REPORT

FOR THE YEAR 1861,

PRESENTED TO THE TOWN COUNCIL, FEBRUARY 18th, 1862.

As required by the Lunatic Asylum Act of 1853, the Committee of Visitors of the Birmingham Borough Lunatic Asylum present their annual Report for the year 1861 to the Town Council.

On the 1st of January,	1861,	the	numb	er of	Patier	nts in	the
Asylum was						344	
Admitted in the year .						142	
			Tot	tal	•	486	
Discharged in the year		. 1			80		
Died					30		
Total discharged and died	•					110	
Leaving in the Asylum on	the 9	1 of T	Docom	or 1	861	876	
Leaving in the Asylum on	the o	150 1	Jecenn	Jer, 1	001	-010	
They were chargeable as f	follows	:					
Birmingham Parish					1.	·293	
Birmingham Borough						8	
Aston Union .						48	
King's Norton Union						6	
Bridgnorth Borough				1.		6	
						2	
Patients not Paupers						18	
- une and a map		ring to					
			Tot	tal ·		376	

The daily average number of Patients resident through the year was 360.

Twenty-five of the cases admitted had been previously in this Asylum.

Ten of the Patients discharged were taken away by their friends, the same being sanctioned by the Committee.

Six Patients were removed to the Workhouse for want of room in the Asylum. Fourteen were removed to other Asylums, being cases not chargeable to the Parish or Borough of Birmingham; and six Patients absconded, which were not recaptured.

The Income and Expenditure for the year is as follows :---

Income from Parishes, Unions, Private Patients, and Goods sold . . . £8210 18 9 Expenditure for Maintenance, &c. 7691 3 8

	Balance	. F.P			519	15	1
Receipts from	Farm and G	arden,					
with Stock			2638	12	0		
Expenditure	ditto	.9	2448	14	4		
	Balance			. 70	189	17	8
Total Balance	in favour o	f the A	Asylum	. 31	£709	12	9
						221	2153
The Treasurer'	s Accounts	for the	year a	re as	follows	:	
Amount due t	o Treasurer	, Dec.	31st, 1	861,	£2783	5	7
Tradesmen's	Accounts for	r Dece	mber Q	uarte	er 860	0	8
		Т	otal	•	£3643	6	8
Arrears of	Accounts d	ue to					
	ept. 30th		£1563	7	8		
Accounts due	Dec. 31st,	1861	2933	4	5		
	Te	otal	£4496	12	1		
Balance in far	and the second				0050	E	10

Balance in favour of Asylum . . . £853 5 10

The charge per week for Maintenance, &c., through the year has been as follows :---

To Parishes in and Bord	ough	of	Birmin	gham		s. 8	<i>d</i> . 6	
" Bridgnorth Borough						11	0	
,, Outlying Parishes						11	6	
" Private Patients				8s. 6d.	and	12	6	

These charges are sixpence per week in advance of the year 1860 (with the exception of Bridgnorth); this advance was deemed advisable by your Committee from the high price of provisions and other things required for the maintenance of the Institution.

From January 1st to December 31st, 6663 relations and friends visited the patients at the Asylum, and many patients have been permitted to visit their homes, leaving the Asylum in the morning and returning in the evening. There was on an average 242 patients attending Chapel; and 235 daily employed.

Two of the Commissioners in Lunacy visited the Asylum on the 31st of October, and again on the 1st of November; the following passages are from their Report :---

"During our visits the Patients were generally free from excitement, and no one was restrained or secluded.

"Very few of the Patients were in bed, and their bodily health is generally good. The last entry in the Medical Journal shews that 4 men and 5 women are under medical treatment.

"Of the whole body of Patients, 233 are habitually employed in various ways, and all the clothing, shoes, &c., are made on the premises.

"All the wards were very clean, and quite free from any offensive odour. The bedding was also in excellent order; we noticed with satisfaction the comfortable and cheerful appearance of several of the Galleries, which have lately been papered, decorated, and furnished; and we are glad to hear that the other Galleries will gradually be made to resemble them.

"We have inspected the Land, consisting of about eighteen acres, which has recently been added to the Asylum property; a pathway runs along the western boundary of it, and we think it very desirable that this should be closed, if powers can be obtained for so doing." The Asylum has been regularly visited by Members of the Committee, at uncertain periods, and their reports show the good condition of all connected with its cleanliness, order, and management; also the tranquility and general satisfaction of the patients.

The ventilation continues to work well, there is a good supply of water; the warming of the galleries is satisfactory, and the drainage (with one exception) has been effective through the year. The alterations made in the front Galleries answer well their intended purposes, —the open fire-places in these galleries have a very cheerful appearance, and the galleries themselves form a comfortable sitting room, affording ample space for all the patients to group themselves round the fire, or otherwise. These galleries have been papered and painted, entirely dispensing with whitewash.

On the Male side, the floors both of the bed-rooms and galleries are dry polished, therefore free from all damp and unhealthiness caused by scouring them, while for cleanliness, this method of polishing floors and painting walls and ceilings, is preferable to scouring and whitewashing.

The alterations in the Laundry, forming part of the plan for enlarging the Asylum, were completed previous to commencing the additions to the general building. This alteration consisted in making day-room and sleeping accommodation for thirty patients and their attendants, with bath-room, scullery, &c., for the same. The work was done by J. Hardwick and Son, at a cost of £563. 10s., and the whole was finished and furnished by the end of May last; since that time twenty-eight patients have been located there, and employed in doing the washing of the Establishment. Alterations have also been made in the Kitchen apartments, giving accommodation to five female patients who are employed there. These arrangements made room for the increased number of female patients, and although the Asylum through the year has been so overcrowded, the health of the inmates has been remarkably good.

The occupation of the patients continues to afford not only one of the best means towards their restoration to health, but the Institution is benefited thereby. The value of their labour for the year, estimated at a very low rate, amounts to $\pounds 810.\ 10s.\ 7d.$

The purchase of the eighteen acres of Land for the use of the Asylum is completed, and the Committee of Visitors proposed to the Guardians of the Poor of the Parish of Birmingham a mutual exchange of the land belonging to the said Guardians adjoining the Asylum Estate, for a portion of the land purchased adjoining the Workhouse. Your Committee have to report that so advantageous an exchange to both parties was not agreed to by the Guardians.

The plans for enlarging the Asylum, prepared by Mr. Martin, the architect, and sanctioned by the Council, were submitted by advertisement to contractors in the month of May last, when ten tenders were received, from which the Committee selected that of Messrs. Chambers and Hilton, their tender being \pounds 8339—the highest tender was \pounds 13,175. 14s. 3d.—the work was commenced on the 14th day of June, and was to have been completed by the end of October, which probably would have been the case, but from the difficulty experienced by the Contractors in procuring stone, &c., in the quantity and of the quality required. The works however have progressed so far, that the front blocks will be finished ready for furnishing by the end of the present month, when the house will be relieved from its now overcrowded state.

Your Committee hope when the extension of the Asylum is completed, to afford some accommodation to a class of persons in the Borough who by their means are shut out from private Asylums, or by paying the rates charged therein are soon reduced to poverty, and ultimately find their way through the Parish into your Asylum.

In no town in England is Lunatic Asylum accommodation for the middle class of its inhabitants more required than in Birmingham, as this class of persons under the affliction of insanity are entirely unprovided for, and in this respect are worse off than the pauper. This question, it is hoped, will shortly receive the consideration it requires from the Legislature, and arrangements will be made by which the insane of the middle class of society will be admitted into the Public Asylums.

(Signed,)

CHARLES STURGE, Chairman.

BIRMINGHAM BOROUGH

MALE DIETARY.

BREAKFAST.

1 pint of Coffee, 6 oz. Bread, and 1 oz. of Butter.

DINNER.

Sunday . $\begin{cases} 9 \text{ oz. undressed Meat, free from Bone (roasted).} \\ 16 \text{ oz. Potatoes, or other Vegetables.} \\ 3 \text{ oz. Bread, and } \frac{1}{2} \text{ pint of Beer.} \end{cases}$

MEDICAL SUPERINTENDENT'S REPORT.

In this my eleventh Annual Report I am again able to speak satisfactorily of the condition of the Asylum during the year which has just expired. The general health of the inmates has been uninteruptedly good, and they have enjoyed a singular immunity from accidents, as well as from epidemic disease; though much annoyance was temporarily occasioned by the admission of a patient suffering from an inveterate form of itch, which spread to other patients and caused much trouble for a time.

Another circumstance in the history of the year-in this Asylum an extraordinary one, and therefore not to be passed over in silencewas the use of mechanical restraint, which was resorted to on two occasions, and which had never before been used, except once in a bad surgical case nearly seven years ago. The first patient to whom it was applied was a young Irishwoman of unusual strength and determination, who was resolved upon inflicting some bodily injury upon herself-to gouge, strangle, or choke herself-and made such efforts to do so, that it took the united strength of four nurses to hold her. At the end of two hours, finding no abatement in her fury, nor any diminution in her strength, and the services of the nurses being required elsewhere, I placed around her waist a leathern belt, to which the wrists were secured by padded straps. The effect of this was, that finding resistance useless she instantly became tranquil, and never afterwards gave us a moment's trouble. The restraint was continued between two and three hours.

The other was a patient who was admitted with a large wound in her throat, made just before she came, which, after it had united, she tore open. The restraint in this case was continued for one night only.

The admissions during the year were 142, just the average of the previous ten years, but 14 more than in 1860. Twenty-five were re-admissions, after absences ranging from three months to ten years; but one patient, who was taken away by his friends contrary to my advice, was brought back at the end of ten days. The average daily number of patients in the House was 360, the lowest number 342, the highest 377.

There were 45 recoveries, being 31 per cent. upon the year's admissions, the same as 1860. The average of the previous ten years was 41 per cent.

The rate of mortality was lower than in any former year. The number of deaths was 30, which is 20 per cent. upon the year's admissions, but only 6 per cent. upon the total number under treatment. It will be seen by Table XI. that one-third of the deaths arose from general paralysis, and nine, nearly another third, from other forms of cerebral disease; seven were from pulmonary affections.

In two cases of sudden death inquests were held : the verdict in each case was "Died by the visitation of God."

Having regard to the bodily condition of the patients recently admitted, among others three helplessly bedridden patients admitted at the same time, and also to the great number of paralytics whose cases are fast verging towards their inevitable termination, it is to be expected that the mortality during the present quarter will be far beyond the average.

Owing to the exposed state of the premises during the progress of the new buildings, an unusual number of patients have been tempted to escape, and six of the absconders (five men and one woman) were not again heard of in time to be reinstated as patients. All the others were either fetched back or returned voluntarily, after short absences, except one who returned on the fourteenth day.

A few years ago an article appeared in a medical periodical condemnatory of the practice pursued in this and many other Asylums with regard to the uncleanly patients. As it was written by one of our most distinguished Medical Superintendents, I felt that the opinions therein enunciated were entitled to the gravest consideration, and, therefore, instituted the following experiment in order to satisfy my own mind upon the subject. I directed the night attendant, for a time on alternate weeks, not to interfere at all with that class of patients, and carefully noted the result, which, though I have mislaid the memoranda made at the time, I well recollect did not in any way bear out the views of the author of the paper alluded to.

Lately my attention having again been called to the subject, and wishing for exact data to replace those mislaid or lost, I repeated the trial for a single week. The result, then, was as follows. On the male side, during the trial week, there were 75 wet beds and two dirty, against an average of 38 wet and not one dirty during the previous three weeks. One the female side, setting aside one exceptional case, the trial week produced 32 wet and 18 dirty, the average previously having been 12 wet and only one dirty in three weeks. This statement fully disposes of one of the two objections made to our practice, viz., that it does not materially lessen the amount of uncleanness. The other objection is, that to disturb persons from their sleep by taking them out of their bed two or three times every night, must have an injurious effect upon their general condition,-an objection plausible enough in theory, but not borne out by experience. Long and close observation has convinced me that the patients do not suffer in any way by being taken out of bed, for in a few minutes all are again as fast asleep as though they had not been disturbed, a few are scarcely awakened by it, and it is worthy of notice that some from habit got out of themselves, thus lessening the number of wet beds which would otherwise have

occurred. Were the practice to be discontinued, one of two things must happen, either many more of the patients would often have to pass a great part of the night in wet beds, or they would be kept shivering in the cold while the clothes were being changed. It is hardly necessary to say that the practice is limited to chronic cases; for in recent and acute attacks unbroken sleep is of too great importance to admit of such interference.

The ornamentation of the wards is proceeding as rapidly as the means at our command admit of; whitewash is giving way to paper and paint, and benches to chairs, tables, couches, book-cases, curtains, pictures and other ornaments are being gradually introduced into the different apartments. When the whole is completed, which, however, must be a work of time, the interior of the Asylum will have as much the appearance of an ordinary dwelling-house as so large a place can be made to assume.

It has been remarked that the style in which these things are being done is too good for the class of persons (Paupers) for whose reception the building was erected, and calculated to make them dissatisfied with their own homes. To this it may be replied, that the character of the furniture, &c., is not superior to what is frequently met with in the houses of that class of artizans from which many of our patients are drawn; some it is true come from a lower station, but not a few also from a higher. It must be borne in mind that a large proportion of the inmates of this Asylum, I think fully one-half, are persons whose pauperism is solely the consequence of their mental malady, and who would not have been reduced to that condition by any other cause. It appears to me that such persons no more deserve to be called paupers than do the inmates of any large Hospital, both being equally, and for similar reasons, the recipients of public bounty. But the question must be looked at from another point of view : What effect does all this elaborate preparation have upon the minds of patients? Does it make them more contented, more tranquil? Especially does it tend in any way to promote their recovery ?--- a consideration paramount to all others.

That a well-ordered, well-furnished house has a tranquillizing effect, and thereby a curative influence upon the minds of insane persons, is seen in the fact that in such a house there is less destruction of property than in one meagrely furnished. I say this, not from any preconceived notions upon the subject, for they were just the contrary; but from a conviction which has been gradually forced upon me by the experience of the last ten years.

Our Library is the only valuable property which has suffered any material injury; not, however, from wanton mischief, so much as from the wear and tear of ordinary use. From this cause, conjoined with our increasing numbers, and the proposed subdivision of the Library into sections in order to provide each gallery with a Library of its own which will be always accessible to the patients, our present stock of books has become altogether insufficient for our wants; I therefore unhesitatingly appeal to the liberality of generous and sympathizing friends for contributions of surplus books from their private collections towards supplying our deficiencies.

> THOMAS GREEN, Medical Superintendent.

January 10th, 1862.

CHAPLAIN'S REPORT.

TO THE COMMITTEE OF VISITORS OF THE BOROUGH LUNATIC ASYLUM, BIRMINGHAM.

GENTLEMEN,

In presenting my fourth annual report as Chaplain to your excellent Institution, I have great pleasure in stating that the affairs of the Asylum have been conducted upon the same uniformly excellent rules and regulations which have in former years characterized the Institution.

In the discharge of my ministerial duties, I have with sincere thankfulness to report that during the past year I have continued to receive the warm support and co-operation of the superior Officers, and the respectful regard of the Attendants, in carrying out my plans for the moral and spiritual welfare of those committed to my care and oversight.

The order of Divine Service in the Chapel, and the private ministrations in other parts of the Institution, have been of a similar character to those pursued by me in former years, and may be thus particularized :—

On Sunday the service consists of the Morning Prayer to the end of the Litany, the singing of a Hymn, and the preaching of a Sermon adapted as far as possible to the capacities and requirements of my congregation.

On Wednesday morning at half-past eight, a service is held in the Chapel, consisting of the Litany, the singing of a Hymn, and the delivery of an expository Bible Lecture, a mode of instruction which experience during the past four years has, in an especial manner, commended itself to my judgment, as not only interesting in its character, but calculated to engage the attention and stimulate the minds of the hearers to healthy action and mental vigour.

On Thursday morning at half-past eight, I read Prayers in the Chapel, afterward visit the Courts and Galleries of the Institution for the purpose of conversation and religious instruction and consolation to the various portions of my charge. I am happy to report that the instruction given is warmly appreciated and affectionately received by the inmates.

The Sacrament of the Lord's Supper has, with one exception, been regularly and duly administered during the year. The omission alluded to was necessitated by the closing of the Chapel for alterations and enlargement, and the great inconvenience of administering it in the Hall, which, in the interim, had been used for Divine worship.

In consequence of the Hall being required for religious services, the usual Monday evening amusements and recreations were postponed until Christmas; but in order in some measure to supply a source of entertainment to the inmates, your Chaplain delivered a series of popular Lectures on the following subjects : the first being "Biographical Sketches of some of the more Distinguished Men of Modern Times;" the second on "Robert Bloomfield and his Poetry;" the concluding lecture was upon "The Life and Poetry of Cowper." The whole of the lectures, I am happy to report, were listened to with much interest and attention by large audiences.

It is with much satisfaction that I report upon the success which has attended the enlargement and alterations of the Chapel, just completed, whereby a large amount of additional accommodation has been provided for the use of the inmates.

I consider the Chapel in consequence of its recent alterations to be admirably adapted for Divine worship, in every particular, and for the comfort and convenience of both minister and people, the recently erected Gallery being excellently arranged both for seeing and hearing.

I have also pleasure in mentioning that the Library for the use of the Asylum, consisting of a large number of valuable and instructive volumes, continues to form an important auxiliary to the other means employed for the moral and spiritual welfare of the afflicted inmates.

I have found from long experience that the distribution of religious tracts has proved to be a ready and excellent means of doing good, they are eagerly sought, and for the greater part carefully read by the patients; and I may mention, that they are the more valued by them from the fact that they are *given* to them and not merely lent. As an instance of the value set upon the tracts by the inmates, after having diligently perused them, they carefully lay them aside for presentation to their relatives and friends, who from time to time visit them; and thus an affectionate feeling is cherished toward their friends outside, which, if it does not largely contribute toward the recovery of the patients, certainly will not fail to enhance their happiness and promote their comfort during their seclusion.

After a careful review of the events and duties of the past year as regards your Institution, I can with confidence assure you, that no means have been left unemployed for the moral and spiritual welfare of the inmates.

I have the honour to be,

Gentlemen, Your obedient Servant, CHARLES BRITTAIN,

Chaplain.

January 24th, 1862, Winson Green.
