JOSEPH WOLLEN, Esq.

**TREASURER:**

CAPT. GILES, STUCKEY'S BANKING COMPANY, WELLS.

REPORT  
OF THE  
COMMITTEE OF VISITORS  
OF THE

County Lunatic Asylum,

PRESENTED TO THE  
COURT OF QUARTER SESSION,

*Held at TAUNTON, in the said County, on TUESDAY, the 31st Day  
of DECEMBER, 1872.*

---

THERE are at present in the Asylum 237 males, and 276 females. 513.

The health of the patients has been good during the past year. The Committee have pleasure in again expressing their thankfulness that there has been no epidemic or contagious disease, and they have to repeat the complaint so frequently made, that aged and infirm patients are sent to the Asylum to die there.

The Payment from the Unions was raised at Midsummer from 8s. 9d. to 9s. 4d., and the Committee are in doubt whether they may not be obliged to require a larger payment.

The salaries of the attendants were carefully considered by a sub-committee and an increase of pay was agreed to; the old scale and the new will be printed in the appendix.

The same Committee afterwards considered the salaries of the Officers, and in consequence Dr. Medlicott is to receive £600 a year instead of £500, and it was further agreed that he should have a definite annual vacation, during which any charge which might be necessary for the performance of his duties should be paid for by the Committee, and that a separate house should be provided for him. Mr. Dove, the assistant medical officer, and Mr. Duke, are also to receive additions to their salaries.

The Commissioners in Lunacy visited the Asylum on the 1st and 2nd of November, and the Committee have pleasure in reporting that they expressed themselves satisfied generally with the Asylum.

The questions connected with the enlargement of the Asylum, have very fully occupied the attention of the Committee during the past year.

The Report presented to the Spring Sessions explains very fully what had been done up to that time, and the Committee need only remark now on the results of the experiment made on the 21st of December last year of discharging 47 quiet, clean, harmless Lunatics to their respective Unions ; of these, 19 have been sent back. An appendix gives the weights of these patients when they were sent out, and when they returned. They required nothing but kind treatment, good food, and warmth. It is plain this measure has not succeeded, and cannot safely be extended. It is moreover not economical. Such patients as were sent out sleep in dormitories, and are kept in the cheapest manner of any in the Asylum, except those who do remunerative work ; when brought back they must be put in separate rooms, of which there are not enough, and cost much more than the other patients.

At the Spring Sessions an order was made for adding a second storey to the north wing of No. 3 on each side ; on obtaining the

assent of the Commissioners in Lunacy on the 29th of May, the Committee proceeded to obtain tenders and contracts. Delays and difficulties occurred connected with the disorganization of the building trade this year, which made it impossible for any builder to be sure of men or prices, and the contract has been made on terms which will somewhat exceed the grant of £800 made by the Court.

Since the Midsummer Sessions at which an order was made for an addition of 120 beds on the female side, half of them to be in single rooms, the Committee have been engaged at various meetings in considering the necessary plans, which have during December been before the Commissioners in Lunacy, who have suggested alterations, which have, for the most part been approved of by the Committee.

The plans have been amended accordingly, and will be laid by the Commissioners in Lunacy, before the Secretary of State for the Home Department, and the Committee request the assent of the Court to the plans, contingent on his assent being obtained. The alterations and additions will accommodate 120 patients, 58 in single rooms, and 62 in dormitories.

The estimated cost is     ...     ...     ...     ...     ...     £13,310.

To this must be added for the deficiency of the Building

Fund which was explained in the Report presented

to the Spring Sessions...     ...     ...     ...     ...     £6,400

For new House for the Medical Superintendent     ...     £2,000

And the excess cost of the North wing of No. 3     ...     £218

In all     ...     ...     ...     ...     ...     ...     £21,928

The Committee have to express their satisfaction with the conduct of Dr. Medlicott, and of the officers and attendants of the Asylum during the last year.

We request the usual order for their re-appointment, substituting for Mr. R. CLERK and Mr. E. DICKINSON—who retire—Sir ARTHUR ELTON, Colonel ALLEN of Langford, Mr. LLEWELLYN of Langford Court, Mr. JAMES FORD of Wrexall.

F. H. DICKINSON,  
J. WOOLLEN,

---

REPORT  
OF THE  
ASYLUM COMMITTEE.

---

Presented to the Somerset October Sessions,

1872.

---

*The following Report of the Committee presented at the Spring Sessions was ordered to be entered on the Minutes.*

**I**MMEDIATELY after Sessions, the Chairman was instructed to obtain the assent of the Shepton Board of Guardians to the use of a wing of their Workhouse for female patients from the Asylum, and on obtaining this assent to apply to the Commissioners in Lunacy to visit and report.

This was done, and the Commissioners replied that their statutory duties did not leave them time to make the necessary inspection. Upon this, the Chairman requested Mr. Paget to apply personally to the Commissioners. He saw them, and on the 12th of February, two Commissioners, Messrs. Campbell and Wilkes, met Mr. Paget and Mr. E. Clerk at the Workhouse, and a report of the requirements of the Commissioners in Lunacy was sent to Mr. Paget soon after.

Besides the necessary offices and apparatus, an extension of the small airing court was required, and it was recommended that a larger space should be given up to the Committee by the Board, both of Buildings and airing Courts.

The report was, with as little delay as possible, placed in the hands of the County Surveyor. On March the 9th his report was received by Mr. Paget. It was estimated that the buildings and apparatus would cost £215. The alterations required to put the remainder of the house in perfect condition for the Board of Guardians £40, and certain alterations in the windows, £40. These last alterations would not have been satisfactory, but something else would have to be done at probably about the same cost, so that from £280 to £300 would have been required.

The Committee were summoned to a special meeting on March 14th the earliest day on which the County Surveyor's Report could be laid before them. Thirteen attended, and after careful debate, during the course of which Mr. Clerk stated that the Board of Guardians would not in his opinion offer the Committee a longer time than a year with six month's notice. It was resolved that in view of a cost of something like £300 and so short a term, it was impossible to adopt the plan.

The Committee then proceeded to consider the case of chronics that had been discharged to the Workhouses, and Dr. Medlicott stated that four had been returned, and that the fifty cases had been picked ones, and that he could not venture to recommend the discharge of any more. Different members of the Committee explained their views of the failure or success of the experiment in their own Unions; it was stated that some of the Board were adverse to the experiment, and it was agreed that no dependence can be placed on the removal of patients to the Unions as a means of meeting the future accommodation of chronics, and it was afterwards,

RESOLVED—That for the purpose of providing for the increase of pauper lunatics it is the most economical and expedient course either to add to the present Asylum, or to erect a detached building in some part of the adjoining grounds at Wells.

During the negotiations with the Commissioners in Lunacy Mr. Paget, at the request of the Chairman, saw also Mr. Lumley the Secretary of the Local Government Board, and enquired about the possibility of dissolving the Wells Union, and making use of the Workhouse for an Asylum for chronics. This Mr. Lumley considered impossible, and it does not appear worth while to make any further enquiry on the subject.

Dr. Medlicott has expressed to the Committee his opinion that the proportion of separate sleeping rooms to beds in dormitories is not large enough. He considers that the Infirmary on each side should have improved accommodation in this respect, and that the women, who are increasing more rapidly than the men, require a much greater proportion of single rooms. He informs them that the experience of those who have charge of Asylums bear him out in these views.

The Committee have then not only to calculate the probable yearly increment of persons under their care, but to recommend to the Court improved accommodation for those they have. As to the first question, the table given at page 4 of the special report of October last, seems to shew that an increase of 25 women in five years may be expected; the great uncertainty of the calculations is manifest when it is noticed that in the first five years and the last, there was no material increase, while in the intermediate 10 years, there was an increase of about 100. An increase of 5 women in each year upon 265, the number of women belonging to the County in the Asylum on the 26th September, 1871, gives rather less than 2 per cent. increase.

On the other hand table 2 on the next page shows that the increase of pauper lunatics, men and women, in England, exceeds

3 per cent. per annum. It is unfortunate that the table in the last report of the Commissioners in Lunacy, from which the table is extracted makes no distinction between men and women. The Committee as they stated in the report of October, cannot depend on their own statistics, when they show different results from those of the rest of the kingdom. They cannot also base their calculations of increase on the present number of patients in the Asylum, as that number is diminished by the discharges to the Unions at the desire of the Board of Guardians made in December, and it is altogether uncertain at present how many of the patients thus discharged may be returned.

Taking then the number of women in the house on the 26th of September as the basis, and excluding all foreign patients, an increase of 100 beds would provide the necessary accommodation for women, for about 11 years, if the rate of increase be 3 per cent. per annum; and here it may be well to remark, that a certain number, say 20 in excess of the exact number calculated on is desirable, and that it is altogether improvident and dangerous to permit the house to be perfectly full as it is at this time on the female side. Dr. Medlicott also is of opinion that the bedrooms in the roof are not desirable, and are not available to the extent that has been expected. It appears therefore, that an increase of at least 120 beds on the female side is desirable, and at least half of the accommodation thus obtained must consist of single rooms. It is at present impossible to give the details further than to state that the female infirmary, and that a new infirmary must be part of the plan. On the Court agreeing to this proposal at Midsummer, the Committee will proceed to prepare plans, and obtain the assent of the Commissioners in Lunacy, and begin the work as soon as may be possible. The Committee have further to recommend in order to meet the want of additional single rooms, that the north wing of No. 3 on each side, should be raised by building an additional storey, which will

give 12 single rooms on each side, and the diminution of one in the gross number of beds, consequent on an alteration of the end of each of the large dormitories to provide communication and in view of the delay which is certain to occur before the assent of the Commissioners in Lunacy can be obtained; this improvement should be proceeded with at once on the assent of the Court being obtained so as to make use of the fine weather of the summer; they feel bound to state that the question can not be postponed without inconvenience, and to request the Court to order at the present Sessions this improvement to be made without notice as matter of urgency. The Committee have also to report that it will be necessary for the Court to take measures to liquidate the Debt of the Building Fund of the Asylum, and on this point they have to submit the following considerations.

The Court will bear in mind that from the time the Asylum was opened until now, the Lunatics chargeable to the City of Bath have been received in the Asylum at a rate of charge made up of the ordinary charge made to the Unions of the County of which Bath is one, and 5½d. per head per day besides, because the City of Bath did not contribute anything to the Building of the Asylum; similarly other persons have been received latterly, chiefly men, at various payments, and we have now 15 men from Unions at London, for whom 9d. per day per head is paid beyond the charge of 1s. 3d.

The excess beyond the ordinary rate of charge thus received has been carried to the Building Account, and for the first 18 years of the existence of the Asylum sufficed for all repairs, and for very considerable improvements; up to the beginning of last year it has amounted to £16,000. For a while, when the County of Middlesex was building, and many Middlesex patients were in this Asylum, it reached £2,000 a year. It was hoped that the Committee would never be obliged to make use of other funds than this for building and repairs, and it was with great regret

that they felt themselves obliged in 1869 to make those orders on the County Treasurer which the law permits for building and repairs. During the last 4 or 5 years the Committee have had to complete the extension of the male side, which will probably make it needless to add to that side of the Asylum (except as is now proposed) for several years. The new Chapel has been built which was required, on account of the insufficient accommodation of the old one, and at the same time very extensive improvements have been necessary in the Kitchen and Laundry, and repairs throughout the house.

The increase of the establishment, the natural deterioration of parts of a building which has stood for 20 years, and in some respects the unnatural deterioration caused by the habits of the patients, are the reasons why the Committee have been led into expenses larger than they could have calculated on.

The Building Account, published annually with the other accounts kept the Court informed of the state of that fund, and in the report for 1862, and again in that for 1870 summaries were given of the proceedings. The Court will observe that this account was latterly heavily in debt. It had been hoped that the excess payments would avail to set things straight, but many of the Middlesex patients have been removed in consequence of the opening of new Asylums near London, and in December last the Committee resolved to annul the Bath contract, the effect of which measure is, that the women will be removed in a fortnight to Fisherton, and that the men remain for an uncertain time, at least a year, until the City of Bath is provided with an Asylum of its own. Having then no room on the Female side, and no certainty of occupants of the vacant space on the other, the Committee are constrained to give up all hope of reducing the debt by the excess payments, and apply to the Court accordingly. The Committee would probably have been able to come to the Court

with a proposal of a more economical nature than that which they make now, if it had been possible to remove the idiot patients. They have frequently urged on all who have anything to do with poor persons threatened with insanity, the great importance of sending them early to the Asylum; what is now proposed is intended to make it impossible for many years to come that such persons should be refused admittance. On their being taken proper care of at the earliest proper time, the probability of their cure depends. This is not the case with idiots, who are for the most part incurable, and the Committee are very far from desiring that such persons should be sent at all. They get no good from being in the Asylum, they get harm, their tendency is to imitate those who they are with, and therefore they ape the odd ways of the lunatics, to whom especially when convalescent they are troublesome, and whose cure they interfere with, when they are placed from necessity in the single rooms which are part of the means of treatment of curable lunatics.

The Committee have under their care 30 males and 18 female idiots. They cannot ask the Court to provide a special place for the management of so small a number, but they beg to express their strong wish, that some public provision should be made for the care of idiots, either in national institutions, or by voluntary union of Counties.

Those who have attended to the education of persons of weak mind know very well how much may be done with them if treated systematically at an early age. Many who now become idiots might be made to earn their maintenance; they would need to be kept at healthy, industrial occupations from the time when they are found not to have the faculties of other children, until either they are able to make their own way in the world, or their condition is found hopeless; in the latter case they must of course be removed. Having in view the long time, 10 or 12 years, during which most of these children could remain under instruction, it

was calculated by Dr. Boyd and the Chairman some years back, that accommodation would probably be wanted in this County for 400.

This duty perhaps, as well as the care of the blind, and deaf, and dumb, and others who have not the ordinary means of helping themselves ought to be undertaken by the State, and it is much to be desired that the new Local Government Board might give its attention to the matter.

The Committee have been applied to many times during the last few years by the Wells Burial Board, to provide a Cemetery of their own. The Board complains that their ground is filled up with paupers from the Asylum, and have proposed to increase the fees. The Committee have received deputations from the Board, and have been anxious to meet their views. The assent of the Commissioners in Lunacy was given in November to the purchase of a bit of land, between Wells and the Asylum, out of sight of the Asylum grounds, and yet close to them. The owner refused to part with the land, but other land as eligible has been found, and the Court is requested to vote £400 for the purchase of 3 acres and 14 perches, of which, 2 acres will be consecrated for a burial ground. It is obviously inconvenient that the Chaplain and the servants of the Asylum who have to attend to the burial of those who die, now averaging 60 in the year, should have to go to the other side of Wells.

The Rev. E. Godson has resigned the office of Chaplain, and the Rev. R. Wood has been appointed.

TWENTY-FIFTH ANNUAL REPORT  
OF THE  
SOMERSET  
COUNTY LUNATIC ASYLUM,  
*FOR THE YEAR 1872,*

BY C. W. CARTER MADDEN-MEDLICOTT, M. D.,

RESIDENT PHYSICIAN AND SUPERINTENDENT.

---

THE Medical Superintendent has the honour to submit to the Committee of Visitors, the Twenty-fifth Annual Report.

On the 31st December, 1871, the numbers in the Asylum were 239 males ; 283 females ; total 522.

The Admissions during the year have been 97 males, 88 females ; total 185.

The Discharges during the year have been 57 males ; 76 females ; total 133 ; of these have been discharged "Recovered", 38 males ; 38 females.

The Deaths during the year have been 42 males ; 19 females ; total 61.

The average population during the year has been 235 males ; 272 females ; total 507.

The numbers in the Asylum this day (31st December, 1872,) are 237 males ; 276 females ; total 513.

The general condition of the Asylum has been satisfactory during the year just closed, and the health of the patients good. The only qualification necessary to add is that although no epidemic morbid state prevailed, low forms of diseased action frequently attended some of the cases under medical treatment. It is a matter of deep regret that patients continue to be brought in such a debilitated state to the Asylum. Many are admitted in a painfully unsatisfactory state, and often severely bruised. As long as old and infirm cases are sent, who obviously require only careful nursing, so long must the question of extended accommodation be seriously entertained. The number of feeble, epileptic, and idiotic patients continues to increase, and form a large majority among the admissions.

The question of increased accommodation has reference principally to the female division of the Asylum. The deficiency of single rooms is most marked here, especially in connection with the Infirmary ; but as plans for the further enlargement of this side of the Asylum are now under consideration, it is to be hoped that this will soon be secured, together with increased hospital accommodation.

### ADMISSIONS, DISCHARGES, DEATHS.

The following analysis gives the chief points of interest in these returns :—

#### ADMISSIONS.

The number of admissions during the year has amounted to 185 (97 males and 88 females). As usual, some cases have been admitted very advanced in years, simply in a state of dotage, and not a few in almost a dying state. Generally speaking, the constitution of patients on admission has been sensibly depressed below the average physiological standard. Their bodies have

been exhausted by defective nutrition, and their minds wearied by mental labour; hence, in all probability their greater impressionability to other morbid influences.

In the 1st Quarter were admitted 40 cases; 23 males, 17 females.

„	4th	„	„	„	42	„	23	„	19	„
Total ... ..					185		97		88	

#### DISCHARGES.

The proportion of recoveries has been for the males 39·1, and for the females 43·1 per cent. on the admissions. Some of the recoveries during the year have been remarkably satisfactory, and the results of early treatment in recent cases have been well illustrated. It is proper to mention that several cases have been discharged to different workhouses in the county at the request of Boards of Guardians. These were selected cases among quiet and orderly chronics. Owing to the over-crowded state of the wards the experiment was tried of removing 47 harmless cases to the workhouses—of these, 19 returned; the majority greatly deteriorated in mental and bodily condition, a result partly of defective diet, as shown in their remarkable diminution in weight when re-admitted.

## DEATHS.

The mortality has been 61, or 12·4 per cent. both sexes, on the average numbers resident. The obituary for the past year shows a higher average in the males than formerly, owing to the number of cases brought in in an improper state. Coroner's inquests were held in the case of a man who hanged himself in the Infirmary; on a woman who escaped, when walking out from the charge of nurses, and was found drowned; and on an epileptic patient who was found to have died in the night in an epileptic fit, having been suffocated by turning on his face. These cases were duly reported, and formed subjects of correspondence with the Commissioners in Lunacy. The deaths otherwise have all been from ordinary causes.

In the 1st Quarter there were 20 deaths; 11 males, 9 females.

„	2nd	„	„	„	21	„	16	„	5	„

even recovery, as judicious occupation, perhaps nothing is suggestive of keener sorrow than the waste of emotion, the profuse expenditure of fruitless energy among excited patients. It seems all waste, and of no use to any one. Hence the value of judiciously devised means of occupation for utilising this superfluous energy, care being taken not to strain the powers of an already over-taxed system on the one hand, or of ignoring or overlooking grave bodily complications on the other.

### ADDITIONS AND IMPROVEMENTS.

There have been several structural additions and improvements during the year. Chief among these have been the formation of 11 additional single rooms on each side, gained by raising the storeys of the north wings. The female division of the Asylum is at present over-crowded, but plans have been sent up to the Commissioners in Lunacy for extended accommodation.

An associated bath room with 4 baths has also been constructed on the female side, and extensions and improvements introduced into the kitchen and laundry. New rooms have been appropriated for the attendants to serve as recreation and mess-rooms. The interior of the Asylum has also been improved by a further introduction of more furniture, and objects of interest, such as birds, flowers, and pictures. All the corridors without exception throughout the Asylum are now papered, or painted, and the airing-courts have also all been re-laid and re-planted.

### MEDICAL TREATMENT.

It is not intended that the Annual Report shall be the medium of a medical essay on Insanity ; a very brief notice is therefore necessary in stating the leading features of the treatment pursued in the cases that came under medical treatment during the past year. Two chief objects have been held permanently in view in the prosecution of clinical observations. Firstly, the diagnosis

and treatment of intercurrent maladies during life ; secondly their verification by post mortem examination.

As the primary object of a physician is the cure of his patients, so the second is the soothing of those sufferers he cannot cure.

The latter form a large proportion of cases in every Asylum, and if the returns issued periodically from State documents be trustworthy, insanity is vastly on the increase, and legislation has to maintain the perpetual succession of lunatics. But inasmuch as many reputed lunatics are only *manufactured* such, the number of cases that come under legitimate medical treatment are small in proportion.

Insanity then must be regarded as a *disease*, doubtless one of great complexity, but still a curative disease. It is especially in the initiatory stages that delay as a rule occurs, this early stage being precisely the time when low and complex forms of disease may arise, such diseased processes either proving directly fatal of themselves, or complicating other morbid states set up in the system. Great judgment therefore must be exercised in the medical treatment of cases, regard being especially had to various predisposing or exciting causes, such as hereditary predisposition etc. The closeness of the ties of blood relationship, unfortunately furnish Asylums with numerous patients, and if to this cause be superadded constitutional taint, or previous bodily illness, the complex complications that may arise can well be imagined.

It is gratifying however to know that a large number of cases, under medical treatment, have completely recovered, especially among those whose vital stamina had been much impaired from various concurrent causes. If the fact of the curability of insanity were only more widely circulated, of a surety greater advances might be made, in this branch of the healing art of Medicine.

In conclusion, the Medical Superintendent begs to return his cordial acknowledgements to the Committee of Visitors, both for their liberal and substantial appreciation of his services, as well as for the support tendered him, in the discharge of his onerous and responsible duties.

## TABLE XVI.

Weights of Patients removed to Workhouses.

## MALES.

UNIONS.	WEIGHT DISCHARGED			UNIONS.	WEIGHT RE-ADMITTED.		
	Initial	lbs.	Date		Initial	lbs.	Date
Axbridge ...	J. C.	120	1871, Dec. 30	Axbridge ..	J.C.	117	1872, April 18
" ..	I. M.	141	" " "	" ..	L.M.	120	" " "
Chard .....	E.L.	151	1872, Jan. 6	Chard .....	E.L.	141	" May 20
Clutton .....	J.J.	140	" " 2	Clutton .....	J.J.	132	" July 21
Langport ...	J.L.	144	1871, Dec. 30	Langport ...	J.L.	129	" " 25
Shept.Mallet	W.B.	173	" " 29	Shept.Mallet	W.B.	141	" June 18
" ..	A.V.	176	" " "	" ..	A.V.	146	" Aug. 3
Taunton ...	H.B.	122	" " 30	Taunton ...	H.B.	113	" " 22
" ..	J.B.	120	" " "	" ..	J.B.	112	" Feb. 9

This "Table" shows that all the men removed from the Asylum to the workhouse lost in weight. The greatest loss occurring in Shepton Mallet workhouse both patients losing 30lbs. in about six months.

## FEMALES.

UNIONS.	WEIGHT DISCHARGED			UNIONS.	WEIGHT RE-ADMITTED.		
	Initial	lbs.	Date		Initial	lbs.	Date
Axbridge ...	M.B.	125	1871, Dec. 30	Axbridge ...	M.B.	120	1872, April 14
Bedminster..	D.P.	122	" " 23	Bedminster..	D.P.	117	" Mar. 18
Chard .....	H.O.	112	1872, Jan. 6	Chard .....	H.O.	112	" " 1
" ..	S.D.	135	" " "	" ..	S.D.	135	" July 15
Clutton .....	M.W.	112	" " 2	Clutton .....	M.W.	100	" April 20
Frome .....	S.G.	140	1871, Dec. 25	Frome .....	S.G.	122	" Feb. 20
Langport ...	S.F.	119	" " 31	Langport ...	S.F.	109	" July 13
Wells .....	E.C.	147	1872, Jan. 8	Wells .....	E.C.	147	" June 4
Yeovil .....	S.J.	91	" " 2	Yeovil .....	S.J.	90	" May 1
" ..	E.D.	122	" " "	" ..	E.D.	160	" " "

The loss in weight is not so marked among the female patients. Frome and Yeovil give the greatest diminution in weight.
