СИВУЯНГОДІ

Сівуньгоді — це відомий в Україні та за кордоном пісеньний фестиваль, який щорічно проводиться в селі Сівуньгоді Красилівського району Хмельницької області. Він заснований у 1989 році. Ідея його народження належить місцевому письменнику, поету, композитору та музичному педагогу Олегу Григоровичу Бондареву. У фестивалі беруть участь артисти з різних країн та регіонів України, а також з інших країн світу. Виступи відбуваються на відкритих сценах, які створюють у селі та навколо нього. Пісні, які виконують учасники фестивалю, засновані на українських народних піснях та легендах, але вони оброблені композитором Олегом Бондаревим та пристосовані для сучасного виконання. Фестиваль є важливим культурним подієм, який допомагає зберегти та розвинути традиції та звичаї нашої народності.

R E P O R T
OF THE
COMMITTEE OF VISITORS
OF THE
County Lunatic Asylum,
PRESENTED TO THE
COURT OF QUARTER SESSIONS,

*Held at TAUNTON, in the said County, on TUESDAY, the 4th day
of JANUARY, 1876.*

THE Committee have the pleasure of Reporting satisfactorily on the state and condition of the Asylum, and that it is sufficient for the proper accommodation of the County patients; that for some time to come there will be room for the Male patients from Bath, and for a part of the Females, for all of whom ample accommodation will be provided as soon as possible after the new contract with Bath is completed. That the management of the Asylum is satisfactory, and that they have much pleasure in expressing their satisfaction with Dr. Medlicott, the Officers, Attendants, and Servants, of the Asylum, and their care of the patients.

They are thankful that the last year has been healthy, though the number of deaths has been large. This is owing in part to the age of the epileptics and chronics who have been long in the Asylum telling upon their numbers, and partly to the great age of persons sent. It is cruel to send persons whose insanity is

nothing but the natural decay of age, to die in the Asylum. The pay from the Unions which was reduced on the first of January from 1/6 to 1/5 has remained fixed during the year. The balance in favour of the Asylum account has increased considerably, but the Committee have not as yet thought it prudent to reduce the pay.

The Court is aware that the most important business during the past year has been the Contract with Bath: according to the order of the last Sessions a contract has been drawn up and agreed on by the Committee, and the authorities of Bath, and is before the Secretary of State for his sanction. He having intimated to the Chairman of Quarter Sessions in reply to the application ordered at the last Sessions, that when a proper draft arrangement has been submitted to him, he will consider the propriety of rescinding the contract which the City of Bath has entered into for the site of a separate Asylum.

The Chairman and the Committee have several times during the past year had under consideration the question of the better management of Idiots, and at the request of the Court at the last Sessions certain circulars have been sent to the neighbouring Counties to ascertain whether union for this purpose is possible.

It is most important that the custody of adult Idiots, Chronics, and Epileptics should be kept distinct from the improvement of children of weak intellect by proper education.

A change of the law is required before proper separate accommodation can be provided on a sufficiently large scale for either of these purposes. In the opinion of the Committee it would be convenient and economical if the Government were to build the necessary accommodation rather than empower the Counties or Unions of Counties to do so, and charge the cost upon the rates, and provide for the management by local Committees.

More recently a paper has been laid before the Committee which has been drawn up by the Unions in the County of Surrey, in which complaint is made of the expense of the main-

tenance of Chronics and the consequent necessity of additional and expensive accommodation.

This paper has led to some correspondence, and to the suggestion that a meeting should be held in London of Members of Asylum Committees, in order to consider such changes in the law as may be thought expedient, and communicate thereon with Her Majesty's Government.

Some correspondence has been caused by application from Bath and Taunton Union for the reception of Criminal lunatics. The Committee have no complaint to make, as they did not receive the men, but they mention the subject with a view to the necessity of pressing on the Government the propriety of providing ample accommodation for this most troublesome and mischievous class.

The Contract with Bath will make it necessary to fix a certain number of the Committee. Hitherto all magistrates who were willing to act have been added to the Committee without regard to vacancies, and there are many who seldom attend.

It has been thought necessary to limit the number of the Committee to twenty-five, which is believed to be larger than the committee of many other counties, and to this, five will be added who will be chosen by the Bath authorities as soon as the contract is completed.

The Committee recommend that Mr. Homfray, Mr. Perkins, and Mr. Roach, be added to the Committee, and that such members of the late Committee be re-elected as the Court may approve of.

TWENTY-EIGHTH ANNUAL REPORT
OF THE
SOMERSET
COUNTY LUNATIC ASYLUM,
FOR THE YEAR 1875,
BY C. W. CARTER MADDEN-MEDLICOTT, M.D.,
RESIDENT PHYSICIAN AND SUPERINTENDENT.

THE Medical Superintendent has the honour to submit to the Committee of Visitors the Twenty-eighth Annual Report.

On the 31st December, 1874, the numbers in the Asylum were 287 males ; 288 females ; total 575.

The Admissions during the year have been 93 males ; 79 females ; total 172.

The Discharges during the year have been 88 males ; 73 females ; total 161 ; of these have been discharged "Recovered", 30 males ; 43 females.

The Deaths during the year have been 51 males ; 26 females ; total 77.

The average population during the year has been 294 males ; 299 females ; total 593.

The numbers in the Asylum this day (31st December 1875) are 292 males ; 294 females ; total 586.

Notwithstanding a severe winter, an exceptionally cool summer, and a very wet autumn, the general health of the patients has been remarkably good. Erysipelas however once again

made its appearance in the summer months, but was restricted to the boys' ward. As increased attention had previously been paid to sanitary arrangements in the same ward, it was difficult to attribute this outbreak to any specific causes, though it was just possible that some injurious sanitary defects might still have been in existence. As a matter of precaution the soil pipes of the closets were ventilated in the usual way, namely, by having the outside ejects tapped by a pipe carried up externally above the roof, and alterations were made in the dietary.

ADMISSIONS, DISCHARGES, DEATHS.

The following analysis gives the chief points of interest in these returns :—

ADMISSIONS.

The number of admissions during the year has amounted to 172 (93 males and 79 females). The youngest case admitted was that of a boy aged 17 years, the oldest that of a man nearly 95. As these and similar other cases could just as well have been cared for in workhouses, it is thus tolerably evident that the existing arrangements for the admission of patients into the Asylum are far from satisfactory in practice. Too strong a censure moreover can hardly be passed *on those responsible* for the cruel practice of sending patients to the Asylum, in some instances extremely advanced in years, and in others unfortunately insufficiently clad, brought as they were only in a few days to die.

On the one hand cases have been unduly detained in Workhouses (probably curable if sent earlier) till the most distressing evidences on admission have made only too apparent their wretched mental and bodily condition; on the other, patients have been admitted at the patriarchal ages of 83, 88, and 94 years of age, some certified even in this their day of dotage, as "*dangerous to others.*"

In the 1st Quarter, were admitted 37 cases ; 19 males, 18 females.

„ 2nd „ „ „	49	„ 27	„ 22	„
„ 3rd „ „ „	40	„ 22	„ 18	„
„ 4th „ „ „	46	„ 25	„ 21	„
Total... ...	172	93	79	

DISCHARGES.

The proportion of recoveries has been for the males 32·2, and for the females 54·4 per cent, on the admissions. There have been some very satisfactory recoveries during the past year, and in many cases patients semi-convalescent have been allowed out with their friends, on periods of probation varying from a few weeks to several months, prior to their final discharge by the Committee.

No further experiments have been tried respecting the discharge of patients to Union Workhouses. It is justifiably open to Boards of Guardians to argue that they have not the proper accommodation for lunatics, and that in 1871 whilst utilising Workhouses for the reception of harmless chronic cases (pending the question of further enlargement of the Asylum) they reluctantly accepted a necessity which could be no longer denied.

	RECOVERED,			RELIEVED.			NOT IMPROVED.

DEATHS.

The mortality has been 77 or 12·10 per cent. both sexes on the average numbers resident. The death-rate during the year has been higher than usual, and it might naturally have been expected that with the severe winter a higher rate of mortality

would have occurred, inasmuch as decrease of temperature especially amongst the aged and infirm is a sure cause of mortality. But the deaths have been chiefly among epileptic and paralysed cases, besides the aged and helpless, and have occurred at all seasons of the year.

Three deaths necessitated a Coroner's Inquest. The first was on a man aged 41, who died a few days after admission from exhaustion after Mania. The second was an old man aged 70, sent from Keynsham Union in very cold weather (the snow lying deep on the ground, and very inadequately clothed), received in a thoroughly chilled and helpless condition, and who died on the second day after admission. The third was on an Epileptic "found dead." This patient had slept in the ward specially put aside for epileptics, and under the supervision of a nurse specially appointed to look after such cases at night. When seen last by the night nurse at 6.30 a.m. (prior to going off duty) was alive; when visited half-an-hour afterwards by the day nurse was found dead.

Some more stringent restrictions however should be enforced as regards the admission of persons only in second childhood. Notice has already been taken of the great ages at which some of the patients were when brought to the Asylum, namely, 88, and 94. These cases can only live for a short time, and surely might be cared for elsewhere. It only seems incredible how such curiosities of longevity can ever be certified to be insane.

In the 1st Quarter there were 18 Deaths; 14 males, 4 females.

OCCUPATIONS AND AMUSEMENTS.

Not the least successful of many honourable reforms in the modern humane treatment of persons temporarily deprived of

reason, is that effected by occupation. This reasonable method (in direct opposition to the barbarity of former times) can be rendered almost universal in any Asylum, and by judicious means can relieve the monotony of life even among the suffering and comparatively helpless.

The various occupations entered upon by the patients during the last year have thus formed a large part of the so-called *Moral* treatment. Any policy indeed which increases the self-respect of a patient, cannot be consistently pursued without its elevating influences, and agreeably to this theory even the so-called incurables have been employed in domestic duties, according to their individual capacities.

The general workshops also have been well and regularly attended during the past year, thus furnishing a signal proof of the success of occupation in the treatment of the insane. Their utility may be fairly tested by reference to the numerous decorations and furniture of the different wards, nearly all of which have been made in them, there being an ample supply of voluntary labour at command. The most interesting feature in connection with the workshops is the fact that every year some of the patients are there *taught* some new trade, and are instructed in those branches where good design and skilled labour are so essentially necessary.

Recreation, in like manner, has been made supplementary to industrial occupation. Among the amusements provided cricket has continued in summer, and foot-ball in winter, together with numerous dramatic representations. An addition has moreover been made to the number of daily papers and periodicals supplied to the several wards, besides games for evening amusement such as draughts, dominoes, cards, &c. &c.

MEDICAL TREATMENT.

Conjointly with the administrative, has been the therapeutical treatment of the patients during the last year, and the same

attention (as in past years) has been paid to individual cases, requiring special Medical treatment. The results have been very satisfactory, observable in many patients by complete mental restoration, and in others by decided physical relief. This has been the more gratifying, inasmuch as occasionally on admission, recovery in some cases was deemed perfectly hopeless, and even afterwards partial improvement seemed almost impossible. If then insanity in its initiatory stages is a curable disease, this fact of itself should stimulate the more to further enquiries.

The whole subject raises questions of great public as well as private interest, upon the right settlement of which the utility of further legislative enactments must greatly depend. Some patients have been admitted into the asylum (stress of poverty being the assignable cause of their insanity), and such cases have received only dietetical treatment in the infirmary wards; better living and more cheerful surroundings being all that was really wanted. This surely points to the necessity of more being done by parochial officers to meet the requirements primarily affecting the *bodily* health of patients prior to admission. These observations it is scarcely necessary to say have especial significance regarding that class of persons, to whom all the evils of poverty are aggravated by its inevitable surroundings. Treatment in such instances has thus to bear both on moral as well as physical disease. Other patients have come in, legitimate cases of course for treatment in a Hospital for the insane; yet even amongst these there has too frequently been unnecessary and protracted delay.

It follows however from the above, that all those who have the Medical charge of the insane, cannot give enough patient study and careful reflection to each individual case. They must ever bear in mind the secret of successful administration, namely kindness with firmness, but the utter repudiation of anything in the nature of force; they must however also recognise the fact

that every individual cure is but the result of many successive improvements, based on more or less theoretical Medical deductions, and therefore they will be the more anxious to regard the Asylum as a Hospital. In this way only can an unjust stigma be removed from the unfortunate inmates of Lunatic Asylums, and the honour of the healing art of Medicine be thoroughly vindicated.

In conclusion, the Medical Superintendent begs to return his most grateful acknowledgments to the Committee of Visitors, for the renewed confidence and uniform support tendered him in the discharge of his arduous and most responsible duties.

REPORT

OF THE

REV. R. N. WOOD, CHAPLAIN.

To the Visiting Justices of the Somerset County Lunatic Asylum.

GENTLEMEN,

The past year, has upon the whole, brought nearly the same amount of encouragement, and the same amount of disappointment as those which preceded it.

The behaviour of the patients in Chapel has been good, considering their condition, and I hope we may look for improvement especially among the women. These, while there was only one approach, were obliged to be in their places a considerable time before Divine Service began; because the men had to come in after them. Now that there are separate approaches for men and women all can enter after the bell has been rung, just before service—all can also leave the Chapel in a more speedy and orderly manner.

The number of Communicants is small, and I think, will continue so. Longer experience shows more plainly the need of caution in admitting patients. In cases where I was almost satisfied I have been obliged to change my opinion. Apparent anxiety to communicate is not a safe sign of fitness, sometimes it is the reverse, those who are most unfit often requesting most urgently to be admitted. It has struck me as remarkable that a patient, who, while pretty well has no wish to communicate, will ask to be allowed to do so when under an aggravation of mental disorder. I suppose that those who have lost the sense of responsibility and are restless from disease, ask for they know

not what, just as they might set their hearts on a change of ward or diet.

I have generally had a congregation, though a small one, at the Friday evening services for attendants during Advent and Lent.

The average number attending Chapel has been :—

	Men.	Women.
Sundays... 	135	119
Other Days	110	92

The average number of Communicants ;—patients 4 ; others 5.

The Alms have been £3 9s. 10d. besides £1 15s. 6d. received at Christmas and sent to the Missionary Candidates' Association. £3 has been given to patients leaving the Asylum.

The school remains much the same, and is attended by the same kind of patients ; they are generally orderly, but, I fear understand little of the instruction which I try to give. The average number present has been Men, 17 ; Women 10.

R. N. WOOD.

Horrington, January 10, 1876.
