulsion therapy, both by Insulin and Cardiazol, is intensively pursued and we hope that a scheme will presently be evolved to ensure the systematic observation of remitted cases.

Extensive pathological examinations are carried out at the laboratory under the direction of Dr. Ashby, whilst the fullest use is made of the hydro-and electro-therapeutic departments.

In such surroundings as are to be found at this Hospital it is hardly surprising that the patients' general health is of a high standard. There has been an entire absence of epidemic and zymotic disease in the Hospital during the period under review. Twenty-four deaths (eight males, 16 females) have occurred, the average age at death was seventy-two years. One inquest was held, the circumstances of which have already been communicated to our Board.

Dr. Tennent and his deputy, Dr. O'Connell, accompanied us and gave us every assistance throughout our visit. The other members of the medical staff are Dr. Gibson, Dr. Davy, Dr. Ashby and Dr. Morgan Jones. Dr. Starkey is the resident medical officer at Bryn-y-Neuadd.

Our visit has been one of great interest and it is a pleasure to record the impression of keenness and progress left upon us.

Dr. Tennent and Dr. O'Connell give their valuable services in a consultant capacity at the General Hospital, Northampton, where they hold an out-patient clinic weekly for the benefit of the population of the County and Borough of Northampton.

JOHN C. RAWLINSON | Commissioners of the Board of Control.

BRYN-Y-NEUADD,

LLANFIARFECHAN,

N. WALES,

June 9th, 1939.

In residence here today are twenty-one gentlemen and thirty-nine ladies. One gentleman was out for the day, but I have seen all the other patients and spoken to many of them.

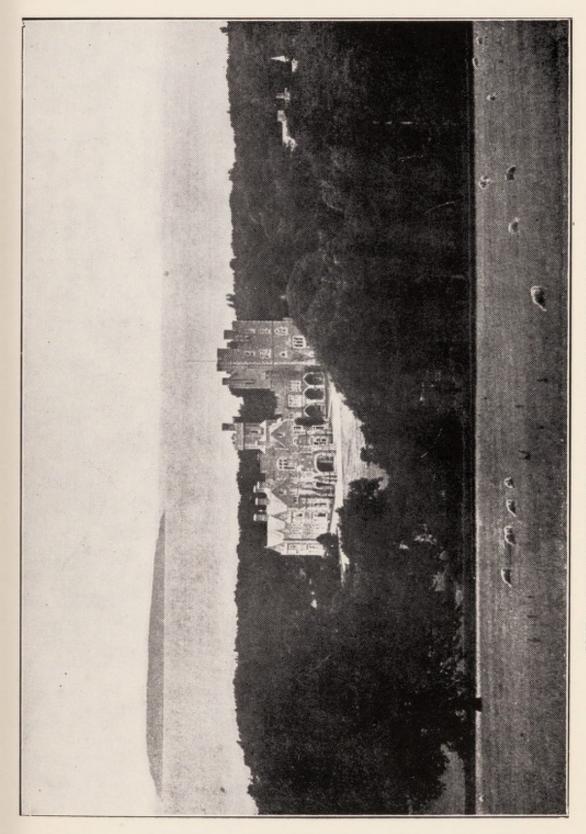

The custom here is that twenty-one gentlemen are permanently resident at the Annexe. The Hall acts as a holiday home, and is open from April to October, accommodating forty ladies during the first four of these months and forty gentlemen during the latter three.

Both the Hall and the Annexe are in excellent order and most comfortably furnished. The dining-room at the Hall has recently been redecorated. Cooking for each house is done in that particular house and, to facilitate these arrangements at the Annexe, the kitchen there has been enlarged and re-tiled.

I found practically all the patients out-of-doors enjoying the sunshine in the large and lovely grounds here. Many of them expressed pleasure in their surroundings and appreciation of the treatment they receive here. It seemed to me that a very great deal of personal care and attention is paid to everyone and that the nursing and medical care is efficient.

Dr. Starkey accompanied me on my round and gave me every possible assistance.

(Signed) FLORA CALDER, Commissioner of the Board of Control.

VIEW OF WELSH SEASIDE BRANCH ESTABLISHMENT.

THE REPORT OF

The Medical Superintendent, FOR THE YEAR 1939.

St. Andrew's Hospital,
Northampton.

MY LORDS, LADIES AND GENTLEMEN,

I have the honour to present to you my annual report for the year 1939.

In spite of the state of emergency, which has operated during a great part of the year under review, the work of the Hospital, as shown by the following statistics, has continued uninterruptedly. During the year, 46 certified patients have been admitted—29 ladies and 17 gentlemen. Of this number, 3 ladies and 6 gentlemen were transferred from other Institutions or from Single Care. One hundred-and-fifteen voluntary patients—55 ladies and 60 gentlemen, and 5 temporary patients—1 lady and 4 gentlemen, have also been admitted, making a total of 166 admissions during the year. This total number, 166, does not include 6 patients who were already in the hospital and were regraded.

Thirty-eight certified patients have been discharged—25 ladies and 13 gentlemen. One lady temporary patient has also been discharged; 89 voluntary patients—46 ladies and 43 gentlemen—have left. During the year 2 voluntary patients have been certified, one certified patient became a voluntary patient, and one was made a temporary patient, and 2 temporary patients became voluntary patients.

Thirty-nine certified patients have died—18 ladies and and 21 gentlemen. Three temporary patients—2 ladies and 1 gentleman—and 8 voluntary patients—4 ladies and 4 gentlemen—have died, making a total of 50 deaths. Post mortem examinations were held in 12 cases.

The total number of patients under treatment during the year was:—

Certified patients	Males.	Females.	Totals.
Temporary patients Voluntary patients	5	108	7 201
Totals	305	376	681

The average daily number of certified patients resident during the year was 406—232 ladies and 174 gentlemen; the average number of voluntary patients was 91—52 ladies and 39 gentlemen; and that of the temporary patients was 3—1 lady and 2 gentlemen.

The numbers remaining on the books of the Hospital on 31st December, 1939, were:—

Certified patients	Males.	Females.	Totals.
Temporary patients Voluntary patients	. 2	56	2 105
Totals	223	280	503

The Statistical Tables will be found at the end of this report.

During the year, 27 patients—21 ladies and 6 gentlemen—who were admitted had been previously under treatment in this Hospital. Of these, 8 were certified patients, and 19 were voluntary patients.

The number of certified patients discharged—38—includes 19 patients transferred to other care. Of the other 19 patients who left, 13 were discharged recovered—10 ladies and 3 gentlemen.

The proportion per cent. of recoveries of certified patients to the direct certified admissions was:—ladies 38.45, gentlemen 27.27; taken together, 35.15. The proportion per cent. of voluntary patients who had recovered was:—ladies 40.00, gentlemen 23.33; taken together, 31.30.

The proportion per cent. of deaths of certified patients to the total number of certified patients under treatment was:—ladies 6.76, gentlemen 10.14; taken together, 8.24. The proportion per cent. of deaths of temporary patients

to the total number of temporary patients under treatment was:—ladies 100.00, gentlemen 20.00; taken together, 42.85. The proportion per cent. of deaths of voluntary patients to the total number of voluntary patients under treatment was:—ladies 3.70, gentlemen 4.30; taken together, 3.98.

Of the 50 deaths, 39 were certified patients, 3 were temporary patients, and 8 were voluntary patients. The average age at death of the 50 patients was 72·10 years. Forty of the deaths occurred in patients of 65 years and upwards; 34 of these were aged 70 years and upwards, of whom 10 were 80 years of age and over. All the deaths were due to natural causes.

The number of certified patients admitted during the past year was greater by 11 than in 1938; the number of voluntary patients was greater by 24, and the temporary patients were less by 2—a total increase of 33 when compared with the year 1938.

The average daily number of patients resident has been less by 4 than in 1938.

The total number of patients—certified, temporary and voluntary—under treatment was greater by 30 than in 1938.

The usual arrangements regarding the parties to our Seaside Home were considerably modified during the year. Nevertheless, one hundred and forty patients visited Bryn-y-Neuadd Hall between March and September for periods of one, two, three or four months. It was considered that this area was one of the safest in the Country, and that our accommodation there should be utilized as much as possible in the event of the outbreak of hostilities. Consequently, when this seemed inevitable, the arrangements for seventy-seven ladies to go there were carried out. The progress of events since War began is by no means what was anticipated. Furthermore, Northampton is an area to which large numbers of children have been evacuated so that it may be considered reasonably safe. It is probable, therefore, that the arrangements regarding the future use of Bryn-v-Neuadd will be revised at an early date. I consider that, if possible, it should continue to be used as a holiday home, during the Summer, as I am convinced of its value as such to those who are in the Hospital for long periods. In addition, there is no doubt that the patients greatly enjoy their holiday there.

At the Hospital, considerable air raid precautions have been made. Underground shelters have been provided and various wards have been set aside and appropriately protected for those patients confined to bed. A large number of the Nursing Staff, both male and female, have been instructed in anti-gas measures and they have had both theoretical and practical training in dealing with incendiary bombs.

The following alterations, repairs, additions, improvements and re-decorations have been carried out during the year 1939:—

MAIN HOSPITAL :-

There has been a re-arrangement of rooms, to minimize labour in the main kitchen, and the whole has been redecorated throughout. A new Hobart mixer has been installed there.

Pasteurization of the milk to the Hospital has been provided and a new cold storage room installed adjacent to the kitchen.

At the Laundry a large room, formerly used as a dormitory for the domestic staff, has been adapted as a Linen Room. It has been re-wired for electric light, and central heating installed. Additional dormitory space there has been divided to make five bedrooms for the domestic staff. All of these rooms have been re-decorated.

Considerable extensions have been made to the male patients' workshop. The whole has been re-wired for electric light, central heating installed and re-decoration carried out.

LADIES' SIDE.

Ward 1—Bedrooms re-decorated.
Ward 2—Bedrooms re-decorated.

Ward 3—Extensive alterations to day-rooms—new fireplaces installed, concealed steam radiators fitted, re-wired for electric light and completely re-decorated.

GENTLEMEN'S SIDE.

Ward 1-Bedrooms re-decorated.

Ward 3—New fireplaces installed in day-rooms, concealed steam radiators fitted, re-wired for electric light and completely re-decorated.

Ward 4-Staircase re-decorated.

WANTAGE HOUSE.

Corridors and bedrooms on both Ladies' and Gentlemen's sides re-decorated.

Dormitory on Ladies' side re-decorated.

VILLAS AND HOUSES.

Ivy Cottage—Central heating installed and re-decorated. Cedars—Central heating installed, re-wired for electric light and re-decorated.

Fernside—Central heating installed.

All outside painting at Wantage House, Merchiston, The Rowans, Boughton Lodge, the Laundry and 80 Billing Road has been done during the year. Most of this work has been completed by Hospital labour; some of the paintwork was carried out by contract.

MOULTON PARK :-

The additional accommodation provided at Ladies' House has proved of great value to both the patients and staff.

It seemed advisable to have accommodation at Moulton Park reserved for gentlemen patients who were convalescing from their nervous or mental illness. Consequently, Red House was re-decorated and re-furnished and it is now utilized for this purpose. The stabilizing effect of life on the farm, prior to a return home, has been appreciated by many throughout the year.

BRYN-Y-NEUADD :-

The enlargement of the kitchen at the Annexe has now been completed, increasing enormously the facilities for work there.

The Main Dining Room and various bedrooms in the Hall have been re-decorated.

OCCUPATION OF PATIENTS :-

Occupational and recreational facilities continue to play a large part in the Hospital regime. I have referred elsewhere to the therapeutic value of the work on the farm and need not recapitulate this. At the Hospital gardening continues to be popular, and those plots managed by the ladies and gentlemen are a source of great pleasure. These methods provide an outlet for those willing to co-operate, but there remain a large proportion of the patients for whom these forms of therapy are unsuitable. Much ground has been covered by Miss Parry, with the assistance of the Ladies' Companions, in dealing with this aspect of the problem. This work continues to be carried out in the wards and sitting rooms, and all of us long for the provision of adequate structural facilities. I know that I have your support in this, and had conditions been normal I had hoped to press for this building. In spite of these difficulties, considerable progress has been made, and there is an average daily attendance of sixty-two ladies at the occupational classes. The constructional ability of individual patients has improved to a remarkable extent, and the stimulus to greater effort is readily apparent. On the gentlemen's side we are much more fortunate. It has been possible to enlarge considerably the Carpenters' shop provided a few years ago. The completion of this was delayed by the A.R.P. work, but I am glad to report that work there has been resumed and should be completed early next year.

An exhibition of work was held in December; the exhibits including many types of embroidery, basketry, leather work, felt work, soft toys, knitting, stool seating, drawing and painting. The quality of the work was of a fairly high standard, and the exhibition was a great success.

OUTDOOR GAMES AND AMUSEMENTS :-

Tennis, on hard and grass courts, cricket, hockey, football, bowls and golf have been played in their respective seasons. The golf lessons given by the Professional continue to be popular and their value apparent in the standard of play. Plans were prepared during the summer by Colonel S. V. Hotchkin, M.C., D.L., for the extension of the golf course, but this work has had to be postponed meantime. The Annual Sports were held in July and were much appreciated by both patients and staff. Throughout the summer season motor coach drives were arranged each week both here and at Bryn-y-Neuadd. Facilities were also available for patients who wished to take such drives by motor car. When the weather was favourable the weekly bathing and boating parties on the river Nene were arranged, and were greatly enjoyed by the gentlemen patients.

Those patients who were fortunate enough to visit Bryny-Neuadd, Llanfairfechan, during the Summer appeared to enjoy their holiday. Practically without exception all of them improved physically and slept much better during their stay there. The weather in the latter part of the summer was very good, and the bathing facilities were appreciated then to the full. Every advantage was taken by the patients to visit the various beauty spots in North Wales and many parties were organised for this purpose.

INDOOR PASTIMES :-

In Appendix I. of this report is the calendar of entertainments for the year, which is very varied, and includes dances, plays, cinema entertainments, lectures, concerts, whist drives, bridge drives, table tennis, chess matches, smoking concerts and billiards tournaments. The Hospital chess team, composed of both patients and staff, had a very successful season and carried off the Manningham Buller Trophy of the Central Northamptonshire Chess League. During the Winter months weekly choral classes were held for both lady and gentlemen patients under the direction of Mr. Cyril Davis (the Musical Director) and the Ladies' Companions. The members of these classes produced the usual cafe Chantants with great success. Reference must be made also to a very successful farcical comedy, "Baa, Baa, Black Sheep," presented by the staff in the early part of the year. The high quality of the production was merely the expression of the thoroughness with which the cast undertook the work and were prepared to sacrifice so much of their time for this purpose. Their efforts were greatly appreciated by all and we look forward to further productions.

WANTAGE HOUSE :-

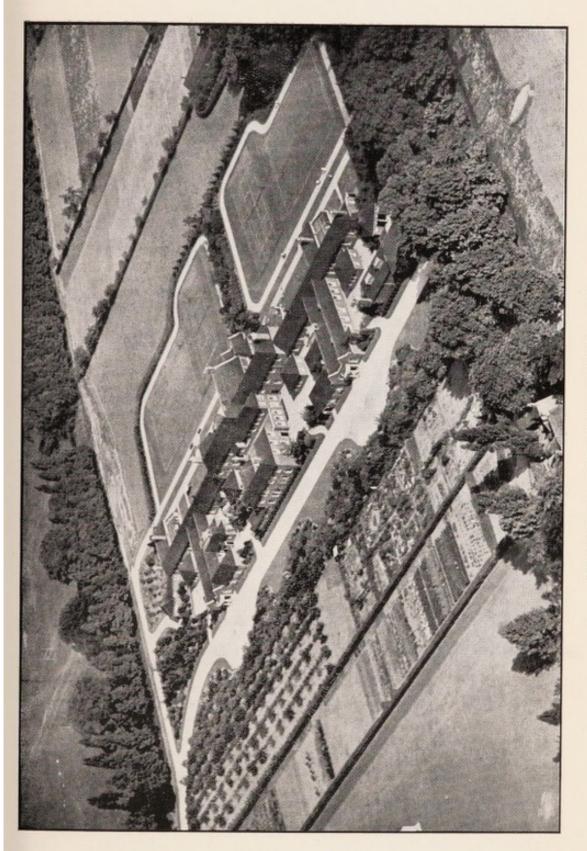

In my previous report I advocated that this department of the Hospital should return to discharge the threefold function for which it was originally intended. I am satisfied that this is being achieved so far as its reservation for the investigation and treatment of acute and recoverable patients is concerned, and of its value in the investigation of patients in other parts of the Hospital. In the original conception of the unit, research was to play its part and structural provision was made for this. During the past year various investigations have commenced, some of which will be referred to later. I cannot feel, however, that this plays a sufficiently important part in our regime. I know that it is a matter of concern to some of you whether or not this work should figure in our Budget. Personally, I can conceive of no better way in which part of our resources

can be spent, than in endeavouring to procure some means whereby the offspring or relations of a patient shall be prevented from spending the ten, twenty, fifty or more years in hospital, which their predecessors have had to do.

During the year 102 patients were admitted into Wantage House—of these 45 were ladies and 57 gentlemen. This is the largest number of patients ever admitted to this unit in one year, and is more than two-and-one-half times the number admitted five years ago. Of these patients, no less than 73 were admitted on a voluntary basis; of the others, 6 were temporary patients and 23 were certified patients. During the year 66 patients were discharged—a number of these completed their convalescence in our villas.

In my former report I referred to the therapeutic work being carried out by Insulin and Cardiazol on cases of schizophrenia. Treatment by Insulin was introduced here in August, 1938, and since then twenty patients have received a full course of treatment. The variation in response to dosage of Insulin was noteworthy; in one gentleman the method was abandoned as 1,000 units of Insulin failed to produce coma. Of the twenty patients who received a full course of treatment, eight have improved clinically so that it has been possible for them to return home. The remainder showed some degree of improvement, though in some cases this was only of a temporary nature. Considerable improvement was shown in the general physical health of these patients. Obviously many more patients will have to be treated by this method and results observed over a long period, before a true evaluation can be made.

Up to date, forty patients suffering from schizophrenia have received one or more courses of Cardiazol; of these, twenty have improved clinically so that it has been possible for them to leave hospital and the most recent reports show that their improvement is being maintained. The others remain in hospital, quite a number of them having been here for several years. The majority appear to benefit while undergoing treatment but, unfortunately, in some cases there is a tendency to relapse when the injections have been discontinued for some time. It has been found possible to raise the social level of these patients very considerably by periodic injections. Although originally introduced in the treatment of schizophrenia, this method is now being employed in other forms of mental illness. It has been our experience that it is even more beneficial in the treatment

WANTAGE HOUSE FROM THE AIR.

of manic depressive psychoses, and I am of the opinion that by its use in these cases the duration of the illness can be considerably shortened.

Various lines of research are being conducted in connection with both of these forms of treatment, the results of which will be published when further data has been collected.

HYDROTHERAPEUTIC DEPARTMENT :-

The beneficial effects of hydrotherapy in the alleviation of such symptoms as insomnia, anxiety, states of excitement and depression are generally accepted. We are exceedingly fortunate in the excellent facilities for this available here and they are extensively utilized. All methods are employed, but the continuous bath remains that in most frequent and almost daily use. The Turkish and Russian baths continue to be popular and efficacious in certain types of illness, more especially of the depressive variety.

RADIOLOGICAL DEPARTMENT :--

During the year, 243 patients have been examined in this department. The routine initial investigation includes stereoscopic examination of the skull for possible sinus infection, and this is carried out in each case. There were 46 dental X-ray examinations, and the other examinations included such special examinations as X-rays of chest, alimentary tract, kidneys and spinal column. In view of recent reports we are now carrying out an X-ray examination of the spinal column before and after treatment by Cardiazol. The results of these will be published elsewhere; so far they are essentially negative, and suggest, at the moment, that the dangers have been over emphasized.

ELECTRICAL DEPARTMENT :-

The electrocardiographic apparatus obtained during the past year has proved exceedingly valuable, and up to date 95 electrocardiographic records have been made. Its use enables us to establish, with a greater degree of accuracy, the nature of certain cardio-vascular disorders. This examination is carried out now as a routine measure before the employment of treatment by hypoglycæmia or cardiazol already referred to. Other forms of treatment carried out in this department were artificial sunlight, either for its general stimulant effect or for local treatment of the skin, infra-red treatment and diathermy. During the year, altogether 492 treatments were given in this department.

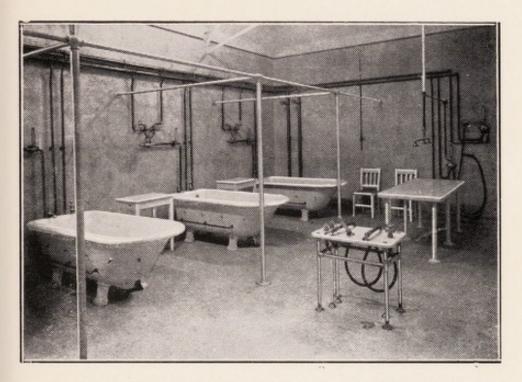

OPERATING THEATRE :-

Four major operations were carried out during the year. These were herniotomy, amputation of breast, excision of tumour and excision of glands. Two operations were performed under local anæsthesia; in the other cases a general anæsthetic was administered by a member of the medical staff.

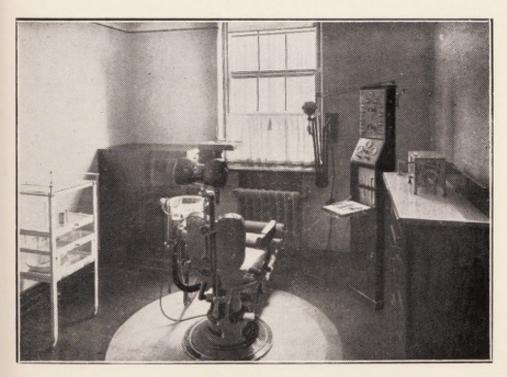

REPORT OF THE PATHOLOGICAL DEPARTMENT:-

During 1939, the number of examinations made was 5,490. This is just under twice the number made in the previous year. These examinations may be classified thus:—

BLOOD CHEMICAL EXAMINATIONS—		
Bromide		170
Sugar		83
Glucose Tolerance		55
Calcium		4
Van den Bergh Reaction		156
Cholesterol		5
Urea Icterus Index	•••	163
D		155
Phosphatase		4
Corpuscle Chloride		64
		01
Blood Examinations—		
Total Counts		243
Leucocyte Counts		41
Malarial Films		21
BLOOD SEROLOGICAL EXAMINATIONS—		
Kahn Reaction		8
Meinicke Reaction	***	160
Sedimentation Rate		200
Group Determination		53
Agglutination Test		19
Hanganatziu-Deicher Reaction		2
CEREBRO-SPINAL FLUID EXAMINATIONS-		
General		18
Kahn Reaction		16
		.0
URINE EXAMINATIONS—		
General		
Special (various)		50

PART OF THE HYDRO-THERAPY DEPARTMENT, WANTAGE HOUSE.

Examination of Von	nit			 8
Examination of Spur	tum			 15
Friedman Pregnancy	Test			 2
Histological Specime	ns pre	epared		 130

The investigation of the chloride content of the red blood corpuscles in various psychiatric conditions, referred to in last year's report, is still being pursued by Dr. Ashby.

The investigation of the conditions necessary for the continued stability of the brain when considered in terms of cell-function, has been continued during the year. The brain, when considered as a system of cells is, normally, not only stable but is self-stabilizing. Only systems of certain types can be self-stabilizing, and investigation of the conditions necessary is likely to advance our knowledge of the essential physiology of the brain. A preliminary report of the work has been prepared.

OFFICIAL VISITORS :-

Dr. I. G. H. Wilson, Mr. J. C. Rawlinson and Dr. T. R. Forsythe, Commissioners of the Board of Control, visited the Hospital during the year. Dr. F. H. M. Calder, a Commissioner of the Board of Control, visited Bryn-y-Neuadd. The Chancery patients were all visited and examined by the Lord Chancellor's Visitors.

NURSING STAFF :-

Sixteen of our nurses—6 male and 10 female—have been successful in obtaining the Certificate of the Royal Medico-Psychological Association during the year 1939. Two female nurses were successful in passing the Final Examination of the General Nursing Council. I am very grateful to the Medical Staff and to Miss Catterick, the Sister Tutor, for their work in training these candidates. The success of these nurses is due, in no small measure, to the tuition that they received.

STAFF:-

I referred, in my last report, to the illness of Dr. Phillips. He returned to duty at the end of February and, although recovered from the immediate effects of his operation, he felt unable to discharge his duties to his own satisfaction. Accordingly, he tendered his resignation and retired on pension in May of this year. He had given very valuable service to the Hospital for the long period of 32 years, and we wish him many years in which to enjoy his retirement. Dr. D. J. O'Connell was appointed to fill the vacant position of Deputy Medical Superintendent, and I am very grateful to him for his valuable help. Dr. J. Gibson, who had previously had experience at Canterbury Mental Hospital. was appointed first Assistant Medical Officer, and took up his duties here in July. The other members of the Medical Staff (Drs. Ashby, Davy, Morgan Jones and Starkey), and the Chaplain (the Rev. J. T. Stevens) continue to render most valuable service and constant loyalty. My grateful thanks are also due to the Matron, the Chief Male Nurse, and all the members of the Nursing Staff, for their continued enthusiasm, sympathy and care; without such, the success of the Hospital would be much less evident.

During the year, the Hospital lost the services of three servants who had served it loyally for many years. They were Miss Amy Watson, Housekeeper, 40 years service; Mr. G. Griffin, Head Gardener, 45 years service; and Mr. F. G. Twist, Foreman of Works at Bryn-y-Neuadd, 39 years service. No one can deny that their retirement was well earned, and we wish them many happy years to enjoy this.

Messrs. Baker, Cæsar and Clarke continue to discharge the work of their respective departments with marked efficiency. I am most grateful for their assistance to me.

I should like to express my gratitude to the Chairman (Sir Kenneth Murchison), the Committee of Management, and the other Governors of the Hospital for their sympathetic consideration of my many requests, and for their advice, encouragement and support throughout the year.

I have the honour to be,

My Lords, Ladies and Gentlemen,

Your obedient Servant,

THOS. TENNENT,

Medical Superintendent.

January, 1940.

APPENDIX I.

CALENDAR OF ENTERTAINMENTS FOR THE YEAR 1939.

- Jan. 2-Nurses' Hockey Practice.
 - ,, 2-Smoking Concert at Moulton Park.
 - " 3-Party for Daily Women Workers.
 - , 3-Whist Drive, 8 p.m.
 - " 4-Choral Class, 5.30 to 6.30 p.m.
 - ,, 5-Football Match, v. Rugby Police.
 - " 5-Cinematograph Entertainment-" Take my Tip," etc.
 - ,, 6—Golf Competition (Stroke).
 - ,, 6-Cinematograph, etc.
 - " 7-Nurses' Hockey Match, v. Miss Harris' Team.
 - ,, 7-Hockey Match, v. Leicester Westleigh.
 - " 7—Staff Supper.
 - " 9-Nurses' Hockey Practice.
 - " 9-Whist Drive, 8 p.m.
 - " 9-Snooker Match, v. Foresters.
 - " 10-Christmas Party in Dining Hall for Wards 3, 5 and 6.
 - " 10-Dance-Syncopated Players' Dance Orchestra, 8-11 p.m.
 - " 11-Hockey Match, v. R.A.F., Henlow.
 - " 11-Choral Class, 5.30 to 6.30 p.m.
 - " 11-Cafe Chantant.
 - ,, 12-Football Match, v. Borough Police.
 - " 12-Nurses' Hockey Match, v. Parkside Ladies.
 - " 12-Cinematograph Entertainment-" One Night of Love," etc.
 - , 13—Golf Competition (Mixed Putting).
 - " 13-Cinematograph Entertainment-" One Night of Love," etc.
 - " 14—Hockey Match, v. Bedford.
 - " 16-Nurses' Hockey Practice, 2.30 p.m.
 - " 16—Chess Match, v. Northampton Chess Club (League).
 - ., 16—Smoking Concert.
 - ,, 17—Staff Ball.
 - ., 18-Football Match, v. Rugby Corinthians.
 - ,, 18—Choral Class, 5.30 to 6.30 p.m.
 - " 19-Hockey Match, v. Peterborough.
 - ,, 19—Snooker Match, v. County Players.
 - " 20—Golf Competition (Bogey).
 - " 21-Hockey Match, v. Peterborough.
 - " 21-Nurses' Hockey Match, v. Northampton School for Girls.
 - " 21—" Charity Begins" by Bancroft, D. C.
 - " 23-Nurses' Hockey Practice, 2.30 p.m.
 - ,, 23-Whist Drive, 8 p.m.
 - " 24—" At Home" at Merchiston House, Tea at 4 p.m.
 - " 24—Dance—Syncopated Players' Dance Orchestra, 8—11 p.m.
 - " 25—Choral Class, 5.30 to 6.30 p.m.

- Jan. 26-Hockey Match, v. Bedford Thursday.
 - " 26-Nurses' Hockey Match, v. Kettering Ladies.
 - " 26-Snooker Match, v. Town Football Club.
 - , 27-Golf Competition (Ladies).
 - " 28—Football Match, v. Royal Dental and Charing Cross Hospitals.
 - " 30-Nurses' Hockey Practice, 2.30 p.m.
 - ., 30—Chess Match, v. Kettering Chess Club (at Kettering).
 - ,, 31-Whist Drive, 8 p.m.
- Feb. 1-Hockey Match, v. Depot.
 - , 1—Choral Class, 5.30 to 6.30 p.m.
 - ., 2-Football Match, v. Rugby Police.
 - , 2-Nurses' Hockey Match, v. Stevenage Ladies.
 - "Baa, Baa, Black Sheep" by St. Andrew's Hospital Dramatic Society.
 - ., 3—Golf Competition (Stroke).
 - 3—"Baa, Baa, Black Sheep" by St. Andrew's Hospital Dramatic Society.
 - ,, 4—"Baa, Baa, Black Sheep" by St. Andrew's Hospital Dramatic Society.
 - , 6—Nurses' House Hockey Match, 2.30 p.m.
 - , 6-Smoking Concert at Moulton Park.
 - " 7-Dance-Syncopated Players' Dance Orchestra, 8-11 p.m.
 - ,, 8-Hockey Match, v. R.A.F., Wittering.
 - " 8—Choral Class, 5.30 to 6.30 p.m.
 - ,, 9-Snooker Match, v. The Saints.
 - .. 9—Cinematograph Entertainment—"Storm in a Teacup."

The Report of the Chaplain FOR THE YEAR 1939.

St. Andrew's Hospital,
Northampton,
January, 1940.

My Lords, Ladies and Gentlemen,

I have the honour to submit my report for the year 1939.

The following services are held in the Hospital Chapel:-

HOLY COMMUNION.

Celebrations at 8 a.m. have been held every Sunday morning, and at the same hour weekly on some morning other than Sunday.

In addition to these, a Choral Celebration is held once a month at 10.0 a.m. This provides an opportunity for communion to patients unable to attend the early services.

Special celebrations are arranged for members of the nursing staff at the great festivals.

The Holy Communion is administered from time to time in the hospital wards, and the communion of the sick is arranged for whenever necessary or desirable.

The number of communicants for the year was 1,352.

MORNING AND EVENING PRAYER.

Choral Services are held every Sunday morning and afternoon (or evening during the summer months). The Chapel choir, under an efficient organist and choirmaster, maintains a high standard of singing.

Morning Prayer is said daily at 10.0 a.m., with the Litany on Fridays, and extra services are held in Lent.

Special musical services are arranged from time to time.

The attendance in Chapel has been affected by the evacuation of a large number of patients to Llanfairfechan. On Sundays, an average of sixty-six men and sixty women; and on week-days, of eight men and five women has been maintained.

At Moulton Park, a Choral service is held every Sunday; and the Holy Communion is celebrated once a month.

The Wards and Villas are visited regularly, and the Chaplain can be seen by patients individually whenever they wish to do so.

The circulation of books from the Hospital Library forms an important part of the recreational life of the Hospital; and care is taken to keep patients supplied with books suitable to their needs and tastes. Many of the newest books from Messrs. Boots' Library are always available.

There is an adequate supply of magazines, periodicals and newspapers.

I have to thank the Medical Superintendent, the Assistant Medical Officers, and the other Officials and Nursing Staff for their kindness and help.

I have the honour to be,

My Lords, Ladies and Gentlemen,

Your obedient Servant,

J. T. STEVENS,

Chaplain.

BRYN-Y-NEUADD,

LLANFAIRFECHAN,

January 15th, 1940.

My Lords, Ladies and Gentlemen,

I have the honour to submit my report as Chaplain for the year 1939.

A service—in which an address is given—has been held every Sunday during the year and the Holy Communion has been celebrated on the Greater Festivals and on other occasions. These services have been well attended and I believe are much valued by the patients and the members of the staff.

During the early part of the year we were without a regular accompanist—though we were helped occasionally by some of the patients—but Mrs. Williams, The Rectory, has now kindly promised to attend all the services to help us with the singing and to accompany the hymns and chants on the piano. This has made my work much easier.

This year, at Christmastide, a carol service was held. The Altar and the room in which the service was held had been decorated by the staff with flowers and evergreens for the occasion. A party of nurses—and other members of the staff sang several carols, the service gave much pleasure to those who attended it.

Patients have been visited regularly.

I wish to express my sincere thanks to the Medical Superintendent for his unfailing courtesy and great helpfulness to me and also to the members of the staff for their friendliness and reverent attention during the services.

I have the honour to be,

My Lords, Ladies and Gentlemen,

Your obedient Servant,

HENRY WILLIAMS, Rector of Llanfairfechan.
