**The Twenty-third Annual Report**  
OF  
**THE COMMITTEE OF VISITORS**  
OF THE  
**LUNATIC ASYLUM FOR THE CITY AND COUNTY  
OF BRISTOL.**

---

YOUR Committee have much pleasure in reporting that the condition of the Asylum has been satisfactorily maintained in all its departments during the past year, and that the buildings are in a good state of repair.

The number of the patients in the Asylum at the date of the last Report was 199 males and 226 females; total, 425.

There are now in the Asylum 200 males and 238 females; total, 438.

The highest number resident at one time was 202 males and 238 females; total, 440.

There are at present 5 private patients in the Asylum, viz., 2 males and 3 females. Of these only 1, a male, is presumed to have a settlement outside the Borough; and, as the male division is not yet quite full, he will, unless removed by his friends, remain on the books. The remaining 4 would, if any alteration in their status were made, be transferred to the

pauper list, which would not be advantageous in any respect. It is intended, therefore, to make no change in regard to them at present.

Referring to the Report made to the Council on the 14th December, your Committee have pleasure in stating that they have received the consent of the Secretary of State for the purchase of the Lands therein referred to.

In April last Dr. Fullerton resigned his appointment as Assistant Medical Officer, and Dr. Harry Benham has been appointed in his place.

A copy of the Commissioners' Report is hereunto annexed, and the Annual Reports of the Medical Superintendent and Chaplain are also appended.

Your Committee regret that during the past year they have been deprived of the valuable aid of their late Chairman, Frederick Terrell, Esq., J.P., who retired from the Council in consequence of advancing years. Mr. Terrell joined this Committee while the Asylum was being erected, and in the year 1863 he succeeded as Chairman the late Mr. William Herapath.

Your Committee have elected Charles Wathen, Esq., their Chairman.

CHARLES WATHEN,  
*Chairman.*

COUNCIL HOUSE, BRISTOL,  
*31st December, 1883.*

# REPORT

OF THE

## VISITING COMMISSIONERS IN LUNACY.

---

BRISTOL BOROUGH ASYLUM,

*November 22nd, 1883.*

This Asylum, which has to-day been inspected by us, contains 435 patients, 202 males and 233 females, and all but two of each sex of the pauper class. There are thus 10 patients more than at the visit of our colleagues on November 3rd of last year, and in two years the increase in number has been 35. To provide for the present number of women, beds for 16 have to be made upon the floor, but in the male division there are 9 vacancies. The increase of accommodation is therefore a question of pressing importance; but, in the view of our Board, a necessary preliminary is, as the Visitors are aware, an addition to the very limited Asylum estate. This, we understand, comprises but 30 acres, an extent obviously inadequate for the present number of inmates, and we feel sure that the Board will feel unable to recommend for the sanction of the Secretary of State any extension of the existing accommodation until there has been a material addition to the land. We are informed that negotiations are on foot to this end, and we trust they may, without much delay, be brought to a successful issue.

Since the last visit 60 males and 66 females have been admitted here, 20 males and 37 females were discharged, 16 males and 33 females on recovery, and 39 males and 21 females died. In 50 of these 60 deaths the cause of death was verified by *post-mortem* examination. Of the causes of death general

paralysis was the most fatal, accounting for 14 deaths. In three cases inquests were held. There has been correspondence with our Office respecting all three deaths, two of which occurred at night, the patients being unattended and the deaths due to epilepsy. The want of continuous night supervision of the epileptic and actively suicidal classes of patients in this Asylum has so often been a subject of comment by our Commission, that it is, with special satisfaction, we learn that the Committee have at length resolved that the large dormitories of the new buildings of either division shall be used by these patients under the care of night attendants not leaving the rooms. The system cannot be too soon introduced and brought into working order. Some alterations, of no great cost, are, however, requisite: open panels in the doors of the single rooms, gaslights in orifices in the wall over the doors, and a satisfactory plan of recording the wakefulness of the attendants. Dr. Thompson informs us that it is intended to introduce one of the electric systems for this purpose, with which we hope may be combined means for summoning assistance. We think that the bedsteads for epileptic patients should be lowered, so as to prevent injuries by falling out of bed.

The dormitories in question with the adjoining wings contain 68 beds, all of which will probably be occupied by epileptic or suicidally-disposed patients, and we doubt if the supervision of one attendant will be sufficient for so many. The epileptics at present are 51 among the males and 41 among the females.

The only serious casualty reported to us was an injury sustained by a patient who was kicked by an attendant. The latter was tried for assault at the Gloucester Assizes, but was acquitted. There have been, however, numerous slighter injuries and accidents, which probably a stronger staff of attendants might have diminished in number.

The rate of mortality since the last visit has been rather high, over 13 per cent. per annum on the average daily number

resident, but there has not been any epidemic or contagious disease prevalent.

The state of the Wards is very satisfactory; some have been redecorated this year. We can report favourably, too, of the demeanour of the patients and of the condition of their dress.

No well-founded complaints of illtreatment were made to us, nor any of the diet. The dinner to-day was of fish, and it appeared to be liked. We hear that the use of beer has been wholly discontinued, without any dissatisfaction on the part of the patients. The Attendants receive a money allowance in lieu, and some slight addition has been made to the dietary.

There is still room for improvement in the proportion of the patients who are usefully employed. At present this is about 60 per cent. So also as regards those whose exercise extends beyond the airing courts. We find that 146 males and 100 females are confined to these. Some 50 of each sex go for walks beyond the estate.

Not many patients were to-day confined to bed, and under medical treatment are 18 males and 18 females. While on this subject we would call attention to the obvious objections to the plan of allowing aperient medicines to be kept in the Wards, and given at the discretion of the Head Attendants.

We find that five male patients have been restrained on 45 occasions and for 436 hours, and an idiot boy with destructive propensities has voluntarily had his hands tied during 44 days. A woman for surgical reasons was also restrained during several days. Seclusion was resorted to in the case of 35 patients on 117 occasions, and for a total of 456 hours.

The present staff of Attendants for day duty consists of 14 men and 15 women. This gives an Attendant to about 14 male and 15½ female patients, proportions which strike us as low, having regard to the requisite leaves of absence. Seven men and five women have not more than twelve months' service. The rates of wages paid are good.

Some structural improvements have been effected since the last visit; among them the important one of connecting the drains with the City system, the connecting sewers being trapped and ventilated. Some alterations have been made to diminish the risk from fire, and further appliances for extinguishing one have been provided. We think that lengths of hose should be kept by the internal hydrants, enclosed, of course, in locked cupboards. As regards the means of egress from the sleeping rooms, we think they are fairly adequate except in the case of the dormitories over the Laundry and Workshops respectively, which are rather isolated from the staircases. Some additional exits should be provided, and the removal of the Workshops and conversion of the space occupied by them into rooms for patients should be considered by the Committee.

The present weekly maintenance rate is 10s.

# The Twenty-third Annual Report

OF

## THE MEDICAL SUPERINTENDENT.

1883.

*To the Committee of Visitors of the Bristol Lunatic Asylum.*

*January 1st, 1884.*

GENTLEMEN,

I have the honour to submit to you the Twenty-third Annual Report of the Medical Superintendent, which, together with the Statistical Tables annexed, will afford an account of the changes which have occurred in the Asylum during the year just closed.

The admissions, re-admissions, discharges, and deaths, have been as follows:—

	MALES.			FEMALES.		
	Private.	Pauper.	Total.	Private.	Pauper.	Total.
On the Books Dec. 31st, 1882...	4	195	199	3	223	226
Admitted in 1883 ... ..	0	55	55	1	59	60
Re-admitted in 1883 ... ..	0	5	5	0	7	7
Discharged:—						
Recovered ... ..	0	14	14	0	30	30
Relieved ... ..	0	3	3	0	1	1
Not Improved... ..	0	0	0	0	0	0
Removed ... ..	0	2	2	0	3	3
Died ... ..	1	39	40	0	21	21
Transferred from Private to Pauper List... ..	1	0	1	1	0	1
Transferred from Pauper to Private List... ..	0	0	0	0	0	0
Remaining Dec. 31st, 1883 ...	2	198	200	3	235	238
Highest Numbers Resident ...	2	200	202	3	235	238
Average Numbers Resident ...	3	197	200	3	230	233

Comparison of  
Numbers.

On comparing the foregoing Table with the one contained in the Twenty-second Report, it will be seen that there has been an increase of 16 in the total number admitted and re-admitted; of 34 in the total number under treatment during the year; of 18 in the average number resident; and of 13 in the number remaining at the end of the year.

The Admissions.

Though the number admitted—127—exceeds that obtained in 1882, it is rather below the average number—129—admitted in the five years preceding the year just closed. But for the comparative exhaustion of the Workhouses, the number would doubtless have been greater. I have much reason to regret the very unfavourable character of the cases admitted, and that no less than 53 passed some time in one or other of the Workhouses previous to being brought here. Forty of the cases admitted were the subject of coarse lesion of the brain, 11 being epileptics, 10 general paralytics, and 19 bearing symptoms of other brain disease of various kinds, being about the same as last year. One woman was pregnant when admitted, but was discharged, recovered, before delivery. Three insane prisoners were admitted on the Home Secretary's order, and one discharged soldier on the order of an Under-Secretary at War.

The Recoveries.

The rate of recovery taken on the number admitted shows a percentage of 34·6. This is slightly below the average for this Asylum, but equal to the percentage of recoveries in all the County and Borough Asylums in England and Wales in the previous year, as shown in the "Blue Book." A larger proportion of curable cases remain on the books than usual, so that a higher rate of recovery may fairly be looked for in the next Report.

Escapes.

Two men effected their escape during the year. One was shortly afterwards re-admitted; the other, who was a malingerer "gaol-bird," was not re-captured.

Removals.

Two patients—one of each sex—were discharged to the care of their friends, and two men and three women were removed to other Asylums. All these were "relieved."

The deaths were 61 in number, made up of 40 males and 21 The Deaths. females. The rate, calculated on the average number resident, gives a percentage of 14. This is the highest rate of mortality which has occurred since 1875. No less than 40 of these deaths were due to the "coarse lesions" of the brain referred to in a previous paragraph; while "natural decay" carried off 5 more. As in the previous year the deaths were comparatively few, it may be assumed that many cases were "tided over" into this year. The two years afford a mortality amounting to about 11 per cent.

Three inquests were held; one on an epileptic woman who Inquests. was found dead in bed during the night. The verdict of the Coroner's jury was to the effect that she died from epilepsy. The other two were men, who died from exhaustion after mania.

The average age at death was 45 years.

Table IX., appended, shows in detail the causes of death, and is so modified, in accordance with the revised Tables of the Medico-Psychological Association, as to show at the same time the ages at death in quinquennial periods.

Table XII. is also modified so as to show, in addition to the The Residuum. form of mental disorder in the admissions, discharges, and deaths, the form of mental disorder affecting those remaining at the end of the year. This supplants the special Table embodied in my Report of the previous year so far as the "form of disease" goes, but it is necessary to supplement it by saying that the curable cases remaining are: Males, 11; females, 12; total, 23.

There are at the present time 20 more women in the Asylum The present Condition of the Asylum. than the division is capable of accommodating, and now the pressure is being felt in the day rooms. The result is much friction, with the usual further result of quarrels and injuries to person and property. In the men's division there are still seven empty beds; but it is only in consequence of the high death-rate

that even these few beds remain vacant. Should the admissions and discharges go on at the same rate as last year, and the deaths fall back to the rate of the previous year, this division will be full in the course of two or three months.

Improvements  
and Altera-  
tions.

One great improvement has taken place during the year—I refer to the attachment of the Asylum sewage system to the parish drains. This removes from the Asylum for ever the perhaps unfounded charge that it was fouling its neighbours' wells and the river contiguous. The connection is made through an ordinary ventilated trap; but in addition to this the sewage is discharged into an open pit on the "proximal" side of the "trap"—into the open air in fact—and an iron grid is placed over the entrance to the trap so as to intercept "house cloths" and other substances which it is as well should be kept out of the drains. The "pit" and other openings afford an efficient means of ventilating our own system, and so of preventing foul gas from entering the wards and other parts of the Asylum.

Another improvement is the purchasing of about ten acres of land situate on the west side of the Asylum. This will afford more scope for healthful exercise to the patients, and be serviceable in other respects. I trust it will remove the objection raised to allow more patients to be provided for on the limited amount of ground hitherto owned by the Asylum.

In the men's division a good billiard table has been placed, and it affords much amusement to patients, attendants and officers.

The setting of the women's refractory ward has been extended from the day room to the corridors, and light chairs have been abolished. This means a great saving of glass and the removal of some risk of injury to the person.

The Beer Ques-  
tion.

On the 1st of September last, in accordance with the resolution of the Visitors, beer ceased to be an article of ordinary diet. This change was not made in haste, but after much deliberation.

From every point of view it has been beneficial. The beer given was much better than that usually supplied in Asylums, but I had long maintained that it had no dietetic value whatever, or, if it had any, that that value was counterbalanced by the deleterious effect, moral and physical, which it had. The patients drank the ordinary amount allowed as a matter of course, and were not benefited by it. Those who were expected to do work got an extra allowance, and were all the more discontented with their lot. No extra work could be got out of anybody unless extra beer was allowed. The nurses and female servants seldom drank it, but received no compensation for their abstinence; while the male attendants were often "the worse" for what they had consumed. It is only fair to these to say, however, that they had frequently expressed a desire to be allowed money instead of beer, but I need hardly say that there was a difficulty in that matter so long as beer was sent to the wards. Now each paid man receives £4 and each paid woman £2 per annum in lieu of the allowance of beer, and insobriety is now very conspicuous by its absence.

As the subject of the retirement of Mr. Terrell from the Chairmanship of the Committee is mentioned in your Report to the Council, it is hardly necessary for me to refer to the circumstance; but I cannot refrain from saying, on behalf of my colleagues and myself, that we shall always feel grateful for the sympathy, consideration and unvarying kindness which we received from him; and that, while regretting the cause of his separation from us, we hope he will live long to enjoy the rest which he has so well earned.

The Retirement  
of the Chair-  
man.

One change of importance occurred during the year—I refer to the appointment of Dr. H. A. Benham to the post of Assistant Medical Officer. After six months of experience of Dr. Benham I am inclined to believe that he will prove to be equal to his late brother, who was one of the most able officers this Asylum has known, and who held the same responsible position.

The Asylum  
Staff.

To the other officers, the attendants and the servants my thanks are hereby tendered.

In concluding this (my thirteenth) Annual Report, I beg to thank you for the confidence reposed in me, and subscribe myself,

Gentlemen,

Your obedient servant,

GEORGE THOMPSON, M.D.,

*Medical Superintendent.*

## CHAPLAIN'S REPORT.

---

*To the Committee of Visitors of the Bristol Lunatic Asylum.*

*December 31st, 1883.*

GENTLEMEN,

I have again the honour of laying before you the Annual Report of the Chaplain. During the past year there have been two services in the Church on Sundays, and one on Good Friday, Ascension Day and Christmas Day. The Holy Communion has been publicly administered on six occasions.

After a shortened form of "morning prayer," which has been said daily in the dining hall, I have regularly visited the several wards, and, from the hearty welcome always given me, venture to hope that my efforts to comfort and encourage have not been altogether unsuccessful.

The average number of patients attending Church has been 228, viz., males, 108; females, 120. From observations made to me from time to time, it is satisfactory to be able to state that the bright and hearty services are not only appreciated, but greatly valued; and I take this opportunity of publicly expressing my thanks to Dr. Thompson and the other members of the choir for the assistance which they have at all times most cheerfully and ungrudgingly given.

The "Pillow Letter Mission," as on three previous occasions, sent a "Christmas letter" to each of the patients; and the Local Secretary—a lady residing in Clifton—again added a number of useful presents, consisting of woollen mittens, &c.

A parcel containing a large number of appropriate cards, texts, &c., for distribution at Christmas, was received from the Religious Tract Society.

Permit me, in conclusion, to refer briefly to an event during the past year which caused universal regret in the Asylum—I mean the retirement of F. Terrell, Esq., from the post which he had filled for twenty years. It is not for me to speak of the way in which he discharged the duties of Chairman, but I desire to bear my humble testimony to the unvarying kindness and consideration which he always showed to officers and patients alike. Ever willing to give good counsel—and none knew better how or what to advise,—sparing neither time nor trouble on behalf of those in whose welfare he ever took a kindly interest, Mr. Terrell will not easily be forgotten by those whose good fortune it was to serve under him. As the regret for his resignation is universal here, so also is the wish universal that he may long be spared to enjoy the rest which he has so well earned, the respect and confidence which he has so justly and deservedly gained.

Thanking you for much kindness shown to me in the past year,

I remain, Gentlemen,

Your obedient servant,

JAMES FOUNTAINE, M.A.,  
*Chaplain.*
