TREASURER.

JOHN STURROCK JUN., 21 REFORM STREET.

SECRETARY.

REV. JOHN ROBERTSON, 30 MID STREET, CHAPELSHADE.

CHAPLAIN.

THE REV. ALEX, F. REID, BALFOUR STREET.

#### Rule I. under the Head "Committee of Management."

The General Courts, in June and October, 1856, resolved, that Rule First, under the head "Committee of Management," should stand thus—"The Committee shall meet at the Asylum at least once a month, and it shall be left to themselves to hold the other meetings either there or in town, as they may find it most convenient."

The members of Committee meet in the Asylum, on the third Monday of each month, at half-past eleven A.M., with the exception of the months of April and October, during which the meetings take place on the second Monday of each of these two months,—the April and October Quarterly Courts being held in the Asylum on these two days, at twelve o'clock noon.

## REPORT BY THE DIRECTORS

OF THE

# Anndee Koyal Annatic Asylum,

TO THE

# ANNUAL GENERAL COURT,

JUNE, 1865.

In laying the Forty-fifth Annual Report before their Constituents and the Public, the Directors have much pleasure in stating that the Institution continues in a state of undiminished efficiency. The health of the patients during the past year has been exceedingly good, and the utmost harmony and good feeling have existed throughout the entire establishment.

At 20th June, 1864, there remained in the house 205 patients, of whom 108 were males, and 97 females. There have been admitted since, 14 males and 22 females, 11 have been discharged recovered, 61 have been removed more or less improved, and 16 have died. It thus appears that the Institution continues to answer the ends for which it was established, in affording a safe and comfortable retreat for a class of persons suffering from one of the greatest of human maladies. The Directors have studied, whilst exercising a proper economy in their expenditure, to maintain the high character which the Asylum has hitherto possessed.

By referring to the accompanying accounts, it will be seen that the debt due by the Asylum, which, at 31st March, 1864, amounted to £3478, 18s. 1d., has now been reduced to £3069, 17s. 2d.

In the last Annual Report, the Directors referred to some correspondence which had taken place betwixt them and the General and District Lunacy Boards, in regard to an agreement for the custody and maintenance of pauper lunatics. object of these Boards was, to alter the arrangement which previously existed betwixt the managers of the Asylum and the Parochial Boards in the district, as to pauper patients, and to interpose the District Lunacy Board as the contracting party with the Asylum. As the Parochial Boards were perfectly satisfied with the arrangement made with them, the Directors were unable to see any advantage to arise from a change in the contracting parties; but finding, after conferences held with the principal Parochial Boards interested, that these bodies were willing to accede to the proposal of the Lunacy Board, the Directors acquiesced, and a contract was accordingly entered into with the District Lunacy Board for Forfarshire, whereby the Asylum undertook to receive pauper lunatics to the number of 166, on the same terms as had been previously agreed to by the Parochial Boards; and with the proviso, that it should be in the power of either party to terminate the agreement on six months' notice. The object of the Directors was to preserve intact the position of the Institution as a Public Asylum, which had been reared and maintained without either Government aid or local assessment. They claimed the right of fixing the terms on which patients of every class shall be received into the Asylum.

A good deal has been done during the past year in papering and painting, as well as in otherwise ornamenting, the Asylum. And it is gratifying to the Directors to find in the last Report of the Lunacy Commissioners the following allusion to the state of the Dundee Asylum, (p. 154:) "The Commissioner has pleasure in reporting that active steps are now being taken to retain for the Asylum the high position which it has so long held in public estimation. Papering and painting are being extensively carried out, and numerous decorative objects have been supplied; walks beyond the premises are habitually taken, and endeavours are

made to extend to a larger number of patients the benefits of industrial occupation."

In connection with this subject it may be stated, that during the past year the Lunacy Board have licensed certain wards in the Poor Houses of Dundee and Liff and Benvie, for the reception of pauper lunatics. Already 19 patients have been removed to the Liff and Benvie Poor House, while 17 males and 14 females have been removed to the Dundee Poor House, making a total of 50 pauper patients. As these consist almost entirely of the quietest and least troublesome patients, whilst the more violent and destructive are left in the Asylum, the Directors will have to consider whether it may not be necessary to increase the rate of charge for those that remain.

In consequence of a discussion which arose at a recent Quarterly Court as to the state of the Asylum buildings, and whether it would be prudent to expend money in adapting them somewhat more to modern requirements, a special Committee was appointed to consider the whole subject. That committee have visited some of the newest Asylums in the neighbourhood with the view of seeing the latest improvements which have been adopted in the construction and fitting up of such buildings; but as the Committee are not yet prepared to report, it is unnecessary to allude farther to the subject at present.

The Directors cannot conclude the present Report without expressing the regret with which they have received an intimation from their respected Chairman of his intention to retire from the direction of the Asylum, and from the office which he holds in the Weekly Committee. Mr Duncan has acted as Chairman of the Weekly Committee for the last eight years, and during the whole of that time has taken the deepest interest in attending to the wants and promoting the welfare of the Institution. The Directors consider it fortunate that Mr Duncan, after retiring from his Parliamentary duties, was willing to devote a portion of his spare time for the benefit of a benevolent Institution like this; and although no longer in the management, they hope he

will be long spared to enjoy his well-earned retirement, and to favour the Directors from time to time with the benefit of his valuable advice.

In conclusion, the Directors have to acknowledge the valuable services of the Medical Superintendent and Matron, as well as of the Consulting Physician, and to thank them for the unceasing care and kindness exercised by them towards those under their charge. They have also to express their sense of the services rendered by the Chaplain, Secretary, and Treasurer. Nor would it be proper to overlook the services rendered to the patients by the various attendants, who have often a difficult and disagreeable duty to perform.

AT THE

# ANNUAL COURT OF DIRECTORS

Dundee Royal Annatic Asylum,

HELD IN THE TOWN-HALL OF DUNDEE,

On MONDAY, 19th JUNE, 1865,-

GEORGE DUNCAN, Esq., IN THE CHAIR,-

Mr WILLIAM THOMS read the Annual Report.

The Provost moved that the Report now read be approved of, and adopted as the Forty-fifth Report of the Directors, which was seconded by the Rev. Mr Lang, and agreed to. The following twenty-six parishes, the parishioners of which having contributed £20 or more to the funds of the Asylum, are entitled to have their pauper patients admitted into the lowest class, and are accordingly charged the lowest rate of board; but no other parish, since 1823, can claim the privilege. The parish of St. Andrews was privileged in 1837, and the parish of Kingsbarns in 1852, to have each one patient only in the Asylum at the lowest rate of board.

Airlie. Kettins.

Alyth. Kingsbarns, one patient only.

Arbroath. Liff and Benvie.

Auchterhouse. Longforgan.

Brechin. Mains and Strathmartine.

Dundee. Monifieth.

Dunnichen. Monikie.

Forfar. Murroes.

Glamis. Newtyle.

Guthrie. Rescobie.

Inverarity. St. Andrews, one patient only.

Kirriemuir. Tannadice.

Kinnettles. Tealing.

## MEDICAL SUPERINTENDENT'S REPORT.

19TH JUNE, 1865.

THE changes which have taken place in the population of the Asylum have been greater during the past year than any that have occurred since it was first opened forty-five years ago.

These have arisen chiefly in consequence of the erection of the District Asylum for Perthshire at Murthly, and of the Lunatic Wards in connection with the Poor Houses of Liff and Benvie and of Dundee. While 36 patients have been admitted, 10 have been discharged recovered, 16 have died, and 53, from the causes above-mentioned, have been removed not recovered. One patient has been discharged on probation, and 8 others have been removed by their friends or relatives, more or less improved.

The result is that the number of inmates has fallen from 205 on the 20th June, 1864, to 153, the number remaining at the present date.

During the past year only 8 patients were refused admission in consequence of want of accommodation, namely, one private and 7 pauper females. The applications for admission were therefore 44 in all.

In connection with the admissions, certain circumstances have occurred sufficiently unusual to merit notice. In the first place, it was observed that while applications for admission were made for 30 females, only 14 males required accommodation, and this difference existed entirely in connection with the pauper class: the applications for the admission of female paupers being nearly three times as numerous as that for the admission of males.

Again, the applications for the admission of parish cases have been during the past year much fewer than in former years,

As this can scarcely be regarded as due to an actual decrease in the number of persons becoming insane, the explanation will probably be found in the present defective statutory definition of

the term "Lunatic:" no person, whatever may be his real mental condition, being legally a Lunatic until he has been certified to be so by "two medical persons."

The character of the cases admitted also deserves attention. While as a rule they presented the usual variety of forms of mental disease, in many instances the patients had been many years already insane; while in others, their bodily health on admission was such as to preclude hope being entertained of their deriving much benefit by treatment. Thus, 4 cases had been insane for 8, 5, 4, and 2 years respectively; two were in advanced stages of consumption, and died, one after two months', the other after 3 weeks' residence; two were paralytic, and died in about 3 weeks; and one who had suffered from melancholia for 7 months, and had been refusing sufficient sustenance, was so frail and emaciated on admission, that, notwithstanding every attention, she never rallied, but sank after being only 18 days in the Institution—an illustration of the danger of unnecessary delay in placing such cases under treatment.

Of the patients admitted, 7 had been on some former occasion under treatment in the Dundee Asylum, and 9 were transferred from other similar Establishments.

Of the patients discharged and removed, 10 were recovered, and 4 were removed by their friends improved. Three were transferred to other public Asylums; one to a private Asylum; three to the District Asylum for Perthshire; and 50 to the Poor Houses of Liff and Benvie and of Dundee. One of these cases had been 43 years in the Asylum. At first maniacal and violent, he latterly subsided into a state of Dementia, and at length he became so harmless and inoffensive that he could be restored to comparative liberty. Next to complete recovery or improvement, this is perhaps the most satisfactory result that can be wished for, and the removal of such cases should always be encouraged. Unfortunately, however, the opportunities for doing so are rare, for it too frequently happens that when a patient has been so long in an Asylum, he not only becomes dead to the world, but even by degrees loses the interest and sympathy of his own immediate relatives.

With regard to the majority of the removals which took place

during the past year, these remarks, however, do not apply. The expediency of removing the so-called harmless and incurable insane to Poor Houses has so frequently been considered in former reports, that, on the present occasion, further comment is unnecessary.

A word or two may however be said relative to the patients so removed. Some, as might be expected, were aged and infirm; but, in many, their increasing years appear to have made but little inroad on their bodily health, a circumstance no doubt attributable to the regularity of the habits which had been secured for them by their admission to the Asylum.

Many had been long under our roof: two had been resident for 38, one for 34, one for 33, one for 32, two for 29, and two for 27 years. Notwithstanding their mental state, many appeared to feel keenly the trial to which they were subjected; nor can this be a matter of surprise, when their removal from the Asylum was virtually the rending asunder of ties and associations which had been formed and confirmed by a residence in the Asylum in many cases of upwards of a quarter of a century.

An expediency which necessitates such a step on the grounds of a doubtful economy is, it is to be feared, but little in harmony with those principles of humanity which guided the Public of Dundee, 50 years ago, in the erection of an Asylum for the treatment of the insane.

It is understood that several patients may yet be removed to the Poor House of Dundee, and others transferred to the Asylum from Montrose. Until these changes are completed it cannot be stated with certainty what the ultimate effect on the Institution will be, but it will probably result in the female pauper department being again filled, to the exclusion of recent cases, while the accommodation for male pauper patients will be but partially occupied.

The entries in the register of deaths this year have been unusually numerous, and have, in a great measure, arisen, as already stated, from the condition of the patients on admission.

The deaths have been 16 in number, of whom 8 were males, and 8 females. Two died from exhaustion, 4 from paralysis, 1 from general paralysis, 3 from phthisis, 1 from epilepsy, 1 from

general decay, 1 from bronchitis, 1 from cancer, 1 from marasmus, and 1 from disease of heart.

The average age at death was  $46\frac{5}{16}$  years. The majority of these were comparatively recent cases; two of them, however, were admitted, one in 1835, and the other in 1838. The deaths calculated on the number under treatment have been 6.6 per cent.

The treatment of the patients has during the past year been conducted on essentially the same principles adverted to in former reports. By occasional amusements and recreation, the attention of the patient is sought to be diverted from a morbid train of thought, and brought to a more healthy standard. For this purpose, however, active occupation continues to be found the most efficient agent.

The grounds continue to afford active employment for several of the male patients, and the laundry and weaving shops have been of especial benefit. Nearly 23,000 yards of cloth have this year been woven by the inmates, including sheeting and towelling for the use of the Establishment. In addition to the usual articles of manufacture, 240 yards of striped bed-tick have been woven for covering hair-mattresses.

The walking parties beyond the Asylum boundaries have been beneficial, not only in promoting the health of the patients, but also have been found to lessen that desire for freedom often intensely felt by the insane; and by allowing them occasionally to visit their friends in town and in the country, certain of the inmates appear to have forgotten altogether that they are detained, and have come to regard the Asylum as their home.

The services of the Chaplain continue to afford benefit and consolation to the inmates.

In mentioning that the servants and attendants in connection with the Institution still deserve every praise for the manner in which they discharge their duty, it is particularly gratifying that this year we are able to put on record that Ann Scott and Harriet Goodfellow gained two of the prizes awarded to attendants by the Society for the improving the condition of the Insane, in token of their length of service.

## STATISTICAL TABLES

FOR THE YEAR ENDING 19TH JUNE, 1865.

(The Year ending on the Third Monday in June, agreeably to Charter.)

## XV.—AVERAGE ANNUAL MORTALITY,

From 1830 to 1865 inclusive.

Males.	Females.	TOTAL.
7.1	4,1	5.7

#### RATES OF BOARD.

The following is the present rate of Board—subject, however, to such alterations as the Directors shall judge proper, and which must necessarily vary according to the state of the funds and the expense of the establishment. The Board in all cases must be paid quarterly, and in advance. Before the entry of a patient, the Board is to be paid up for one quarter.

First Class, inc	eludin	 £0	8	0 pc	er week.			
Second Class, i	nelud	ing Clo	othes, &	ke.	 0	9	0	,,
Third Class,					 0	10	6	,,
Fourth Class,					 0	15	0	,,
Fifth Class,					 1	1	0	.,
Sixth Class,					 1	11	0	.,
Seventh Class,					 2	2	0	.,
Eighth Class,					 3	3	0	,,

The First Class—paupers belonging to the parishes that have contributed to the erection of the Asylum. The Second Class—all other paupers. Every patient who is certified by four respectable householders to be unable to pay 10s. 6d. of Board per week, or whatever rate of board may be fixed by the Directors to be paid by Class Third, and to have no relation to be able to pay this rate of Board, shall be considered a pauper, and admitted in Class Second; but if the patient shall belong to any of the twenty-five parishes\* that have contributed £20 and upwards to the erection of the Asylum, such patient shall be admitted into Class First.

A Fee, on admission, is paid to the Physician by the several classes of patients, as under:—

Third Class,		 	 	 £0	10	6
Fourth Class,		 	 	 1	1	0
Fifth and Sixth	Classes,	 	 	 2	2	0
Seventh Class,		 	 	 3	3	0
Eighth Class,		 	 	 4	4	0

On the dismissal or death of a patient, after six and within twelve months, the Fee is repeated; but if any patient shall remain longer than one year, the Fee is to be repeated only at the end of every successive year of his residence in the Asylum.

## No Fees are paid for Paupers.

The patient shall have no claim to remuneration for work done in the House.

One Shilling per quarter is charged for mending Clothes.

<sup>\*</sup> See List of privileged Parishes, page 16.
