REPORT OF THE COMMITTEE OF VISITORS.

Epiphany Sessions, 1866.

In presenting our Twentieth Annual Report, it is not necessary that we should make any especial remark on the general condition of the Asylum, which is in every respect good (except as to the number of inmates), but it is our duty to call immediate attention to its over-crowded state, which is already productive of great inconvenience, and would be attended with the most serious results in the event of the occurrence of any epidemic disorder.

The number of patients now in the Asylum is 690, of which 284 are males, and 406 females. There are 579 County patients, 111 Borough patients, and 10 Criminal patients.

The number of admissions during the year have been 180; that of deaths, 73; and of discharges, 93.

We do not infer from this large number that there has been any increase of insanity. It is entirely accounted for by the circumstance of there being so many chronic cases, and by the discharges and deaths being so much fewer than the constant increasing number of such cases added to those yearly admitted; indeed, it will be heard with regret, that, according to the returns to be laid before Parliament, and the opinion of our Medical Superintendent, there are not

more than 50 cases in which there is any reasonable hope of recovery.

We have divided the twenty years since the first receipt of patients into the Asylum into quinquennial periods, and we find that of those admitted during the first eighteen months, viz., in 1845-46, 78 still remain; of those admitted during the first five years 128 remain; of those during the second five years, 87 remain; of those during the third five years, 119; in the fourth five years, 264; which, together with the admissions of the last year, make the number 710. We make this statement to prove that we cannot hold out any present hope of a reduction of numbers, and as at this time it was reported to us that the beds are too closely placed, and that 20 patients are sleeping on the floor, it became our duty to take immediate steps to relieve the pressure. With this view we have addressed a letter to the Clerks of the Petty Sessional Divisions, requesting the Magistrates not to send patients to the Asylum except in cases of great urgency, until they have first ascertained from the Superintendent whether he has accommodation for them in the wards. This, however, is only a temporary expedient, and does not meet the urgency of the case. It has been suggested that we might gain accommodation by discharging the Borough patients, but as the contracts with the Boroughs do not expire for some time, it is evident that we should not receive immediate relief by taking that course. We have also considered whether it might not be possible to remove some of the working patients to the farm buildings, but they are not sufficiently advanced to enable us to do so. Another mode of relief may be found in sending the harmless patients back to the Workhouses, which we are enabled to do by Act of Parliament; and we think that many harmless patients and those whose insanity is produced by the infirmities of old age, may, with propriety be discharged to the care of their friends,

the Boards of Guardians granting a sufficient sum for their maintenance, as soon as the relief can be charged upon the common fund of the Union.

Having, however, considered the matter in all its bearings, we feel it to be our duty to recommend that, unless the Boards of Guardians will concur in the suggested removal of the chronic cases to the Workhouses, some addition must, of necessity, be made to the present building. We shall give our best attention to any plan which may be suggested for that purpose, and make our report at the next Sessions, when we hope a grant, if required, will be made to enable us to carry it into effect with the least possible delay.

We have pleasure in being able to state that a sufficient quantity of water has been obtained, by providing a new pump to the well, of greater length and power than the one hitherto in use, and for which an order was made at the Michaelmas Sessions, 1864, and we have every reason to hope the supply will continue.

In consequence of the high price of provisions, we have been compelled to raise the rate of maintenance to nine shillings and six-pence per week, and we do not see any present prospect of reduction.

The further sum of £4,000 of the Building debt has been paid off during the past year, and the debt is now reduced to £10,000.

A large portion of the farm buildings has been completed, including the Steward's house; the cattle sheds and dairy and piggeries are in a forward state. Several additional acres have been laid down to grass, and the sewage of the Asylum carried over it. We have purchased nine cows, which give an average return of £7 per week, and when we have sufficient grass for the whole number which we propose to keep, we hope that the farm will supply a large portion, if not all the milk and butter required for the

patients. The expense has been paid out of the Building and Repair Fund, of which we shall render an account, together with the General Account, at the next Quarter Sessions.

We have only to express our entire satisfaction at the manner in which the Officers of the Asylum have discharged their duties during the past year, and to remind the Court that the Visitors for the ensuing year are to be appointed at these Sessions.

SAML. TREHAWKE KEKEWICH,

Chairman.

EIGHTEENTH ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT.

The Medical Superintendent has the honor to submit to the Committee of Visitors the Twentieth Annual Report, accompanied by the usual statistical Tables.

During the year 1865, 150 patients have been admitted, of whom 279 were males, and 397 were females.

The deaths during the year have been 73; males, 36; females, 37.

The discharges during the same period have been 93; of whom 53 were men, and 40 were women; of these 68 were discharged recovered.

The total number of patients under treatment during the year has been 856.

The following Table shews the changes which have occurred in the Asylum during the year.

		Males.	Females.	Total.
Number of Patients 31 December, 1864		279	397	676
Admissions during the year 1865	...	94	86	180
		<hr/>	<hr/>	<hr/>

		<hr/>	<hr/>	<hr/>
Remaining in the Asylum, Dec. 31, 1865		284	406	690
		<hr/>	<hr/>	<hr/>
Average number resident during the year		289	401	690
		<hr/>	<hr/>	<hr/>
Number deemed curable on Dec. 31, 1865		22	23	45

The recoveries have been 38·8 per cent. on the admissions.

The death rate has been 8·29 per cent. on the total number under treatment during the year, and 10·57 per cent. on the average number resident.

The average age at death was 54½, and the average residence in the Asylum of those who died was 4 yrs. 7 mos. 29·6 days.

The average residence in the Asylum of those discharged cured was 258 days.

The admissions have been more numerous than in any previous years, with the exception of the year 1862. Many of those admitted belong to the chronic class, and were in a very bad state of bodily health at the time of their admission. There appears to be an increasing desire on the part of the parochial authorities of relieving themselves of the responsibility of keeping the old and infirm at their own homes or in workhouses, by sending them to the Asylum.

Many such cases come under notice and are duly reported at the Monthly Meetings of the Committee.

H. V., an idiot child, aged 6, admitted on the 4th of March. Was sent as an idiot not under proper care and control, and cruelly neglected; the parish authorities in this case declined to recognize the idiot's chargeability. On admission she was much emaciated and unable to move the lower extremities.

Of the patients discharged, 17 males were removed to the Exeter City Workhouse, where accommodation has been provided for 28 patients, by erecting separate wards and carrying out the arrangements required by the Commissioners in Lunacy. Those requirements were embodied in the last Annual Report. It is proposed to remove eleven females, of the harmless and chronic class, thither, in the course of a week. The percentage of recoveries during the year has been slightly below the average, but this fact is accounted for by the unfavourable character of the cases admitted, and some patients having been discharged improved to the care of friends, whereas, had they remained longer in the Asylum, would have been classed with the "Recovered."

Your Superintendent has much satisfaction in stating that the Asylum has been free from those epidemic disorders

which have visited neighbouring districts, and there has also been a comparative absence of acute disease. The rate of mortality has been 2 per cent. below that of the previous year.

The following is a summary of the principal causes of death, as detailed in the Obituary Table : General Paralysis, 13 ; Phthisis, 16 ; Old age and natural decay, 13 ; Apoplexy, Epilepsy, &c., 8 ; Disease of heart and lungs, 12 ; Other causes, 11.

The greatest difficulty encountered during the year has been occasioned by the overcrowded state of the wards, and the anxiety naturally attendant upon making temporary accommodation for the great number of patients seeking admission within our walls, when the Asylum was already full ; and indeed the numbers had far exceeded their proper limit. Originally the Asylum was constructed to contain 400 patients, but by appropriating the cottages formerly intended for the Chaplain and Engineer, accommodation was provided for 450 ; more recently, the detached new houses were built for the reception of 100 women and 50 men, which, with some alterations in the old building, made by raising the cottages an additional story have increased the total accommodation in the Asylum to 650. Still the present accommodation is insufficient for the present and prospective requirements of our steadily increasing population.

The maximum number of patients was reached on the 5th of December, at which time there were 713 patients on the Asylum books, and it became the duty of your Superintendent to report this to the Visitors at their Monthly Meeting in December, and to suggest the expediency of exercising their statutory powers, and to declare the Asylum full, which was accordingly done, and Patients are admitted as vacancies, by death or discharge, occur.

If the average number resident in the Asylum at different periods be compared, it will be seen that the numbers have gradually increased ; thus the average number resident in 1857 were 395 ; in 1855, 478 ; in 1860, 592 ; and in 1865, the numbers had risen to 690.

From a comparison of the admissions in the same quin-

quennial periods, it will be seen that in the first period ending in 1855, 608 were admitted; in the second period, 807; and in the five years ending the 31st December, 1865, 901 patients were received.

The causes of the great apparent accumulation of pauper patients were indicated in your Superintendent's Seventeenth Annual Report, but the inference drawn by the Commissioners from their statistics may be quoted, viz., "that such causes being still in operation, we can only calculate on a further progressive increase; and we accordingly draw attention to the subject, in the hope that Committees of Visitors will see the necessity of a timely increase of accommodation."—(*Fifteenth Report of Commissioners in Lunacy*)

The drought was severely felt here during the past summer, and occasioned great inconvenience in our crowded wards. The water supply is at the present time in a most satisfactory state, since the erection of the new pumps the well has yielded from 20,000 to 30,000 gallons per diem. As the pumps were in working order before the dry weather had ended, and were found to answer, there is every prospect that the present supply will be permanent.

The average weekly cost of maintenance, medicine, clothing, and care of patients during the year has been 9s. 4½d.

The only change in the staff of superior officers during the year was occasioned by the resignation of the Assistant Medical Officer, Mr. Thomas Lyle, who has been appointed to the office of Resident Medical Superintendent of the St. Thomas' Lunatic Hospital, near Exeter. He has been succeeded by Mr. John Stuckey, from University College, London.

The Asylum has sustained a great loss during the year by the death of John Bethrey, the head attendant of the male department. He was a valued servant of the institution for 20 years, and at all times performed his duties in a thoroughly trustworthy and efficient manner, and commanded the respect of all who knew him. He has been succeeded in his duties by John Bowden, who has been in the service of the Asylum for more than six years.

Your Superintendent has much pleasure in bearing testimony to the efficiency of the officers of the Asylum, and in acknowledging their assistance and co-operation in carrying out the objects of the institution.

(Signed)

G. SYMES SAUNDERS,

M.B. (LOND.,) M.R.C.P. (LOND.)

Medical Superintendent.
